3.1.1 Introduction

In April of 2014 the Lowell School District submitted a Statement of Interest (SOI) to the MSBA regarding the condition of the Lowell High School. Through the course of the eligibility phase, the District worked with the MSBA to define a range of configuration options that could be explored. In November of 2015 the MSBA invited the district to proceed with a Feasibility Study that would explore options for a High School of 3,520 students

Following the Eligibility period the District continued on Forming-the-Team and subsequently engaged Skanska USA Building consulting as the Owner's Project Manager and Perkins Eastman|DPC as the Architect.

The primary reason for the study as stated in the SOI is the age and condition of the existing school building(s), and the prevention of severe overcrowding expected to result from increased enrollments. In order to fully understand the existing building(s), site(s), current educational program, community concerns and overall project goals/objectives, the Feasibility Study process was outlined with several major tracks of study that occurred in an overlapping sequence, including;

1) Existing Conditions Study - the scope of the Feasibility Study included a full assessment of the Existing High School building's facilities.
    a. Architectural staff visited and cataloged the facility conditions of the Lowell High School.
    b. MEP/FP, Structural, Acoustical, Audio Visual, Code, Foodservice, Geo-environmental, and Security, consultants visited and toured the facilities.
    c. Civil Engineers and Landscape Architects visited the site(s) cataloged the conditions as well as observed the morning and evening activities.
    d. Geo-environmental and Hazardous Materials consultants performed both a phase 1 and a full survey of hazardous materials.
    e. Engineers completed a property survey at the downtown site which included all parcels except the Freshman Academy.
    f. Traffic consultants conducted a preliminary traffic study at the downtown, Wang and Cawley sites. A more detailed traffic analysis will be conducted when a final site is selected.
    g. Preliminary geo-technical exploration will be performed at the site finally selected.
    h. Historic Preservation consultants conducted a Preliminary Evaluation of the Lowell High School Existing Conditions and Historic Preservation Regulatory Review. The campus facilities include four buildings identified in the report as the 1922 Building (Kouloheras/Sullivan/Coburn Hall), Lord/Fieldhouse Buildings, Freshman Academy and the Steam Plant.

All buildings are located within either the Lowell National Historic Park and Preservation District, City Hall District or the Downtown Lowell Historic District. Work on these buildings will be subject to Massachusetts Historic Commission, the Lowell Historic Board and the National Park Service.

2) **Alternate Sites** - Different sites throughout the city were examined for a suitable alternate location for the high school. A large list of possible sites was developed which was quickly culled to six potential locations. The six sites were further analyzed in more detail resulting in further reducing the sites to three which were identified as the most suitable for a new high school. The three high school sites include; 1. Existing downtown High School location, 2. Wang Middle School / LeBlanc Park and 3. Cawley Stadium. Test fits were then studied at each site to determine the impact a school of this size would have on the site and the surrounding community.

3) **Educational Visioning** – During the months of October and November of 2016, the Lowell High School Educational Working Group (EWG), a group of approximately 50 Lowell Area Schools (LAS) administrative leaders, and Lowell High School (LHS) teachers, administrators, students, parents, and community partners, participated in three Educational Visioning Workshops run by New Vista Design and Perkins Eastman │DPC. Each workshop was a collaborative session designed to inform the LHS design process. Participants were led through a step – by - step process aimed at capturing their best thinking about LAS's/LHS's current and future educational goals and priorities, and connecting them to the best practices and possibilities in innovative school facility design.

   Educational Workshop 1 - October 14, 2016

   Agenda: Priority Goals, 21st Century Teaching and Learning Practices, Strengths, Challenges, Opportunities and Goals (SCOG Analysis), 21st Century Learning Goals.

   Educational Workshop 2 – November 1, 2016

   Agenda: 21st Century Design Patterns 1.0, Guiding Principles 1.0.

   Educational Workshop 3 – November 17, 2016

   Agenda: Blue Sky Ideas, Key Spaces and Adjacencies, Bubble and Adjacency Diagramming.

   See Appendix for presentation materials and meeting notes.

4) **Educational Programming** – based on the visioning process, public and committee input and ELT direction, the Educational Program was developed, vetted and approved via the School Committee. The space needs were developed in conjunction with the Educational Program and corroborated through the course of numerous ELT meetings and work sessions.

5) **Development of Options** – the development of alternatives began with a preliminary assessment of site options and test-fit studies at each location as mentioned above before extending into plan alternatives. New high school options were examined at the three alternate sites. One new school option was studied at the Wang and Cawley sites and two options were examined at the existing downtown site. In addition to the four new options, six various addition and renovation options were studied at the downtown site, totaling ten preliminary options studied. The ten options in addition to Base Repair were studied as follows:
    a. Base Repair (existing site)
    b. Full Renovation w/ Small Additions (existing site)
    c. Addition / Renovation Option 1A (existing site)
    d. Addition / Renovation Option 2 (existing site)
    e. Addition / Renovation Option 3 (expanded existing site)
    f. Addition / Renovation Option 4 (existing site)
    g. Addition / Renovation Option 5 (expanded existing site)
    h. New School (existing site)
    i. New School (expanded existing site)
    j. New School Wang
    k. New School Cawley

A. Summary of Deficiencies

Lowell High School (LHS) currently educates over 3,100 students in grades nine through twelve (9 – 12). The high school reflects the great diversity of the City of Lowell with students representing over 50 countries from all over the world. LHS provides a comprehensive high school offering of programs for all Lowell Public School students in grade 9 – 12, as well as ROTC, Culinary arts, and swimming. The facility also houses city-wide services programmed for the students including a community health center, bank, CCTV, DARE, UP and a thrift shop.

Lowell High School's facilities are of an age that the facilities can no longer keep pace with the instructional and program needs of the community. For any comprehensive high school, it is imperative that they maintain a current facility and curriculum. In particular, the science related program offerings are constrained due to outdated and inadequate education spaces within the buildings. Lowell High School facilities must be updated so as to support current needs and be flexible enough to meet future needs as well. The current conditions of the facilities are an obstruction to delivering a 21st Century education while improved facilities will create more opportunities for interdisciplinary teaching and will strengthen student achievement.

The facility's deficiencies are detailed in the Statement of Interest (SOI) included as the appendix , but can be briefly described as follows:

Lowell High School campus sits on four parcels on municipally owned land totaling approximately 6.6 acres. In addition to the 1922 (2.7 acres) and 1980 buildings (3.3 acres), a third building located across the street and not connected to the campus houses the Lowell High School Freshman Academy, as well as the Steam Plant which is adjacent to the Freshman Academy. The LHS Freshman Academy sits on an approximately .4 acre parcel per GIS. The site for the Steam Plant which provides heat to the school buildings is adjacent to the National Park Service Building and is approximately .2 acres. Zoning is Downtown Mixed Use District.

Generally the site is flat, fully developed and bordered either by city streets or adjacent properties. The High School occupies three separate distinct parcels that form the campus. The campus is divided by a canal, or in the case of the Freshman Academy, a city street. Students and staff are required to cross a city street or traverse the second story bridges to travel between buildings. All drop-off / pick-up take place on the adjacent city streets and sidewalks.

There is a city owned parking garage across Father Morissette Boulevard that serves both staff and students. Visitors to the school utilize on street metered parking. There are approximately 3 onsite parking spaces. There are a number of paved courtyards and walks adjacent to the main entrance and the cafeteria. The Merrimack canal runs between the 1922 building on the east side and the Lord Building and Field House on the west side of the canal. The space between is landscaped on each side and provides for a pleasant urban park-like atmosphere. Unfortunately, there is also a Trolley for tourist and visitors to the Lowell Historic Park that parallels the west side of the canal and further divides and separates the main campus. There are two connecting enclosed bridges at the second floor that span the trolley tracks and the canal to accommodate pedestrian traffic between the two buildings. The constrained site does not provide for any outside athletic or physical education opportunities, with the exception of a small irregular shaped green space adjacent to the city parking garage which is used for outside physical education classes.

Lowell High School Buildings Located in the City of Lowell Massachusetts - TOTAL: +/- 626,188 GSF
Freshman Academy- +/- 90,236 SF (1900 & 1939 portions) located at 40 Paige Street
Steam Plant – +/-3,328 SF, no additions located at Paige Street
High School - 1922 Building (Coburn/Kouloheras/Sullivan) – +/-312,052 SF (whole facility) 50 Father Morissette Blvd
High School - 1980 Buildings (Lord & Fieldhouse) –+/- 216,172 SF, no additions 50 Father Morissette Blvd
Connecting Bridges – 1980 and 1997 – 4,400 SF.

National and State Registers of Historic Places

Lowell High School is listed on the National and State Registers of Historic Places through its inclusion within both the Lowell National Historical Park & Preservation District, the City Hall Historic District and the downtown Lowell Historic District. This applies to the buildings on Kirk Street including Colburn Hall (1892), the Sullivan addition built circa 1922 and the 1997 Kouloheras addition. The 1980 sections (Lord and Fieldhouse) are within the preservation district and within the Lowell Downtown Historic District. All work on these buildings will require Lowell Historic Board and likely MHC review. Three nearby buildings also associated with the high school, the former Lowell Trade School (1901) at 68 John Street, the Lowell High School Annex (1939) at 55 French Street as well as the Steam Plant and associated smokestack on French Street are also listed on the National and State Registers of Historic Places through their inclusion within both the Lowell National Historical Park & Preservation District and the City Hall Historic District.

This report is organized in accordance with MSBA Module 3 – Feasibility Study Guidelines (updated January 2015). The Preliminary design program process took a course that, in general, included determination of the Owner's needs, assessment of existing conditions, analysis/evaluation of alternatives, and recommendation of at least three (3) distinct alternatives for further study. As part of the Feasibility Study scope of work, the Owner also requested that Perkins Eastman|DCP study and evaluate, in addition to the existing facility to review potential New Construction options for the 3,520 student enrollments; this work is presented in 3.1.6 Preliminary Evaluation of Alternatives.

In addition to the problems posed by the physical condition of the buildings, other reviews identified significant programmatic deficiencies. Some of the physical plant issues affecting the educational program are inadequate lighting, poor ventilation and cooling, and some acoustic issues. Others are the size and arrangement of certain spaces, or are simply a lack of the correct type of space. Current classroom sizes are not in compliance with MSBA standards for new construction. In addition, the current high school is not in compliance with sprinkler, seismic, energy, and ADA codes/requirements.

The feasibility study provides an analysis of the Base Repair option for the High School, addressing deficiencies as previously identified in various accreditation reports and review the problems identified in the Statement of Interest.

B. Date of Invitation to Feasibility

On April 10, 2014, the Owner submitted a Statement of Interest to the MSBA for the Lowell High School. The MSBA Board of Directors invited the Lowell School District to conduct a Feasibility Study to explore a broader range of options that included; renovations, renovation /addition and or new construction option to address the facility's deficiencies. A copy of the MSBA's Board Action Letter dated November 18, 2015 is attached in the appendix section.

C. Design Enrollment

The agreed-upon Design Enrollment Certification dated October 9, 2015 (MSBA Executed Design Enrollment Certification) calls for the Feasibility Study to consider design alternatives for a Grade 9-12 enrollment of 3,520 students from the districts. A copy of the MSBA's Design Enrollment Certification Letter is attached under the appendix section.

D. Capital Budget Statement Narrative

The Lowell School district has initiated planning to address deficiencies and issues as identified in the Statement of Interest for the Lowell High School buildings. The aim of the project is to provide adequate, safe and economical facilities that meet the MSBA's Education Program Space Standards and Guidelines for high school building. At the February 7, 2016 School Building Committee meeting the SBC recommended to the City Council to submit the PDP to MSBA and study further four options in more detail; Full Renovation w/ Small Additions, Add/Reno Option 2, Add/Reno Option 3 (with expanded site) and a New School at the Cawley Site.

It is anticipated the gross project cost of the construction range

Base Repair to be approximately $270,770,322

Full Renovation w/ Small Additions to be approximately $331,360,298

Add/Reno Option 2 to be approximately $344,087,262

Add/Reno Option 3 (Expanded Existing Site) to be approximately $334,335,971

New Bldg. at the Cawley Site to be approximately $332,458,871

The School Committee and School Building Committee have carefully reviewed and analyzed the affordability of the project. The funding source for this project would be through bonds paid through debt exclusions supported by the tax levy of the City.

The Capitol Budget Report is included in the appendix.

E. Project Directory

The project directory is included in the appendix.

F. Project Schedule

The project schedule is included in the appendix.

3.1.2 Educational Program

Lowell High School, established in 1831 with a principal and 47 students, was the first public co-educational high school in the United States and one of the first integrated high schools in the nation. In 1896 Coburn Hall was erected and an adjacent building was added in 1922. The school was expanded across the canal in 1980 with the construction of a new building and field house. Expansion and renovation of both buildings occurred in 1997. In 2005, the district repurposed a nearby middle school to serve as additional space for the Lowell High School Freshman Academy.

Throughout its long life, the high school buildings have been repurposed to the extent possible to meet educational needs, but the structure only allows for minimum flexibility and usage. As the school expands in numbers and evolves into a modern educational approach, a new facility is needed to implement technology seamlessly across the building and to offer flexible spaces that support collaboration and 21st century teaching and learning.

LHS successfully completed the Fall 2015 NEASC Accreditation process and received full reaccreditation. However, the school was placed on warning for standard 7: Community Resources for Learning, which deals with budget, facilities, and the physical plant. The accreditation committee listed the following concerns (noted in the 4/22/16 Accreditation letter):

The school site and plant do not minimally support the delivery of high quality school programs and services, including but not limited to the following:

- *Leaks in the roof, the tunnel, and from sinks*
- *Temperature fluctuations where one room is considerably warm while another is considerably colder*
- *The presence of pests in the building*
- *Windows in need of repair*
- *The nurse's office which is small and not easily navigated by wheelchair-bound students*
- *The lack of full accessibility to individuals with physical handicaps*
- *The main cafeteria that is at or near capacity*
- *The lack of capacity of the electrical system resulting in the inability to support upgrades in technology*
- *The lack of natural light or adequate ventilation in art rooms*
- *The inability of the science labs in both the 1922 and the 1980 buildings to support modern science curriculum and pedagogy*
- *The lack of equitable facilities to support students in life skills programs*
- *The lack of equitable access to up-to-date technology for all students*

According to the Fall 2015 NEASC Accreditation report,

> *In the 2013-2014 school year, a comprehensive facilities assessment by OMR Architects determined that the building's needs, based on enrollment trends for the next ten years and the fluctuations in enrollment, provide justification for a renovation or for the construction of a new high school. A request has been submitted to the Massachusetts School Building Authority (MSBA) and has been accepted and is being looked upon favorably. The city of Lowell and the Lowell School Department are unified in their support for this petition to the MSBA. The adoption and funding of a comprehensive, long-range plan for programs and services, facility needs, technology, and capital improvement will ensure the ability of Lowell High School students to achieve the school's expectations for learning.*

The Lowell Public Schools are incredibly diverse. The ethnic/racial/cultural composition of the student body in the schools makes it one of the most diverse districts in the Commonwealth: African American students 7.1%, Asian students 29.4%, Hispanic students 30.1%, White students 30.1%, and all other students 3.2%. In the district, 75.1% of the student body qualifies as low-income, 15.1% are classified as Special Education, and the English Language Learner population is 26.6%. The high school reflects the great diversity of the City of Lowell with students representing over 50 countries from all over the world and speaking almost 60 different languages. Given this cultural, racial and socioeconomic diversity, Lowell High School has been successful at consistently maintaining a high graduation rate for an urban district (over 80%) and a high college attendance rate (over 85% of students seek post-secondary education at four-year and 2-year colleges and universities).

The proposed planning concepts, whether renovation or new construction, will include the scope/costs of creating a weather-tight, code compliant facility (including full accessibility) along with new mechanical (indoor air quality, heating and cooling), electrical, plumbing, fire protection, technology, communications and safety/security systems. All options have been planned to address program deficiencies, including sub-standard Nurse's Office, Cafeteria, Science Labs, Special Education (including Life Skills) and numerous other program deficiencies that do not meet MSBA guidelines or capacity needs.

The great diversity represented by the student body is expected to be celebrated in new and different ways, possibly through new means of display and broadcasting within the school, but also by having Special Education and English Language Learner (ELL) to be integrated as 2-room clusters, adjacent to regular academic classrooms (as opposed to a separate zone within the school).

A. GRADE AND SCHOOL CONFIGURATION POLICIES

Lowell High School currently educates over 3,125 students in grades 9-12. The school has twelve academic departments each led by an Academic Department Chair, nine Pathway Programs (eight currently and one in development), an academically-accelerated Latin Lyceum program, and four administrative houses that consist of a House Dean, two Guidance Counselors, a Social Worker, and two clerks. The houses in the main building are located in four different areas of the building, two in the 1980s building and two in the 1922 building. Classes are randomly scattered within the buildings, a product of repurposing space as needed, and teachers are assigned to houses based on proximity to the house office for organizational purposes only. Courses and teachers are not scheduled in a single house but rather across the building. There is a Freshman Academy program housed in a building separated from the rest of the high school by a public roadway. The Freshman Academy is its own separate house, with its own two clerks, three Guidance Counselors, and a Social Worker. Students are placed into one of three clusters in the Freshman Academy; two clusters contains two English, History, Math and Science teachers and a third super-cluster contains three English, History, Math, and Science teachers. Ninth grade students need to travel to the main buildings for physical education and other elective courses.

Proposed Change: We would like to keep our current grade and school configuration in regards to departments, pathways and administrative houses. We would like to incorporate the Freshman Academy within the new/renovated high school in its own wing, which would allow the Freshman Academy to keep its distinct program identity but make it more connected to the rest of the school and safer for students who would no longer have to cross a street to get to classes during the school day. In order to make it easier for parents to access house offices and to strengthen collaboration between house teams, one option would be to locate the house offices near the main entrance(s) and in proximity to each other. This also supports the safety and security of the building, eliminating traffic streaming in through open doors and the need to share security officers in multiple buildings. One physical plant would ensure that there is a more cooperative effort to support safety and security throughout the building.

The proposed planning concepts intend to create a distinct Freshman Academy as a small learning community within the school, but not completely isolated, as students will utilize shared programs, such as World Language Classrooms, Library/Media Center, Gymnasium and Arts/Tech programs. Class scheduling may be used to keep shared programs distinctly separate, but also intentionally mixed to expose new students to the larger high school community in a deliberate manner. The Freshman Academy will be arranged in teams of 4 classrooms (English/social studies/math and science). Freshmen currently utilize 2 teams of 8 classrooms +1 team of 12 for

3100 students. The proposed enrollment increase of 13% suggests approximately 4 teams of 8 will be needed for an enrollment of 3,520 students.

The proposed administrative program includes space for main administration, main student support as well as the suites for freshman and 4 houses (7 administration suites total). Additional space is earmarked for archived records, teacher workrooms and the career center

B. CLASS SIZE POLICIES

Lowell High School takes pride in its extensive course offerings, offering more variety than most public high schools in Massachusetts. This offers students the opportunity to not only meet core graduation requirements, but also explore their interests in a variety of areas including Business/Marketing, Culinary, Engineering, the Fine and Performing Arts, and ROTC, just to name a few. This variety does have an impact on the schedule and class sizes. There is no official class size policy in the district, though we do try to keep our college level courses below 28 at the high school. The average class size in the core academic areas of English, mathematics, science, and social studies is 24. ELL courses average 22 and Foreign Language courses average 22. Physical education average 33 and our special education courses average 7. In the elective area of art, business, culinary, and ROTC, average class sizes range from 2 to 22 with outliers ranging due to unique needs of certain programs, from 2 in the bank program, 10 in the Retail Marketing (School Store) to 60 in the band and chorus classes.

Proposed Change: There is a need for flexible classroom space for a variety of reasons to include the ability to appropriately schedule classes that are not within the average class size.

Future space needs are calculated based on the current Master Schedule, prorated for the new student enrollment (3,520 students) and an average class size of 24 students/room (same average as exists now, which results in a range between 20 and 28, sometimes a few more). Given the existing range, rooms are planned larger (at 900sf vs existing 825-850 sf average) and will include furniture layouts for 28. Some classes are deliberately smaller at 8-16 students and were tracked and calculated separately to ensure courses were not averaged-up and course offerings were not eliminated.

Note:
Planning for the future, ELL classes were calculated for a 20 student average and specialty programs, including SPED, Fine Arts, Business and Technology were based on existing sizes. Physical Education needs are based on 26 student class average.

C. SCHOOL SCHEDULING METHOD

Lowell High School is on a seven period day. The school day begins at 7:55 am and ends at 2:30 pm. There are four 25 minute lunch periods per day between two cafeteria locations, one in the main campus and one at the Freshman Academy.

Warning Bell	7:50		
Period 1	7:55	- 8:45	(50)
Period 2	8:45	- 9:35	(50)
Advisory	9:35	- 9:55	(20)
Period 3	9:55	- 10:45	(50)
Lunch 1	10:45	- 11:10	(25)
Period 4A	10:45	- 11:35	(50)
Period 4B	11:10	- 12:00	(50)
Lunch 2	11:35	- 12:00	(25)
Period 5A	11:35	- 12:25	(50)
Period 5B	12:00	- 12:50	(50)
Lunch 3	12:25	- 12:50	(25)
Period 6A	12:25	- 1:15	(50)
Period 6B	12:50	- 1:40	(50)
Lunch 4	1:15	- 1:40	(25)
Period 7	1:40	- 2:30	(50)
Dismissal	2:30		

The academic year is divided into two semesters with half year courses worth 2.5 credits, but most core courses run for a full year (with consecutive A/B semester sequencing). The master schedule is completed by the school's scheduler with input from the department chairs.

Graduation Requirements:
Students must earn a total of 90 credits, including the following minimum course requirements:

- Ten (10) credits in U.S. History and Government.
- Twenty (20) credits in English.
- Ten (10) credits in Mathematics. Students must pass Algebra IA, Algebra IB, Geometry A, and Geometry B.
- Ten (10) credits in Science.
- Ten (10) credits of Physical Education
- Five (5) credits of Health

Courses are offered in four levels: College, Honors, High Honors, Advanced Placement/Dual Enrollment.

Proposed Changes: The high school is planning to create an exploratory committee to look at schedules to see if there would be a schedule for the high school that would meet the goals of retaining a robust selection of course offerings (7 courses per semester) but with longer blocked class periods. This would not have a significant impact on room usage, but would allow for sustained blocks of teaching time.

Programming calculations are also tied to the available periods per cycle each room can be used. No immediate change to the school schedule is anticipated, but a hypothetical model was discussed that might allow longer blocks that also maintains a 35-period cycle. As such, space needs were based on a 35-period cycle.

D. TEACHING METHODOLOGY AND STRUCTURE

Lowell High School is a community of educators whose core commitment is to provide students with exceptional instruction. Teachers and administrators regularly review and refine instructional practices through scheduled sessions within academic disciplines, formal and informal observations, a new and comprehensive teacher evaluation process, and a building-based support team that serves to ensure that at-risk students are supported in ways that allow them to access the curriculum. Teachers at Lowell High School utilize instructional strategies that are consistent with the school's core values, beliefs, and learning expectations. Strategies that are implemented personalize instruction, engage students in cross-disciplinary learning, engage students to be active learners and emphasize inquiry and problem-solving skills. Opportunities exist to allow students to engage in authentic application of knowledge and skills and to self-assess their performance in those tasks. Technology is utilized in a variety of ways to assist and further the educational process. Teachers maintain expertise in their respective content areas and utilize effective content-specific practices such as formative assessments, strategic differentiation, group activities, and specific support strategies which aid struggling students. Teachers believe it is essential to have more time to collaborate and plan to share and implement additional instructional strategies that will strengthen student achievement and learning and encourage more student-centered classrooms.

Proposed Change: An area of need for the high school, as identified by the most recent NEASC Accreditation process, is to create more opportunities for collaborative planning opportunities and interdisciplinary connections. While the current facility groups together teachers in a variety of ways - some by departments (Fine & Performing Arts on one floor) and some by grade level or program needs - the administration is interested in looking at different organizational structures that would more fully support the concept of expanding areas organized for STEM classrooms, Humanities classrooms, and CVTE classrooms. Also a focus on more interdisciplinary teaching and learning would require some larger, flexible spaces where departments can bring classes together for interdisciplinary work such as

guest speakers, teach-out opportunities, learning demonstrations, and other types of interactive group learning.

- Administrative and Academic Organization/Structure:
  Currently the administrative and clerical staff are located throughout the buildings, organized into house offices consisting of house deans, guidance counselors, social workers and clerks; office space for the majority department chairs and the director of curriculum, instruction and assessment in the teachers center, student support services includes the coordinator of student support, discipline & operations specialist, parent liaisons, enrollment and student support services clerks, the main office consisting of the head of school and three clerks. The special education suite includes the department chair for special education, clerk, and educational team chairs. The athletic office has the athletic director, clerk and school bursar. Data processing office includes a scheduler, clerk and instructional specialist overseeing testing.

  The high school has 12 academic departments and nine Pathway Programs (eight currently and one in development for next year) that fall within departments. Each department requires flexible learning spaces for students and teachers to engage in both teacher-directed and student-directed learning.

  Proposed change: LHS Administration is considering clustering academic Department Head offices together by subject matter connections (Humanities, STEM, CVT) and integrating the houses into this configuration. One way to do this would be to place two house offices in a combined house and guidance suite in proximity to a department center. This would allow for administrative presence in multiple areas of a large building. Another option would be to place all the house offices into one central space near the main office, such as a house and guidance suite. The Freshman Academy, while housed within the same large building, would have a separate office suite for the Director of the Freshman Academy, Student Support Specialist, clerks, guidance counselors and the FA social worker. The Head of School, the Director of Curriculum, Instruction, and Assessment, and the Discipline and Operations Specialist would all have offices clustered near the main office. It is crucial to have adequate conference room space available for all offices.

  The proposed program/plans anticipate the equivalent of 5 House Offices Suites (including Freshman Academy), each with (2) Clerks/Waiting, the House Dean, (1) Social Worker (2) Guidance Counselors and a small Conference area. The Freshman Academy will need space for (1) Student Support Specialist and an additional Guidance Counselor (a total of 3).

A separate Main Office with Secretary/Waiting, Head of School, Bursar, Director of Curriculum/Instruction, Discipline/Operations, large Conference & kitchenette is planned along with a Main Student Support Center including Student Support Coordinator, Conference, (1) Clerk, (1) Registrar/Clerk, Waiting for 10-12, (3) Testing and (4) Parent Liaison stations/desks. A separate College/Career Center with (3) Guidance Counselors, Conference and main room with 24 computers and soft seating area.

- Curriculum Delivery Methods and Practices:
  Lowell High School's course offerings are more comprehensive in range and scope than most public high schools in Massachusetts. As such, curriculum at LHS is comprehensive in design and aims to challenge students at all academic levels. Curriculum maps are currently being revisited to have parallel structure across all departments and to use *Understanding by Design* as the philosophy behind the curriculum and instructional mapping. In terms of instruction, teachers are encouraged and guided to use a wide variety of instructional techniques, keeping student engagement and active participation at the forefront of the work. In the past few years, a major focus area has been integrating technology into instruction across all content areas. We have also developed the idea of formative and summative assessments being varied, meaningful, and authentic as we move away from using only traditional assessments and integrate more projects, presentations, demonstrations, and other non-traditional assessments across departments.

  The one area that has been identified as an important need (as indicated by the faculty in our last NEASC process) is more time for teacher collaboration, especially around sharing instructional practices and tools that will grow student learning across all levels and encourage more student-centered classroom practices.

  Priority 21st - Century Learning Goals for LHS
  (created in Fall 2016 Building Visioning Workshops):

  Empathy, Global Perspective, and Civic Engagement
  - Cultural Awareness
  - Personal, Social, and Civic Responsibility
  - Awareness of Community and Global Society
  - Multicultural Literacy

  Critical and Inventive Thinking
  - Critical Reasoning and Problem Solving
  - Agility, Adaptability, and Risk-Taking
  - Joy, Curiosity, and Imagination
  - Motivation and Creativity

  Communication and Collaboration

- Oral and Written Communication
- Teamwork and Interpersonal Skills
- Media Literacy and Digital Competence
- Accuracy of Information

Real World Interconnectivity

- Executive and Organizational Skills
- Competency in Core Skills and Content
- Career Preparation and Life Skills
- Vocational Opportunities and Certifications

Holistic Awareness

- Self-advocacy
- Wellness
- The Natural World

These 21st-century learning goals expand our existing mission statement and goals for student learning, which we are in the process of revising:

Lowell High School Mission Statement

Commitment to excellence in <u>everything</u> we do: academics, activities and citizenship.

Lowell High School provides a secure and cooperative environment where the emphasis is on mutual respect, curiosity, the free exchange of ideas, and the appreciation of education both as a process and a means to betterment.

We are a community…

- That values a curriculum incorporating the best practices of both traditional and contemporary instruction.
- That creates and supports an atmosphere promoting high expectations for student achievement.
- That strives to meet the needs of a variety of ethnic and language backgrounds, career interests, and learning capabilities and styles by providing a broad range of programmatic offerings.
- That believes student accomplishment is a shared responsibility of students, parents, staff, administration, school committee, and community.
- That provides all students the curriculum to meet school and state graduation requirements, and assesses learning continuously in a variety of ways including mandatory state testing.

Expectations for Student Learning

Lowell High School expects all students:

- To attain an understanding of the educational standards, core knowledge, skills, and concepts defined by the Massachusetts Curriculum Frameworks.
- To take increasing responsibility for educational decisions on a daily and long-term basis.
- To complete academic work both independently and cooperatively in a productive manner.
- To think critically and solve problems using inductive and deductive reasoning.
- To read effectively and communicate ideas and information using a variety of formats.
- To develop an ability to use a variety of mediums—including the creative and the technological—in the process of learning, and demonstrate their acquired learning through use of those mediums.
- To demonstrate respect for individual differences and appreciation for the diversity of a multicultural world.
- To understand and demonstrate a sense of community.

Core Values

- Responsibility
- Integrity
- Determination
- Engagement
- Respect

○ English Language Arts/Literacy:

The Lowell High School English Department is committed to supporting and encouraging students to become independent, life-long learners. All English courses are designed to build skills in effective reading, writing, speaking and listening. Through a sequential program of core courses, students are supported to read critically from a wide range of literary and informational texts, write effectively for a variety of audiences and purposes, and speak effectively in informal and formal situations. We recognize that mastering these complex communication skills is essential for successfully meeting the challenges of the 21st Century.

The English Language Arts curriculum is comprehensive in design and aims to challenge students at all academic levels. Curriculum maps have been redesigned to parallel structure in other departments and to use Understanding by Design as the philosophy behind the curriculum and instructional mapping. In terms of instruction, teachers are encouraged and guided to use a wide variety of instructional techniques, keeping student engagement and active participation at the forefront of the work. In the past few years, a big focus area has also been on

integrating technology into instruction as a core part of classrooms. We have also developed the idea of formative and summative assessment being varied, meaningful, and authentic as we move away from using only traditional assessments and integrate more projects, presentations, demonstrations, and other non-traditional assessments across departments.

- Mathematics:
  A primary goal of the Mathematics Department is for all students to achieve mathematical literacy. However, mathematical literacy includes more than students being able to do arithmetic and to solve routine mathematical problems. Mathematical literacy requires students to reason and prove, to solve real mathematical problems, to make connections, to use multiple representations of numerical information, and to communicate mathematical information to other people. All of the courses in the Mathematics Department operate with these learning goals in mind. The mathematics curriculum is comprehensive in design and aims to challenge students at all academic levels. Curriculum maps have been redesigned to parallel structure in other departments and to use Understanding by Design as the philosophy behind the curriculum and instructional mapping. In terms of instruction, teachers are encouraged and guided to use a wide variety of instructional techniques, keeping student engagement and active participation at the forefront of the work. Math teachers use various methodologies to differentiate the instruction for all learners including direct instruction, discussion, problem solving, simulation, inquiry-based investigations, and collaborative groupings. In the past few years, a big focus area has also been on integrating technology into instruction as a core part of classrooms. We have also developed the idea of formative and summative assessment being varied, meaningful, and authentic as we move away from using only traditional assessments and integrate more projects, presentations, demonstrations, and other non-traditional assessments across departments.

- Science:
  Science educators use various methodologies to differentiate the instruction for all learners including direct instruction, discussion, problem solving, simulation, inquiry-based investigations, and collaborative groupings. Science labs currently include traditional fixed benches that take up much of the room. This lack of flexibility and fixed furnishings, such as laboratory tables, limit group sizes because of safety concerns. The limited flexibility of our small, outdated science labs also includes limited storage areas. We would like to have laboratory science rooms that meet today's lab safety standards and allow us to deliver a high quality, hands-on, inquiry-based science curriculum. We envision providing appropriate opportunities for the authentic application of knowledge and skills in our science curriculum. It is essential to have the space, flexibility and equipment to provide opportunities for students to gather quality data for these authentic

experiments. Additionally, in collaboration with Middlesex Community College and U-Mass Lowell, we intend to continue to offer Dual Enrollment courses with a focus on biotechnology and medicine, chemistry, computer science, engineering, robotics, and green and renewable energy. It is essential to support interdisciplinary collaboration between science, math and engineering in order to ensure the success of these programs and the practical application of student knowledge. We must offer these opportunities to Lowell High School students as these are STEM-related fields with enormous potential for college and career opportunities

The program/plans provide large/flexible science labs in accordance with State standards. A total of 28 labs, 20 being full-sized 1,440 sf and 8 being Integrated Science classrooms at 1,000sf are proposed. 2 of the 20 are for Health and Bioscience as previously noted. All 20 large labs will have 200sf of Prep/Storage space, typically grouped in two's as 400sf, and (2) additional Prep/Storage rooms are provided for the Freshman/Maker Space. (1) Chemical Storage and a Growing Room are also provided.

- Social Studies:
  The Social Studies Department offers a four-year course of study in history and the social sciences. The content, reading materials, instructional activities, and assessments are designed to promote higher-level thinking and communication skills. All of the history and social science courses at Lowell High School adhere to the Massachusetts Social Studies Curriculum Frameworks and the Common Core State Standards. Social Studies at LHS promotes a College, Career, and Citizenship (C3) approach to student learning and engagement in social studies. The Social Studies curriculum is comprehensive in design and aims to challenge students at all academic levels. Curriculum maps are being designed to parallel structure in other departments and to use Understanding by Design as the philosophy behind the curriculum and instructional mapping. In terms of instruction, teachers are encouraged and guided to use a wide variety of instructional techniques, keeping student engagement and active participation at the forefront of the work. In the past few years, a big focus area has also been on integrating technology into instruction as a core part of classrooms. We have also developed the idea of formative and summative assessment being varied, meaningful, and authentic as we move away from using only traditional assessments and integrate more projects, presentations, demonstrations, and other non-traditional assessments across departments.

- World Languages/English Language Learners:
  It is the goal of the Foreign Language Department that every student achieves an ability to understand, speak, read and write in the target language, while at the same time developing global awareness and knowledge of different cultures.

Lowell High School offers English Language Learners (ELLs) in grades nine through twelve a comprehensive academic program to build English language proficiency and academic content knowledge. English Language Learners develop English proficiency while learning the general curriculum. Instruction also recognizes that language modalities (speaking, listening, reading, and writing) develop interdependently and, therefore, should be integrated to promote skill development. English Language Learners at Lowell High School participate in one or more program models that support English language and content knowledge development. Students' English language proficiency is assessed and academic background reviewed in order to recommend an appropriate program placement in English Language Development (ELD) classes, Sheltered English Instruction (SEI) content classes, and/or English Language Development support classes.

Both of these departments need classrooms that can serve as flexible language "lab" classrooms, with technology of our current language lab and areas of the classroom that can be used for individual listening/speaking practice as well as collaborative spaces for using the lab technology in small groups, working with direct teacher instruction, or other areas of a language classroom that would allow students to engage in discourse for language practice.

Proposed Change: To help ensure the best learning opportunities for students, all academic department teaching spaces must include:

- Modern classrooms with interactive LCD projectors, adequate whiteboard space, adequate storage, maximum natural lighting with windows that open, ample outlets for device charging, and a streamlined, moveable teacher desk and podium.
- Classrooms that are clustered into inter-disciplinary configurations to promote cross planning and discourse between academic departments.
- Multiple large, flexible group instruction spaces that can be used for combined classes, presentations, lectures, seminar, faculty meetings, and parent meetings. These could be various-sized spaces that can be split up or combined (with movable walls) to better suit the needs of the various users.
- Adequate book storage for all departments, but especially for the core departments (English, Foreign Language, History, Math and Science) where textbooks and trade books are used extensively in all classes. We would prefer to have a central storage location for many of the books but with smaller distributed book and supply storage for specific departments.

The program/plans provide large, flexible and fully integrated technology for all classroom spaces, including World Language and ELL programs. ELL rooms are

intended to be dispersed with general classrooms, but clustered or paired for inter and intra collaborative opportunities. World Language rooms are to be grouped as a department or potentially semi-dispersed by language for the same collaborative opportunities. The Freshman Academy, as a separate zone within the overall school, should have easy access to all language classrooms and will have one ELL team included within (ELL language, social studies, math and science).

Operable walls can be used between select sets of classrooms (1 per cluster) to allow large group gatherings. Likewise, select single classrooms can have sub dividable partitions to allow small group flexibility.

- Academic Support Programming Spaces:
  Lowell High School has 3 Instructional Specialists: 1 is focused on Instructional Technology Support, one is focused on classroom/instructional support, and the third is focused on academic testing support (MCAS, ACCESS, etc.). We also have number of academic tutors (part-time) who work in classrooms to support student learning; these are specifically language tutors in the Newcomers classroom and a "Read 180" tutor for additional literacy support with grade 9 students.

  (1) Office for the academic Instructional Specialist is provided with other Dept Offices, a second will use space within the Tech Center and third will use space within the MCAS room.

- Student Guidance and Support Services:
  School guidance counselors are located in house offices. A social worker is assigned to each house office and the Freshman Academy but not every social worker is physically located in the house due to space constraints.

  Proposed change: Ensure that there is space in each house office to accommodate the assigned social worker for more effective case management.

  Student Support Services suite provides for enrollment, working papers, parent liaison, and support for critical student issues including homelessness. There is a separate college and career center staffed by three guidance counselors with an attached computer lab for use of Naviance and other college/career research activities.

  As noted under Administrative and Academic Organization/Structure, the House Administration areas include (2) Guidance Counselors and (1) Social Worker. Freshman House will include a third Guidance Counselor and (1) Student Support Specialists. A separate Student Support Services Center is provided for the full school.

E. TEACHER PLANNING AND ROOM ASSIGNMENT POLICIES

Lowell High School teachers are assigned to one of 12 departments and for administrative purposes to one of four house offices or the Freshman Academy. There is one Teachers' Center which also houses the majority of the department chairs but no department centers which has hindered collaboration between teachers.

Proposed change: Moving forward the school would benefit from combined academic wings (humanities, STEM, CVT) with teacher workrooms (located near classroom clusters) and multi-media rooms that help to foster cross-curriculum collaboration and support. Teacher workroom space that is designed for both inter and intra departmental collaborative work as well as professional development would greatly enhance the ability of teachers to plan and support robust curriculum. The majority of teachers currently have their own classrooms, teaching 5 periods of a 7 period day with one 50 minute period of prep time, one 50 minute period of duty or collaborative time and a 25 minute lunch period.

Classrooms are planned at approximately 85% utilization per state requirements vs 71% per current practices. This effectively means non-ownership of classrooms; most teachers would have primary ownership, but would need to share if one period a day or, conversely, all academic teachers might share two rooms (one for 3 periods, another for 2 periods per day). In either case a dedicated work space for each teacher is required and would be provided via planning rooms dispersed throughout the school and located convenient to each teacher's classroom(s).

The new plans anticipate having (4) freshman planning rooms; (1) for each team and sized for 10+ staff, anticipating SPED & ELL specialists. (13) Additional planning rooms are to be dispersed with grade 10-12 academic classrooms/labs, including (1) with World Language. The program also provides a large seminar room (little theater) to be used for teacher seminars, professional development and other multi-purpose activities as currently occurs.

Note: the proposed number of classrooms/sci-labs are projected at fewer than exist despite a 12.5% planned enrollment increase. This is primarily due to the difference in utilization. For example; 148 core academic classrooms/sci-labs exist for approximately 3,125 students. If enrollment increases 12.5% (to 3,520), you would expect classrooms/labs to increase to approx.166, but if the utilization of those rooms increased 14%, then 166 would become 143 rooms. The program calculates 146 classrooms/sci-labs are required (including 6 scheduled small group classrooms).

F. CLASSROOM INSTRUCTION (9-12)

As described in sub-section D and broken down into each academic subject

G. FOOD SERVICE PROGRAMS

Aramark provides food service for Lowell High School. All lunches are made at the high school. The school has a full service kitchen for grades 10-12 and a warming kitchen at the Freshman Academy. Breakfast is available to all students from 7:00 am to 7:55 am. There are two breakfast carts along with the service in the cafeteria. Lunch is served daily in four 25 minute seatings between 10:45 am and 1:40 pm. in two separate cafeterias (main school and Freshman Academy). All breakfasts and lunches for students are free of charge.

The current space does not adequately accommodate all the students scheduled for lunch in the main school so many students eat in the lobby in front of Student Support Services and in the hallways outside the cafeteria.

Proposed Changes: Ensuring that the designated cafeteria space can accommodate enough students to allow for three lunch periods instead of four will have a positive impact on the scheduling process. It is also important to have a small satellite space off the main cafeteria for students who cannot function in a large space or large groups.

Kitchen and Cafeteria areas are undersized now. The design/program meets the MSBA guidelines for 3 seatings (1/3 of the student population) and is anticipated to be developed as space that has a variety of zones within to accommodate different predilections and to be more flexible for alternative and multi-purpose uses. The potential of separating the freshmen portion of cafeteria, along with a satellite server will be explored during design.

The Cafeteria is to be located for easy and flexible access of students for early and extended hours, as well as for community use. The school would like to include easy and increased access to the breakfast service.

H. TECHNOLOGY POLICIES/PROGRAM REQUIREMENTS

Technology at Lowell High School is not equitable and needs significant upgrading within classrooms and throughout the building. There is a need for reliable technology that assists in the deliver 21st century curriculum along with a robust, high-speed wireless network with enough bandwidth to support a digital learning environment.

All teachers and administrators were recently issued MacBook Air computers. The school has invested in LCD projectors and document cameras over recent years to assist in presenting material in a effective manner to students and this is a basic tool that we are striving to ensure is in every classroom.

The district has computer technicians who are assigned through an online work order process to help maintain technology for the district. Currently the high school has ten shared labs (6 PC and 4 Mac) along with 16 restricted-use computer lab classrooms (8 PC classrooms, 5 Mac classrooms, 1 language lab, 2 ROTC, 1 Maker Space). The school has been migrating to mobile technology carts shared on an as needed basis by the community (4 iPad, 3 Macbook, 1 iPad science cart and 1 Chromebook cart). The school has one technology specialist whose primary focus is helping teachers integrate technology into their classrooms. She works one-on-one with teachers, offers group trainings, and has open lab hours for teachers to drop in.

The school is moving forward with online curriculum resources as allowed by the current technology. For example, business courses are completely online. While the current facility includes 33 classrooms equipped with Apple TVs and mobile iPad carts, and ten classrooms recently outfitted with interactive whiteboards, the use of such technology is generally limited to those classrooms and the trained teachers using them. While the current budget does not contain specific earmarks for the expansion of new technology to other classrooms, the library media center, or computer labs, the school purchases digital projectors and document cameras to upgrade classrooms when the budget allows. Twenty of these setups were added to classrooms across all academic departments in 2014-15, and another ten in the 2015-16 school year. A few classrooms have older model PCs dedicated to student use, but LHS does not provide classroom sets of mobile laptop computers or other digital devices for general use by teachers or students except in the Apple TV/iPad equipped rooms or with the “rental” carts. One recent technological improvement in the past few years is the installation of wireless access points in most classrooms, which has improved connection to the Internet throughout the school via personal mobile devices. However there are still too many areas in the school where WiFi connection is weak.

Teachers in all disciplines integrate technology into instructional practices. This means the use of technology in classroom pedagogy (e.g., iPads in some classrooms, computer labs in most instructional areas, a growing number of interactive whiteboards, digital projectors and document cameras) and the inclusion of technology in student assignments and outcomes. Some of the latter technologies include Google Apps for Education such as Google Drive, Google Classroom, YouTube and Blogger, iMovie, and Keynote (on iPads and iMacs). Students use a variety of mediums to demonstrate their learning including audio, video, and cloud-based apps.

Students in graphic design, television production, and engineering classes use technologies including CAD, Photoshop, Adobe, digital cameras, Avid, etc.

Proposed Change: Moving forward the high school anticipates moving away from shared computer labs to technology embedded in all classrooms with the use of mobile computer carts that allow for greater flexibility in the use of space. Eventually the school would like to be in a position to have student 1:1 use and install an interactive projector in every classroom.

The new school will include robust infrastructure with fiber optics delivery into the building and a fully wireless environment planned for 1:1 capability in the future and designed for access to laptop and/or tablet devices. Specialty labs that require substantial computing, graphics and streaming capabilities will be outfitted as required.

All classrooms, special education/small group, arts, music, media center and flexible learning areas and conference rooms will be planned with data-projectors, document camera capability, fully wireless computing and have access to laptop or tablet cart storage/charging areas.

The (10) existing unassigned computer labs will not be replicated in the new program, but instead larger rooms and computer carts allow every classroom to become a computer lab.

The proposed program includes (12) specialty computer labs, including (5) Business/Mktg, (3) Art/Graph, (2) Engineering/Robotics, (1) Maker Space and (1) Digital Music are included in the program, along with (4) classrooms with computers; (2) ROTC + (1) World Language + (1) Math/Computer Sci. Additional computer lab settings occur within the TV/Media Studio, Library/Media with Technology Center and the Career Center.

Space is required for the existing and ongoing computer/technical support staff, equipment, work area and training lab. These spaces will be included as part of the overall Media Center that will more than double in size, per MSBA standards (from approximately 9,000sf to 22,000sf).

- Media Center/Library:
  The school has a library media center staffed by one Library Media Specialist along with two library aides. The library media center is used broadly by various departments. Teachers schedule time in the library when they need students to research material (3 classes can be scheduled at the same time), work collaboratively in groups, the library also offers instructional sessions on how to use a library or take out books. The center is also open an hour before school five

days per week and an hour after school four days per week with teachers hired to provide tutoring or homework help. The Library Media Specialist focuses on using technology as a viable research tool coordinating google docs and the use of library research databases which is the number one library skill students need for college. The library media center has a dedicated computer lab which is essential for both visiting classes and for students coming in during lunch, before/after school and advisory time that need access to computers and printing capabilities. The library also has banks of computers in the library proper. These computers allow students to access key search engines, databases and allow students to write and edit papers.

The Library Media Center also houses the Lowell High School archive which has material dating back to the 1830s.

Proposed change: The library media center needs an upgrade in technology to include a dedicated laptop cart along with a balance of quiet areas, reading areas, collaboration areas, meeting areas and storage space. The space needs to support multi-media, flexible group space and current research practices along with small alcoves for small group or one-on-one tutoring.

The current Media Center is approximately half the size of the state's standards and will be increased substantially, while also accommodating the needs of the school's Technology Center and professional training.

The new Media Center will serve as the technology hub and will be positioned to offer access to students in the morning and for extended day use. The space will be planned to accommodate 3 or more classes simultaneously with reading/soft seating areas, computer lab(s), instructional/presentation area(s) and a series of quiet/small group spaces. The space will include storage/charging for laptop carts and provide a room for Lowell High School archives.

I. ART PROGRAMS

The Mission of the Fine Arts Department of Lowell High School is to provide all students with a wide variety of high quality artistic experiences in Dance, Music, Theater and Visual Arts and to encourage creativity, the development of a unique artistic voice, and the enthusiastic pursuit of excellence in the Arts. The Philosophy of the Fine Arts Department at Lowell High School is to encourage all students to learn in, about, and through the Arts as a process of intellectual growth and self-discovery and as a contribution to the advancement of our collective cultural heritage. We believe that the creative process is essential to learning and we endeavor to provide a diverse, comprehensive, and sequential curriculum that includes creating, performing, presenting, and producing, making aesthetic judgments as well as

responding to the numerous connections between art and life. At the core of this creative work is using one's risk-taking, curiosity and collaborative abilities. We challenge students to become life-long learners who understand and appreciate the potential of the Arts. We strive to build student confidence and resiliency that fundamentally transforms students into creative thinkers with 21st-century skills.

Although Graphic Design, Digital Photography, Digital Audio and Animation are listed in the communications pathway, they are also part of the Fine Arts Pathway. Labs with the appropriate technology, data storage and file sharing systems and flexible furniture (except in Digital Audio lab due to pianos) are needed.

The program/plans provide dedicated spaces for Visual Arts in the form of separate 2D, 3D & General Art Studio, Graphics Lab, Digital Photography/Animation Lab and TV Production Classroom. Additional Dark Room, Kiln and Storage and space is provided. The size of each lab is proposed slightly larger than State standards due to the class sizes that run higher than standards.

J. MUSIC AND PERFORMING ARTS PROGRAMS

In the performing arts, a Dance Studio - large enough for 2 classes simultaneously with ballet bars, mirrored walls, appropriate flooring, sound system and technology. The chorus room should have a flexible foot print. The room does not need built in risers but the floor should be hardwood to allow dancing for show choir. Portable platform and choral risers along with sufficient storage and sound system.
The band room requires very large storage spaces due to the size of many of the instruments including marimbas, tubas, and drums. It also requires practice rooms and an office area. We would like to keep the current size of the auditorium to best meet the needs of the program and school.

The Performing Arts spaces include separate Chorus, Band, Digital Music/Piano Lab and (2) Dance Classrooms along with associated practice rooms, storage and office area. Similar to Visual Arts, the traditional Band and Chorus Rooms are proposed larger than State standards.

K. PHYSICAL EDUCATION PROGRAMS

<u>Gymnasium:</u>
The gymnasium and its supporting spaces would be the primary area for physical education instruction and on-campus athletics. It should include a flat track (ideally 6-lane, 150 or 200m) and three basketball courts (ideally 4 and not overlapping the track) for physical education, athletic team conditioning and track and field and sub-varsity basketball practices, (currently the four sub-varsity basketball teams and one

varsity basketball team practice off campus). The space would also include spectator seating with storage underneath.

An additional gym for special education/adaptive physical education instruction, would be located adjacent to the main gym, allowing for individual and class activities in support of students educational plans. The gym would have a wood floor with set up for three volleyball courts for special education physical education and interscholastic practice and interscholastic volleyball matches. Additionally, a main basketball court with 2 courts lined side by side across the main court for special education physical education and interscholastic practice is included. Spectator stands on one side of the gym with the set up for team benches and scoring table on the other side closest to the locker rooms, trainer's room. Storage needs would include wrestling mat storage for at least two mats.

The supporting spaces in the gymnasium would include:

- A shared space for weights/functional strength with a focus on Olympic-type lifting and dynamic/core training for physical education and athletics.
- Double sized (space for two wrestling mats) and divisible wrestling/multipurpose room for physical education instruction and wrestling practice. The divider would allow for combined or differentiated instructional offerings for physical education and for our large wrestling program to separate practice based on instructional level (currently our beginning/freshman wrestling practice in the Murphy Cafeteria).
- A multipurpose, flexible room with some spectator seating could be used for alternative physical education options during the day such as yoga, pilates, zumba, cheering and gymnastics (moveable equipment)

<u>Natatorium:</u>

The city of Lowell contains two major rivers and multiple canal systems; it is essential for the safety of our citizens that all students have the opportunity to learn to swim. The natatorium would include an 8-lane pool for physical education aquatics instruction, interscholastic swimming, and diving and community swimming. It would include independent access from a lobby area with restrooms for spectators/rental groups and spectator seating inside the natatorium for swim meets and community swimming.

<u>Administrative/Support:</u>

The administrative/support spaces would include an ice and water fill station for team access without entering the trainer's room. Male and female PE/coaches' offices with showers and restrooms Secure Storage for uniforms, clothing and equipment. An administrative office with a conference room. An athletic training room and locker rooms for use by physical education students and student-athletes.

The MSBA's standards are focused on meeting the needs of Physical Education as opposed to Athletics. As such, the creative/flexible use of PE teaching stations is necessary to best serve the needs of all. A total of (9) stations can be justified based on the schedule of PE courses, each station is considered to be 3000sf (half a basketball court sized gym).

The ideal gymnasium/track would require approximately more than 28,000sf (9 stations) and would not afford any other PE/athletic spaces.

The program/plans have allocated the 9 station equivalent which allows a 3 court gym with overlapping track, a weights/strength room, a 2-mat wrestling room and separate multi-purpose room (for gymnastics/cheering/yoga) with adjacent storage. The intent is to co-locate the SPED Adaptive PE gym and ROTC Multi-Purpose space within the overall PE/Athletic area for beneficial adjacencies and create an overall space that could include an overlapping 134.1m, 4-lane track (12 laps =1600m)

The state does not participate in funding Natatoriums, but the program/plans include an 8-lane, 25 yard pool as part of the project.

Separate boys' and girls' locker rooms, team rooms, athletic director's suite, coach's offices, trainer's room and storage rooms are included in the program.

L. SPECIAL EDUCATION PROGRAMS

Currently there is limited handicapped access to the 1922 building. Moving forward this needs to be addressed to ensure that all handicapped students can easily access all buildings to include doors that have handicapped access. Currently inside the 1922 classroom doorways have thresholds which limit a student's independence and mobility to freely move in/out of the room. Another obstacle for the students in being able to turn the door knob. Lever style handles in the classroom would again provide students independence in moving in/out of the classrooms.

It is also important for the steps to be color coded on the edges to allow those visually impaired students independence in getting from area to area. At present we have had a number of falls/trips on the steps due to the perceptual depth problems of some students.

The design plans are to be fully accessible, and seek to accommodate all learners, including those with sight, hearing, cognitive and physical impairments through a universal design approach. This approach focuses on inherent equity and barrier free planning for physical, sensory and cognitive differences. In other words, a fully sloped corridor would be preferred over corridors with a separate stair and ramp, to provide equal access and common experiences for the able and impaired alike. This concept carries into the treatment of wall and floor finishes and colors that should

be used to help accentuate changes-of-plane with visual cues. Acoustic considerations include recognition of mechanical system noise, and even quieting the sound of rain on roofs and window sills.

In addition to the number of classrooms that are required by the department, there are some programs that have specific needs. Each will be addressed below:

Lifeskills Classrooms *(4) - proposed to reach beyond to all Special Ed programs:*
Presently in the 1922 building one of our life skill classrooms houses a cooking area and a laundry area. This room is also the classroom for a group of 18-22 year old students. The facilities provided should be accessible to the entire special education program and not limited to a class. Although the 2 class periods a day that are free can be utilized, it does not afford students the amount of time required to learn the skills needed to successfully transition to adult independent living. The proposal is to have separate space for the kitchens, laundry, mail room and copy center allowing staff to sign up for the rooms.

Intensive Needs Full Size Classrooms *(2):*
The Intensive Needs classrooms house our neediest students in terms of physical, medical and cognitive needs. Each class must be full sized to allow for wheelchairs, standing apparatus, swings, etc. The classrooms also need to have full size sinks with running hot water to clean the tubing and machinery (food processors, blenders, etc) used to prepare food and feed students. Presently there is one small room attached to room 118 that serves as a sensory room for the students. It is small and presents an issue of movement on some days; a larger room, though not full size, would alleviate the jams that can be created. In terms of personal needs, the high school has 3 changing bathrooms for our students. There is one in the 1980 building (near the nurse's office) and 2 in the 1922 (ground and first floor). Staff are required to take students out of the classrooms in order to change students. A changing room/bathroom connected to the classrooms is ideal. These bathrooms need toilet facilities with handicap bars, changing tables, sinks, and hoyer lifts.

Autism Classrooms *(8):*
The classrooms for students with autism also require a full-size classroom to allow for movement space and planning stations for students. Even in high school we continue the process of toilet training some of our students so an attached single bathroom in each classroom is ideal. Presently our 18-22 year old class has an attached bathroom. At times students need to be able to go to a quiet area that gives them room to meltdown and then regroup. Presently in our older classroom we have a separate backroom which has been utilized consistently and effectively while in the younger class we had the school department install partitions to allow for such a space. Again it is optimal to keep these types of separations/rooms to manage the potential volatility of some of the students.

The program/plans provide (4) Life Skills classrooms grouped in two's (one for ages 14-18, the other for 18-22). The duel labs include dedicated toilets and shared kitchen, laundry and mail room areas. A separate Hygiene (wash/changing) space will be provided in a location that can be shared among the program.

The Intensive Needs Classrooms are also intended to be split-up between two age groups

The Life Skills program also includes (2) Intensive Classrooms with toilets, (8) Autism Classrooms with toilets, a shared Sensory Room and (2) Adaptive PE stations to be collocated with the main Gym.

Adjustment Program:

The Adjustment program has a social worker devoted to the program to help manage the behavioral outbursts and emotional breakdowns of students with emotional disabilities. Presently the social worker is housed central to those classrooms and has a 2-room suite to both counsel and give students space as needed. This type of arrangement needs to continue in order to afford the adjustment students the services they require. Additionally, the adjustment classrooms need to be of good size to allow space between the students and for the opportunity to complete project based activities while allowing areas for students to regroup/take space.

The program/plans provide (8) Adjustment Classrooms (2 to be located with the Freshman Academy) and space for the associated Social Worker, Counseling and Storage.

Fundamental Program:

One of the course offering in the Fundamentals Program is the Instructional Support Class which services well over 100 students. In this class we presently work on transitional skills, self-determination skills, and largely on academics from other classrooms. These subject area classes are using Google Classroom and students are regularly accessing information on Aspen. Presently many teachers teach this course with inadequate materials and space to truly service students fully. To meet the students' required work we require a large classroom (larger than the average) that can house up to 10-12 computers for students to regularly access. Our "Instructional support" classroom - solely dedicated to this class- presently houses as many as 12-16 students with a mere 4 computers. Students are continuously waiting to get on the systems to complete their work or check in on their progress/work that needs to be completed. As a school we are having students send information/work through Google Drive constantly but we cannot meet this need in our classes. In order to meet needs we need a large space with many computers and study carrels for students to use when they come to take a test. Presently students will leave a gen

education class and come to test in the IS class but we have no private/quiet space to offer them and the efforts we and the student put in are compromised. In addition, shelving is critical as the IS center should house a textbook from each classroom as well as space for every student to have an individualized binder to track their work and transitional planning.

The program/plans provides (9) half-classroom sized spaces (2 to be located with the Freshman Academy) and space for the large Instructional Support suite. The Instructional Support space must support the equivalent of 3 classes of 10-12 students working closely with specialists.

Deaf and Hard of Hearing *(1):*
The DHOH program is presently housed at the Freshman Academy. It requires a ½ size classroom with the typical classroom needs (i.e. whiteboard, computer, etc.)

Speech and Language (SPL):
Presently housed in 2 smaller rooms in the back of a classroom (#305), the SPL class requires office space as well as teaching space. There is an assistant that works with the speech therapist. A ½ size classroom would be sufficient and would also house a little space for the Occupational Therapist and the Physical Therapist to complete some paperwork. The Speech Therapist holds small groups (6-8) students that work as a group at a round table.

Administrative Needs*:*
The Special Education administrative team at LHS consists of the following: 2 Evaluation Team Chairpersons (ETC), 1 Social Worker (in addition to adjustment social worker), 2 Evaluators, 2 Psychologists, 1 Department Chair and 1 Clerk. The staff requires office space, meeting rooms and testing rooms in order to complete their work. The main office for special education must be a locked room as it contains confidential files. This room (presently #144) houses the clerk, Department Head, and ETCs and works well. Optimally, each staff member evaluating (evaluators, psychologists) would have a small office to allow them to test in their room where all the materials are located. Presently evaluations occur in a number of places - wherever there is a free spot. The teams hold over 400 meetings a year and the need for meeting rooms is critical. We presently have 2 rooms: one is located in the Students Support Services office and one is located in room #220. Social workers also need a room that is individual in order to service students. The adjustment program is a little different and is addressed above.

The program/plans provide a half classroom for the Deaf/Hearing Impaired program, Speech Office for 3 + meeting for 6, (2) Social Workers, (2) Psychologists with (2) Evaluators/Testing, (2) Meeting Rooms, a SPED Dept. Chair, (2) Team Eval. Chairs and SPED Office/Clerk.

M. VOCATIONAL EDUCATION PROGRAMS

Non-chapter 74 Programming

- Air Force ROTC

  The Air Force Junior ROTC Pathway is a four-year citizenship program designed to develop citizens of character dedicated to serving their nation and community. The objectives of AFJROTC are to educate and train high school cadets in citizenship, promote community service, instill responsibility, character, and self-discipline, and provide instruction in air and space fundamentals. The program is grounded in the Air Force core values of integrity first, service before self, and excellence in all we do. The curriculum emphasizes the Air Force heritage and traditions, the development of flight, applied flight sciences, military aerospace policies, and global awareness. Rigid academic courses in military science and leadership provide a solid foundation. The curriculum shows students how to reach their full potential while serving society through self-discipline, structure, followership, and leadership. Students are challenged by assuming various leadership positions throughout the Lowell High School Cadet Corps. Senior Cadets are responsible for organizing, planning, and coordinating all cadet operations and activities. In addition to classroom curriculum, learning includes numerous extra-curricular activities including before/after school programs, field trips, and community service activities. These activities emphasize teamwork, discipline, and community engagement.

  This program provides both classroom instruction and physical fitness training that requires multiple classrooms and a dedicated physical training space where cadets can drill and conduct physical training without disturbing other classes in the vicinity.

  The program/plans provide (5) classrooms (1 more than exists) and a 2,500sf multi-purpose space dedicated for drills, physical training, color guard, etc. per USAF standards. Additional prescriptive storage, cadet office and conference areas are provided. The ideal location for ROTC programs would be near PE/Athletic areas for shared use of spaces and with easy access to outdoors.

- Communications

  The Colleen Creegan Media Center: The Digital Media Studio requires an adjacent flexible classroom, a Digital Media Production Lab, with state of the art computers, wall monitors and secure storage where students will learn all aspects of media production - pre-production through broadcasting in a flexible, authentic environment. In addition, the Digital Media Studio should have individual editing bays with computers and updated software, a collaborative meeting space for students and digital media studio staff along with sufficient

storage to house all the equipment required to maintain a state of the art digital media production studio.

Within the actual studio, there needs to be a lighting grid with a sufficient number of light fixtures to allow for dedicated lighting cues for sets - newsroom desk, interview set, etc. A teleprompter, digital light and sound boards, the ability to add graphics and transitions, production switchers, duplication and storage, capture and playback deck, broadcast converters, video monitoring, audio monitoring, working communication between studio floor and control room and the ability to shoot/broadcast in HD. An edit/share system allowing for collaboration between digital media classes, graphic design classes, digital photography and digital audio classes.

In addition to the Digital Media Production studio and lab, additional labs for graphic design and digital photography as well as a digital audio lab that included digital pianos are essential. An edit sharing/storage system that would allow students and staff to work collaboratively - graphic design students create images and logos for TV broadcast, digital audio students create soundtracks for news segments, etc. For animation, tablets and computers are needed.

The Colleen Creegan Media Center also houses Lowell Educational Television, the educational access channel for the city of Lowell. Three staff members manage content and programming for channel 22 and let22.org as well as support LHS class activity. The studio contains a full sized media studio, edit rooms, small offices, and storage rooms. A teacher works in a media computer lab classroom where students create content for in school and city of Lowell broadcasts.

Proposed change: Locate the classroom within the media studio suite and provide students with private workspaces that allow them to focus on their media projects. It is essential to have flexible space and classroom adjacencies to allow for additional related programs to enhance the learning experience and allow for collaboration between the studio and journalism, music and digital music production, graphics, live music production, web radio production and drama and acting.

The Media Studio is replicated in the new program and ideally located with other digital media programs and/or arts programs in the plans, with classroom space nearby.

The program/plans provide equivalent square footage to what exists, with a slight increase to address the need for a larger conference/meeting room. The suite will be configured with a full-size Studio, Waiting Room, Control Room, (8) Editing Suites, Media Classroom, Equipment Room, Offices for 3 and a Conference Room

for 15. The location would ideally be clustered near other Digital Media spaces and/or with Fine Arts (Digital Photo/Animation, TV Production & Graphics).

- Culinary

  The Culinary Arts Department is designed for students interested in careers within the Food Service Industry, one of the largest and fastest growing industries in the world. This Pathway is ideally a three year program that can be tailored to one or two years on an individual basis. This Pathway integrates a rigorous academic curriculum, but it also provides "hands-on" training in a student-operated restaurant. Students are exposed to different baking and cooking techniques, a variety of table services, and customer relations. This Pathway provides a professional environment so students will culminate a basic, well-rounded education in Culinary Arts. All students complete the program with a portfolio and enough experience to secure an entry-level position within the Food Service Industry or pursue careers through higher education. Students also have the opportunity to train and test for the Serve-Safe Certification.

  Proposed change: The restaurant with its full service kitchen is not in the best location to serve the general public. It is currently in the basement and anyone being buzzed in the exterior door can go in many different directions within the school. This is a safety concern. The restaurant should be located with easy monitored access from the lobby in the same vicinity as the school store and the bank. This would keep our school businesses accessible to the general public while ensuring safety. The configuration of culinary area should be made up of the restaurant/kitchen with adjacent classroom space and an adjacent culinary lab for feeder culinary program. This would allow for more effective collaboration within the department. The other piece that is crucial is adequate storage space for inventory to include adjacent space for walk in freezers and refrigerators.

  The program/plans provide (2) Culinary Classrooms along with the Kitchen/Restaurant and associated Freezer/Cooler and Dry Storage spaces. The new spaces are sized slightly larger than the existing and ideally located for easy, but controlled access by the public and for after-hours use. The kitchen will benefit further from shared access to loading/receiving areas.

- Engineering

  Maker Space Lab - The LHS Makerspace will allow for student intrinsic motivation and self-directed learning, while engaging students in significant content by allowing for connections to curriculum. The Makerspace will reinforce or introduce to students the components of all LHS STEM disciplines.

  An unassigned Maker Space serves as pull-out space for the 9th Grade. The Science Lab sized space will have an adjacent prep room for associated storage

of materials, projects and 3D printing. The space will be located within the Freshman Academy areas.

Engineering Lab - Technology/engineering classes will be able to move seamlessly between tool-based work, lecture, group work, and non-tool-based labs. Physics and robotics classes will have direct access to woodworking and metal tools for hands-on applications. All classes in this Pathway will be able to move from paper-based lecture or group work to computer based design to manufacturing

Proposed change: The growth of this program has prompted the need for 2 Engineering labs so that all classes can have full access to this facility and educational/technology tools.

The program/plans provide (2) Engineering Labs as required to meet prorated scheduling. Each room is sized as a traditional Science Lab, but will be outfitted according to the specific needs for CADD and Robotics.

- Environmental Sustainability (in development)
  All classes in this Pathway will be able to move from classroom/academic work to hands-on, designing and manufacturing (computer-based, solar panels, etc.)

  Proposed change: With the addition of a lab, students will be able to access design and manufacturing tools in house (rather than using facilities at satellite locations - such as businesses and collaboratives).

  The program/plans provide a Science Lab sized space that will be developed as a new pathway for clean energy and sustainable design. The enrollment for this program is expected to come from other tech/engineering programs which might reduce in utilization, but provide specialized spaces to support each pathway.

- Health & Bioscience
  The Health and Bioscience Pathway is designed for students with an interest in the fields of allied health and/or the emerging field of biotechnology. The Health and Bioscience Pathway offers students a unique opportunity to gain essential classroom knowledge and practical experience within the local medical or biotechnological community.

  Proposed change: *Hospital Room Model Classroom* - Students will interact with model patients and learn how to conduct electrocardiograms, draw blood, interpret X-rays, set broken bones, and perform a range of other challenging tasks.

The program/plans provide a separate Health and Bioscience Lab as part of the overall count of Science Labs, but each is to be outfitted for the specifics of either medical assisting, including associated patient beds, mock toilet/changing room or micro/biotech which includes specialized fume hoods and clean room set-up.

The design/plans seek to create a dispersed pattern of interdisciplinary STEM and Humanities clusters, each potentially grouped as (3) science labs with (3) math classrooms vs (3) english with (3) social studies classrooms. Ideally, each cluster would have shared pull-out spaces and good visibility to foster collaboration and small-group and project-based activities. The visibility may allow a bit more independent work by students and also provides passive supervision throughout academic areas. ELL academic classrooms/labs will be woven alongside regular academic clusters in groupings of (2), as will health classrooms and special education spaces. World Language is to be grouped as a department, similar to Fine Arts, Business/Tech, ROTC and Physical Education, and located for ease of access among all grades.

Larger classrooms are critical to meet the needs of more active learning and to accommodate more flexible furniture that allows for multi-mode set-ups and better accommodates individual computing.

<u>Chapter 74 Programming:</u>

- Business Marketing & Finance

Lowell High School offers a Marketing & Finance Pathway for students interested in majoring in Business Administration in college or entering the workforce in the areas of management, finance, accounting, or marketing. The Marketing & Finance Pathway offers students authentic learning opportunities. Our students have the ability to work in the 1826 School Store, with a site in the high school and another in the downtown. Students experience the excitement and challenges of being a small business owner. Our marketing program partners with NFTE (Network for Teaching Entrepreneurship) which provides numerous hands-on learning activities and opportunities. Our partnership with the Jeanne D'Arc Credit Union allows students in the pathway to work in the Lowell High School branch of the Jeanne D'Arc Credit Union. In this branch, students learn the day-to-day operations of the banking industry. Both these valuable business opportunities allow students to earn high school credit and real world experiences while providing valuable services to the school and community.

Proposed change: The school store requires an adjacent flexible classroom (marketing retail lab) with retail and storage space to effectively provide students with real world experience in running a store, which includes customization of t-shirts, inventory control, customer service, accounting, marketing/advertising, and online

sales. Beyond the retail program there is a need for flexible, technologically-equipped classroom space that allows for the use of online business and marketing simulations, software designed specifically for these types of classes, and online research. Positioning the other four business classrooms in the vicinity of the store would be beneficial in allowing more collaboration between the teachers. The bank is currently located within the cafeteria which allows for access by students and staff but does not allow for easy public access. There is a need for a larger space for the bank. The store and the bank should be co-located with the restaurant program in a configuration that allows for access through the main lobby for security purposes.

The program/plans provide (5) Business Finance/Marketing classroom/labs, (3) of which are recognized under Massachusetts Chapter 74 Program for Marketing and include the School Store. A separate space for the Bank is provided as a pull-out component of this program.

All Business programs would ideally be located as a cluster, but the larger priority is positioning the Bank, Store and associated Classrooms near the Cafeteria, Main Entry/Lobby and easily accessible for public and afterhours uses. Separate storage for retail/supplies is provided.

N. TRANSPORTATION POLICIES

Transportation is not provided to Lowell High students to get them to and from school. If a student wishes to use the Lowell Regional Transit Authority bus, the cost of a bus pass is $20.00 per month. A survey of students conducted during the 2014-2015 school year indicated that students commute to and from school using the following methods: ride from family/friend (33%), walk (32%), ride city bus (24%), drive (11%). Daily, 11 LRTA buses transport students at drop-off and pick-up times, lining up along French Street and Kirk Street.

Approximately 83 SPED students are transported to and from LHS separately each day with 10 total of the following: specialty equipped wheelchair vans, yellow buses, and smaller vehicles.

Transportation for Athletics is extensive. Daily, about 7 buses line up at the main entrance on Father Morissette Boulevard to transport students to practices at Cawley Stadium, the boat house and other locations. Students provide their own transportation home from practice. On game days, there can be up to 4 additional buses that pick up students (also at the Father Morissette location) for transportation to games.

Note; the Educational Program does not address parking needs. The site program is articulated in section 3.1.5 Site Development Requirements. The school currently benefits from its location that utilizes city transportation, wide streets and adjacent

parking garage. Planning options that create a new school a different site will need to account for parking and transportation as part of the site program.

O. FUNCTIONAL AND SPACIAL RELATIONSHIPS

Lowell High is interested in exploring different organizational structures that would more fully support the concept of expanding areas organized for STEM classrooms, Humanities classrooms, and CVTE classrooms. LHS is considering clustering academic Department Head offices together by subject matter connections (Humanities, STEM, CVT) and integrating the houses into this configuration. One way to do this would be to place two house offices in a combined house and guidance suite in proximity to a department center. This would allow for administrative presence in multiple areas of a large building. Another option would be to place all the house offices into one central space near the main office, such as a house and guidance suite. The Freshman Academy, while housed within the same large building, would have a separate office suite for the Director of the Freshman Academy.

The broad planning goals are to organize a new or renovated school for community use and control by having a zone or zones with major activity areas, such as the PE/Athletics spaces, Auditorium, Cafeteria and Media Center able to be opened or closed in a controlled and naturally supervisable way. The Cafeteria and Media Center seek to serve as the heart of the school, one as the social core and the other as the technology hub. Both located and configured for flexible use and access to views and outdoors. The culinary program would ideally be in proximity to the lobby as well as cafeteria kitchen/loading areas. The culinary restaurant, school store and bank also need to be located near the main lobby/community use areas.

The freshman are to be zoned in a separate wing, but well connected to shared programs and major spaces. Freshman academic rooms are to be clustered as teams of 6 classrooms + 2 science labs with nearby special education, health, ELL classrooms and a teacher planning room. Other academic rooms are to be organized in STEM clusters (3 science with 3 math) and Humanities clusters (3 english and 3 social studies), but in an alternating pattern that promotes collaboration within each cluster and convenient cross-discipline connections between STEM and Humanities.

Special Education, ELL and Health Classrooms are to be dispersed with general academic areas (grades 9-12), but ideally in groups of two.

Fine-Arts, World Language, ROTC and Digital Media programs are to be clustered alike, while seeking proximity to general academics for foster potential inter-disciplinary efforts.

P. KEY PROGRAMMATIC ADJACENCIES

As described in section O above

Q. SECURITY AND VISUAL ACCESS REQUIREMENTS

Of critical importance to the Lowell High community is an environment that is safe and secure. The school currently has 32 entrances. After the start of the school day, all doors are kept locked with the exception of the main lobby door. A security guard monitors the door closest to the Freshman Academy at class changing time to allow student to enter the main school without having to go to the main entrance. The main entrance has no buzzer or electronic monitoring system to manage entrance into the building. There is a security desk in the main lobby where visitors are expected to check in and be given a visitor's pass but visitors can easily bypass the guard who might be busy checking another visitor in. The school uses the Raptor visitor system and during school hours the school has over 10,000 visits each year. The high school has approximately 110 analog cameras throughout the three buildings that are being replaced by digital cameras as the analog cameras wear out. Currently the command and control center in an emergency is the security office that has multiple camera monitors and the ability to use the intercom. This space is not secure having both an interior glass door and large ground level windows to the outside.

At its current site the high school has a neighboring facility that is of adequate size to house students in an emergency/evacuation situation. This is important factor in our safety protocols that allows us to account for both students and staff in a safe alternative environment.

Proposed Change: The plan should include an upgrade to the cameras system. The security vestibule should be configured to better monitor the main entrance to the school to include a camera and buzzer system on the door. If the high school continues to occupy multiple buildings the second building should also have a security entrance to better monitor the flow of students, staff and visitors. The school would also benefit from a secure command and control center preferably in the vicinity of the main office with multiple monitors to display footage from security cameras, an intercom system and space for a conference table. To alleviate bottlenecks and overcrowding during class changing time having multi-level bridges would be very beneficial and would limit the amount of students choosing to go outside to move between buildings. The school also needs a more robust security system that allows for automatic lockdowns of all exterior and interior doors along with a system of communicating with police and rescue. The current intercom system is past its functional life and needs to be upgraded to better meet the needs of the school.

The proposed planning concepts include a controlled main entry vestibule with security desk, adjacent SRO Office and a conference room that can function as Command/Control Center and also serve as DARE meeting space. A satellite SRO Office will be provided due to the large size of the school.

The planning layout for new or renovated facilities will be zoned for the ability to lock-off wings and control after-school use and community access. This includes locating the school store, bank, culinary and administrative houses for access from main lobby and functional areas.

R. OTHER PROGRAMS

In-House Suspension(2): The high school has two separate in-house suspension rooms, one for grades 10-12 and one for grade 9. These rooms are used all day and students do self-reflection and coursework with the assistance of the in-house teacher who acts as tutor/counselor.

Student Activities: The high school also has a student activities office that manages 32 after school activities and clubs. This office space is located in the cafeteria for easy access by students.

Nurses' office. This office has four assigned nurses. This space needs to have a reception area, private exam rooms and storage space for equipment and student records.

Outside service providers provide both academic support and health and social services:

- SCORE Mediation: Mediation office that trains students to work as mediators on student issues referred by house deans and other staff members. This space requires and office and a small meeting room.
- MCC/UMass: Programs provide intensive academic support and college/career support for 1st generation college and underserved populations. These programs require office spaces and a classroom (TRIO; Gear-Up / Talent Search / Upward Bound)
- Catie's Closet: A nonprofit that provides clothing and cosmetic items for students in need. Space needed is the size of a small classroom.
- Health Center: Lowell Community Health has a medical suite at the high school to service students with medical and mental health issues.
- Counseling Services: Outside counseling providers come into the school to support students with mental health needs.
- Safe Harbors Homeless Coordinator: Office space needed for program coordinator that assists our homeless student population.

The program includes (2) classrooms for In School Suspension, a student activities space and full Nurses' Suite per MSBA Guidelines. An office and waiting/secretary is provided for Score Mediation, along with a 3-room suite for MCC/UMass Trio programs, 2 spaces for Catie's Closet (1 with freshmen), a suite of rooms for the Community Health Center and space within the Student Support Center for Safe Harbors.

The program also provides a small space for Latino Connection and an office for substitute teachers. Counseling Services occur throughout the school, within available space.

See Appendix for further information

(This page intentionally left blank)

3.1.3 Initial Space Summary

A. Space Summary Description

B. Proposed Space Summary Form

C. Floor Plans

(This page intentionally left blank)

3.1.3 Initial Space Summary

A. SPACE SUMMARY DESCRIPTION

Perkins Eastman| DPC has worked collaboratively with the School District on space needs, primarily through the Educational Leadership Team (ELT), assembled for the purpose of researching, reviewing and recommending the Educational Vision and Program to the School Department and Building Committee. The ELT group included Building Committee, Superintendent's Office and Facility/Operations Representatives along with School Leadership and the Design & OPM Team.

Refer to Appendix Section T for an overview of the ELT and tasks

The program and space needs for the Lowell High School Project is based on the MSBA agreed upon enrollment projection of 3,520 students in grades 9-12. The Proposed Space Summary (following this narrative) provides an itemization of existing spaces, including separate Freshman Academy facility. The proposed space needs are tabulated based on an analysis of existing and future programs, class sizes, scheduling and pro-rated design enrollment.

The proposed spaces vary from the MSBA's default tabulations only where we believe they are justified to meet the Educational Program or maintain specific needs for Lowell. The variances between MSBA space guidelines and the proposed program are as follows;

Core Academic Spaces are proposed at **11,540sf lower** than the guideline tabulation and effectively 11 academic classrooms/labs less. This is somewhat the result of students spending time in other places (like additional Fine Arts and PE spaces), but primarily the result of Lowell's classroom averages being slightly higher than the MSBA formulas. A simple calculation shows the difference between 23 and 24 class size average in a school as large as LHS creates a difference of 8 rooms alone:

3,520 students /23 class size avg. /.85 utilization rate = 181 rooms

3,520 students /24 class size avg. /.85 utilization rate = 173 rooms

Actual program and space need calculations were based on a much more extensive analysis of the existing programs, scheduling, class sizes and utilization of spaces. Our Program Analysis tracks pupil periods (every pupil for every period of the cycle) to ensure a closed loop of accounting and to reveal academic nuances, such as deliberately larger or smaller class sizes or utilizations. The Analysis was then pro-rated and Adjusted for the design enrollment and for significant program changes that would affect the type, size or count of rooms. The program Requirements were then tabulated and reconciled with the MSBA Space Summary template.

Refer to Appendix Section H for full programming documents

The proposed 112 Classrooms + 6 Small Group (half classrooms) back-calculate at between 83 and 84% utilization, assuming a 24 student average for classrooms and 12 to 14 for small group. Actual classes typically range +/- 4 students, so classrooms are sized larger than the 850sf default (proposed are 900sf) to better accommodate class sizes of 28, along with more project-based activities.

Note; ELL classes are calculated with 20 student average, Physical Education at 26 and Special Education, Fine Arts, Business and Technology are based on existing class sizes.

Science Labs are typically calculated at a lower utilization to allow additional time for lab set-up (in this case 76%). A total of 28 labs are proposed vs. 31 per guidelines, 20 being full-sized 1,440 sf in accordance with MSBA requirements and 8 being wet-classrooms at 1,000sf for 9th grade Integrated Science.

Special Education programs are proposed at **4,260sf larger** than the guidelines. The increase is based on right-sizing current rooms for the number of occupants and activities anticipated within each (as described in the Educational Program narrative, section 3.1.2). The District understands that the proposed Special Needs program will be submitted and vetted by the Massachusetts Department of Elementary and Secondary Education (DESE).

Specific increases in Special Education needs include planning for an increasing Autism Program (6 additional classrooms needed based on actual growth in the elementary and middle schools), creating dedicated Adaptive PE space (2 stations are justified based on the frequency of scheduling) and providing an additional Adjustments & Fundamentals Classrooms per prorated enrollment calculations.

In addition to the full size rooms noted above, there is an expressed need to provide adequate offices, conference and testing rooms as proposed.

Art & Music rooms are proposed at 1,651sf less sf than existing and **5,125sf larger** than guidelines, with the same count of spaces, except for 2 additional rooms to maintain the existing Dance program and a Digital/Piano Lab. The room sizes, however, are based on the need for larger classes than otherwise anticipated in the MSBA guides. Like typical classrooms, Art Rooms are expected to accommodate up to 28 students and therefore sized larger at 1,350sf.

Art Room guidelines are 1,200sf for 25 students = 48sf/student

Planning for Art classes that spike at 28 x48sf/student =1,344sf

Similarly, Band and Chorus Rooms, currently and in the future, must accommodate more than the 50 students guidelines are based on. With actual sizes projected at 69-70 students, the rooms are sized at 2,000sf.

Music Room guidelines are 1,500sf for 50 students = 30sf/student

Planning for Band/Choir at 69-70 students x30sf/student =2,100sf

The guideline of 1,775sf for Practice and Storage has been reallocated as 1,800sf including Office and Conference space.

Vocations & Technology spaces are proposed at **2,185sf less** than guidelines, but based on actual LHS programs and the specific space needs which will continue to be tested as room and equipment layouts are studied. Business and Culinary classrooms are sized at 1,200sf per guidelines, with the exception of Marketing, which is subject to DESE standards.

Marketing is an approved Chapter 74 program that will be maintained. Space needs are complex to calculate, because they are based on full-time equivalent enrollment

(FTE), which changes year by year, by semester, daily and per period. A total of 285 students are enrolled for 306 seats, which averages 41-44 students/period, but range from 10 to 72. Prorated, these numbers climb to 321 total students, average 47-50/period with a range of 12-82. Using DESE standards at 110sf per student, these could total between 5,500sf and 9,020sf depending on how the FTE is interpreted. Our approach, instead was to calculate the number of rooms required and size them appropriately, recognizing that the 1:20 teacher/student ratio.

321stu /20per class =16 sect's x5p./cycle =80 /35p.cycle =2.3 /85% util. =2.7rms

With 2.7, or effectively 3, rooms required and 1:20 ratio, 60 student could be seen as the max seats/period, which would result in 6,600sf per DESE standards. This space summary propose the 3 marketing computer labs, sized comfortably at 1,000sf, having another 600sf pull-out space for school store and 200sf for retail storage. All spaces being slightly larger than existing.

The District understands that the proposed Marketing program will be submitted and vetted by the Massachusetts Department of Elementary and Secondary Education.

Culinary, although not an approved Ch.74 program is sized per DESE standards. The program currently has 80 students in Culinary and 120 in Foods averaging 20-27 students per period, but ranging from 18-38. Prorated, these numbers climb to 90 Culinary/136 Foods with averages at 23-31/period and a range from 21-43. Using DESE standards at 125sf/student these could total between 3,875sf and 5,375sf de depending on how the FTE is interpreted. Using the 1:15 teacher/student ratio for Culinary and typical class size for Foods, a total of 3 spaces would be required;

90stu /15per Culinary = 6sect's x10p./cycle =60 /35p.cycle =1.7 /85% util. =2rms
136stu /24per Foods = 6sect's x5p./cycle =30 /35p.cycle =.86 /85% util. =1room

With 3 rooms required, and largest projected period of 43 students, the 5,375sf calculation was used. The space summary proposed 2 classroom/labs at 1200sf + Kitchen/Restaurant at 2,975sf, totaling 5,375sf and providing spaces slightly larger than existing. An additional 600sf is provided for associated storage.

ROTC programs have specific guidelines that mandate a 5th classroom at >350 students (385 are currently enrolled, which prorates to 434 for design enrollment). ROTC classroom match academic classroom sizes at 900sf.

An ROTC Multi-Purpose/Gym is used for pull-out drills, marching, training and wellness, and cited as requiring 2,500sf based on units of 100 (2,500sf is proposed) + storage. Storage regulations are 400sf minimum, with 4sf extra for every cadet over 100 cadets, which totals 1,736sf min. (1800sf is proposed).

Health & Physical Education spaces are proposed at 3,318sf less than existing, partly due to inefficiencies, but **14,038sf more** than guidelines, which seems like allot, until you look deeper into the default calculations. The guidelines currently base locker room needs on the number of students, but office storage and gym stations are a fixed number despite a school having 500 or 3,500 students.

Our programming calculations show that 9 PE stations are required, even with large class size averages (26 students) and 84% utilization. The proposed space summary shows 9 PE stations as an 18,000sf Gymnasium (6 stations x 3,000sf), (1) Wrestling Room, (1) Weights/Functional Strength Room and (1) M.P. Room. Dance Rooms were considered for possible use as PE stations, but are already substantially utilized at an estimated 93%. PE/Athletic Storage and Offices areas are also not scaled-up per size of school in the space summary template, but given this school is 2 to 6 times the size as most schools, we have estimated larger spaces are needed. Locker Rooms, however, are shown at less sf than guidelines, partly the result of trying to counter balance other increases, but also using the existing relatively functional rooms as a guide and prorating for increased enrollment.

The Pool is a valued and vital part of the school and community offering daytime, athletic and afterschool/adult education opportunities. As only one of two pools in the City, it is critical given the surrounding context of extensive canals/waterways. It had been noted through the visioning process, that the high percentage of underprivileged families benefit substantially from having access to such facilities.

Auditorium/Drama spaces are proposed at **5,116sf larger** than guidelines which, similar to the Gymnasium, does not increase fully with the magnitude of Lowell's 3,520 students. The formulas are based on 2/3 of the student enrollment, but cap-out at 750 students (2/3 of 1,120 population). This cap seems reasonable even as many schools have populations of 1,200, 1,500 and even 2,000, but we submit that Lowell could easily be seen as the equivalent of 2 or 3 High Schools. Our proposed space summary suggests a relatively modest 1/3 of the 3,520 design enrollment, or 1,161 students x 10sf = 11,616sf. The stage is also sized slightly 1,00sf larger to accommodate the larger Band, Chorus and other productions.

A second auditorium exists within the current Freshman Academy building, but would be repurposed in renovation options that keep that building or not replicated in the case of a new or renovation option that does not keep that existing facility.

Administration & Guidance spaces are proposed at **3,920sf larger** than guidelines, but 1,718sf smaller than existing. The proposed offices are based on the counts and sizes necessary to meet the educational program including a main office, 5 separate house offices (including freshman academy) and separate student support center.

While the breakdown in office suites does create some inefficiencies, it is necessary to accommodate the volume of students and parents that need to meet with administration, guidance and support services. Additionally, the school's rich diversity and high ESL population, many entering the school system at the secondary level, along with those coming from underprivileged homes, requires an increased need for specialists and support staff.

Custodial & Maintenance spaces are proposed at approximately the same size as exists, but **2,175sf larger** than guidelines due to the fixed sizes (other than Receiving and Storerooms that are based on population). Given the sheer size of the high school, other custodial sf allowances are proposed at double the amount allocated. 6 Network/telecom rooms are proposed vs 1 in the guidelines, based on the size and spread of facilities. This number could reduce in a hyper-consolidated new plan.

Other Programs identified in the proposed space summary, **add 7,700sf** vs guidelines, but are substantially reduced from the existing 19,764sf (-12,064sf). The major reduction comes from the transition from dedicated computer labs (10 exist, totaling 8,457sf) to a plan to provide computer carts short-term, while planning for a 1:1 environment long-term. Other cuts include an unassigned freshman science lab and interactive learning center that can utilize laptops in classrooms, rather than dedicated space.

The programs being maintained and considered integral to the educational needs and objectives include the Lowell Community Health Center, Catie's Closet, MCC Trio Programs, In-School Suspension spaces and several smaller activities and services (Score Mediation Office, Latino Connection Office, Student Activities Room, Substitute's Work Space, Student Resource Officer and Dare Offices)

The bottom-line net program is proposed at 28,609nsf larger than MSBA guidelines and although sf variances ebb and flow throughout subject areas, they effectively balance each other out, reflecting the specific needs of where LHS students spend their time. The real substantive difference between proposed and MSBA guidelines can be summed-up in 4 areas;

1. Auditorium for 1/3 enroll. (+5,116sf)
2. justifying 9 vs 5 PE stations (+12,000sf)
3. desire to maintain a pool (+8,000sf)
4. intent to keep other prgms (+7,700sf)

+32,816sf

The Total Gross SF is 37,484sf larger than guidelines, based on the proposed net program with a 1.5 grossing factor applied. We understand that while 1.5 is the acceptable multiplier, it will be applied to the approved program spaces.

B. PROPOSED SPACE SUMMARY FORM

See the Attached Space Summary

C. FLOOR PLANS

High School Space Summary

3.1.4 Evaluation of Existing Conditions

A. Executive Summary

This report examines the existing conditions of the exterior and interior of the Lowell High School which is a campus comprised of multiple buildings: the "1922 Building" (collectively includes the original 1892 Coburn Building, the 1922 Sullivan Addition and the 1997 Kouloheras Addition), the 1980 Lord Building and Field House Building, and the Freshman Academy which consists of the former 1901 Lowell High School Commercial and Manual Training Department (Trade High School) and the former 1939 High School Annex. The Steam Plant was constructed as part of the 1922 High School addition. It includes a review of all the systems and is meant to act as a snapshot of the overall facility condition at the time the reviews were completed. The consultant team has visited the existing buildings, spoken to the facilities and maintenance staff, reviewed the areas of the building applicable and relevant to their respective trades and provided a base existing conditions report as well as a summary of necessary repair scope, as applicable.

These existing conditions analyses included: review of the available construction drawings from the City Engineering Department and the High School, available drawings from the Massachusetts Archive, the Comprehensive Facilities Assessment by OMR Final Draft dated February 28, 2014, and on-site observations by Perkins Eastman|DPC and their consultants during the months of August, September and October 2016.

Perkins Eastman | DPC visited and cataloged every room and surface in the facility, any deficiencies discovered during that effort were recorded in the field and then transcribed in the office onto existing condition drawings and schedules to develop the project base repair scope for the estimator. Design Team consultants also visited the site and recorded their observations in reports. These drawings, schedules and reports are included in the appendix.

The Lowell High School is located at 50 Father Morissette Boulevard in Lowell Massachusetts. The +/- 6.6 acre campus is comprised of 4 parcels, 4 buildings and 2 bridges that span the canal totaling approximately 626,188 s.f. The condition of these buildings vary with the vintage of each and are summarized in this section.

The campus is located in the DMU (Downtown Mixed Use District) within the city. Lowell High School is located along Father Morissette Boulevard, Arcand Drive and French Street. The Freshman Academy is detached and located at the intersection of Paige Street and John Street adjacent to the Steam Plant. The two main high school structures are the 1922 Building and the Lord and Field House Building which span a segment of the National Historic Park's Merrimack Canal and Lucy Larcom Park.

On the east side of the Merrimack Canal the existing Lowell High School is listed on the National and State Registers of Historic Places through its inclusion within both the Lowell National Historical Park & Preservation District, the City Hall Historic District, and the Downtown Lowell Historic District. This applies to the buildings on Kirk Street including Coburn Hall (1892) and an addition built circa 1922; the 1997 addition is also in the National Historical Park by virtue of its attachment to the High School Building. The 1980s sections (Lord and Field House) are within the preservation district, and within the Lowell Downtown Historic District. The 1980's buildings may be deemed less historically sensitive, but all work on those buildings will require Lowell Historic Board and likely also MHC review. Three nearby buildings also associated with the high school, the former Lowell High School Commercial and Manual Training Department (a.k.a. Lowell Trade School) (1901) Located at 68 John Street, the Lowell High School Annex (1939) located at 55 French Street as well as the Steam Plant and associated smokestack on French Street are also listed on the National and State Registers of Historic Places through their inclusion within both the Lowell National Historical Park & Preservation District and the City Hall Historic District. The Lowell Trade School/Lowell High School Annex were subsequently renovated circa 1997 as the Freshman Academy.

As to be expected with facilities that have been renovated over time, the buildings have portions which comply with the ADA (Americans with Disability Act) / MAAB (Massachusetts Architectural Access Board) and other spaces that don't. A substantial renovation project would likely exceed thresholds that would require altering non-compliant areas to comply with these regulations.

In general, the various buildings have more than the minimum number of toilet facilities to address the projected enrollment of 3,520 students and approximately 500 staff. Some of the toilet room layouts are not compliant and toilet fixtures can be eliminated to allow for reconfiguration of compliant toilet rooms.

Recommendations for Future Investigations for All Buildings:

In general, the available existing information is incomplete and does not reflect the current configuration of the campus. Should the existing buildings be part of a renovation or expansion project, it is recommended that a full laser survey of the buildings be done to confirm layout and dimensions, as well as invasive testing to determine the existing structure of the older vintage buildings.

3.1.4 Evaluation of Existing Conditions

B. Developable Property

See appendix for additional information regarding Titles and Deeds.

The Lowell High School campus is bordered by Father Morissette Boulevard, the Tsongas Center and George A. Ayotte Parking Garage to the north, an office building and the Lowell Masonic Association to the south, Kirk Street and The National Park Headquarters and the Steam Plant and Freshman Academy Buildings to the east, and Arcand Drive and apartment buildings to the west. The main campus is bisected by the Merrimack Canal which has an active trolley track on the east side of the canal, and Lucy Larcom Park on the east.

Water:

Lowell Regional Water Utility (LRWU) water mains provide domestic and fire protection service to all high school buildings. A 20 inch main runs east - west in Father Morissette Boulevard which splits to a 12 in main continuing on Father Morissette and a 16 inch main running southerly in Arcand Drive. A 6 inch main runs north – south between the Merrimack Canal and the 1922 building in Lucy Larcom Park. A 20 inch main runs easterly and westerly in French Street which supplies a 6 inch main that runs northerly – southerly in Kirk Street. A 6 inch main tees into the Kirk Street main which runs easterly – westerly in Paige and Lee Streets. A 6 inch main runs northerly – southerly in Dutton Street.
See appendix for further information.

Sanitary Sewer:

Lowell Regional Wastewaste Utility (LRWWU) provides sewer service to all high school buildings. A 15 inch sewer main runs in a northerly direction in Arcand Drive which connects to a 24 inch sewer main at the intersection of Father Morissette Boulevard and then turns westerly and connects to a 48 inch sewer main in Father. Morissette Boulevard. A 15 inch sewer main beginning west of the Merrimack Canal located in Father Morissette Boulevard running westerly increasing in size to 18 and then to 24 inches. A 12 inch combined sewer runs northerly in Lucy Larcom Park connecting to a combined 12 inch sewer main in French Street. A 16 x 18 inch combined sewer main runs northerly in Kirk Street to a 24 inch combined sewer main in French Street.
See appendix for further information.

Storm Drainage:

The storm drainage service is provided through a combination of the Lowell Regional Wastewater Utility (LRWWU) by way of a combined sanitary and stormwater system, which does not meet DEP Stormwater Regulations 2008 and a separate stormwater drainage system. There is a 24 inch drain line in Arcand Drive running northerly and connecting to a combined 24 inch sewer main in Father Morissette Boulevard. There

is a 15 inch increasing to 36 inch drain line running westerly in Father Morissette Boulevard. A 15 inch increasing to 24 inch sewer main also is running westerly in Father Morissette Boulevard. A 12 inch combined sewer runs northerly in Lucy Larcom Park connects to a combined sewer in French Street that turns easterly. A 16 x 18 inch combined sewer main runs northerly in Kirk Street.
See appendix for further information.

Gas:
The city's gas service is provided through National Grid. A 6 inch gas main is located in Father Morissette Boulevard. A 4 inch gas main tee's off the 6 inch main at the intersection for Father Morissette and Arcand Drive and continues southerly in Arcand Drive. The 6 inch gas main splits at the eastern end of Father Morissette and continues southerly parallel to the Lord Building and into Merrimack Street. A 6 inch gas line runs in northerly in Dutton Street. A 4 inch gas line runs in a northerly direction in Kirk Street and tees into a 6 inch gas main running on the northern edge of French Street.
See appendix for further information.

Electrical:
The city's electricity service is provided through National Grid.
See appendix for further information.

Telecommunication/CATV:
The city's telecommunication and cable television services are provided through Comcast and Verizon.
See appendix for further information.

Soils:
Pending geotechnical investigations which will be performed when site selection is finalized.

Public Sidewalk and Private Driveway Improvements:
The paving at the main entrance to the high school between the Lord Building and Field House is in poor condition and needs replacement. HC accessible curb ramps are in poor condition and need improvements to meet MAAB requirements. Most of internal site sidewalks and all of the driveways are in poor condition requiring replacement. HC parking spaces along Father Morissette Boulevard do not meet MAAB requirements and need replacement and relocation.

Phase 1 Geo-environmental:
A Phase I Environmental Site Assessment (ESA) has been performed per ASTM E1527-13 and MGL Part I, Title II, Chapter 21: Massachusetts Oil and Hazardous Material Release Prevention and Response Act. This report also includes 75 Arcand Drive which is included as part of the "expanded" existing site options. Based on the findings Nobis Engineering recommends that a Phase II subsurface investigation be conducted including collection and analysis of soil samples and a surface geophysical survey (electromagnetic and ground penetrating radar) in the vicinity of the steam plant to determine the presence or absence of a historical underground storage tank.

See appendix for additional information.

Permitting:

Wetland Protection Act (310 CNR 10:00)

The Wetlands Protection Act ensures the protection of Massachusetts' inland and coastal wetlands, tidelands, great ponds, rivers and floodplains. It regulates activities in coastal and wetlands areas, and contributes to the protection of ground and surface water quality, the prevention of flooding and storm damage, and the protection of wildlife and aquatic habitat.

A review of the Massachusetts Department of Environmental Protection (DEP) wetland layers available on the Massachusetts Geographic Information System (MassGIS), dated April 2009 indicates a wetland resource area located along the Merrimack Canal, (and more specifically located between the 1922 Building and Lord/Field House Buildings).

Work performed within resource areas or buffer zones will require a filing of a Notice of Intent (NOI) with the Lowell Conservation Commission and the Massachusetts Department of Environmental Protection.

It appears that any proposed work within the vicinity of the Merrimack Canal may require the filing of a Notice of Intent filing with the DEP and the Lowell Conservation Commission.

Flood Plain:

Based on the Flood Insurance Rate Map (FIRM), the Community Panel Numbers 25017C0139F and 25017C0143F and both dated July 7, 2014, the Merrimack Canal is in Zone A (No base flood elevations determined). The remainder of the school building sites are located in Zone X (Areas determined to be outside the 0.2% annual chance floodplain).

Surface Water Supply Protection (310 CMR 22.20):

The Massachusetts Department of Environmental Protection (DEP) ensures the protection of surface waters used as sources of drinking water supply from contamination by regulating land use and activities within critical areas of surface water sources and tributaries and associated surface water bodies to these surface water bodies to these surface water surfaces.

The only water supply for the Lowell Regional Water Utility (LRWU) is the surface water from the Merrimack River, which has its source in the White Mountains of New Hampshire. The Intake Station is situated on the riverbank north of the city and water is pumped one half mile to the treatment plant. A review of the Massachusetts DEP resource layers available on the MassGIS indicates the High School is not located within a water Supply Protection Zone, and appears to not require permitting under 310 CMR 22.20.

Natural Heritage & Endangered Species Program:

A review of the 13th Edition of the Massachusetts Natural Heritage Atlas prepared by the Natural Heritage and Endangered Species Program (NHESP), dated October 1, 2008, indicates that the High School site is NOT located within a Priority Habitat of Rare Species or an Estimated Habitat of Rare Wildlife and that there are no vernal pools on or adjacent to the site. It does not appear that the project will require NHESP review.

Area of Critical Environmental Concern (ACEC):

A review of the Massachusetts Geographic Information System (MassGIS) dated April 2009, indicates that the site is NOT located within any Area of Critical Environmental Concern.

US EPA NPDES:

Construction Activities that disturb more than one acre are regulated under the United States Environmental Protection Agency's (EPA) National Pollution Discharge Elimination System (NPDES) Program. In Massachusetts, the USEPA issues NPDES permits to operators of regulated construction sites. Regulated projects are required to develop and implement stormwater pollution prevention plans in order to obtain permit coverage. The permitting requirement will need to be determined based upon future design options. Update for options under consideration.

Sewer Connection Permit (314 CMR 7.00):

New connections to sanitary sewers, increases in flow to existing sanitary sewers, and discharges from businesses that are not considered to be "industrial wastewater" are subject to state requirements based on their expected discharge volume:

- Discharges ≤ 15,000 gallons per day (gpd) will need only local approvals (no approvals by MassDEP)
- Discharges ≥ 15,000 gpd but ≤ 50,000 gpd must file a one-time certification statement with MassDEP within 60 days after the connection starts to be used
- Discharges > 50,000 gpd must obtain a MassDEP permit before construction

Due to the existing sewer flows from the buildings to be maintained or to increase slightly, no permitting is expected to occur. Any new sewer services may require permitting (street opening, sewer connection fee) from the City of Lowell.

Permitting Table Timeline:

Permit	Permitting Authority	Anticipated Filing Date	Anticipated Approval Date
Notice of Intent (Order of Conditions)	MassDEP & City of Lowell Conservation Commission	After 100% DD	Approval in 3 to 6 months
Planning Board Site Plan Review	City of Lowell Planning Board	From SD to DD	Up to 6 months+

(If Required)			
National Pollutant Discharge Elimination System (NPDES) with EPA Notice of Intent (NOI)	Environmental Protection Agency (EPA)	After 100% CD	Once Submitted: Close NOI at end of Construction

Zoning:

The Lowell High School is located in the DMU Downtown Mixed Use District. The site has few limitations other than a Max F.A.R. of 4 and a Minimum Frontage of 25 which the parcels well exceed. See Section 3.1.5 for additional information.

See appendix for further information.

(This page intentionally left blank)

3.1.4 Evaluation of Existing Conditions

C. Architectural, Building Code and Accessibility

Architecture:

Prior to the construction of the existing High School buildings, the site has been developed since the early 1800's, when the Merrimack Canal and associated textile mills were constructed. The Merrimack Manufacturing Company and Boot Cotton Mills were both located to the north of the Site, and rail line was constructed to the west of the canal to serve these mills. Today this rail line still exists and is used for streetcar traffic associated with the Lowell National Historical Park. Former railroad activities likely transported and handled raw materials that were associated with the operation of the mills that surrounded and were located on parts of the site which suggests that although there is no documented release of contamination to the environment from historical site operations, the nature of historical site operations suggests that there is potential for a release to have occurred which warrants further investigations should the existing high school site be selected for a renovation or expansion project . The various campus buildings were constructed at various times as described below.

"1922 Building":

The 1922 Building is located at 38 Kirk Street. The site consists of approximately 2.7 acres situated on the east side of the Merrimack Canal and is bounded by Father Morissette Boulevard/the George Ayotte Parking Garage to north west, Kirk Street/National Park Headquarters to the east, an alley and St. Anne's Episcopal Church to the south, and Lucy Larcom Park and the Merrimack Canal to the west.

The building consists of approximately 312,052 sf and is comprised of three main sections: the original Coburn Hall Building at the south constructed in 1892, the Sullivan addition constructed in 1922, and the Kouloheras addition at the north that was constructed in 1997. The building is comprised of 3 stories, with a partial mezzanine in the original Coburn building (that was constructed at the time of the 1997 addition), plus a full basement. The 1922 Building is connected to the Lord Building via 2 pedestrian bridges consisting of approximately 4,400 sf; one at the southern end of the site which was constructed in 1980 and another at the northern end which was constructed in 1997.

The building appears to be constructed of various structural systems for each vintage. The 1892 Coburn Building is a combination of wood framing supported by steel and wood trusses at the roof, and tongue and groove wood plank on wood joists spanning to brick masonry bearing walls at the floors. The1922 Sullivan Building construction is largely unknown due to lack of existing drawings and the fact that hard finishes obscure the structure; observations and limited original drawings

suggest at least some sections of the building are reinforced concrete slab construction (concrete slabs with masonry block or tile forms, supported on masonry bearing walls). The 1997 addition is structurally separated from the 1922 building by an expansion joint, and is steel framed with metal deck spanning to steel joists and beams/girders supported by steel columns. The lowest level of the building is slab on grade with a mixture of fieldstone and concrete foundations. The bridges are long span structures comprised of concrete slab on metal deck spanning to steel joists and beam/girders supported by steel columns.

Pending confirmation of the existing construction via invasive testing, the building is likely Type IIIA, the bridge is Type IIB construction under the Massachusetts State Building Code 780 CMR 8th Addition.

The building is comprised of spaces which include: classrooms, the Cyrus Wendell Irish Auditorium, the Daniel P. Kane Courtyard Restaurant, the Lowell Community Health Center, Catie's Closet, a Teacher's Center, ROTC, various mechanical and electrical rooms. The 1922 building also includes and historic artifacts such as the Carney Medal Winner and the Distinguished Alumni wall plaques located the public spaces adjacent to the Auditorium. Due to the width of the building, academic classrooms are organized along the perimeter walls (including courtyards) to maximize natural light. There are also light wells that provide additional light into corridors. The multi-level Auditorium is located in the central northern core of the 1922 portion of the building and is accessed via a ramp and stairs off of Father Morissette Boulevard. The vertical circulation is provided by 8 egress stairs and 2 elevators. The building is accessed through 9 separate entries distributed around the building perimeter,

As noted above, it is expected that per many facilities of this era renovated over time the building has portions which comply with ADA/AAB and other spaces that don't. Areas of non-compliance include but are not limited to: exterior entries which contain stairs and no ramps, the existing HC lift at the north entry foyer adjacent to the Auditorium is technically not compliant and needs to reconsidered, Auditorium floor slopes exceeds the maximum allowable of 1:12, Auditorium Balcony and Control Room are not accessible, classroom door clearances on the push and pull sides, classroom thresholds that exceed the ½" maximum, toilet room clearances, Band and Choral rooms have tiered floors. The Teacher Work Room located in the mezzanine is not accessed by an elevator, Science rooms / labs do not have required clearances, the majority of hardware is not accessible, and signage does not reflect current room usage and does not meet accessibility requirements. In general, the buildings has more than the minimum number of plumbing fixtures to serve the potential design population and therefore reducing the number of restroom fixtures to provide accessibility will not be a problem.

The envelope components range in condition from good to poor. In general the masonry and structure do not show severe signs of distress and appear to be in good condition. The slate and copper roofs and downspouts on the original 1892 building have been recently replaced and are in excellent condition, but the existing membrane are past their useful life and experiencing water infiltration that suggests full replacement. The brick walls are in good condition with few exceptions. The

limestone and terra cotta features require some replacement; several pieces have been salvaged and could possibly be reused. The exterior walls of the 1892 and 1992 portion of the building are comprised of multiple wythes of masonry, and the 1997 addition is brick veneer with steel back-up 1997. Only the 1997 portion of the building has confirmed insulation in the exterior walls. The majority of the windows are in fair to poor condition and are difficult to operate (some will not close or open), and several seals and insulated glass units are broken. The poor condition combined with the fact that preliminary Historic discussions suggest that a window with a more historic profile would be required should a major renovation occur, suggests that all windows be replaced. The building sealants have deteriorated requiring full replacement. The exterior doors appear to have been replaced as part of the 1997 work but may need to be replaced as part of making the entrances accessible. The stairs are in poor condition and replacement is recommended. Interior doors and frames are in good to poor condition. The elevator in the 1892 building was recently replaced and is good condition with the exception of the ceiling and lights which are damaged and should be replaced. The elevator in the 1922 building is in poor condition and replacement is recommended. Some of the interior partitions are the demountable type which do not extend to the deck, and are an acoustic breach which will not meet the LEED prerequisite, and should be replaced. The majority of the interior finishes and casework are in fair to poor condition with few exceptions and replacement is recommended. The bridges are generally in fair to poor condition: the barrel vaulted aluminum and polycarbonate roof/wall system should be replaced, window systems are tired and failing and should be replaced, as should interior finishes. The HVAC, Mechanical, Electrical, Plumbing and Fire Protection Systems are in poor condition and are at the end of their useful life cycle and require replacement as further explained in Section C of this report.

1980 Buildings: Lord (Academic Building) / Field House (w/ Natatorium)

The Lord/Field House Building is located at 50 Father Morrissette Boulevard. The site consists of approximately 3.3 acres situated on the west side of the Merrimack Canal and is bounded by Father Morissette Boulevard to the north, Arcand Drive along the west, the trolley tracks/Merrimack Canal to the east and a parcel of property at 75 Arcand Drive along the South of the site, which is an office building.

Constructed in 1980 with a minor renovation and addition in 1997, the facility is comprised of two buildings totaling approximately 216,172 sf. The Lord Building is a 3 story academic building which is approximately 141,122 sf. The Field House is a 2 story athletic facility with a partial basement totaling approximately 75,050 sf. The two buildings are connected via a 2 story glazed lobby space. As noted above, the Lord Building is connected to the 1922 building via 2 pedestrian bridges; one at the southern end of the site which was constructed in 1980 and another at the northern end which was constructed in 1997. The two bridges total approximately an additional 4,400 sf. The construction type for both buildings and the bridge is Type IIB unprotected, non-combustible construction.

The Lord Building is a 3 story academic building is comprised of classrooms, science

laboratories, Murphy Cafeteria, kitchen, conference space, the Colleen Creegan Library (Ext. Building Sign, "George D. Kouloheras Library Media Center), a television studio, student support offices, administration and nurse's offices, Police Department, 1826 School Store, the Jeanne D'Arc Credit Union, the Little Theatre, and a maintenance and receiving area. The structure is a concrete slab on grade of varying thickness with building columns supported on pile foundations. The second and third floor construction consists of concrete slab on metal deck spanning to steel joists and beams/ girders supported by steel columns. The roof construction of the Lord Building is steel framed, with metal deck spanning to steel joists and beams/ girders supported by steel columns. The vertical circulation is provided by 7 egress stairs and 1 elevator. The first floor has 11 perimeter entrance areas with doors serving the facility.

The Field House is a 2 story hexagonal building with a multi-sport gymnasium, pool, wrestling room, weight rooms, locker rooms, and mechanical room located in a partial basement. The basement also contains a pool pump area. The structure is a concrete slab on grade of varying thickness and reinforcing around the pool area. The second floor construction consists of concrete slab on metal deck supported by steel framing with the exception of the structure located over the pool which is reinforced concrete slab spanning to concrete encased wide flange steel beams supported by steel columns. The roof construction consists of metal deck spanning to steel trusses, supported by steel bents which clear span the hexagonal space. The vertical circulation is provided by 2 egress stairs and there is no separate elevator in this building. The first floor has 6 perimeter entrance areas with doors serving the facility.

The configuration of the Lord building is such that the majority of the academic classrooms are located on the 2nd and 3rd floors along the perimeter; however, various lab classrooms are located in the center with no exterior light or views. Many of the administrative rooms are also without exterior light or views.

The Lord and Field House buildings have portions which comply with ADA/AAB and other spaces that don't. Areas of non-compliance include but are not limited to: Locker Room layouts and clearances, lab clearances, toilet room layout and clearances, and the Little Theatre contains tiered floors without ramps or elevators serving all levels, door clearances, some non-compliant hardware, and signage does not reflect current room usage and does not meet accessible requirements.

The overall condition of the buildings' exteriors are in fair condition with the exception of specific components, such as the cement asbestos panel which is in poor condition and should be replaced with a material that does not contain asbestos. Generally speaking, floor and roof structure appear to be in satisfactory condition; there is no evidence of structural distress that would indicate significantly overstressed, deteriorated or failed structural members. The Lord Building roof is a EPDM type which is in poor condition with evidence of extensive water infiltration and should be replaced. The roof of the Field House is corrugated metal that slopes to a perimeter gutter which appears to be failing causing water to enter the wall cavity below. The exterior walls are showing signs of water infiltration from the failing roof, gutter and downspout system. The brick veneer is failing in numerous areas and

should be removed and replaced. The window and curtain wall systems are in fair to poor condition and replacement is recommended. The exterior doors and entrance systems are in fair to poor condition and replacement is recommended. The building sealants have deteriorated and replacement is recommended. The stairs are in fair condition but need finish upgrades and modifications for accessibility are required to the hand/guardrail configuration to meet MAAB/ABB requirements. The elevator controls and finishes need to be replaced. Interior doors and frames are in good to fair condition requiring selective replacement. Many of the interior partitions are the demountable type which do not extend to the deck, and are an acoustic breach which will not meet the LEED prerequisite, nor best educational best practices and should be replaced. The majority of the interior finishes and casework are in fair to good condition requiring selective replacement. The science labs are in fair to poor condition requiring reconfiguration and casework replacement.

The bridges are generally in fair to poor condition: the aluminum and polycarbonate barrel vault roof/wall system should be replaced. The aluminum panel sidewall and soffit systems are tired and failing and should be replaced, as should interior finishes. The HVAC, Electrical, Plumbing and Fire Protection Systems are in poor condition and are at the end of their useful life cycle and require replacement.

Freshman Academy-:

The Freshman Academy Building is located at 55 French Street. The site consists of approximately .4 acres on a site which is remote from the main campus and is bounded by French Street / Boarding House Park to the north, John Street / the Joseph M. Downes Garage to the east, Paige St. / Lowell Five Bank to the South, and the Steam Plant/ Lowell National Historic Park Building to the west.

The building consists of approximately 90,326 sf and is comprised of two joined buildings connected by a courtyard; the original southern building constructed in 1901 and the northern building constructed in 1939. The Building, originally the Lowell High School Commercial and Manual Training Department (a.k.a. Lowell Trade School), was subsequently renovated to become the Arts School and City Magnets middle schools circa 1985, and then renovated to become the Freshman Academy circa 1997.The 1901 building is 3 stories with a full basement and is primarily wood framed with fieldstone foundations. The 1939 building is 2 stories with a full basement and is concrete and steel frame w/ concrete foundations. The classrooms are located on the perimeter walls (and surrounding a courtyard) to provide ample exterior light (the exception being classrooms located in the lower level which utilizes smaller windows with high sills). Skylights at the lowest level provide additional light into the corridor outside of the Theatre. Pending confirmation of the existing construction via invasive testing, the building is likely Type IIIB, construction under the Massachusetts State Building Code 780 CMR 8th Addition.

The Freshman Academy building is comprised of: classrooms, administrative offices, a Cafeteria/Multi-Use Room, the J.J. Burgoyne Theatre, Catie's Closet, a Maker Space, and Nurse's Office. The current configuration is largely residual to the

previous layouts and contains numerous level changes that make for difficult circulation, and spaces that are sized for elementary students which are not appropriate for high school students. The vertical circulation is provided by 6 full egress stairs, additional partial stairs, ramps and (1) 2-sided elevator. The first floor has 6 perimeter entrances with sets of double doors serving the facility.

As noted above, it is expected that per many facilities of this era renovated over time the building has portions which comply with ADA/AAB and other spaces that don't. Areas of non-compliance include but are not limited to: 5 exterior entrances which contain stairs and no ramps (there is one accessible entrance on the west side of the building), the Theatre floor slope appears to exceed the 1: 12 maximum allowable, the stage is accessed via a ramp which exceeds 1:12 , the dressing rooms are accessed via stairs, some toilet room dimensional clearances do not meet code, a corridor ramp in the north building appears to exceed the 1:12 max. slope, and some classroom door clearances and hardware also do not comply.

The envelope components range in condition from fair to poor. The EDPM roof is in poor condition which is contributing to leaks throughout the building and full replacement is recommended. In general the structure and the masonry appear to be in satisfactory condition; there is no evidence that would indicate significantly overstressed, deteriorated or failed structural members. The windows systems are in fair to poor condition and many units do not open or close, and finishes are badly faded, and full replacement is suggested. The exterior doors are in fair to poor condition and should be replaced. All exterior sealants are deteriorated and should be replaced. The stairs are in poor condition and full replacement is suggested. The 2-sided elevator is very small and in poor condition and replacement is recommended. The interior doors and frames are in fair to good condition. The Interior Partitions are in fair to good condition. The finishes and caseworks are in fair to poor condition with few exceptions and replacement is recommended. The HVAC, Electrical, Plumbing and Fire Protection Systems are in poor condition and are at the end of their useful life cycle and require replacement.

Steam Plant:

The Steam Plant is located at 35 French Street. The site consists of approximately .2 acres and is bounded by French Street / Boarding House Park to the North, the Freshman Academy to the east, and the National Historic Park Building to the south and west.

The building is comprised of approximately 3,328 sf, and is a one story rectangle with a substantial brick chimney on the SW of the lot, and a partial basement and tunnel that connects utilities to the 1922 Building Via a tunnel and to the Freshman Academy via overhead lines. The structure is steel and concrete w/ brick bearing walls. The building is likely Type IIB, construction under the Massachusetts State Building Code 780 CMR 8th Addition.

The Steam Plant layout is an open plan which contains boilers in an open plan, with an enclosed generator. There is one stair that leads to the partial basement / tunnels.

The building is a mechanical use and technically does not need to comply with the MAAB's current requirements. The existing tunnels are accessed via stairs. No elevator is required or provided.

The envelope components range in condition from good to poor. The EPDM roof is in good condition and full replacement is not recommended. In general the structure and the masonry appear to be in satisfactory condition; there is no evidence that would indicate significantly overstressed, deteriorated or failed structural members. The windows were replaced circa 1996 and are in good condition. The overhead exterior door at the east was damaged in a fire and should be replaced. The swinging wood doors at the north are in poor condition and should be replaced. All exterior sealants are deteriorated and should be replaced. The stairs are in poor condition and full replacement is suggested. The interior doors and frames are in good condition. The Interior Partitions are good condition. The interior finishes are utilitarian brick, cmu & concrete and in fair condition except the concrete floor which appears to experience flooding at the north and may require repair. The HVAC, Electrical, Plumbing and Fire Protection Systems are in poor condition and are at the end of their useful life cycle and require replacement in the Base Repair condition. Other renovation options will likely pursue new mechanical systems within the buildings and the Steam Plant Building would not be utilized for the MEP systems and the building would be turned over to the City.

See appendix for further information.

Code:

Following is a list of applicable codes:

Code Type	Applicable Code (Model Code Basis)
Building	780 CMR: Massachusetts State Building Code, 8th Edition[1] (2009 International Building Code) (2009 International Existing Building Code)
Fire Prevention	527 CMR: Massachusetts Fire Prevention Regulations (2012 NFPA 1)
Accessibility	521 CMR: Massachusetts Architectural Access Board Regulations
Electrical	527 CMR 12.00: Massachusetts Electrical Code (2014 National Electrical Code)[2]
Elevators	524 CMR: Massachusetts Elevator Code (2004 ASME A17.1)
Mechanical	2009 International Mechanical Code (IMC)

Plumbing	248 CMR: Massachusetts Plumbing Code
Energy Conservation	2015 International Energy Conservation Code[3]
Seating	ICC 300-2012 Standard for Bleachers, folding and telescopic seating & Grandstands

1 The 9th edition of 780 CMR based on the 2015 International Codes is expected to go into effect in mid-2017.
2 The 2017 NEC is in effect as January 2017 and is based on the date the electrical permit is issued, not the building permit.
3 The 2015 IECC has been adopted and will be required to be met January 1, 2017.

International Existing Building Code

The 2009 International Existing Building Code with Massachusetts amendments allows for 3 separate compliance methods:

- Prescriptive Method (in general, altered areas must comply with the code for new construction)
- Work Area Method (level of compliance is based on the classification of work)
- Performance Compliance Method (numerical method that allows tradeoffs for deficiencies). This report is based on the Work Area Method.

Work Area and Classification of Work:

Work will likely include renovations throughout the entire interior of the buildings, installation of new MEP systems throughout, as well as the potential for an addition to the building(s). For the purposes of this report it has been assumed that the scope of work is likely to be classified as Level 3 (the highest level of renovation). This level includes the reconfiguration of spaces, the addition or elimination of doors and windows, the reconfiguration or extension of systems, and/or the installation of additional equipment in more than 50% of the aggregate area of the building. The work must comply with the following IEBC Chapters based on the level of work in each building:

Level 2 Alteration: IEBC Chapters 6 & 7

Level 3 Alternation: IEBC Chapters 6, 7 & 8

Addition: IEBC Chapter 10

Occupancy Classification:

Field House: Non-Separated Mixed Uses:

- A-3 (Exercise Areas and Locker Rooms)
- A-4 (Gymnasium and Pool with Spectator Seating)

Lord Building: Non-Separated Mixed Uses:

- E (Secondary Education)
- A-2 (Cafeteria)
- A-3 (Library and Assembly Areas)

1922 Building: Non-Separated Mixed Uses:

- E (Secondary Education)
- A-1 (Auditorium)

Freshman Academy Building: Non-Separated Mixed Uses:

- E (Secondary Education)
- A-3 (Multipurpose Spaces)

Steam Plant Building:

- U (Utility Building)

Construction Type:

Field House:

Based on conditions observed during our site visit, the Field House building appears to be constructed with CMU walls and unprotected structural steel members resulting in Type IIB construction (noncombustible, no fire- resistance rating).

Lord Building:

Based on conditions observed during our site visit, the Lord building appears to be constructed with CMU walls and unprotected structural steel members resulting in Type IIB construction (noncombustible, no fire- resistance rating).

1922 Building:

Based on conditions observed during our site visit, the 1922 building appears to be constructed with various construction materials including concrete, wood and steel structure and masonry exterior wall resulting in a minimum of Type IIIB construction (combustible interior- no fire-resistance rating; 2-hour noncombustible exterior wall). The addition at the front of the building had spray-on fireproofing on the structure, therefore the construction type could potentially be Type IIIA (combustible interior- 1- hour fire-resistance rating; 2-hour noncombustible exterior wall).

Freshman Academy Building:

Based on conditions observed during our site visit, the Freshman Academy building appears to be constructed with various construction materials including concrete, wood and steel structure

and masonry exterior wall resulting in a minimum of Type IIIB construction (combustible interior- no fire-resistance rating; 2-hour noncombustible exterior wall).

Steam Plant Building:

Based on conditions observed during our site visit, the Steam Plant building appears to be constructed with CMU walls and unprotected structural steel members resulting in Type IIB construction (noncombustible, no fire- resistance rating).

Building Separation:

The Field House and Lord Building are connected but appear to have a rated wall separating them and could be considered separate buildings. The 1922 Building and Lord Buildings are connected via a pedestrian walkway and could be considered as separate building if needed (if addition is built to one building) but would require additional smoke rated doors at the end of the walkway. The Freshman Academy and Steam Plant buildings are standalone buildings.

Fire Resistance Ratings:

The following table summarizes the required fire resistance ratings for the building elements of Type IIIB & IIB construction, based on 780 CMR Table 601 and other applicable code provisions:

Building Element	Fire Resistance Rating (Hrs) Type IIIB	Fire Resistance Rating (Hrs) Type IIB
Primary Structural Frame[A]	0	0
Exterior Bearing Walls including columns along the exterior wall	2	0
Exterior Non-Bearing Walls	Based on FSD	
Interior Bearing Walls	0	0
Floor Construction	0	0
Roof Construction	0	0

A. Includes beams, trusses, floor members, etc. having a direct connection to the columns (780 CMR 202).

Building Element	Fire Resistance Rating (Hrs)	Opening Protectives (Hrs)
Exit Access Corridors (780 CMR	0	0
Existing 3 stories or less Stair, Mechanical, and Elevator Shafts	Maintain Existing	Maintain Existing
Existing 4 story Stair, Mechanical, and Elevator Shafts (IEBC 703.2.1)	1	1
New shafts: (780 CMR 708.4) 3 stories or less: 4 stories:	1[A] 2	¾ 1½
Building Separation (780 CMR Table 706.4) (Between Field House and	2	1½
Emergency Electrical Room (527 CMR 12.00 700-9(D)(1))	2	1½

A. In lieu of rated shaft enclosure, if the duct connects not more than two stories, the annular space around the penetrating duct may be protected by approved noncombustible material that resists the passage of flames and smoke. If the duct connects not more than three stories, the duct also needs to have fire dampers installed at each floor line (780 CMR 716.6.1).

Interior Finishes:

The existing interior finish of walls and ceilings in the work area and in all exits and corridors serving the work area must comply with the code requirements for new construction (IEBC 703.4, 803.3). All newly installed wall and ceiling finishes, and interior trim materials must also comply with 780 CMR Table

803.9 (IEBC 602.1, 602.2, 602.3). The requirements are summarized below:

Walls & Ceilings (IBC Table 803.9) – Fully Sprinklered

Use Group:	E	A
Exit Enclosures	Class B	Class B
Exit Access Corridors	Class C	Class B
Rooms & Enclosed	Class C	Class C

Walls & Ceilings (IBC Table 803.9) – Not Sprinklered (Field House)

Use Group:	A
Exit Enclosures	Class A
Exit Access Corridors	Class A
Rooms & Enclosed	Class C

Note that where exit stairs and exit access corridors serve more than one use group, the most restrictive interior finish is required. Based on our site visit, the existing interior finishes appeared to comply for all buildings

Means of Egress:

The means of egress including the number of exits and egress capacity must be sufficient for the number of occupants on all floors (780 CMR 102.6.4). All means of egress are required to be maintained.

The means of egress for the existing buildings appears sufficient for the current occupant load of the buildings. However, once renovation plans have been developed, the means of egress within the building can be further evaluated based on the calculated occupant load.

Based on observations during our site visit, there were areas of the means of egress that were not properly maintained including the following conditions that occurred throughout the buildings:

- *Storage within stairwells*
- *Broken/ missing door closing devices*
- *Fire hose used to prop door open*

Required Fire Protection Systems:

The following fire protection systems are required to maintained and provided:

- Automatic sprinkler system (IEBC 704.2.2 & MGL c. 148 s. 26G):
  - The Lord, 1922 Building and Freshman Academy buildings appear to be fully sprinklered. (The mezzanine (teacher center) in the 1922 Building was built above the third floor is not provided with sprinklers. The sprinkler system is required to be altered as the configuration of the building changes.)
  - The Field House is not provided with sprinklers. (A sprinkler system must be installed throughout the Field House if the work area exceeds 50% of the floor area. Full sprinkler protection could also be required by MGL c. 148s. 26G)
  - The presence of sprinklers could not be confirmed in the Steam Plant building however a sprinkler system would not be required even for new construction due to the use of the building.
- Fire Alarm (IEBC 704.4.1 & 804.2) – the IEBC allows existing previously approved fire alarm systems to remain regardless of the level of renovation. However full compliance with the MA Architectural Access Board's Regulations will require a compliant fire alarm system.
  - *The existing buildings currently contain a fire alarm system with*

deficient notification device coverage (no strobes in classrooms). Note that the fire alarm system must also be altered as necessary in the new construction areas to reflect the new configuration and comply with NFPA 72.

Energy Code Provisions for Existing Buildings:

The buildings are subject to the International Energy Conservation Code (IECC) including the amendments contained in 780 CMR Chapter 13. Level 2 and 3 alterations to existing buildings are permitted without requiring the entire building to comply with the energy requirements of the International Energy Conservation Code (IECC). The alterations (new elements) shall conform to the energy requirements of the IECC as they relate to new construction only (IEBC 711.1 & 808.1).

Accessibility for Persons with Disabilities:

Massachusetts Architectural Access Board Regulations:
Alterations to the building must comply with the requirements of the Massachusetts Architectural Access Board Regulations (521 CMR). For existing building alterations the requirements of 521 CMR are based on the cost of the proposed work:

Americans with Disabilities Act Guidelines:

The ADA Guidelines are not enforced by the Commonwealth of Massachusetts, they can only be enforced through a civil lawsuit or complaint filed with the U.S. Department of Justice. Compliance with the ADA Guidelines is triggered by renovations to an existing building. All renovations to the building must be made to ensure that, to the maximum extent feasible, the altered portions of the facility are readily accessible to and usable by individuals with disabilities (28 CFR Part 36 Section 36.402(a)). Alterations made to provide an accessible path of travel to altered areas and accessible facilities (i.e. provide accessible toilet facilities) are not required if the cost exceeds 20% of the total cost of the alteration (28 CFR Part 36 Section 36.403(f)). However, if the cost to meet these accessibility requirements does exceed 20%, alterations are still required to the maximum extent that the area can be made accessible without exceeding the 20% criteria (28 CFR Part 36 Section 36.403(g)). The ADA also contains less stringent dimensional requirements for some building elements in an existing building where it is infeasible to meet the requirements for new construction (ADA Section 4.1.6).

Plumbing Code:

248 CMR: The Massachusetts State Plumbing Code

The Massachusetts Plumbing Code (248 CMR) regulates the number of plumbing fixtures required throughout buildings. The minimum number of plumbing fixtures is established by 248 CMR 10.10(18) Table 1 based on the building use and the expected population as determined by the local Plumbing Inspector per 248 CMR 10.10 (18)(2).

The Plumbing Inspector must approve the building population, however, the building population can generally be based on the designer's determination of the actual number of people expected within the building. The Plumbing Code expects that the building population will be divided evenly between male and female for the purpose of determining fixture counts. Any distribution other than 50/50 must be justified to the Plumbing Inspector.

If the existing number of toilet room fixtures are altered (i.e. to make existing toilet rooms accessible) the number provided is subject to the minimum requirements of 248 CMR.

3.1.4 Evaluation of Existing Conditions

C. Structural

Overview:

The Lowell High School is comprised of the following buildings;"1922 Building", Lord/Field House, the Freshman Academy and the Steam Plant which are located along Father Morissette Boulevard/French Street in Lowell. The Lord/Field House building is the only building on the campus located on the west side of the Merrimack Canal. It is connected to the 1922 building by two enclosed pedestrian bridges, spanning over the canal between the buildings at their Second Floor levels. The Freshman Academy (originally the Lowell Trade School) and Steam Plant buildings are located on the east side of the High School's campus, one block over from the 1922 building.

Purpose:

The purpose of this report is to describe in broad terms: the structure of the existing buildings: to comment on the condition of the existing buildings: to comment on the feasibility of renovations to the buildings: and to identify future structural investigations should the existing buildings be renovated or expanded.

BUILDING SUMMARIES

1922 Building:

Structural Description:

The "1922 Building" consists of the three main parts: the original Coburn Hall Building, constructed in 1892, a significant classroom/Auditorium addition, constructed on the north side of Coburn Hall in 1922 (Sullivan Building), and the smaller, 1997 addition to the north end of the 1922 building (Kouloheras Addition). The 1997 addition is separated from the 1922 portion of building at each level by an expansion joint. The three-story "1922 Building" has a full basement and is located on the east side of the Merrimack Canal, which separates it from the Lord Building.

Pitched roof construction of the original 1892 section of the building is wood framed, supported by steel and wood trusses. First, Second and Third Floor construction of the 1892 portion of the building consists of tongue and groove wood plank on wood joists spanning to brick masonry bearing walls.

Due to a lack of original drawings and the presence of hard finishes which obscure the structure, the flat roof construction of the 1922 portion of the building is largely unknown. However, our observations and limited original drawings suggest that at least some sections of the building are reinforced concrete slab construction (concrete slabs with masonry block or tile forms, supported on masonry bearing walls).

Flat roof construction of the 1997 addition is steel framed, with metal deck spanning to steel joists and beams/girders supported by steel columns. The First, Second and Third Floor construction of the 1997 addition consists of concrete slab on metal deck spanning to steel beams supported by steel girders and columns.

Lowest level construction is a concrete slab on grade with a mixture of fieldstone and concrete foundations.

Structural Conditions/Recommended Repairs:

Generally speaking, floor and roof construction appear to be in satisfactory condition; there is no evidence of structural distress that would indicate significantly overstressed, deteriorated or failed structural members. Foundations appear to be performing adequately; there are no signs of significant, total or differential settlements. Structural/structurally related conditions observed on site that need to be addressed include exterior masonry repairs, steel lintel repair/replacement, roofing/roof drainage issues, anchorage of masonry walls and partitions and railing code compliance.

Lord/Fieldhouse Building:

Structural Description:

The Lord/Field House Building is a steel and concrete framed building comprised of a three-story Academic Building and a two-story Field House/Natatorium that are connected by a glazed lobby. The Lord Building, located on the eastern bank of the Merrimack Canal, was constructed in 1980 and underwent minor renovations and an addition in 1997. Two enclosed pedestrian bridges, spanning over the canal, connect the Second Floors of the Lord and "1922 Building".

Roof construction of the Academic Building is steel framed, with metal deck spanning to steel joists and beams/girders supported by steel columns. Field House roof construction consists of metal deck spanning to steel trusses, supported by steel bents which clear span the hexagonal space. Second and Third Floor construction of the Academic Building consists of a concrete slab on metal deck spanning to steel joists and beams/girders supported by steel columns. Second Floor construction of the Field House is similar, with the exception of the structure located over the Pool. Floor construction in this area consists of a reinforced concrete slab spanning to concrete encased wide flange steel beams, supported by steel columns. First Floor construction for both buildings consists of a concrete slab on grade, varying in thickness and reinforcing. Building columns are typically supported on pile foundations, as is the small, steel framed addition on the south end of the Academic Building constructed in 1997.

Structural Conditions/Recommended Repairs:

Generally speaking, floor and roof construction appear to be in satisfactory condition; there is no evidence of structural distress that would indicate significantly overstressed, deteriorated or failed structural members. Foundations appear to be performing adequately; there are no signs of significant, total or differential

settlements. Structural/structurally related conditions observed on site that need to be addressed include exterior masonry repairs, steel relieving angle repairs, soffit repair/replacement, cement board panel replacement, concrete pool deck repairs, anchorage of masonry walls and partitions and roofing/roof drainage issues.

Freshman Academy:

Structural Description:

The Freshman Academy is comprised of an original, three-story wood and steel framed structure, with a full basement, constructed in 1900 (one block east of the 1922 Building), fronting Paige Street. An attached, two-story steel and concrete framed addition (of similar size), with a partial basement was constructed in 1939 on the north side of the original building. The facility underwent significant renovations 1985.

The original (1900) building is primarily wood framed. Third and Second Floor construction consists of wood flooring over wood joists. First Floor construction is similar, with wood floor joists spanning to large steel trusses which clear span the Cafeteria and Theater spaces below. The 1939 (addition) portion of the building is concrete and steel framed, with roof construction consisting of metal deck spanning to steel joists and beams/girders. Second Floor construction consists of concrete slab on metal deck spanning to steel joists and beams/girders. First Floor construction consists mainly of concrete slab on grade construction. Floor construction over the middle third of the addition (where a basement is present below) is concrete slab on metal deck, spanning to steel joists. The central Courtyard, located at the First Floor between the 1900 and 1939 buildings, is constructed with metal deck spanning to wide flange steel beams. Three steel framed skylight openings allow natural light to pass into the basement corridor below. The lowest level construction is concrete slab on grade.

Structural Conditions/Recommended Repairs:

Generally speaking, floor and roof construction appear to be in satisfactory condition; there is no evidence of structural distress that would indicate significantly overstressed, deteriorated or failed structural members. Foundations appear to be performing adequately; there are no signs of significant, total or differential settlements. Structural/structurally related conditions observed on site that need to be addressed include exterior masonry repairs, steel lintel repair/replacement, anchorage of masonry walls and partitions, subfloor deterioration, drifting snow loads and roofing/roof drainage issues.

Steam Plant:

Structural Description:

The Steam Plant is steel and concrete framed with brick bearing walls. Roof construction consists of concrete slab over steel trusses which clear span the space to brick bearing walls on building's north and south sides. First Floor construction consists of concrete slab on grade with concrete pads below the larger pieces of equipment.

Structural Conditions/Recommended Repairs:

Generally speaking, floor and roof construction appear to be in satisfactory condition; there is no evidence of structural distress that would indicate significantly overstressed, deteriorated or failed structural members. Foundations appear to be performing adequately; there are no signs of significant, total or differential settlements. Structural/structurally related conditions observed on site that need to be addressed include exterior masonry repairs (particularly the chimney), and the anchorage of masonry walls and partitions to the roof structure.

FUTURE STRUCTURAL INVESTIGATIONS:

With the exception of the Lord Building (including the Field House/Natatorium) and the 1997 addition to the "1922 Building", limited structural documentation was available. In particular, there were no structural documents for the 1922 addition to the "1922 Building" and the Freshman Academy (both the original building and the 1939 addition). Accordingly, if major renovations to these buildings are ultimately proposed, FBRA recommends that finishes be removed in selected locations, so the general details of the floor and roof construction in these buildings can be determined. This information will be crucial in determining the structural feasibility of reinforcing, modifying, adding to, or removing portions of the existing floor and roof construction, as well as the approximate costs involved in doing so.

See appendix for further information.

3.1.4 C. HVAC, Electrical, Plumbing & Fire Protection

Purpose:
The purpose of this report is to describe in broad terms: the mechanical and electrical systems of the existing buildings: to comment on the condition of the existing systems: and to comment on recommended upgrades to these systems.

HVAC:

General:

Due to the overall age and relatively poor condition and performance of the existing HVAC and automatic temperature control systems, we recommend that all HVAC and ATC Control systems should be replaced. The existing HVAC system should also be upgraded to meet current code requirements for ventilation and energy efficiency, and energy conservation measures (such as energy recovery, variable speed drives for fans and pumps, low pressure ductwork and piping distribution system design, and state of the art direct digital controls and building energy management system) should be designed as part of a new replacement HVAC system. In general, replacing the current High School Buildings including the "1922 Building" (Coburn Hall/Sullivan Addition/ Kouloheras Addition); Lord/Field House; Freshman Academy and Steam Plant, HVAC system with a high performance HVAC system would consist of the following:

1922 Building:

These buildings are primarily heated by a shell and tube steam to hot water heat exchanger that is located in the basement mechanical room. Steam and condensate piping is routed from the mechanical room to the Steam Plant via an underground tunnel. Steam condensate is returned to the Steam Plant by a condensate pump. Hot water is circulated throughout the building with the use of (2) end suction base mounted Bell & Gossett pumps (model 1510 pumps, equipped with 25 HP motors). VFD drives have been installed in recent years for the pumps. The pumps, heat exchanger, condensate pump, and associated piping and valving appears to be in poor condition and beyond their useful expected service life.

A 106 ton Carrier indoor chiller, which is associated with a refrigerant outdoor condenser, is installed in a basement mechanical room. Chilled water is delivered to several rooftop units through the use of (2) end suction base mounted Bell & Gossett pumps. The indoor chiller and associated outdoor condensing unit appear to be nearing the end of their useful service life. Gas fired Roof Top Units provide ventilation air throughout the majority of the building. Some of the units are provided with chilled water coils, which are served by the chiller, for dehumidification purposes and provide constant volume to the rooms for ventilation.

Typical classrooms throughout this building are provided with overhead ducted distribution systems with ceiling mounted diffusers and a combination of sidewall or ceiling supply and exhaust registers for ventilation purposes. Many of the ceiling mounted diffusers and grilles appear dirty which could be a sign of dirty filter and ductwork. Wall mounted fin tube radiation at the exterior walls are utilized as the main heat source for the spaces. The majority of classrooms have operable windows for natural ventilation. The majority of rooms are provided with pneumatic (typically Barber Coleman) heating system thermostats while some rooms are equipped with new DDC temperature sensors for monitoring through the building management workstation. Currently, several classrooms (often up to 3 classrooms) are controlled by one control valve. Most of the basement classrooms are heated and ventilated by classroom ceiling suspended horizontal unit ventilators. The units appear to be in poor condition and in need of replacement.

The Auditorium and Stage is served by a rooftop unit that provides heating and cooling through a ducted distribution system that terminates at the ceiling level with decorative grilles which are integrated into the ceiling design. Return air is captured below the stage through vertical grilles on the face of the stage and on the sidewall of the Auditorium. This space has a new DDC sensor for temperature monitoring and control.

The majority of corridors located with this building do not appear to have code required ventilation air. In addition, the heating equipment directly installed for the corridor areas appears to be minimal and in poor condition.

We recommend the following HVAC system repairs and replacements. These buildings should be served by the Steam Plant Building's new hot water heating boiler plant. All existing steam and hot water heating equipment shall be replaced with new hot water heating equipment. All existing steam heating and condensate distribution piping systems, existing steam to hot water heat exchangers, and condensate return pumps shall be removed. All existing terminal heating units and associated steam/hot water piping should be replaced. All existing rooftop and indoor air handling units, and exhaust fans, should be replaced with new units, and upgraded where possible to include energy recovery ventilation and variable air volume control to provide increased energy efficiency. Ventilation systems shall be provided for areas of the existing buildings that are not currently provided with code required ventilation. All existing ductwork distribution systems should be replaced. The existing chiller and associated chilled water piping system should be replaced, potentially with a larger chiller and distribution system in order to provide air conditioning to areas that are currently provided with air conditioning by inefficient split system and window type AC units. Lastly, a new direct digital (DDC) control automatic temperature control and building energy management system should be installed to control all new HVAC systems and equipment.

Lord/Field House (1980) Building:

The majority of the Lord Building is heated, ventilated and air conditioned by rooftop air handling units. One large gas-fired heating, DX cooling VAV Multi-Zone unit that serves the Library and Media Studio was installed in 1997, while the majority of

remaining rooftop units were installed in 2005. The rooftop units that were installed in 2005 are equipped with direct expansion cooling components, supply and exhaust fans, filter sections, and hot water coils. Hot water for each rooftop is generated through the use of instantaneous gas fired water heater boilers. This current heating system associated with these rooftop units has been failing on a constant basis and high number of water heaters have been replaced and continue to fail.

The majority of building areas are served by overhead ducted distribution system with ceiling mounted diffusers and a combination of low, high sidewall return and ceiling supply registers for heating, ventilation and cooling purposes. Many of the ceiling mounted diffusers and grilles appear dirty which could be a sign of dirty filter and ductwork. In general, much of the terminal heating equipment that is installed is in poor condition and in need of replacement. Several areas have exterior wall areas that do not have fin tube radiation heating, which can cause higher energy use and reduced thermal comfort control. Many corridors throughout the building are not provided with code required ventilation air.

The Pool area is served by one indoor gas/oil fired air-handling unit located in a mechanical room in the basement. The Field House is provided with (4) gas fired indoor air handling units with a single discharge and inlet grille. The Pool and Field House air handling unit systems are generally in poor physical condition and past their expected useful service life.

Many areas have been reported to have inadequate thermostat control, and experiences times when the room/areas are too hot and/or too cold.

We recommend the following HVAC system repairs and replacements. A new high efficiency gas fired hot water plant should be installed to serve the Lord/Field House Building, and to replace the individual rooftop unit boilers. New high efficiency boilers, insulated hot water piping distribution, accessories, pumps equipped with VFDs, and new boiler plant direct digital controls shall be installed to serve the buildings' hot water heating systems. All existing terminal heating units should be replaced with new hot water heating units. All existing rooftop and indoor air handling units, and exhaust fans, should be replaced with new units, and upgraded where possible to include energy recovery ventilation and variable air volume control to provide increased energy efficiency. Ventilation systems shall be provided for areas of the existing buildings that are not currently provided with code required ventilation. All existing ductwork distribution systems should be replaced. Existing split system and window type AC units should be replaced with new high efficiency AC systems. A new direct digital (DDC) control automatic temperature control and building energy management system should be installed to control all new HVAC systems and equipment.

Freshman Academy:

The Freshman Academy is primarily heated by the central Steam Plant via a shell and tube steam to hot water heat exchanger that utilizes steam from the Steam Plant to provide hot water to the building. Hot water is circulated throughout the building with the use of (2) constant flow end suction base mounted Bell & Gossett pumps. Condensate is returned to the Steam Plant via a condensate receiver and duplex pump

set. The shell and tube heat exchanger, condensate pump and hot water pumps appear to have corrosion on the surfaces and appear to be in poor condition and in need of replacement. Many sections of piping insulation appears to be missing or damaged.

One gas fired constant volume rooftop unit is provided for ventilation purposes for the Cafeteria, Theatre and internal areas of the building. The majority of the classroom and administration areas of the building is ventilated by a constant volume central indoor hot water heating and ventilation unit located in the mechanical room. The H&V (heating and ventilation) unit has a supply air fan, filter section and hot water heating coils. The rooftop and indoor H&V units are generally in poor condition and in need of replacement. These units are functioning poorly and are beyond their expected useful service life.

The cafeteria and auditorium have exposed ducted distribution systems that provide tempered air to the spaces. Wall mounted fin tube is also utilized in these spaces for supplemental heat. The fintube radiation and enclosure are in poor condition and in need of replacement.

Typical classrooms throughout this building are provided with overhead ducted distribution systems with ceiling mounted diffusers and a combination of low, high or ceiling returns for ventilation purposes. In many classrooms the supply and return grilles are located too close to one another. Wall mounted fin tube radiation at the exterior walls are utilized as the main heat source for the spaces. Temperature control for individual spaces utilize thermostatic control valves located on the supply side of the fin tube radiation. These valves provide a dial type control where increasing or decreasing the dial will lower or increase the space temperature. These are ineffective when trying to maintain a constant comfort level within the space. Many of the ceiling mounted diffusers and grilles appear dirty which could be a sign of dirty filter and ductwork.

The Maker Space was recently renovated and is air conditioned by three (3) ductless AC units that are piped to exterior wall mounted air cooled condensing units. The AC system appears in very good condition. The Maker Space is heated by hot water fin tube radiation heating and is ventilated by the central H&V air handling system. The fintube radiation and associated enclosure are in poor condition and in need of replacement.

We recommend that the Freshman Academy building be served by the Steam Plant Building's new high efficiency hot water heating boiler plant. All existing steam and hot water heating equipment shall be replaced with new hot water heating equipment. All existing steam heating and condensate distribution piping systems, existing steam to hot water heat exchangers, and condensate return pumps shall be removed. All existing terminal heating units and associated steam/hot water piping should be replaced. All existing rooftop and indoor air handling units, and exhaust fans, should be replaced with new units, and upgraded where possible to include energy recovery ventilation and variable air volume control to provide increased energy efficiency. Ventilation systems shall be provided for areas of the existing buildings that are not currently provided with code required ventilation. All existing ductwork distribution systems should be replaced. Existing split system and window type AC units should be

replaced with high efficiency VRF type AC systems. Lastly, a new direct digital (DDC) control automatic temperature control and building energy management system should be installed to control all new HVAC systems and equipment.

Steam Plant:

The main campus heating plant consists of (2) gas-fired steam Cleaver Brooks tube style boilers, each having a capacity of 24,493 MBH natural gas input. The Boilers are Cleaver Brooks Model CBI700.600.015ST boilers, which were installed in 1996. The boilers appear to be in fair physical condition on the exterior, however the boiler internal shell and tubes surfaces show signs of wear and corrosion. The boilers are nearing the end of their expected useful service life of 25 years. The Steam Plant feeds steam to the Coburn (1892) /Sullivan (1997 Addition)/ 1922 Building and Freshman Academy Building. Condensate return travels back to the boilers through the use of a triplex pump condensate receiver and deaerator boiler feed unit, which was manufactured by Shipco. Breeching associated with each boiler consists of a double wall positive pressure system that combines into a common header and exits the building into a masonry stack located adjacent to the Steam Plant. Combustion air for boilers is provided through high wall mounted louvers, which are equipped with dampers which are interlocked to the boilers. Gas fired vertical unit heaters are utilized for spatial heating requirements. The Steam Plant is tied into the school's direct digital control building management system that is manufactured by Siemens.

ELECTRICAL/TELECOMMUNICATIONS/SECURITY:

General:

In general, the majority of the Electrical systems have reached their life expectancy with some equipment at approximately 50% of its expected life. The equipment that has reached the end of its useful life is in poor condition. Due to the condition of these systems and the fact that some systems do not comply with current codes, or do not meet current standards of expected efficiency and performance, it is recommended that new Electrical systems be provided with some exceptions that will be further detailed below.

1922 Building:

Portions of the existing electrical distribution system was installed in the 1990s and some are original vintage. Panelboards in general are located in corridors and are not separated by load type. Branch circuits are in poor condition and the apparent use of extension cords and plug strips indicates a lack of receptacles. The electrical distribution system should be replaced as described below in any renovation/repair program.

The interior lighting in the building in general is T8 fluorescent however, in most cases light levels quality is not what would be considered acceptable in current lighting design practice. The lighting and lighting controls should be upgraded to meet current

energy codes as well.

The emergency power system does not separate optional standby and life safety loads therefore it is not in compliance with current code. The emergency system is served by the generator in the power plant. Any renovation or base repair will require a generator/emergency systems upgrade as described below.

The fire alarm system notification coverage and type is not in compliance with current code. The fire alarm system should be replaced with a new addressable voice evacuation system as required by the building code in "E" use groups.

A new 4,000 ampere service will be provided with new distribution panels to accommodate power, lighting, and mechanical loads. New energy efficient LED lighting controlled with a new addressable networked lighting control system will be provided. The control system will be interfaced with the BMS system via BacNet over IP protocol. A 250 KW diesel generator will provide emergency power to a new code compliant emergency distribution system. The fire alarm system will be upgraded to a new addressable voice evacuation system to comply with current code. New systems that are required by code that were not previously required will be provided, such as a two-way communications systems and a BDA system for Public Safety communications.

The existing classroom intercom system and clock system is beyond its serviceable life, in same locations it is failing and should be replaced in a renovation or base repair program.

The data cabling has been updated over the years to keep up with the emergency educational technology devices. Telephone and data cabling infrastructure should be upgraded in order for the school to be prepared for 21st Century learning.

The data system will consists of 10 gig fiber optic backbone cabling, horizontal wiring will consist of CAT 6 UTP for both telephone and data. Wireless access locations will be provided with multiple CAT 6A UTP cables to ensure wireless density as well as one hundred percent coverage.

A new central paging system will be provided and integrated with the telephone system which will be synched with wireless clocks that act as transceivers and tie back to a master clock head end.

The buildings are equipped with an access control system, video management system, and intrusion detection system. There is extensive camera coverage however, the cameras are a mix of analog and IP type. All cameras will be upgraded to megapixel IP type cameras with new CAT 6 cabling to replace analog cabling for non-IP cameras. The VMS software should be upgraded and standardized on throughout the facility, cameras should be added in areas that lack coverage.

The access control system will be upgraded and standardized on throughout the facility. Additional doors should be provided with access control to meet the operational needs of the school from partitioning the building to lock down situation.

The intrusion system will be integrated with the video management system and the

access control system.

Lord/Field House (1980) Building:

The existing electrical distribution system is in poor condition. Panelboards in general are located in corridors and are not separated by load type. Branch circuits are in poor condition and the apparent use of extension cords and plug strips indicates a lack of receptacles. The electrical distribution system should be replaced as described below in any renovation/repair program.

The interior lighting in the building in general is T8 fluorescent however, in most cases light levels quality is not what would be considered acceptable in current lighting design practice. The lighting and lighting controls should be upgraded to meet current energy codes as well.

The emergency power system does not separate optional standby and life safety loads therefore it is not in compliance with current code. The emergency system is served by the generator in the power plant. Any renovation or base repair will require a generator/emergency systems upgrade as described below.

The fire alarm system notification coverage and type is not in compliance with current code. The fire alarm system should be replaced with a new addressable voice evacuation system as required by the building code in "E" use groups.

A new 4,000 ampere service will be provided with new distribution panels to accommodate power, lighting, and mechanical loads. New energy efficient LED lighting controlled with a new addressable networked lighting control system will be provided. The control system will be interfaced with the BMS system via BacNet over IP protocol. A 250 KW diesel generator will provide emergency power to a new code compliant emergency distribution system. The fire alarm system will be upgraded to a new addressable voice evacuation system to comply with current code. New systems that are required by code that were not previously required will be provided, such as a two-way communications systems and a BDA system for Public Safety communications.

The existing classroom intercom system and clock system is beyond its serviceable life, in same locations it is failing and should be replaced in a renovation or base repair program.

The data cabling has been updated over the years to keep up with the emergency educational technology devices. Telephone and data cabling infrastructure should be upgraded in order for the school to be prepared for 21st Century learning.

The data system will consists of 10 gig fiber optic backbone cabling, horizontal wiring will consist of CAT 6 UTP for both telephone and data. Wireless access locations will be provided with multiple CAT 6A UTP cables to ensure wireless density as well as one hundred percent coverage.

A new central paging system will be provided and integrated with the telephone system which will be synched with wireless clocks that act as transceivers and tie back to a

master clock head end.

Freshman Academy:

The existing electrical distribution systems are in poor condition. Branch circuits are in poor condition. The electrical distribution system should be replaced as described below in any renovation/repair program.

The interior lighting in the building in general is T8 fluorescent however, in most cases light levels/quality is not what would be considered acceptable in current lighting design practice. The lighting and lighting controls should be upgraded to meet current energy codes as well.

The Freshman Academy does not have an emergency generator; all emergency lighting is done through Bodine ballasts. This is a burden on maintenance to properly test the emergency ballasts. An emergency generator and distribution system as described below should be provided.

The building contains a conventional obsolete fire alarm control system with non-compliant notification appliances. The fire alarm system should be replaced with a new addressable voice evacuation system as required by the building code for "E" use groups.

A new 1,600 ampere service will be provided with new distribution panels to accommodate power, lighting, and mechanical loads. New energy efficient LED lighting controlled with a new addressable networked lighting control system will be provided. The control system will be interfaced with the BMS system via BacNet over IP protocol. A 250 KW diesel generator will provide emergency power to a new code compliant emergency distribution system. The fire alarm system will be upgraded to a new addressable voice evacuation system to comply with current code. New systems that are required by code that were not previously required will be provided, such as a two-way communications systems and a BDA system for Public Safety communications. The communications systems will be upgraded to meet 21st Century learning requirements.

Steam Plant:

The Steam Plant Building will reuse the existing 1,000 ampere and 2,500 ampere services. New branch circuit distribution systems will be provided which consists of a system of sub-panels and feeders to accommodate the lighting upgrades and mechanical upgrades. The existing 105 KW generator will be utilized and the emergency distribution will be modified to accommodate the mechanical upgrades to ensure critical mechanical systems are on emergency power.

The buildings are equipped with an access control system, video management system, and intrusion detection system. There is extensive camera coverage however, the cameras are a mix of analog and IP type. All cameras will be upgraded to megapixel IP type cameras with new CAT 6 cabling to replace analog cabling for non-IP cameras. The VMS software should be upgraded and standardized on throughout the facility,

cameras should be added in areas that lack coverage.

The access control system will be upgraded and standardized on throughout the facility. Additional doors should be provided with access control to meet the operational needs of the school from partitioning the building to lock down situation.

The intrusion system will be integrated with the video management system and the access control system.

PLUMBING & FIRE PROTECTION:

General:

The campus is comprised of five buildings. The Field House shares domestic cold water, and gas services with the Lord Building and 1922 Building. It also shares its fire protection services with the Lord Building. The 1922 Building has its own fire protection service. The Freshman Academy has its own domestic cold water service, fire protection service, and fire pump. The Steam Plant also has its own domestic cold water service, and shares its gas service with the Freshman Academy. The only building not provided with sprinklers is the Field House.

In general, for all five buildings, the piping is past its useful life. Hot water is supplied by a combination of electric water heaters and old gas-fired hot water storage tanks, decreasing efficiency. The following existing conditions report provides more information on each of the buildings along with a summary of recommendations

1922 Building:

Fire Protection:

The 1922 Building sprinkler system is served by a 4" water line, entering the east side of the building. The service is located in the basement, underneath Stair C. The building has sprinklers throughout, with FDV connections in the hallways. One exception is the Teacher's Work Room on the third floor, which is not provided with sprinklers. Protection will need to be provided in this area. The auditorium stage also has FDV's at each end, as required by code.

Plumbing:

The waste and water piping in the 1922 building is past its useful life, and it is recommended to replace it. The building contains bathroom cores as well as art rooms, janitor's closes, lab rooms and a teaching kitchen. The fixtures in the bathrooms are not low-flow and it is recommended to replace them. The sinks in these lab rooms do not appear to be connected to an acid neutralization tank. A central neutralization system for each sink should be added. The emergency eyewashes do not appear to be served by tempered water, which is required to meet code. The hot water comes from the two domestic storage heaters in the basement

of the Field House. The building has different types of drinking fountains throughout, and include some handicapped accessible units. Some were out of service.

There are multiple art rooms in the basement. They each have an art sink. Only one of the art sinks had a solid's interceptor. A solids interceptor should be added per plumbing code.

The teaching, Culinary Kitchen, is located in the basement. It contains equipment that is served by the building's gas line. The kitchen did not have visible floor drains, and the grease interceptor that serves the 3-bay sink is in poor condition.

Lord/Field House:

The Lord and Field House are served by a 6" domestic cold water service that enters through the basement of the Field House. Two gas-fired domestic hot water storage heaters are also located in the basement, and account for the hot water for the Lord Building, Field House, and 1922 Building. It is recommended that the gas-fired storage tanks be replaced with new High Efficiency gas-fired hot water heaters. The 6" waste for the Field House exists on the west side, and the 6" RWL exists on the north.

The two buildings together contain locker rooms, bathroom cores, and labs. The fixtures in the bathroom cores, like with all other buildings, are outdated, and it is recommended to replace them.

The Field House contains a swimming pool, as well as large women and men's locker rooms. The lockers rooms have communal showers, as well as individual shower stalls. Per 248 CMR 10.10, "In shower rooms or in an area that multiple shower heads are installed and the individual shower space, ara, stall, the floor is designed and pitched so that waste water from one shower head area does not flow over the floor area serving another shower head area". The communal showers and the locker room showers and the "Type 2" showers may not meet these requirements.

The Lord Building houses lab rooms. The sinks in these lab rooms do not appear to be connected to an acid neutralization tank. A central neutralization system or local 5 gallon acid neutralization for each sink should be added. The lab also has gas connections, and an emergency gas shutoff located a few inches from the floor, in the back of the classrooms. They should be located at the exit door of the rooms, per code. The emergency eyewashes do not appear to be served by tempered water, which is required to meet code.

Freshman Academy:

The entire Freshman Academy is sprinklered and appears to meet NFPA 13 requirements. Standpipe and FDVs are located on each floor, in the stairwell. The sprinkler service and a 50P fire pump assembly is located in a closet, next to the domestic cold water service.

The domestic cold water service for the building enters at the fire sprinkler room. The electric water heater in that same room provides the building's hot water. It is recommended that the heater be replaced with a new energy efficient gas-fired hot

water heater. The building has bathroom cores, as well as Life Skills rooms which contain sinks and gas-fired stoves.

There is a serving kitchen on the Ground Floor. The purpose of it is mostly for heating and serving food. No actual cooking is done. It is served by its own hot water heater, located in the kitchen itself.

Steam Plant:

The Steam Plant is protected with upright heads. It shares the fire protection services with the Freshman Academy. The building contains a domestic cold water service as well as a domestic hot water heat exchanger. The hot water and hot water recirc. Run between the heat exchanger and the Freshman Academy. On the side of the building is the gas service and meter which serves both the Steam Plant and Freshman Academy. There is flooding in the Steam Plant and the drainage system may need to be modified.

RECOMMENDATIONS:

Fire Protection:

- All existing sprinkler piping and heads in the 1922 Building, Lord and Freshman Academy should be removed and replaced with a new fire suppression system throughout in accordance with NFPA 13. Existing services to building may be able to be reused pending confirmation of condition.
- A major renovation would require sprinkler heads be installed throughout the Field House in accordance with NFPA 13.

Plumbing:

- Per ASHRAE and ASPE, water piping and insulation have a life expectancy of 225-30 years. Piping is past its use life. Consider replacing all water, waste and vent piping in all buildings.
- Replace all bathroom fixtures with new low-flow, sensor operated faucets and flush valves.
- Provide new roof drains on all flat roofs being replaced.
- Replace all existing electric water heaters with high efficiency gas fired water heaters.
- Grease traps in the kitchens are past their useful life and should be replaced.
- Complaints regarding lack of floor drains in the teacher kitchen; floor drains should be added.
- Emergency gas shut offs should be located by the exit door all lab rooms.
- Emergency eyewashes did not appear to be served with tempered water. Tempered water loop needs to be added per plumbing code.

- Lab sinks did not appear to have an acid neutralization system. A central neutralization system or local 5 gallon acide neutralization for each sink should be added per plumbing code.
- Replace gas fired domestic hot water storage tanks in Field House with high efficiency gas heaters.
- Add floor drains or modify floor slop of showers in locker rooms to meet 248 CMR 10.10 requirements.
- Add solid interceptors to all art sinks.
- Modify drainage system in the Steam Plant to prevent future flooring.
- Add regular and handicapped fountains to all buildings to meet code requirement of 1 drinking fountain per 75 people.

See appendix for further information.

3.1.4 Evaluation of Existing Conditions

C. Foodservice

School Foodservice:

The Lowell High School's cafeteria kitchen serves the typical school lunch program offering a wide variety of food options at multiple service points. The student participation is steady but service is slow due to many factors with the obvious one being that the serving area is not maximized for ultimate flow and throughput. Additionally, it is remotely located from the kitchen forcing the misplacement of labor assets so that management can deal with food transport.

The production kitchen is antiquated and poorly equipped in some cases. It serves two remote serving areas located in the Lord Building and one in the Freshman Academy. Over the years as menu offering and production standards have changed so has the equipment. Unfortunately, the existing infrastructure did not offer any flexibility. Equipment was placed where it could be accommodated and not where it needed to be placed. As a result much of the kitchen flow is in conflict. Lastly, as the program has grown the storage capacities have not. In one example the kitchen staff added walk-in freezer but that additions had come at the expense of displacing some other function.

A complete reorganization is warranted. The future kitchen and servery design must be focused on adequate facilities, flexible future growth, and direct adjacency of the serving area. Additionally, this facility will also need to be positioned so that it can adequately ship product to other schools and programs throughout the campus and district.

Culinary:

The Culinary Arts program located in the 1922 building is well attended. However, the facility in which the program operates is in dire need of a complete reorganization. The program, in order to meet demand is trying to do too much in an undersized facility that is not properly equipped. There are cooking pieces not located beneath exhaust hoods. There is not enough adequate space for students to set up learning stations. For example a row of tables where students can set up and safely learn knife skills such as chopping and dicing. The culinary program also supports a retail restaurant that is equipped with a bakery display case and salad bar and seating for small groups. The restaurant dining area is open to serve community groups, teaching staff, and is available for special functions and catering.

The future culinary teaching kitchen must be organized to accommodate two main programs, baking and hot food production. These two programs must be organized so that are separate but also share common functions such as pot washing, storage, and use of a common food preparation area used to teach basic culinary skills. The

restaurant component must be placed so that it is convenient to street access while also maintaining a secure point of entry to the school.

See appendix for further information.

3.1.4 Evaluation of Existing Conditions

C. Hazardous Materials

1922 Building:

1.0 INTRODUCTION:
UEC was contracted by Perkins Eastman to conduct a determination survey for hazardous materials at Lowell High School,1922 Building.

2.0 FINDINGS:
Asbestos Containing Materials (ACM)
Various types of asbestos containing materials were found during the survey. The following suspect materials were either found or assumed to contain asbestos.

1. Lab table was found to contain asbestos.
2. Soft black glazing caulking for borrowed lite was found to contain asbestos.
3. Hard grey glazing caulking for borrowed lite was found to contain asbestos.
4. Light grey/white vinyl floor tile was found to contain asbestos.
5. Mastic for vinyl floor tile under plywood/carpet was found to contain asbestos.
6. Glue daub for ceiling plaster was found to contain asbestos.
7. Hard grey glazing caulking for vision lite in metal door was found to contain asbestos.
8. Exterior door framing caulking was found to contain asbestos.
9. Exterior residue door framing caulking on brick was found to contain asbestos.
10. Glue holding blackboard was assumed to contain asbestos.
11. Pipe insulation was assumed to contain asbestos.
12. Stage fire curtain was assumed to contain asbestos.
13. Underground sewer pipes were assumed to contain asbestos.
14. Damproofing on exterior and foundation walls was assumed to contain asbestos.

Polychlorinated Biphenyls (PCB's)-Electrical Equipment and Light Fixtures
Visual inspection of various equipment such as light fixtures, thermostats, exit signs and switches was performed or the presence of PCB's and mercury. Ballasts in light fixtures were assumed not to contain PCB's since there were labels indicating that "No PCB's" was found. Tubes in light fixtures, thermostats, signs and switches were assumed to contain mercury.

PCB's in Caulking:

Building materials and caulking were assumed to contain PCB's.

Lead Based Paint (LBP):

LBP was assumed to exist on painted surfaces in all areas constructed prior to 1978. A school is not considered a regulated facility.

Airborne Mold:
Indoor airborne mold spore concentrations were lower than the outside sample. Based on comparisons with historical data from projects of similar type, building

utilization, geographic location and season, the indoor airborne levels are considered high.

Radon:
The measured radon concentrations of the samples were found to be lower than the EPA guideline of 4 picoCuris of radon per liter of air (pCi/L). No further action is required.

3.0 RECOMMENDATIONS/REQUIRED TESTING:
Destructive testing of the exterior walls and excavation around foundation walls will be required to be performed to expose any suspect ACM (damproofing/flashing) and would need to be performed during the design development phase of the project.

Testing for PCB's is not required to be performed by the EPA and is not recommended.

Lord/Field House:

1.0 INTRODUCTION:
UEC was contracted by Perkins Eastman to conduct a determination survey for hazardous materials at Lowell High School, Lord Building/Field House.

3.0 FINDINGS:
Asbestos Containing Materials (ACM)
Various types of asbestos containing materials were found during the survey. The following suspect materials were either found or assumed to contain asbestos.

15. Soft black glazing caulking for borrowed lite was found to contain asbestos.
16. Vertical white caulking in CMU wall was found to contain asbestos.
17. Mastic for white with black/grey vinyl floor tile was found to contain asbestos.
18. Mastic for older caramel vinyl floor tile was found to contain asbestos.
19. Exterior window soft brown glazing caulking was found to contain asbestos.
20. Exterior transite panel was found to contain asbestos.
21. Exterior transite panel covering vertical steel column was found to contain asbestos.
22. Exterior window glazing caulking for transite panel was found to contain asbestos.
23. Glue holding tectum deck at the pool building was assumed to contain asbestos.
24. Exterior black damproofing behind brick at foundation was found to contain asbestos.
25. Exterior flashing protruding from brick was found to contain asbestos.
26. Exterior hidden caulking for transite panel encasing vertical steel column was found to contain asbestos.
27. Glue holding blackboard was assumed to contain asbestos.
28. Underground sewer pipes were assumed to contain asbestos.

Polychlorinated Biphenyls (PCB's)-Electrical Equipment and Light Fixtures
Visual inspection of various equipments such as light fixtures, thermostats, exit signs and switches was performed or the presence of PCB's and mercury. Ballasts in light fixtures were assumed not to contain PCB's since there were labels indicating that "No PCB's" was found. Tubes in light fixtures, thermostats, signs and switches were assumed to contain mercury.

Mercury in Rubber Flooring:
Samples results of the rubber flooring indicated the presence of high level of mercury. Mercury was assumed to have leached into the concrete slab. Sampling would be required to determine extent of contamination/leaching.

PCB's in Caulking:

Building materials and caulking were assumed to contain PCB's.

Lead Based Paint (LBP):

LBP was assumed to exist on painted surfaces in all areas constructed prior to 1978. A school is not considered a regulated facility.

Airborne Mold:
Indoor airborne mold spore concentrations were lower than the outside sample. Based on comparisons with historical data from projects of similar type, building utilization, geographic location and season, the indoor airborne levels are considered high.

Radon:
The measured radon concentrations of the samples were found to be lower than the EPA guideline of 4 picoCuris of radon per liter of air (pCi/L). No further action is required.

3.0 RECOMMENDATIONS/REQUIRED TESTING:
Destructive testing of the exterior walls and excavation around foundation walls will be required to be performed to expose any suspect ACM (damproofing/flashing) and would need to be performed during the design development phase of the project.

Testing for PCB's is not required to be performed by the EPA and is not recommended.

Freshman Academy:

1.0 INTRODUCTION:
UEC was contracted by Perkins Eastman to conduct a determination survey for hazardous materials at Lowell High School, Freshmen Academy.

4.0 FINDINGS:
Asbestos Containing Materials (ACM)
Various types of asbestos containing materials were found during the survey. The following suspect materials were either found or assumed to contain asbestos.

1. Soft black glazing caulking for vision lite in metal door was found to contain asbestos.
2. Soft black glazing caulking for borrowed lite was found to contain asbestos.
3. Purple sink damproofing was found to contain asbestos.
4. Tan sealant around sink drain was found to contain asbestos.
5. Black mastic in speaker box was found to contain asbestos.
6. Underground sewer pipes were assumed to contain asbestos.
7. Damproofing on exterior and foundation walls was assumed to contain asbestos.

Polychlorinated Biphenyls (PCB's)-Electrical Equipment and Light Fixtures

Visual inspection of various equipments such as light fixtures, thermostats, exit signs and switches was performed or the presence of PCB's and mercury. Ballasts in light fixtures were assumed not to contain PCB's since there were labels indicating that "No PCB's" was found. Tubes in light fixtures, thermostats, signs and switches were assumed to contain mercury.

PCB's in Caulking:

Building materials and caulking were assumed to contain PCB's.

Lead Based Paint (LBP):

LBP was assumed to exist on painted surfaces in all areas constructed prior to 1978. A school is not considered a regulated facility.

Airborne Mold:

Indoor airborne mold spore concentrations were lower than the outside sample. Based on comparisons with historical data from projects of similar type, building utilization, geographic location and season, the indoor airborne levels are considered high.

Radon:

The measured radon concentrations of the samples were found to be lower than the EPA guideline of 4 picoCuris of radon per liter of air (pCi/L). No further action is required.

3.0 RECOMMENDATIONS/REQUIRED TESTING:

Destructive testing of the exterior walls and excavation around foundation walls will be required to be performed to expose any suspect ACM (damproofing/flashing) and would need to be performed during the design development phase of the project.

Testing for PCB's is not required to be performed by the EPA and is not recommended.

Steam Plant:

1.0 INTRODUCTION:

UEC was contracted by Perkins Eastman to conduct a determination survey for hazardous materials at Lowell High School, Steam Plant.

5.0 FINDINGS:

Asbestos Containing Materials (ACM)

Various types of asbestos containing materials were found during the survey. The following suspect materials were either found or assumed to contain asbestos.

1. Pipe insulation was assumed to contain asbestos. The insulation was found in metal elevated enclosure leaving the plant to Freshmen Academy.
2. Exterior flashing protruding from foundation was found to contain asbestos.
3. Underground sewer pipes were assumed to contain asbestos.
4. Damproofing on exterior and foundation walls was assumed to contain asbestos.

Polychlorinated Biphenyls (PCB's)-Electrical Equipment and Light Fixtures

Visual inspection of various equipments such as light fixtures, thermostats, exit signs and switches was performed or the presence of PCB's and mercury. Ballasts in light fixtures were assumed not to contain PCB's since there were labels indicating that "No PCB's" was found. Tubes in light fixtures, thermostats, signs and switches were assumed to contain mercury.

PCB's in Caulking:

Building materials and caulking were assumed to contain PCB's.

Lead Based Paint (LBP):

LBP was assumed to exist on painted surfaces in all areas constructed prior to 1978. A school is not considered a regulated facility.

Airborne Mold:

Indoor airborne mold spore concentrations were lower than the outside sample. Based on comparisons with historical data from projects of similar type, building utilization, geographic location and season, the indoor airborne levels are considered high.

Radon:

The measured radon concentrations of the samples were found to be lower than the EPA guideline of 4 picoCuris of radon per liter of air (pCi/L). No further action is required.

3.0 RECOMMENDATIONS/REQUIRED TESTING:

Destructive testing of the exterior walls and excavation around foundation walls will be required to be performed to expose any suspect ACM (damproofing/flashing) and would need to be performed during the design development phase of the project.

Testing for PCB's is not required to be performed by the EPA and is not recommended.

See appendix for further information.

(This page intentionally left blank)

3.1.4 Evaluation of Existing Conditions

D. Site - Site Survey & Infrastructure

Lowell High school is located at 50 Father Morissette Boulevard in Lowell, Massachusetts. Lowell High School consisted of five (5) buildings:

- 1922 Building
- Lord Building
- Field House Building
- Freshman Academy
- Steam Plant

The following is a summary of infrastructure utilities available. The summary is based on record plans, on site survey by Consultant Engineers and Lowell Regional Wastewater Utility. See appendices for further detailed information.

Water Service:

All five buildings of the Lowell High School are connected to the Lowell Regional Water Utility (LRWU) water system.

- 1922 Building:
  - Two (2) existing 4-inch water services under the sidewalk on the easterly side of the building and connected to an existing 6-inch water main located in Kirk Street near Paige Street.
  - One (1) existing 6-inch fire service with a post indicator valve (PIV) that connects to the southerly side of the building. The fire service connects to an existing 6-inch water main located between the 1922 Building and the Merrimack Canal.
  - Two (2) fire hydrants appear to be within 500 feet of the westerly side of the 1922 Building and Merrimack Canal. One (1) hydrant is located at the corner of Kirk and Lee Streets.
- Lord/ Field House Buildings:
  - One (1) single 8-inch cement-lined ductile iron water service that provides both domestic and fire service to both buildings which is located under the sidewalk and connected to an existing 20-inch water main in French Street near Arnand Street.
  - The post indicator valve (PIV) on the existing 8- inch water service
  - The 8-inch water service splits into a 6-inch fire service ad a separate 6-inch domestic water service prior to entering the building.
  - Fire department siamese connection located at the northwest corner of the Field House Building
  - One (1) fire hydrant approximately 150 feet from the water services on French Street between the Lord/ Field House Buildings.

- Freshman Academy:
  - One (1) existing 4-inch domestic water service under the sidewalk and connected to an existing 6-inch water main located in Paige Street.
  - One (1) existing 8-inch fire service under the sidewalk and connected to an existing 6-inch water main located in Page Street.
  - One (1) fire department siamese connection on fate face of the southerly side along Paige Street.
  - One (1) fire hydrant approximately more than 300 feet on John Street located between Paige Street and French Street
- Steam Plant:
  - One (1) existing 2-inch domestic water service located on the westerly side of the building connected to the existing 6-inch water main via a tunnel to the 1922 Building
  - One (1) existing 4-inch fire service that is connected to the existing 6-inch water main via a tunnel to the 1922 Building with a double check back flow preventer in Kirk Street.
  - The existing water service is a 6-inch diameter (type unknown) pipe installed under the entry drive and sidewalk to a 10-inch main in South Franklin.
  - One (1) fire department siamese connection the northwest corner of the building on French Street.
  - One (1) fire hydrant approximately 100 feet of the building near the intersection of French Street and Kirk Street.

Sewer Service:

All five buildings of the Lowell High School are connected to the Lowell Regional Wastewater Utility (LRWWU) sewer system.

- 1922 Building:
  - One (1) 8-inch sewer service lateral and two (2) 6-inch sewer service laterals serve the building.
  - The 8-inch sewer service lateral near the northwest corner of the building and one (1) 6-inch sewer service lateral near the southwest building corner exists on the westerly side of the building and connects to the existing 12-inch combined sewer main near the Merrimack Canal.
  - The other 6-inch sewer service lateral exits on the easterly side of the building and connects to an existing 12-inch combined sewer main near Lee Street.
- Lord/ Field House Buildings:
  - Four (4) sewer service laterals that serve the buildings
    - The first sewer service is a 6-inch vitrified clay (VC) pipe that exits the westerly side of the Field House Building and connects to a sewer manhole located in the intersection of Arnand Street and French Street.

        - The second sewer service is a 6-inch VC pipe that exits on the northeasterly side of the Field House Building and connects to a 15-inch sewer main at an existing sewer manhole located in French Street.
        - The third sewer service is an 8-inch VC that exits on the northeasterly side of the Lord Building
        - The fourth sewer service is a 4-inch VC pipe that exits the Lord Building approximately 10 feet from the third service. The 4-inch sewer service connects to an acid neutralization manhole that then connects to the 8-inch sewer service and connects to a 15-inch sewer main at a sewer manhole located in French Street.
- Freshman Academy:
    - One (1) 6-inch sewer service lateral serves the school. The sewer service exits the school near at the middle of the northerly side of the building and connects to an existing 18-inch combined sewer (storm drainage and sanitary sewer flows) main at a manhole located in French Street.
- Steam Plant –
    - One (1) 8-inch sewer lateral serves the building. The sewer service exits the school and connects to the existing 18-inch combined sewer (storm drainage and sanitary sewer flows) main in French Street.

Storm Drainage:

- 1922 Building:
    - Several catch basins on the westerly side of the building that connect to the existing 12-inch combined sewer line near the Merrimack Canal.
    - One (1) 6-inch storm drain line that discharges from the approximate southerly center of the building at the alley that then discharges to an existing catch basin and then drains via an 8-inch storm drain line to the existing combined sewer system at a sewer manhole located in the sidewalk of Kirk Street.
    - One (1) 8-inch storm drain line discharges from the northwest corner of the building and connects to an existing storm drain line located on the westerly side of the building near the Merrimack Canal.
    - One (1) 4-inch foundation drain – connects to the 12-inch combined sewer line. It appears that the current drainage system is not in compliance with the current DEP Stormwater Regulations (2008)
    - Four (4) downspouts on the southerly side and two (2) on the westerly side which discharge to grade.
- Lord/ Field House:
    - Lord building's roof drainage is routed internally and into the storm water system on Father Morissette Blvd.
    - One (1) 6-inch vitrified clay (VC) drain pipe for roof drainage of the Field House to combined sewer manhole on Father Morissette Blvd. It appears that the current drainage system is not in compliance with the current DEP Stormwater Regulations (2008).
    - A third closed drainage system composed of catch basins, drain manholes and reinforced concrete pipe (RCP) collects surface

stormwater from the driveway to the loading dock discharging to a manhole and then into a 12-inch storm drain line that discharges to a combined sewer system in Arnand Drive. It appears that the current drainage system is not in compliance with the current Department of Environmental Protection (DEP) Stormwater Regulations (2008).

- Freshman Academy:
  - Freshman Academy's roof drainage is routed internally and into a single 12 inch storm drain service lateral and connects to an existing 18-inch combined sewer (storm drainage and sanitary sewer flows) main at a manhole located in French Street.
- Steam Plant –
  - Steam Plant's roof drainage is routed internally into the building and appears to discharge via two (2) 4-inch roof drain pipes into an 18-inch combined sewer line located in French Street.

Flood Plain

Based on the Flood Insurance Rate Map (FIRM), Community Panel Numbers 25017C0139F and 25017C0143F and both dated July 7, 2014, the Merrimack Canal is in Zone A (No base flood elevations determined). The remainder of the school building sites are located in Zone X (Areas determined to be outside the 0.2% annual chance floodplain).

Electrical

- 1922 Building:
  - Main Service provided via a switchboard prior to the 1990s, is back-fed through a 500 kVA dry type transformer.
  - The second switchboard is manufactured by FPE and is rated at 1,600 amps, 120/208 volt, 3 phase.
  - Emergency power is provided via a generator at the power plant. There is an Olympian transfer switch present in the emergency electric room. The transfer switch feeds emergency and optional standby loads.
- Lord/ Field House:
  - Main service provided via a 3,000 amp, 277/480 volt, 3 phase Switchboard located in the receiving area main electric room.
  - Emergency power is provided via a 100 kW generator located adjacent to 750 KVA transformer. The generator serves emergency lighting throughout and walking kitchen refrigeration transformers.
- Freshman Academy:
  - Main service provided via a rated 1,200 amp, 277/480 volt, 3 phase which feeds a 300 kVA dry type transformer with a 1,000 amp, 120/208 volt, 3 phase distribution panel.
  - Emergency power is provided via an emergency generator which supplies lighting and exit signs.

- Steam Plant:

- Main service provided consists of two switches and meters. The services are rated at 1,000 amp, 277/480 volt, 3 phase and 2,500 amp, 277/480 volt, 3 phase.
- Emergency power is provided via a 105 kW natural gas emergency generator. There are emergency battery units throughout as well.

Survey:

A land survey of the parcel which contain the Field House, Lord Building, 1922 Building, and the 75 Arcand Drive Property which is being considered for some expanded existing site options was performed by Nitsch Engineering. The Freshman Academy was not surveyed because of the Owner's requirement to consolidate the Freshman on a single campus. A survey will need to be performed if the renovation or expansion of this building is further considered.

See appendix for further information.

(This page intentionally left blank)

3.1.4 Evaluation of Existing Conditions

D. Site - Environmental Assessment (Phase 1)

Nobis Engineering, Inc. (Nobis) completed a Phase I Environmental Site Assessment (ESA) of six parcels of land located in the downtown area of Lowell, Massachusetts (the site). Five of these parcels are owned by the City of Lowell and are used as facilities and infrastructure for Lowell High School. The sixth parcel is currently privately owned and occupied by a pediatric dentistry office.

The Site is located within an area of mixed residential, commercial, and recreational use, including multiple parking garages, historical sites, a park, apartment buildings, and commercial space. The Site is made up of six buildings, all within a two city-block radius. The Lord Building, Field House, 1922 Building, the Freshman Academy, and the steam plant building are currently owned by the City of Lowell and are part of the Lowell High School complex. The 75 Arcand Street property is not owned by the City and is currently operated as a pediatric dentist's office. The Lord Building and Field House (50 Father Morissette Boulevard) are located on the western portion of the Site, with the 75 Arcand Street property abutting them to the south. A narrow park, the Lucy Larcom Park, and the Merrimack Canal are located to the east of the Lord Building and Field House, separating them from the 1922 Building. The 1922 Building connects to the Lord Building via two enclosed, glazed bridges which span across the canal and park below. The Freshman Academy and the steam plant are approximately one city block to the east of the 1922 building, with the steam plant building abutting the Freshman Academy to the west.

The Phase I ESA identifies several Recognized Environmental Conditions (RECs) associated with the historical use of the subject properties.

Recognized Environmental Conditions:

The RECs identified in the Phase I ESA can be used to evaluate potential subsurface environmental issues that might be encountered should a construction or renovation project be undertaken on one or more of the six parcels included in the assessment. The following are conclusions with respect to the potential impacts of subsurface environmental conditions on future redevelopment efforts for Lowell High School:

- The Site has been developed since the early 1800s, when the Merrimack Canal and associated textile mills were constructed. The Merrimack Manufacturing Company and Boott Cotton Mills were both located to the north of the Site, and a rail line was constructed to the west of the canal to serve these mills. Today this rail line still exists and is used for streetcar traffic

associated with the Lowell National Historical Park.

- Former railroad activities likely transported and handled raw materials, chemicals, and hazardous materials associated with the operation of the mills. Also, railroad operations and maintenance activities themselves typically utilize OHM such as creosote or arsenic-laced railroad ties, herbicides, lubricating oils, diesel fuel, and diesel exhaust, which commonly result in releases of heavy metals, pesticides/herbicides, and petroleum-related contamination along railroad corridors. Any disturbance of soil within the former railroad corridor should consider the possibility that residual contamination is present due to historical use.

- The mills operated until the mid-1900s before closing down and falling victim to urban renewal efforts in the 1960s, which completely changed the configuration of streets in the portion of the Site that is currently occupied by the Lord Building and the Field House. For over 100 years, the portion of the Site located to the west of the Merrimack Canal was occupied by tenement homes associated with the mill, but also a small portion of the mill complex itself. The extreme northwest corner of the Site, the current location of the Field House, was formerly occupied by a "Finishing Mill" that was part of the Merrimack mill complex. The finishing process in a textile mill could have included application of dyes, bleaches, or other chemicals to prepare the textile for its end use. Any disturbance of soil in this portion of the Site should consider the possibility that residual contamination is present due to historical use.

- In 1920, the Steam Plant was constructed at the corner of Kirk and French Streets. Based on the review of historical maps, it appears that the Steam Plant was initially fired by coal, and a "coal bin" was present between the Steam Plant and the Freshman Academy. Residual coal and/or coal ash contains high levels of semi-volatile organic compounds (SVOCs) and polycyclic aromatic hydrocarbons (PAHs). Any disturbance of soil in this portion of the Site should consider the possibility that residual contamination is present due to historical use.

- Review of Lowell Fire Department records revealed that the High School facility has/had a 12,600-gallon "below grade" "Faber Burner" tank located on French Street. The tank's contents were not listed, nor was the installation date, removal date, or any sort of inspection date. Fire Department records do not provide any additional details regarding the tank. This tank may have been a storage vessel for oil that was used to fuel the boilers in the Steam Plant before it was converted to natural gas, or used to heat one of the school buildings. The exact location of this tank is unknown, but is likely to be near the Steam Plant along French Street. According to City representatives, this tank is no longer in service. However, any subsurface exploration performed in the vicinity of the Steam Plant should consider the possibility that this tank is still in place, and that petroleum products may have been released to the environment.

In summary, if construction or renovation activities (or pre-design activities) are expected to disturb soils, or if excess soils are expected to be generated during construction, considerations should be made for the management of environmental media. For example, if soils are expected to be displaced in order to construct a foundation for a new building, these soils should first be evaluated to determine if they have been impacted by OHM. Typically, pre-characterization of soils consists of the collection of soil samples from the area to be disturbed, and analysis of soil samples for a wide range of potential contaminants to determine the presence or absence of contamination, and to meet the requirements of an off-site reuse/disposal location, should these soils be surplus material unable to be reused within the project site.

The typical suite of laboratory analyses for pre-characterization soil samples includes volatile organic compounds (VOCs) by EPA Method 8260, semi-volatile organic compounds (SVOCs) by EPA Method 8270, polychlorinated biphenyls (PCBs) by EPA Method 8082, total petroleum hydrocarbons (TPH) by EPA Method 8100, and heavy metals by EPA Methods 6010/6020. Other analyses may be added based on site-specific knowledge of former operations. There are several nuances, including exemptions and variances that can be applied if specific observations of urban fill materials are made, that might be applicable to the Site as subsurface information is collected and evaluated. A Licensed Site Professional (LSP) should be involved with any soil management evaluations that are made during pre-design or construction, to ensure compliance with all applicable environmental laws and regulations.

Subsurface Investigation:

Given the identification of RECs on the Site, a Phase II investigation may be warranted during the pre-design phase of the project to determine the presence or absence of OHM in soils at the Site. At a minimum, Phase II investigations should include the following:

- Surface geophysical survey (electromagnetic and ground penetrating radar) in the vicinity of the Steam Plant to identify subsurface anomalies that might indicate the presence of an abandoned underground storage tank. This survey might be followed up with test pitting to identify the source of any anomalies.

- Collection of soil samples from Site areas where disturbance of soils is anticipated. The objective of this investigation would be to determine whether OHM is present in soils. This information would be used to determine the appropriate health and safety precautions that should be taken by construction workers, as well as to identify potential reuse or disposal options for excess soils generated during the project. Shallow soil samples (0 to 2 feet below ground surface) can be collected using hand augers. A small drilling rig (Geoprobe® or equivalent) would be required to obtain deeper soil samples.

Further information can be found in the full Phase I Environmental Site Assessment report found in the appendix.

See appendix for further information.

3.1.5 Site Development Requirements

A. Overview of Site Programming

As part of the feasibility study the city requested that the design team examine alternative sites throughout the city to be considered for a location of a new high school. Seventy-five sites were identified from the Lowell 2013 Open Space Plan. Many of the sites were quickly eliminated due to size, ownership or known site restrictions resulting in 7 sites identified as being worth studying further.

The 7 sites include; the Existing HS Location, Cawley Stadium, Wang MS/LeBlanc Park, South Common Park, Regatta Field, Rollie's Farm and Carlisle Street. All sites were evaluated based on: environmental constraints, usable acreage, location, suitability and access to public transportation.

Please refer to the appendix for the Site Selection Analysis for the full breakdown and evaluation of each site.

Existing Site: Lowell High School is located along Father Morissette Boulevard and Arcand Drive. The Freshman Academy is detached and located at the intersection of Paige Street and John Street adjacent to which is the Steam Plant. The two main high school structures are the Lord building and the 1922 Building which span a segment of the National Historic Park's Merrimack Canal and Lucy Larcom Park.

Existing Site Expanded: The expanded site includes an adjacent 1.4 acre parcel located south of the existing Lord and Field House building at 75 Arcand Drive. The site borders the trolley tracks to the east the Masonic building to the south, Arcand Drive to the west and Lowell High School to the north.

Cawley Site: The Cawley Site is located between Rogers Street, Douglas Road, Village Street and Clark Road. The site is approximately 45 to 47 acres depending upon which maps are used, and includes approximately 6.5 Acres located within the town of Tewksbury. The actual acreage is pending a final site survey. Assessor's Map and GIS vary slightly, (GIS area +/- 45 acres, Assessor's Map indicates +/- 47.1 acres). The site is split between zones SSF and RR in Lowell and R40 in Tewksbury. The site is currently home to the Martin Athletic Complex which includes the Cawley Memorial Stadium, Martin Softball Field, Carvalho Field, Stoklosa Field, Desmond Field, Machado Field and a practice softball field and multi-use field.

B. Site Access and Circulation

The majority of students walk, bike or use public transportation (buses) to get to school. The breakdown is as follows: approximately 1/3 walk, 1/3 are dropped off by car and 1/3 drive or take public transportation. There is not a dedicated drop off and

according to staff, cars back up on Father Morissette Boulevard and surrounding streets in the mornings and afternoons. Student arrivals begin at 6:15 am with the majority of arrivals being between 7:30 and 7:55. Dismissal for all is at 2:30.For the student population in wheelchairs 10 vans drop off at 7:15 am and pick up at 2:05 pm. There are 7 contracted buses that take students after school to different sports facilities throughout the city.

Pedestrian circulation includes walking to and from the parking garage across Father Morissette Boulevard at the beginning and end of the day. Circulation during the school day includes walking along the public sidewalks between the buildings, along the Canal Park and through the skywalks across the canal. There is a lot of activity of students coming and going on and off campus throughout the day.

Program Existing Site: It is assumed that the overall access and circulation patterns to the school would generally not change with the exception of freshmen being on campus. Students would continue to use the public bus system, walk, bike or drive to school. Site program should include improvements to all entrance plazas (specifically along Father Morissette Boulevard where after school buses line up) to ensure that they are well lit, ADA compliant and have adequate amounts of bike racks, benches for seating and trees for shade. Though not on the school property, all major street crossing connecting into the site should be improved, this includes the connection from the George Ayotte Parking Garage. Pedestrian connections should be provided around all new and existing buildings.

Program Expanded Existing Site: Same as the Existing Site Program above except that by adding the adjacent property site circulation can be improved and it will also provide direct access to Dutton Street which will improve public safety access around the building.

Program Cawley Site: Cawley site is located outside the city center and may need additional dedicated bus services to access the school. The program for site access will be to separate parent and bus drop-off areas as much as possible internally in order to separate student/parent/ bus vehicle conflicts. Sidewalks and bicycle friendly circulation should be provided around the school and accessing the adjacent athletic complex. Bus services for this site are under discussion with the City and the bus service company.

C. Parking and Paving

Current Program: The majority of staff, visitors and students use the George Ayotte parking garage located at 1 Post Office Square Lowell (garage capacity of 1,200). Additional parking is found at the Joe Downes Garage located at 75 John Street or street parking. All parking garages are owned and managed by the City of Lowell. Parking in the George Ayotte garage is free for school employees. Student parking passes cost $17 a month. Currently, it is estimated there are accommodations available for 624 vehicles for the Lowell High School needs as also accommodates UMASS Lowell.

Future school parking needs estimates include 700 (for staff and students) 35 handicap spaces and 40 visitor spaces for a total of 775 spaces. Required Parking spaces are approximate and will be further verified by Lowell High School.

Program Existing Site: All parking aside from a select amount of handicapped parking spaces will be offsite. The George Ayotte Parking Garage has a capacity of 1,200 spaces and additional parking spaces are available on street or in the Joe Downes Garage. A new site program should include creating as many handicapped parking spaces on site as possible and at a minimum replicating the 3 spaces currently there. The existing HC spaces are currently located to the south of the Field House.

Program Expanded Existing Site: Same as the Existing Site Program above except that by adding the adjacent property site circulation can be improved allowing a direct connection to Dutton Street and allowing additional onsite parking spaces .

Program Cawley Site: The program for the site development should include new, well lit, clearly defined staff, student and visitor parking. Parking should be approximately 775 spaces including handicapped spaces. This number will be further vetted by the school and city. Parking should be located as close to the school as possible but there can be overlap with other parking lots on site that service the field areas. In the current site plan, the proposed parking spaces have been reduced to only 608 on the Cawley site plan to accommodate the possibility of two new fields that replicate (2) of the fields displaced by the new school. Final field and parking layout is pending further discussions with the City and Lowell High School.

D. Emergency Access, Safety and Security

Currently there is fire and emergency access around the existing school except for fire truck access along the canal.

Program both sites: Design will comply with all public safety and building codes.

E. Trash Removal, Deliveries and Maintenance

Current Program: A loading dock and trash/recycling area is located on the south side of the Field House. Deliveries to the school involve the following:
1. Food 3 times /week
2. Paper products 1 time/month
3. Miscellaneous deliveries all go to the loading dock

Trash Removal includes the following:
1. (1) 40 yard recycling dumpster located by the dock- removed as needed
2. (2) 10 yard dumpsters located by loading dock –removed every day
3. Food waste is not recycled

Existing and Expanded Existing Site: Access for deliveries and trash removal for the proposed Full Renovation, Addition/Renovation Option 1A, Addition/Renovation Option 2, Addition/Renovation Option 4, and New School on Existing Site will be from Arcand Drive along the southwest side of the site. Loading, custodial, and food service facilities are located at the rear of Lord building. Similarly, access for deliveries and trash removal for Addition/ Renovation Option 3, Addition Renovation Option 5, and New School on Expanded Existing Site will also be accessed from Arcand Drive with the service drive connecting through the expanded site to Dutton Street which is parallel to the Merrimack Canal. Loading, custodial, and food service facilities are located at the rear of the Lord building and on the east side of the new Fieldhouse.

Cawley Site: For the proposed Cawley site scheme, access for delivers and trash removal will be primarily from Clark Road along the Northern edge for the property. Loading, custodial, and food service facilities are located along the first floor of the northwest corner of the new building extending for a portion along the northern edge.

F. Utilities and Services

EXISTING HS SITE

Water:

There are existing Lowell Regional Water Utility (LRWU) water mains in the surrounding streets. There is an existing LRWU 20-inch water main located in Father Morissette Boulevard and French Street with two (2) fire hydrants; a 6-inch LRWU water main in Kirk Street with one (1) hydrant; a 6-inch water main in LRWU Paige Street with one (1) hydrant; and a 6-inch LRWU water main in the former Anne Street with three (3) hydrant

Sanitary Sewer:

There are existing Lowell Regional Wastewater Utility (LRWWU) sanitary sewer and combined sewer mains in the surrounding streets. In Father Morissette Boulevard, there is an existing LRWWU 15-inch sanitary sewer main that flows westerly in Father Morissette Boulevard that flows into an 18-inch sanitary sewer main and then into a 24-inch sanitary sewer main near Arcand Drive. In the former Anne Street, there is an existing LRWWU 12-inch combined sewer line that flows in a northeasterly direction and connects to a 24-inch combined sewer main in French Street, then flows in an easterly direction in French Street. In Kirk Street, there is an existing 16”x18” inch combined sewer line that flows in a northeasterly direction and connects to the existing 24-inch combined sewer main in French Street. In Arcand Drive, there is an existing 15-inch sewer main that runs in a northerly direction and connects to the existing 24-inch sewer main in Father Morissette Boulevard.

Storm Drainage:

There are existing Lowell Regional Wastewater Utility (LRWWU) combined sewer mains and storm drain mains in the surrounding streets. In Arcand Drive, there is an existing LRWWU 18-inch storm drain that flows in a northerly direction and connects to the existing LRWWU 36-inch storm drain in Father Morissette Boulevard. In Father Morissette Boulevard, there is an existing LRWWU 15-inch storm drain that flows westerly and connects to the 36-inch storm drain at the intersection of Arcand Drive and Father Morissette Boulevard. In Anne Street there is an existing 12-inch combined sewer line that flows in a northeasterly direction and connects to a 24-inch combined sewer main in French Street. In Kirk Street there is an existing 16"x18" inch combined sewer line that flows in a northeasterly direction and connects to the existing 24-inch combined sewer main in French Street.

CAWLEY SITE

Water:

There are existing Lowell Regional Water Utility (LRWU) water mains in the surrounding streets. There is an existing LRWU 8-inch water main located in Douglas Road and an existing LRWU 8-inch water main in Village Street.

Sanitary Sewer:

There is an existing Lowell Regional Wastewater Utility (LRWWU) sanitary sewer main located in Douglas Street. There is a 36-inch LRWWU sanitary sewer main that flows in a northerly direction in Douglas Street that flows into a 42-inch LRWWU sanitary sewer main near Wedgemere Drive and then into a 48-inch LRWWU sanitary sewer main at the intersection of Douglas Street, Glenmere Street and Windward Road.

Storm Drainage:

There is an existing Lowell Regional Wastewater Utility (LRWWU) 36-inch storm drain main located off Douglas Street and within the Cawley Site that runs in a northerly direction that appears to discharge to the existing wetlands located to the north of the site.

Due to the site's proximity to wetland resource areas, the proposed stormwater management system will be designed according to Mass DEP stormwater standards, which require (AC 2/17: Bill this was in a previous iteration and is now missing – confirm inclusion.)

See appendix for further information.

G. Code Requirements

EXISTING HS SITE

Water:

Based on Record Documents, the buildings have existing 4-inch to 6-inch domestic water connections and fire protection connections to the existing LRWU water mains in the surrounding streets. The plumbing report indicates the desire to replace all existing building water services. The existing domestic and/or fire protection service connections to the surrounding streets shall be cut and capped at the main with the tees and gate valves removed.

New domestic and fire service connections to the main shall be made. Connections to the LRWU main will be reviewed and approved by the LRWU as part of their review process and will be constructed with cement lined ductile iron pipe and either tapping sleeves and valves or tees and gate valves. A flow test will be required to determine if the existing water main in the surrounding streets will have enough water pressure for the building's proposed domestic and fire protection needs. Final sizing, number, and location of building water services will be determined by the Plumbing and Fire Protection Engineers.

Inside the building, the LRWU will require installation of new domestic meter with a Meter Transmitter Unit ("MTU") as part of the BWSC's Automatic Meter Reading ("AMR") system and will require backflow prevention installed on both the domestic and fire protection service connections to meet LRWU standards.

Fire protection services will be coordinated with and approved by the Lowell Fire Department. Proposed building Fire Department Connections will be located within 100 feet of a fire hydrant and will be coordinated with the plumbing engineer and the Lowell Fire Department. Additional fire hydrants will be provided as required by the Lowell Fire Department and/or Fire Protection Engineer.

Sanitary Sewer:

New building sanitary sewer services will be designed to connect to the existing Lowell Regional Wastewater Utility (LRWWU) sanitary sewer mains in the streets with tee connections and in compliance with LRWWU regulations. Acidic wastes from chemistry labs or other uses such as MEP systems will require neutralization prior to discharge into the main, and any interior floor drains will be directed to this system. It is not anticipated that an exterior sewer pump system will be required for the building, new or renovated. Final sizing, number, and locations of the building sanitary sewer services will be determined by the Plumbing Engineer.

The building, whether new or renovated, will include a cafeteria with a minimum of 100 seats; therefore; the LRWWU will require a grease trap structure for the kitchen

waste service sized to meet the Department of Environmental Protection (DEP) guidelines. Based on the DEP guidelines and 310 CMR 15.000 (Title V), grease trap sizing is calculated at 15 gallons per day (gpd) per seat, yielding a minimum grease trap size for the building of 1,500 gallons.

Storm Drainage:

The site has a wetland resource (floodplain to the Merrimack Canal) near it and may require the filing of a Notice of Intent (NOI) with the Lowell Conservation Commission and the Massachusetts Department of Environmental Protection.

Soil testing will be required to categorize the onsite soils, identify seasonal high groundwater elevations, and determine infiltration rates. The stormwater management system for the proposed school will be designed to meet the Department of Environmental Protection's (DEP) Stormwater Management Standards to the maximum extent practicable for a developed/redevelopment site.

CAWLEY SITE

Water:

An existing Lowell Regional Water Utility (LRWU) 8-inch water main in Douglas Road and 8-inch water main in Village Street will provide water for the new school. A new cement-lined ductile iron water service loop will need to be provided for both fire service water (indoor sprinkler systems and outdoor hydrants) as well as the domestic water service. A flow test will be required to determine if the existing water main in the surrounding streets have enough water pressure for the building's proposed domestic and fire protection needs. Final sizing, number, and location of building water services will be determined by the Plumbing and Fire Protection Engineers. Review and approval with the LRWU will be required.

Inside the building, the LRWU will require installation of new domestic meter with a Meter Transmitter Unit ("MTU") as part of the LRWU Automatic Meter Reading ("AMR") system and will require backflow prevention installed on both the domestic and fire protection service connections to meet LRWU standards.

Fire protection services will be coordinated with and approved by the Lowell Fire Department. Proposed building Fire Department Connections will be located within 100 feet of a fire hydrant and will be coordinated with the plumbing engineer and the Lowell Fire Department. Additional fire hydrants will be provided as required by the Lowell Fire Department and/or Fire Protection Engineer.

Sanitary Sewer:

New building sanitary sewer services will be designed to connect to the existing Lowell Regional Wastewater Utility (LRWWU) sanitary sewer main in Douglas Street with PVC SDR 35 pipe and tee connections and in compliance with LRWWU

regulations. It is unknown at this time if an exterior sewer pump system will be required for the proposed school. Final sizing, number, and locations of the building sanitary sewer services will be determined by the Plumbing Engineer.

The new building will include a cafeteria with a minimum of 100 seats; therefore; the LRWWU will require a grease trap structure for the kitchen waste service sized to meet the Department of Environmental Protection (DEP) guidelines. Based on the DEP guidelines and 310 CMR 15.000 (Title V), grease trap sizing is calculated at 15 gallons per day (gpd) per seat, yielding a minimum grease trap size for the building of 1,500 gallons.

Acidic wastes from chemistry labs or other uses such as MEP systems will require neutralization prior to discharge into the main, and any interior floor drains will be directed to this system.

Storm Drainage:

The site has wetland resources (floodplain, wetlands, etc.) located on it and will require the filing of a Notice of Intent (NOI) with the Lowell Conservation Commission, the Massachusetts Department of Environmental Protection, and, depending on the proposed site design, possibly with the Tewksbury Conservation Commission.

Soil testing will be required to categorize the onsite soils, identify seasonal high groundwater elevations, and determine infiltration rates. The stormwater management system for the proposed school will be designed to meet the Department of Environmental Protection's (DEP) Stormwater Management Standards to the maximum extent practicable for a developed/redevelopment site.

See appendix for additional information.

Phase 1 Geo-environmental:

Existing HS Site:

A Phase I Environmental Site Assessment (ESA) has been performed per ASTM E1527-13 and MGL Part I, Title II, Chapter 21: Massachusetts Oil and Hazardous Material Release Prevention and Response Act. This report also includes 75 Arcand Drive which is included as part of the "expanded" existing site options. Based on the findings Nobis Engineering recommends that a Phase II subsurface investigation be conducted including collection and analysis of soil samples and a surface geophysical survey (electromagnetic and ground penetrating radar) in the vicinity of the steam plant to determine the presence or absence of a historical underground storage tank.

See appendix for further information.

Cawley Site:

Preliminary research by Nobis indicates that the Cawley Site appears to have been initially developed as athletic fields prior to 1938, and been used for this purpose since. There are several registered underground storage tanks to the south of the Cawley Site along Rogers Street, and one known release site (Release Tracking Number 3-2076) located within 1,500 feet of the site. Should this site be selected, Nobis recommends that a Phase 1 ESA be done.

H. Zoning Requirements

EXISTING HS SITE:

Based on the City of Lowell, Massachusetts Zoning Map, updated May 13, 2014, the existing HS site is located in the Downtown Mixed-Use District (DMU). Parcels located to the east of the Merrimack Canal also have an Artist Overlay District

Portion of Section 5.1 Table of Dimensional Regulations

No building or structure shall be built nor shall any existing building or structure be enlarged which does not conform to the regulations as to maximum ratio of floor area to lot area, minimum lot sizes, minimum lot area for each dwelling unit or equivalent, minimum lot frontage, minimum setback dimensions of front, side and rear yards, minimum open space, and maximum height of structures, and all other dimensional requirements in the several districts as set forth in the Table of Dimensional Regulations, except as hereinafter provided. [Ord. 11-29-05, 4-18-06, 4-3-07, 9-27-11]

Dimensions (in feet or square feet unless otherwise noted)

DISTRICT	**DMU**
TYPE OF USE	All permitted uses
Maximum FAR	4
Minimum Lot Size	----
Minimum LA / DU	----
Minimum Frontage	25
Front Yard Setbacks: Minimum	----
Front Yard Setbacks: Maximum	----
Front Yard Setbacks: Projections	----
Front Yard Setbacks: Porches	----
Front Yard Setbacks: Garages	----
Minimum Side Yard	----
Minimum Rear Yard	----
Minimum UOS / DU	----
Maximum Height	----
Maximum Stories	----

----Denotes no dimensional requirement.
* Front setbacks in these districts shall be consistent with existing setbacks on the block.
† Side and rear yard setbacks in these districts must be at least 15 feet when abutting a residentially-zoned lot.
** Minimum residential frontage in these districts may be reduced by special permit under the provisions of Section 5.1.1 (7).

Portion of Section 6.1.4 Table of Parking Requirements

Off-street parking facilities shall be provided as follows. All requirements based on square footage refer to gross floor area unless otherwise noted. The shared parking chart identifies the percentage of the established required parking spaces that must be provided for each time period in shared parking situations.

	Zone	Min. Parking Req.
INSTITUTIONAL, RECREATIONAL & EDUCATIONAL USES		
c. High School	Where Permitted	6 spaces per instructional room

100	50	5	10	5	5

CAWLEY SITE:

The Cawley site is located in three (3) zoning districts: Two (2) are located in Lowell and one (1) is located in Tewksbury. Based on the City of Lowell, Massachusetts Zoning Map, updated May 13, 2014 the zoning districts in Lowell are the Regional Retail District (RR) and Suburban Neighborhood Single Family District (SSF). The parcel in Tewksbury is based on a Town of Tewksbury Zoning Map dated October 2015 and is located in the Residence 40 (R40) District with a Flood Plain Zoning Overlay that covers a portion of the site.

CITY OF LOWELL – Portion of Section 5.1 Table of Dimensional Regulations

No building or structure shall be built nor shall any existing building or structure be enlarged which does not conform to the regulations as to maximum ratio of floor area to lot area, minimum lot sizes, minimum lot area for each dwelling unit or equivalent, minimum lot frontage, minimum setback dimensions of front, side and rear yards, minimum open space, and maximum height of structures, and all other dimensional requirements in the several districts as set forth in the Table of Dimensional Regulations, except as hereinafter provided. [Ord. 11-29-05, 4-18-06, 4-3-07, 9-27-11]

Dimensions (in feet or square feet unless otherwise noted)

DISTRICT	**SSF**	**RR**
TYPE OF USE	All permitted uses	All permitted uses
Maximum FAR	0.35	2

----Denotes no dimensional requirement.
* Front setbacks in these districts shall be consistent with existing setbacks on the block.
† Side and rear yard setbacks in these districts must be at least 15 feet when abutting a residentially-zoned lot.
** Minimum residential frontage in these districts may be reduced by special permit under the provisions of Section 5.1.1 (7).

CITY OF LOWELL – Portion of Section 5.2.3 Construction near Wetlands.

No new building or structure shall be constructed nor shall any existing building or structure be enlarged within fifty (50) feet of an existing wetland or body of water, except by special

permit, and with the express written approval of the Lowell Conservation Commission, following a public hearing. No septic field shall be constructed or an existing septic field enlarged within seventy-five (75) feet of an existing wetland or body of water. No building permit for construction within one hundred (100) feet of a wetland or within the boundaries of floodplain shall be valid prior to the effective date of a wetlands determination of the applicability and/or the issuance of an order of conditions.
See section 5-120 of the Code of Ordinances of the City of Lowell for the Lowell Wetlands Regulations.

CITY OF LOWELL – Portion of Section 6.1.4 Table of Parking Requirements

Off-street parking facilities shall be provided as follows. All requirements based on square footage refer to gross floor area unless otherwise noted. The shared parking chart identifies the percentage of the established required parking spaces that must be provided for each time period in shared parking situations.

	Zone	**Min. Parking Req.**

100	50	5	10	5	5

Section B of APPENDIX A, TABLE OF USE REGULATIONS in the Town of Tewksbury Zoning By-Laws dated June 2016 appears to indicate that the "Use of land or structures for educational purposes on land owned or leased by the Commonwealth or any of its agencies, subdivisions or bodies politic or by a religious sect or denomination, or by a nonprofit educational corporation" is an allowed use in the R40 district.

TOWN OF TEWKSBURY – APPENDIX B Table of Dimensional Regulations

DISTRICT	**R40**
TYPE OF USE	All permitted uses
Minimum Lot Area	1 acre
Minimum Frontage	150 ft.
Minimum Side and Rear Yard	15 ft
Maximum Building Height (stories/ ft)	2.5/ 35ft
Maximum Building Coverage (% of lot)	15

APPENDIX C, TABLE OF PARKING REQUIREMENTS in the Town of Tewksbury Zoning By-Laws dated June 2016

Principal Use	**Required Spaces**
Use of land or structures for educational purposes on land owned or leased by the Commonwealth or any of its agencies, subdivisions or bodies politic or by a	One (1) space for each staff position, plus one (1) space for each five (5) persons of rated capacity of the largest auditorium, plus one (1) space for each student vehicle which can be expected at any time on the premises

religious sect or denomination, or by a nonprofit educational corporation	

I. Orientation/Location Considerations

Program: A priority throughout the early planning process has been to maintain ideal north-south facing classrooms. This is seen as a critical component to creating high-performance educational spaces that can both improve learning and save energy through the controlled use of daylight.

J. Preliminary Outdoor Program

LHS uses two City-owned facilities- Shedd Park and in Martin Athletic Complex. These two complexes accommodate the majority of the high school's athletic programs. The Cawley Complex has a brand new track and a synthetic turf football field (10 years old but still in good condition.) Both complexes are maintained by the City and students are bused to them. The Martin Athletic Complex is about two miles from LHS. The crew team uses UMASS Lowell facilities and the hockey team utilizes the Tsonga Center. Gymnastics and swimming is located in the existing school field house. Due to constant use of the multi-use fields at the Martin Athletic Complex the fields do not have time to rest causing less then optimum surface conditions. The athletic department would benefit from an additional full sized multi-use field.

Currently the existing high school does not have green space directly around the school for use by athletics or during gym class. Occasionally gym classes and teams will use the small lawn area outside of the Tsonga center across from the school.

Currently the stretch of greenspace flanking the canal is used for photography and art classes. The majority of this space is part of the Lowell National Historical Park.

Program Existing Site: The school would benefit from a lawn area that is within the school campus and can be accessed by foot in less than 5 minutes and able to be used during gym class.

Flexible, multi-purpose outdoor space for students should be considered to include dining, performance space and classroom space as well as a welcoming main entrance plaza. Though space is limited, the current High School Site spans the Lowell National Historical Park specifically the Lucy Larcom Park and is within a few blocks of Boarding House Park and Kerouac Park all of which are rich educational spaces.

Smaller plaza areas and sidewalks surrounding the school should be programmed with benches, adequate lighting, bike racks, trash receptacles and shade trees for both safety and to maximize the use of these streetscape edges.

Site program should include and exterior lawn area or green courtyard within the schools boundary that can be used for gym class and after school athletic programs and ROTC and SPED). It is anticipated that LHS will continue to use Shedd Park and Martin Athletic Complex to meet its athletic program needs.

Program Cawley Site: Flexible, multi-purpose outdoor space for students should be considered to include dining, performance space and classroom space as well as a welcoming main entrance plaza. Outdoor space for students should showcase environmental stewardship though stormwater management and highly visible low impact development techniques. A wetland is located within the northeast quadrant of the site and could potentially be used as a sustainable learning area and a part of a larger trail system.

All exterior spaces including large entrance plazas, outdoor classrooms, sidewalks to parking areas and connections to fields should include site amenities such as benches, tables, lighting, bike racks and shade trees.

Currently many of the Lowell High school athletic programs use Martin Athletic Complex. Located on a portion of this site the new high school has the advantage of being directly adjacent to the Martin Athletic Complex including the new track and synthetic football field, Stoklosa Alumni Field (baseball) and Carvalho Field (Soccer and Lacrosse). Locating the school on this site would displace the following fields:

- Martin Softball field,
- Desmond Field (Freshman Football and spring javelin practice)
- Machado Field (JV and varsity football),
- Softball practice field and a
- Field hockey/lacrosse field.

New site program can include (1) new multi-use field and (1) Softball field.

Athletic programs currently using Shedd Park including tennis and JV softball and baseball will continue to use those fields. Crew will continue to use the UMASS Lowell facilities.

K. Site Specific Narratives

Cawley Site: Currently the existing High School is located within the city center and able to utilize the public bus system. The Cawley site is roughly 2 miles outside of the city center. There are currently bus stops located along Rogers Street and Douglas Road. It is estimated that if the school was located on this site additional dedicated bus service would be required. Currently the site is programmed for between 13-26 buses. This number is under review by the city, transit authority and school and will be refined based on their findings.

The Cawley Site has multiple access points off of Douglas Rd, Village Street, Clark Road and Rogers Street. There is currently a parking lot accessed off of Douglas Road. It is noted that this is a residential street. New school program should include both a bus a parent drop off. New circulation Drives should be accessed off of Village Street and or Clark Road to minimize additional traffic on Douglas.

Ongoing investigations have identified that a portion of the Cawley Site is possibly restricted by an Article 97 agreement between the City and the State. Conclusions pending further investigations.

See appendix for further information.

3.1.6 Preliminary Evaluation of Alternatives

A. Analysis of School District Assignment Policies

B. Tuition Agreements

C. Rental Acquisition of Existing Buildings

D. Code Upgrade (Base Repair) Option

E. Renovation/Addition Option(s)

F. New Construction Option(s)

G. Summary of Evaluations & Conclusions

(This page intentionally left blank)

3.1.6 Preliminary Evaluation of Alternatives

A. Analysis of School District Assignment Policies

The Lowell Public Schools (LPS) is one of the largest districts in Massachusetts, currently enrolling more than 14,150 students in grades PreK-12. The District consists of 28 schools, including an early childhood center, a PreK-2 STEM Academy, 13 elementary schools (predominantly PreK-4), 2 PreK-8 schools, 9 intermediate schools (typically 5-8), a career academy and 1 High School (grades 9-12).

The City schools have no additional capacity, nor a desire to relocate students or additional grades to the other schools. The preference would be to keep all grades and the projected enrollment on one campus for Lowell High School.

B. Tuition Agreements

Lowell Public Schools does not have any tuition agreements with other districts.

C. Rental or Acquisition of Existing Buildings

There are no rental properties or potential acquisitions known to the District that might be made available for school use.

D. Code Upgrade Option (Base Repair)

The base repair study addresses the scope of work required to bring the current facility into conformance with applicable codes, including egress and accessibility, to repair the facilities to be weather tight and address all building systems, including mechanical, electrical, plumbing and fire protection.

BUILDABLE ACREAGE = 6.6
FULL SITE/ALL BUILDINGS

GREEN SPACE (SEP. LOT)
APPROX .5 ACRE NEARBY

PARKING (via GARAGE) =
1,200 TOTAL CAR CAPACITY
APPROX. 624 LHS PASSES

BUILDING (GSF) = 628.0k
RENOVATION = N/A
NEW/ADDITIONS = N/A

RELATIVE COSTS
TOTAL PROJECT = $270.8m
EST CITY SHARE = $73.2m

The Base Repair scope and costs provide a perspective of the relative cost of 'doing nothing'. Cost estimates were in the magnitude of $271m Total Project Cost which measures approximately 70-85% of the relative Add/Reno or New Construction Options, but does not meet the space needs (room types/count/sizes), nor the Educational Program objectives. The existing buildings would also remain with windowless labs, problematic solar orientation, inefficient facilities and limited access to green space. It was noted that the repair project, not meeting the school's Educational Program, would not be part of the MSBA's Core Program, but might seek funding through the Emergency Repair or other program(s).

The duration of repairs to the existing building was estimated at 4years and would require a significant number of modular classrooms, along with temporary gymnasium spaces.

E. Renovation/Addition Option(s)

The range of renovation options studied consist of a Full Renovation of existing buildings (including the existing Freshman Academy) and 5 Addition/Renovation scenarios that add or rebuild portions of the Field House and Lord Building and a few that look at the potential to expand the existing site by acquiring adjacent property.

Full Renovation Option keeps all existing High School facilities, excluding the steam plant. Despite the gross size of the facilities that exceeds the program x1.5 grossing factor, small additions are required because of inefficiencies and the need to enlarge specific spaces (in specific locations), despite excess space elsewhere.

This option creates the proper space needs (room types, counts & sizes) and is able to locate some programs in their desired clusters and/or adjacencies, but many exceptions are caused by fitting spaces within the constraints of the existing facilities. The major shortcomings are having the freshman isolated from other shared programs, having the Gym, Library, Cafeteria & Auditorium spaces separated, rather than grouped or semi-clustered as a community core and heart to the school.

BUILDABLE ACREAGE = 6.4
6.6 TOTAL ACRES EXIST
- .2 ACRE STEAM PLANT

GREEN SPACE (SEP. LOT)
APPROX .5 ACRE NEARBY

PARKING (via GARAGE) =
1,200 TOTAL CAR CAPACITY
APPROX. 624 LHS PASSES

BUILDING (GSF) = 641.6k
RENOVATION = 623.7k GSF
NEW/ADDITION =17.9k GSF
(1 & 2 STORY ADDITIONS)

RELATIVE COSTS
TOTAL PROJECT = $331.4m
EST CITY SHARE = $116.5m

Pro's/Con's

+ Down Town Location is Ideal for Transportation & City/Social Services
+ Adjacent Parking Garage (covered/controlled & no maintenance)
+ Meets All Space Needs (room types/counts/sizes)
+/- Renovated Layout/Adjacencies Meet Some Educational Objectives
- Community Use/Activity Areas Spread & Split-Up among Buildings
- Freshman Academy is Remote (inefficient space use + safety concerns)
- Solar Orientation is Problematic (approx. 45 deg. off direct N/S exposure)
- Windowless Classrooms/Labs Remain
- Limited Access to Green Space
- Inefficient Operations (due to size and existing building envelope)

Construction/Phasing

- Anticipated 5yr Duration
- Significant Temporary Classrooms (Modulars) Required
- Temporary Gymnasium Spaces and/or Alternatives Required

Relative Costs

+ This Option is the Lowest Cost

Addition/Renovation Option 1A keeps all existing facilities, except the Freshman Academy (FA) and steam plant. Consolidates all grades onto the main campus and builds new program space over the canal and in front/back of the Lord Building. The new program spaces over the canal would be in the form of 2-story construction (connecting floors 2 & 3 of the existing buildings).

Although extensive reuse of existing facilities does not allow ideal configuration for all educational program objectives, it does integrate the Freshman Academy into historic Coburn Hall and creates opportunities for a new, more centralized entry/lobby core.

BUILDABLE ACREAGE = 6.0
6.6 TOTAL ACRES EXIST

BUILDING (GSF) = 617.4k
RENOVATION = 529.1k GSF
NEW/ADDITION =88.3k GSF
(2 & 3 STORY ADDITIONS &
NEW 2-STORY BRIDGES)

RELATIVE COSTS
TOTAL PROJECT = $341.0m
EST CITY SHARE = $132.5m

Regulatory permissions for air-rights require additional investigations if this option were to proceed as one of the preferred alternatives.

Same Pro's/Con's as Full Renovation, except;
+ Freshman Consolidated onto Main Campus (into Colburn Hall Building)
+ Former Freshman Facility Available for Reuse
+ Creates New Face/Entry to the School & Centralized Lobby/Cafeteria
+ New 2-Tier Bridges Improves Interior Circulation/Safety

Construction/Phasing
+/- Anticipated 4½yr Duration
- Some Temporary Classrooms (Modulars) Required
- Temporary Gymnasium Spaces and/or Alternatives Required

Relative Costs
+ This Option is in the Lower 1/3 of Costs to the City

Addition/Renovation Option 2 rebuilds the Field House (FH) in the same general location as the existing, but in a more efficient and functional shape that also provides room on site for a new Freshman Academy building and small courtyard. This option would require a temporary solution for PE/Athletics while the new FH and 5 story FA/technology wing are constructed, but thereafter requires no modulars since the 5 story wing would create a 60 classroom equivalent of new space. Freshman would remain in their existing facility for the full duration of construction allowing the new wing to serve as temporary swing space for other programs.

BUILDABLE ACREAGE = 6.0
6.6 TOTAL ACRES EXIST

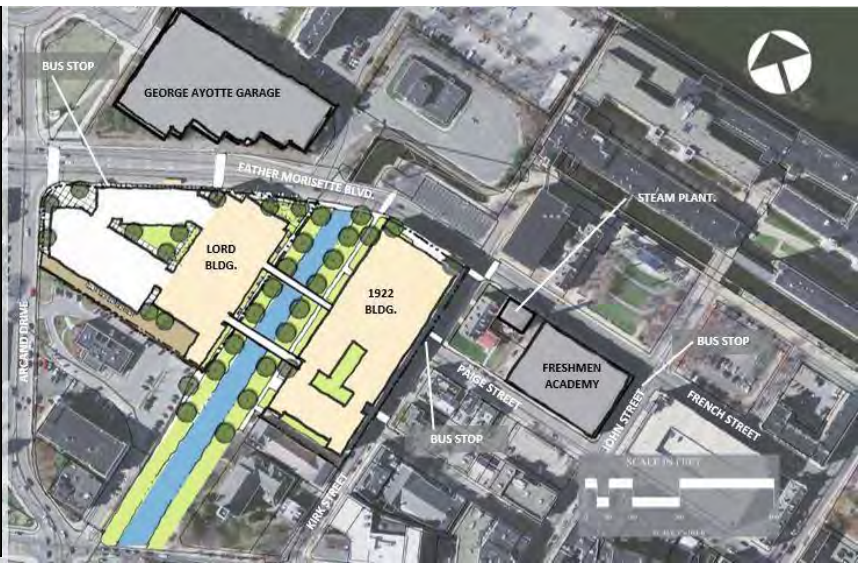
GREEN SPACE (SEP. LOT)
APPROX .5 ACRE NEARBY

PARKING (via GARAGE) =
1,200 TOTAL CAR CAPACITY
APPROX. 624 LHS PASSES

BUILDING (GSF) = 624.1k
RENOVATION = 454.1k GSF
NEW/ADDITION =170k GSF
(2 STORY FH, 5 STORY FA
& NEW 2-STORY BRIDGES)

RELATIVE COSTS
TOTAL PROJECT = $344.1m
EST CITY SHARE = $135.6m



Same Pro's/Con's as Option 1A, except;
+ New Freshman Academy (ideal layout/adjacencies & solar orientation)
+ New Field House (more efficient/flexible and diverse, multi-purp. spaces)
+ Modest Green Space Created

Construction/Phasing
+/- Anticipated 4yr Duration
+ Few or No Temporary Classrooms (Modulars) Required
- Temporary Gymnasium Spaces and/or Alternatives Required

Relative Costs
+ This Option is also in the Lower 1/3 of Costs to the City

Addition/Renovation Option 3 on Expanded Existing Site – This option takes a look at the potential benefits or drawbacks of acquiring additional land adjacent to the Lord Building/Field House. The primary benefits of doing this would be to avoid the need for any modulars, including no temporary gymnasium spaces and to create a large outdoor green space that can be utilized by PE/Athletics, ROTC and other programs.

The resulting plan also takes advantage of having more space for new construction by cutting light-wells into the Lord Building, displacing approximately 6k sf of program into new construction, but eliminating windowless classrooms/labs.

BUILDABLE ACREAGE = 7.4
6.6 TOTAL ACRES EXIST
1.4 ADJACENT PARCEL
- .6 ACRE STEAM/FA BLDG

GREEN SPACE (SEP. LOT)
.5a ON-SITE +.5a NEARBY

PARKING (via GARAGE) =
1,200 TOTAL CAR CAPACITY
APPROX. 624 LHS PASSES

BUILDING (GSF) = 638.7k
RENOVATION = 447.5k GSF
NEW/ADDITION =191.2k
(2 STORY FH, 5 STORY FA
& NEW 2-STORY BRIDGES)

RELATIVE COSTS
TOTAL PROJECT = $334.3m
EST CITY SHARE = $126.4m

Same Pro's/Con's as Option 2, except;
+ Does Not Require PE/Athletics Alt. or Off-Site During Construction
+ Virtually No Windowless Classrooms (Lights Wells Created in Lord)
+ Large Green Space Created
+ New Kitchen/Mechanical/Loading

Construction/Phasing
+/- Anticipated 4½ yr Duration
+ No Modulars Required; Phasing is Minimally Disruptive

Relative Costs
+ This Option is also in the Lower 1/3 of Costs to the City

Addition/Renovation Option 4 rebuilds the entire Western portion of the site including the former 3 story Lord Building as a narrower 5 story structure resulting in no windowless space and allowing a driveway or plaza along the canal-side. This option is similar to Option 2, except that the complete reconstruction of Lord significantly complicates phasing and requires extensive modulars. Reconstruction of portions of Lord would need to occur with the new FH and FA or would restrict use of them after.

Despite more new construction than previous options, the taller/narrower Lord Building forces some public use programs onto upper floors and splits the cafeteria on two floors. Spaces can be zoned for community/activity but occurs more vertically.

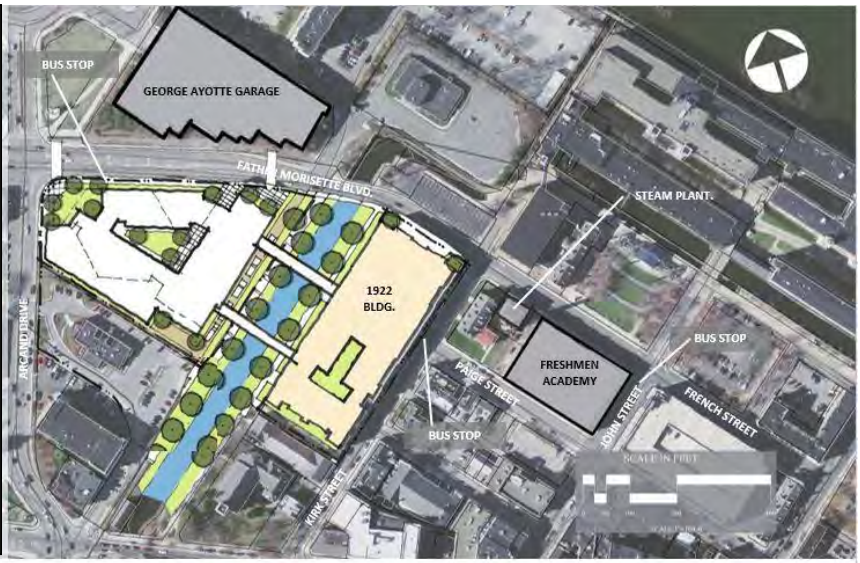
BUILDABLE ACREAGE = 6.0
6.6 TOTAL ACRES EXIST
- .6 ACRE STEAM/FA BLDG

GREEN SPACE (SEP. LOT)
APPROX .5 ACRE NEARBY

PARKING (via GARAGE) =
1,200 TOTAL CAR CAPACITY
APPROX. 624 LHS PASSES

BUILDING (GSF) = 619.0k
RENOVATION = 312.8k GSF
NEW/ADDITION =306.2k
(2 STRY FH, 5 STRY OTHER
& NEW 2-STORY BRIDGES)

RELATIVE COSTS
TOTAL PROJECT = $376.4m
EST CITY SHARE = $165.8m



Same Pro's/Con's as Option 2, except;

+ New Lord Building Allows Driveway or Canal-Side Plaza
+ Virtually No Windowless Classrooms
+/- Cafeteria is Split on Floors (creating separate freshmen area)
- Not All Programs that Prefer Ground Level Access Fit in that Floor
- Solar Orientation Not Ideal for Majority of Classrooms

Construction/Phasing

- Anticipated 5yr Duration
- Significant Temporary Classrooms (Modulars) Required
- Temporary Gymnasium & Cafeteria Spaces and/or Alternatives Required

Relative Costs

- This Option is in the Higher 1/3 of Costs to the City

Addition/Renovation Option 5 on Expanded Site is similar to Opt. 4, except it utilizes the adjacent parcel for larger green space and no temporary gym spaces (like Opt. 3).

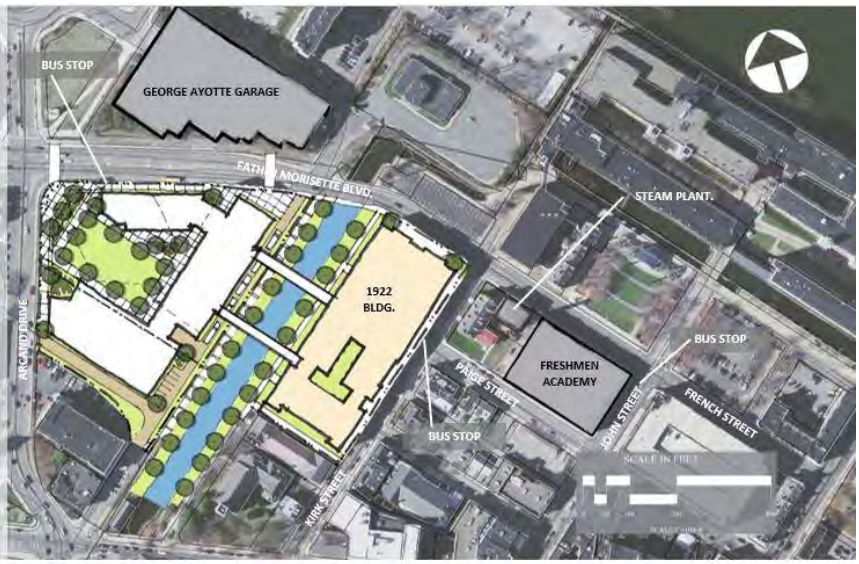
BUILDABLE ACREAGE = 7.4
6.6 TOTAL ACRES EXIST
1.4 ADJACENT PARCEL
- .6 ACRE STEAM/FA BLDG

GREEN SPACE (SEP. LOT)
.5a ON-SITE +.5a NEARBY

PARKING (via GARAGE) =
1,200 TOTAL CAR CAPACITY
APPROX. 624 LHS PASSES

BUILDING (GSF) = 620.9k
RENOVATION = 312.8k GSF
NEW/ADDITION =308.1k
(2 STORY FH, 5 STORY FA
& NEW 2-STORY BRIDGES)

RELATIVE COSTS
TOTAL PROJECT = $386.4m
EST CITY SHARE = $174.0m



As with Opt. 4, however, the complete reconstruction of Lord significantly complicates phasing and requires extensive modulars. It also forces program onto upper floors and creates a more vertical community/activity zone.

Same Pro's/Con's as Option 3, except;
+ Does Not Require PE/Athletics Alt. or Off-Site During Construction
+ New Lord Building Allows Roadway Passage through the Site
+/- Cafeteria is Split on Floors (creating separate freshmen area)
- Not All Programs that Prefer Ground Level Access Fit in that Floor
- Solar Orientation Not Ideal for Majority of Classrooms

Construction/Phasing
- Anticipated 5½yr Duration
- Significant Temporary Classrooms (Modulars) Required

Relative Costs
- This Option is the Most Costly

F. New Construction Option(s)

The range of and new construction options included a study on the existing site, the expanded existing site and the 2 most viable alternative sites.

New Construction on Existing Site assumes the 1922 Building and Freshman Academy will not be demolished and instead would be returned to the City for reuse. The remaining site at only 3.3 acres creates a dense vertical layout for the new school that is fraught with compromises. In this study, windowless labs, bad solar orientation and major community activity areas on upper floors are forced as a result of the small footprint. Although construction might be accelerated in a condensed new-build, extensive modulars would be required and likely located remotely.

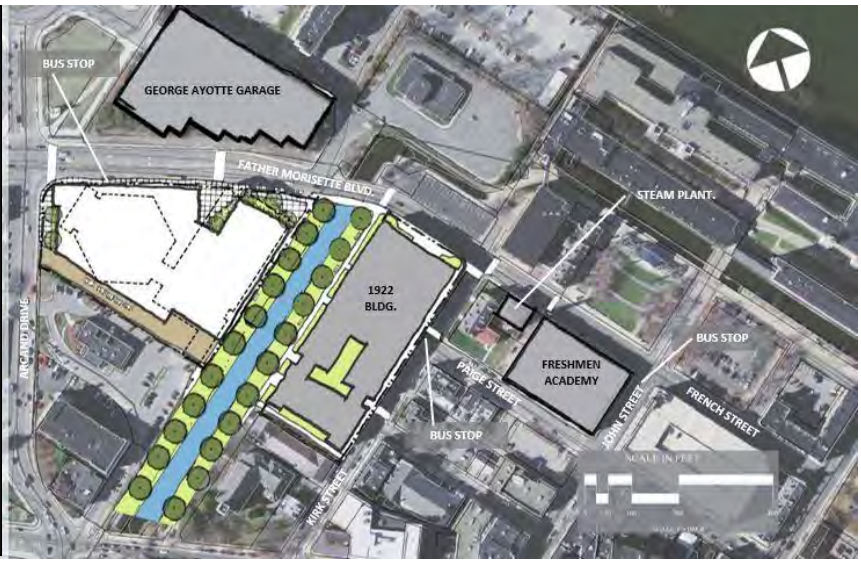
BUILDABLE ACREAGE = 3.3
6.6 TOTAL ACRES EXIST
-2.7 ACRE 1922 BLDG
- .6 ACRE STEAM/FA BLDG

GREEN SPACE (SEP. LOT)
APPROX .5 ACRE NEARBY

PARKING (via GARAGE) =
1,200 TOTAL CAR CAPACITY
APPROX. 624 LHS PASSES

BUILDING (GSF) = 594.0k
(NEW 6 STORY, HIGH RISE)

RELATIVE COSTS
TOTAL PROJECT = $350.6m
EST CITY SHARE = $156.8m



Pro's/Con's
+ Down Town Location is Ideal for Transportation & Services
+ Adjacent Parking Garage (covered/controlled & no maintenance)

+ General Benefits of All New Construction
  - ✓ Meets All Space Needs (room types/counts/sizes)
  - ✓ Meets Most Educational Objectives (locations/adjacencies)
  - ✓ Freshman Academy Wing (ideal org layout/clusters)
  - ✓ New Field House (more efficient/flexible and diverse spaces)
  - ✓ Efficient Operations (due to size and new building envelope)
+ Former Freshman & 1922 Facilities Available for Reuse
+ No Bridges or Split Buildings
- 6-Story, Vertical Plan (High Rise) Forces Many Programs Up
- Solar Orientation Not Ideal for Majority of Classrooms due to Tight Site
- Windowless Science Labs due to Tight Footprint
- Limited Access to Green Space

Construction/Phasing
+ Anticipated 3½yr Duration
- Extensive Temporary Classrooms (Modulars) Required
- Temporary Gymnasium & Cafeteria Spaces and/or Alternatives Required

Relative Costs
- This Option is in the Mid-Higher 1/3 of Costs to the City

New Construction on an Expanded, Existing Site is similar to the New on Existing, but given a bit more space, this option reduces to 5 story construction with better zone for community/activity areas and classroom wings arrayed for good solar orientation.

Although construction might be accelerated in a condensed new-build, extensive modulars would be required and likely located remotely.

BUILDABLE ACREAGE = 4.7
6.6 TOTAL ACRES EXIST
1.4 ADJACENT PARCEL
-2.7 ACRE 1922 BLDG

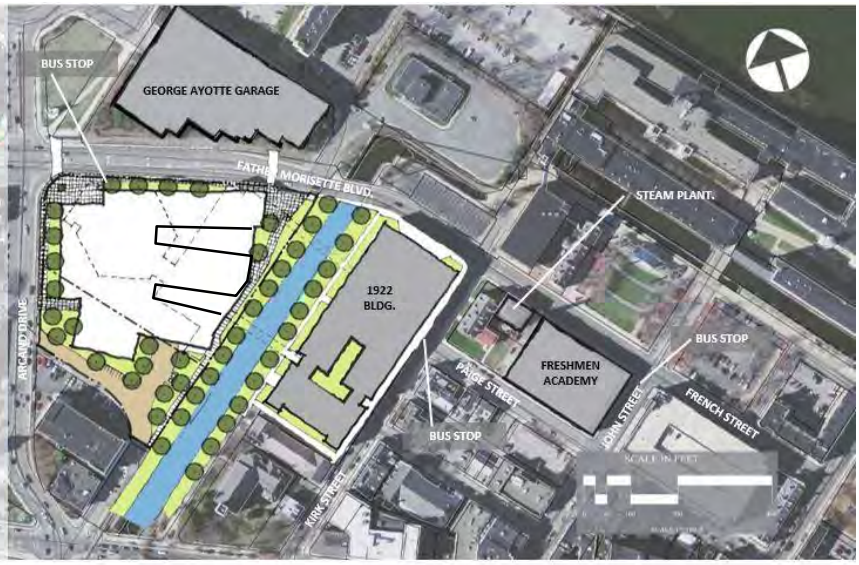
GREEN SPACE (SEP. LOT)
APPROX .5 ACRE NEARBY

PARKING (via GARAGE) =
1,200 TOTAL CAR CAPACITY
APPROX. 624 LHS PASSES

BUILDING (GSF) = 576.5k
(NEW 5 STORY BLDG)

RELATIVE COSTS
TOTAL PROJECT = $355.4m
EST CITY SHARE = $166.0m



Same Pro's/Con's as New on Existing, except;
+ 5 Story/Not High Rise Construction
+ Creates Ideal Community Use/Activity Zone
+ Good Solar Orientation for All Classrooms/Labs
+ Virtually No Windowless Classrooms

Construction/Phasing
+ Anticipated 3½yr Duration
- Extensive Temporary Classrooms (Modulars) Required
- Temporary Gymnasium & Cafeteria Spaces and/or Alternatives Required

Relative Costs
- This Option is in the Mid-Higher 1/3 of Costs to the City

New Construction on Wang Site – Without an adjacent parking garage, city transit and park land, a new Lowell High School requires an estimated 16 acre minimum to meet the space needs of building, parking, site circulation and playfields. At 14.7 useable acres, the shortfall at the Wang Site is seen in limited green space and insufficient parking at 430 vs the 750 to 800 anticipated.

Aside from the limited site size, there are also concerns with co-locating the High School with the Middle and Elementary Schools already on site. The access roads are an additional concern, being relative narrow and within a thickly residential area.

New construction does allow a more ideal 4 story plan, with proper orientation of the double-wide classroom wing and clear zoning of community use/activity areas. The new plan also allows for very efficient and effective clustering of rooms and labs to better promote interdisciplinary collaboration.

BUILDABLE ACRES = 14.7
56 TOTAL ACRES EXIST

GREEN SPACE (ON-SITE)
APPROX 2 ACRES

PARKING = 430 CARS

BUILDING (GSF) = 571.5k
(NEW 5 STORY BLDG)

RELATIVE COSTS
TOTAL PROJECT = $325.7m
EST CITY SHARE = $142.3m

Same Pro's/Con's as New on Expanding, except;
+ More Ideal 4 Story Building
+ Ample Access to Green Space
+/- Parking & Busses on Site (requires bussing plan, but less athletic travel)
- Limited Walkability & Public Transit
- Co-Located with Elementary & Middle School
- Close Proximity to Neighborhoods (Building & Traffic Impact)
- Not Close to City Services

Construction/Phasing
+ Not Complex Phasing, No Educational Disruption

- Field Replications Required (1 Soccer + 2 Little League Fields) at alternative site to be determined.

Relative Costs
- This Option is in the Middle 1/3 of Costs to the City

New Construction on Cawley Site utilizes a similar (ideal) plan to Wang, but bends to the shape of the site. The building footprint is deliberately kept off the City owned parcel to the East because it falls within the Town of Tewksbury. This portion of the site is used for the majority of parking instead.

Although the parking is listed at 608 (also below the target 750-800 spaces), this site has enough space, but comes down to a balance between count of spaces vs field replication. This site offers the advantage of being co-located with significant athletic fields to create a more traditional school campus. Roadway access is considered more accommodating, although there are concerns for travel through nearby neighborhoods (particularly Douglas and Clark Roads).

BUILDABLE ACRES = 20.0
34 TOTAL ACRES EXIST,
NOT INCL. THE STADIUM

GREEN SPACE (ON-SITE)
AMPLE ACCESS TO FIELDS

PARKING = 608 CARS

BUILDING (GSF) = 571.5k
(NEW 5 STORY BLDG)

RELATIVE COSTS
TOTAL PROJECT = $332.5m
EST CITY SHARE = $148.3m

Same Pro's/Con's as New on Wang, except;
+ Adjacent to Major Fields, incl. the Football Stadium
+ Not Co-Located with Other Schools

Construction/Phasing
+ Not Complex Phasing, No Educational Disruption
- Field Replications Required (1 Softball, 2 practice Football). Note; This Site Plan Assumes 1 Practice LAX and Softball Infield are Replicated On-Site

Relative Costs
- This Option is in the Middle 1/3 of Costs to the City

Note: ongoing investigations have identified portions of Cawley site to have potential Article 97 restrictions. Refer to the Conclusion (below) and the Appendix for additional information.

G. Summary of Evaluations and Conclusions

The evaluation of options began with the search for potential sites and a preliminary assessment of the most viable. The search for alternative sites began with a broad sweep of properties yielding 7 potential sites, the viability of each was then screened with assessment of buildable area, proximity to parking and transportation, access to utilities and sidewalks, location (including wetlands and floodplains), zoning, land use and historical restrictions and ownership rights vs eminent domain requirement.

Refer to the Site Assessment Matrix included in the Appendix

All, but 3 sites were eliminated because they were not nearly large enough to meet the estimated 16 acres required for a new school, circulation, parking and green space. Note: the existing site is only 6.6 acres, but benefits from having an adjacent parking garage, city transit and modest green space nearby. One of the three was not pursued because it is owned by Mass DOT. The most viable sites that were used to study building options included the Existing, Existing/Expanded, Wang and Cawley.

The options were developed using the equivalent Educational Program objectives, estimated space needs and site development requirements so they could be assessed relative to each other, even if the needs and objectives continued to evolve. The ability of each option to meet these objectives was noted in the form of Pro's/Con's.

Key Educational Objectives and Project Goals include;

- Freshman Academy to be Connected, but Distinct (4 teams of 8 incl. Sci)
- Create a Social Hub & Heart to the School
- Zone for Community Use/Activities (incl. Restaurant/Retail & Little Theater)
- Student Support & Administrative Houses to be Easily Accessed by Parents
- Academic Clusters for STEM, Humanities and Cross Collaboration
- Teacher Planning Dispersed with Each Cluster
- ELL & SPED to be Dispersed in Groupings of 2 or more
- Cluster ROTC Program
- Cluster Fine Arts Programs
- Cluster Digital Media Programs
- Controlled & Effective Use of Daylight
- Visible Learning & Ample Display of Student Work
- Ubiquitous Flexibility, Breakout/Small Group and Multi-Use Spaces

An initial round of 6 Options were developed and presented to the City Council, SBC, Business Leaders (Lowell Plan Group) and the Community for feedback and to determine if additional options should be developed. This initial round of input lead to the development of Full Reno, Add/Reno Option 1A (advancement of Opt 1), Add/Reno Options 4 & 5 and the New on Expanded Site Option

FULL RENOVATION

BUILDABLE ACREAGE = 6.4

ESTIMATED CITY'S SHARE = $148,341,142

A second round of review lead the SBC to make a recommendation to pursue the 3 or 4 preferred options, narrowing the focus so that each could be developed in a bit more detail. The preferred options were selected to not only to represent the full range of studies (a Full Renovation, Additions/Renovations & all New Construction Option), but also to represent those that best met the educational program, had the least educational impact during construction and were cost effective & efficient.

Full Renovation was selected as one 'book-end' extremes. It is our understanding that the MSBA expects to see a minimum of at least one Full Reno, an Add-Reno and a New Construction Option. This option does not meet several of the educational objectives (most notably locating the Freshman Academy on-site), but the sheer

magnitude of estimated project costs warrants a deeper look at how well it can achieve all but that one educational goal.

It is also the only option in its class and the lowest cost overall. For many in the community who wish to limit their tax burden, this option will help provide perspective on the relative value of meeting the educational goals.

New at Cawley was selected as the opposing extreme and most viable option for new construction. Cawley provides enough space (as currently charted for feasibility level study), to meet all the educational objectives in the most efficient and effective plan. The site will come with a trade-off of lost fields vs. site program, but should be explored further along with the potential of expanding the property bounds.

Late in the selection process, but prior to the City Council vote to adopt the four options recommended by the SBC, new information regarding the Cawley site as Article 97 park lands was discovered. Further investigations into the article 97 logistics and development of the New Option on the Cawley site are expected to continue during the Preferred Schematic Report Phase.

Add/Reno Options 2 & 3 were selected, being the most ideal addition/renovation options in meeting educational objectives and limiting educational disruptions during construction. Both options are among the 1/3 lowest costs overall and between them, explore possibilities within the existing city owned property and with the potential of expanding the site.

Specific features from either option may be explored in the form of sub-options in the next phase in hopes of evolving the concepts toward a singularly appropriate solution for the City of Lowell.

Refer to the Appendix for additional information.

Next Steps to Finalize Submission of your FY 2014 Statement of Interest

Thank you for submitting your FY 2014 Statement of Interest (SOI) to the MSBA electronically. **Please note, the District's submission is not yet complete**. The District is required to print and mail a hard copy of the SOI to the MSBA along with the required supporting documentation, which is described below.

Each SOI has two Certification pages that must be signed by the Superintendent, the School Committee Chair, and the Chief Executive Officer*. Please make sure that **both** certifications contained in the SOI have been signed and dated by each of the specified parties and that the hardcopy SOI is submitted to the MSBA with **original signatures**.

SIGNATURES: Each SOI has two (2) Certification pages that must be signed by the District.

In some Districts, two of the required signatures may be that of the same person. If this is the case, please have that person sign in both locations. Please do not leave any of the signature lines blank or submit photocopied signatures, as your SOI will be incomplete.

**Local chief executive officer: In a city or town with a manager form of government, the manager of the municipality; in other cities, the mayor; and in other towns, the board of selectmen unless, in a city or town, some other municipal office is designated as the chief executive office under the provisions of a local charter.*

VOTES: Each SOI must be submitted with the proper vote documentation. This means that (1) the required governing bodies have voted to submit each SOI, (2) the specific vote language required by the MSBA has been used, and (3) the District has submitted a record of the vote in the format required by the MSBA.

- **School Committee Vote:** Submittal of all SOIs must be approved by a vote of the School Committee.
  - For documentation of the vote of the School Committee, Minutes of the School Committee meeting at which the vote was taken must be submitted with the original signature of the Committee Chairperson. The Minutes must contain the actual text of the vote taken which should be substantially the same as the MSBA's SOI vote language.
- **Municipal Body Vote:** SOIs that are submitted by cities and towns must be approved by a vote of the appropriate municipal body (e.g., City Council/ Aldermen/Board of Selectmen) in addition to a vote of the School Committee.
  - Regional School Districts do not need to submit a vote of the municipal body.
  - For the vote of the municipal governing body, a copy of the text of the vote, which shall be substantially the same as the MSBA's SOI vote language, must be submitted with a certification of the City/Town Clerk that the vote was taken and duly recorded, and the date of the vote must be provided.

CLOSED SCHOOLS: Districts must download the report from the "Closed School" tab, which can be found on the District Main page. Please print this report, which then must be signed by the Superintendent, the School Committee Chair, and the Chief Executive Officer. A signed report, with original signatures must be included with the District's hard copy SOI submittal. **If a District submits multiple SOIs, only one copy of the Closed School information is required.**

ADDITIONAL DOCUMENTATION FOR SOI PRIORITIES #1 AND #3: If a District selects Priority #1 and/or Priority #3, the District is required to submit additional documentation with its SOI.

- If a District selects Priority #1, Replacement or renovation of a building which is structurally unsound or otherwise in a condition seriously jeopardizing the health and safety of the school children, where no alternative exists, the MSBA requires a hard copy of the engineering or other report detailing the nature and severity of the problem and a written professional opinion of how imminent the system failure is likely to manifest itself. The District also must submit photographs of the problematic building area or system to the MSBA.
- If a District selects Priority #3, Prevention of a loss of accreditation, the MSBA requires the full accreditation report(s) and any supporting correspondence between the District and the accrediting entity.

ADDITIONAL INFORMATION: In addition to the information required with the SOI hard copy submittal, the District may also provide any reports, pictures, or other information they feel will give the MSBA a better understanding of the issues identified at a facility.

If you have any questions about the SOI process please contact Brian McLaughlin at 617-720-4466 or Brian.McLaughlin@massschoolbuildings.org.

Submission Date 4/10/2014

SOI CERTIFICATION

To be eligible to submit a Statement of Interest (SOI), a district must certify the following:

- The district hereby acknowledges and agrees that this SOI is NOT an application for funding and that submission of this SOI in no way commits the MSBA to accept an application, approve an application, provide a grant or any other type of funding, or places any other obligation on the MSBA.
- The district hereby acknowledges that no district shall have any entitlement to funds from the MSBA, pursuant to M.G.L. c. 70B or the provisions of 963 CMR 2.00.
- The district hereby acknowledges that the provisions of 963 CMR 2.00 shall apply to the district and all projects for which the district is seeking and/or receiving funds for any portion of a municipally-owned or regionally-owned school facility from the MSBA pursuant to M.G.L. c. 70B.
- The district hereby acknowledges that this SOI is for one existing municipally-owned or regionally-owned public school facility in the district that is currently used or will be used to educate public PreK-12 students and that the facility for which the SOI is being submitted does not serve a solely early childhood or Pre-K student population.
- After the district completes and submits this SOI electronically, the district must sign the required certifications and submit one signed original hard copy of the SOI to the MSBA, with all of the required documentation described under the "Vote" tab, on or before the deadline.
- The district will schedule and hold a meeting at which the School Committee will vote, using the specific language contained in the "Vote" tab, to authorize the submission of this SOI. This is required for cities, towns, and regional school districts.
- Prior to the submission of the hard copy of the SOI, the district will schedule and hold a meeting at which the City Council/Board of Aldermen or Board of Selectmen/equivalent governing body will vote, using the specific language contained in the "Vote" tab, to authorize the submission of this SOI. This is not required for regional school districts.
- On or before the SOI deadline, the district will submit the minutes of the meeting at which the School Committee votes to authorize the Superintendent to submit this SOI. The District will use the MSBA's vote template and the vote will specifically reference the school and the priorities for which the SOI is being submitted. The minutes will be signed by the School Committee Chair. This is required for cities, towns, and regional school districts.
- The district has arranged with the City/Town Clerk to certify the vote of the City Council/Board of Aldermen or Board of Selectmen/equivalent governing body to authorize the Superintendent to submit this SOI. The district will use the MSBA's vote template and submit the full text of this vote, which will specifically reference the school and the priorities for which the SOI is being submitted, to the MSBA on or before the SOI deadline. This is not required for regional school districts.
- The district hereby acknowledges that this SOI submission will not be complete until the MSBA has received all of the required vote documentation and certification signatures in a format acceptable to the MSBA.

Chief Executive Officer *	**School Committee Chair**	**Superintendent of Schools**
Michael Q. Geary	Rodney M. Elliott	Jean M. Franco
Acting City Manager		
(signature)	(signature)	(signature)
Date	Date	Date

* Local chief executive officer: In a city or town with a manager form of government, the manager of the municipality; in other cities, the mayor; and in other towns, the board of selectmen unless, in a city or town, some other municipal office is designated to the chief executive office under the provisions of a local charter. Please note, in districts where the Superintendent is also the Local Chief Executive Officer, it is required for the same person to sign the Statement of Interest Certifications twice. Please do not leave any signature lines blank.

School District Lowell

District Contact Jay Lang TEL: (978) 674-2020

Name of School Lowell High

Submission Date 4/10/2014

Note

The following Priorities have been included in the Statement of Interest:

1. ☐ Replacement or renovation of a building which is structurally unsound or otherwise in a condition seriously jeopardizing the health and safety of school children, where no alternative exists.
2. ☐ Elimination of existing severe overcrowding.
3. ☐ Prevention of the loss of accreditation.
4. ☒ Prevention of severe overcrowding expected to result from increased enrollments.
5. ☐ Replacement, renovation or modernization of school facility systems, such as roofs, windows, boilers, heating and ventilation systems, to increase energy conservation and decrease energy related costs in a school facility.
6. ☐ Short term enrollment growth.
7. ☒ Replacement of or addition to obsolete buildings in order to provide for a full range of programs consistent with state and approved local requirements.
8. ☐ Transition from court-ordered and approved racial balance school districts to walk-to, so-called, or other school districts.

SOI Vote Requirement

☒ I acknowledge that I have reviewed the MSBA's vote requirements for submitting an SOI which are set forth in the Vote Tab of this SOI. I understand that the MSBA requires votes from specific parties/governing bodies, in a specific format using the language provided by the MSBA. Further, I understand that the MSBA requires certified and signed vote documentation to be submitted with the SOI. I acknowledge that my SOI will not be considered complete and, therefore, will not be reviewed by the MSBA unless the required accompanying vote documentation is submitted to the satisfaction of the MSBA.

Potential Project Scope: Potential New School

Is this SOI the District Priority SOI? YES

School name of the District Priority SOI: 2014 Lowell High

Is this part of a larger facilities plan? YES

If "YES", please provide the following:

Facilities Plan Date: 2/28/2014

Planning Firm: OMR Architects

Please provide an overview of the plan including as much detail as necessary to describe the plan, its goals and how the school facility that is the subject of this SOI fits into that plan:

In April 2013, OMR Architects was hired to prepare a Comprehensive Facilities Assessment and Master Plan which included 29 Lowell school facilities- elementary, middle, PK-8, high, alternative, day and the adult education center. The goals of the study were: 1) Perform a Physical and Programmatic Assessment of the Lowell Public School facilities, and 2) Develop a 10 Year Master Plan for critical maintenance, renovations and additions and/or building replacements. The facilities assessment and master plan included: reviewing the schools and their relationships within the City of Lowell and their defining neighborhoods; analyzing the existing conditions of all of the facilities (architecture, site, structure, MEP/FP) and providing baseline repair estimates; three educational visioning sessions with school and district administration and educational leaders to set the goals and values for the master plan study; analysis of NESDEC enrollment projections for ten years; educational programming space analysis comparing the existing and projected population and facilities to MSBA guidelines; understanding site availability in Lowell; developing multiple masterplan options and comparing these with cost and value; developing preferred options; and developing a 10 year capital plan for the design and construction work of this report. The Lowell High School fits into the Masterplan as the Preferred Solution Option 1D/E with a total project cost of $245.4M, not including escalation or land acquisition. This 650,000 GSF solution requires the possession of adjacent land and includes an addition/ demolition/ renovation/ repurposing response to the existing Lowell High School facilities. The same Masterplan includes the Elementary, Middle & K-8 School Preferred Solution of Option 1H with a total project cost of $270M, not including escalation or land acquisition. This solution includes: additions and renovations to Wang, Daley and Robinson Middle Schools to make eight-strand schools serving 792 students each; an addition/ renovation/ conversion of Rogers School to be a four-strand PK-8 facility serving 960 students; a new, four-strand PK-8 facility serving 960 students; and major and minor repairs of 23 other school facilities.

Please provide the current student to teacher ratios at the school facility that is the subject of this SOI: 28 students per teacher

Please provide the originally planned student to teacher ratios at the school facility that is the subject of this SOI: 24 students per teacher

Does the District have a Master Educational Plan that includes facility goals for this building and all school buildings in District? YES

If "YES", please provide the author and date of the District's Master Educational Plan.

OMR Architects February 28, 2014

Is there overcrowding at the school facility? YES

If "YES", please describe in detail, including specific examples of the overcrowding.

This is projected overcrowding. The school district's projected enrollment is significantly higher than the current 2013-2014 enrollment of 3,134 students in grades 9-12. NESDEC's 10-year average enrollment projection for the Lowell Public School District shows a need for the high school sized appropriately to house 3,424 in the 10 year projected average, but with a high in 2022-2023 of 3,900 students in grades 9-12 and no expectation for the PK-8 enrollment to go down in the subsequent years, the committee feels that 3,900 students is the appropriate size for the facility. Overall, there is a documented space need for approximately 2,500 additional seats in the entire Lowell Public School system in the upcoming years.

See NESDEC enrollment projections attachments.

Has the district had any recent teacher layoffs or reductions? NO

If "YES", how many teaching positions were affected? 0
At which schools in the district?
Please describe the types of teacher positions that were eliminated (e.g., art, math, science, physical education, etc.).

Has the district had any recent staff layoffs or reductions? NO

If "YES", how many staff positions were affected? 0
At which schools in the district?
Please describe the types of staff positions that were eliminated (e.g., guidance, administrative, maintenance, etc.).

Please provide a description of the program modifications as a consequence of these teacher and/or staff reductions, including the impact on district class sizes and curriculum.

Does not apply.

Please provide a detailed description of your most recent budget approval process including a description of any budget reductions and the impact of those reductions on the district's school facilities, class sizes, and educational program.

On June 5, 2013, the Lowell School Committee approved the FY2014 annual operating budget of $144,360,281, a 4.28% increase over FY2013. There were no budget reductions impacting the school district’s facilities, class sizes or educational programs.

General Description

BRIEF BUILDING HISTORY: Please provide a detailed description of when the original building was built, and the date(s) and project scopes(s) of any additions and renovations (maximum of 5000 characters).

The Lowell High School facilities are comprised of multiple buildings located on a few city blocks crossing a canal in the Downtown neighborhood. The original 1892 building was added to in 1922 and renovated in 1971 and 1997 (minor), and included a large interior light well at the intersection of the two brick buildings. The 1980 facility is made up of an educational wing and a field house wing connected by lobby spaces and circulation, and was renovated in 1997. These two buildings, the 1892/1922 and the 1980, are connected by two enclosed, glazed bridges which span across the canal and park below. The Freshman Academy, a completely separate structure, is one city block away. Built in 1900 and added on in 1939, it was renovated in 1986. Ninth grade students typically walk along a less dense urban street to access specialty classrooms and the physical education spaces in the main buildings. The Freshman structure also houses their own cafeteria and theater. The Steam Plant, original construction unknown but renovated in 1996, which serves the entire complex, is located between the Freshman Academy and the 1920 facility, and is connected to the Freshman Academy above ground by overhead pipes and to the 1920 Building with a utilities tunnel under Kirk Street.

Outdoor athletic facilities are located in multiple locations including Cawley Stadium and Shedd Park to the southeast of the school, the Lowell Boathouse to the west, and Mount Pleasant Golf Course to the southwest. All are accessible only by bus or car.

Lowell Freshman Academy- 3 stories (1 is below grade)
Lowell HS Steam Plant - 1 story
Lowell High School - 1922 Building (Kouloheras) - 3 stories (1 is below grade)
Lowell High School - 1980 Buildings (Lord & Fieldhouse) – 3 stories

Scope of Renovations include: New windows and storefront systems were retrofitted to the existing 1892 and 1922 Buildings in 1980 and in 1995, respectively. Extensive renovations of the interiors of the 1892 and 1922 Buildings were included in the scope of the 1995 addition. These renovations succeed in updating many of the interior finishes as well as creating uniformity of finish materials between the new and existing. The scope of these renovations was limited to the academic floors and many spaces particularly on the lower level were left untouched. The auditorium was fully renovated including a new mechanical system with air conditioning. A new mezzanine was constructed in the upper part of the 1892 Building which serves as a suite for faculty work, lounge and dining. The upper part of this space is not accessible.

The Freshman Academy was repurposed and fully renovated in 1986. These renovations at the lowest level included the creation of a small theatre and a cafeteria dedicated to the freshman student population. The 1986 project included targeted renovations on the upper levels for academics, science, library, computer labs and faculty spaces. Most spaces were renovated to varying degrees at this time.

The 1980 Building has been maintained over the years but has not been renovated. Most finishes and systems are original with some notable exceptions: 1) the roof top mechanical systems have been recently upgraded, unfortunately, these upgrades have not been very effective. 2) There has been a concerted effort to replace existing carpet in most academic areas with vinyl tile. 3) Toilet rooms benefit from ongoing maintenance with the exception of the Locker/Showers which require full and major renovation.

TOTAL BUILDING SQUARE FOOTAGE: Please provide the original building square footage PLUS the square footage of any additions.

628558

SITE DESCRIPTION: Please provide a detailed description of the current site and any known existing conditions that would impact a potential project at the site. Please note whether there are any other buildings, public or private, that share this current site with the school facility. What is the use(s) of this building(s)? (maximum of 5000 characters).

Lowell High School sits on two parcels on municipally owned land totaling 243,000 square feet. In addition to the 1922 and
1980 buildings, a third building located across (and not connected) the street houses the Lowell High School Freshman Academy. The LHS Freshman Academy sits on a 10,000 square foot parcel.

The site for the steam plant is shared with the National Park Service Building and the exact limits of the site are unknown. Zoning is Downtown Mixed Use District. See site plan and existing conditions analysis attachments.
Context:
- Generally a flat site(s) fully developed and bordered either by city streets or adjacent properties. The High School occupies three separate distinct parcels that form the campus. The campus is divided by a canal, or in the case of the Freshman Academy, a city street. Students and staff are required to cross a city street or traverse the second story bridges to travel between buildings.
- All drop-off / pick-up takes place on the adjacent city streets and sidewalks. This creates serious traffic and safety issues.
- There is a city owned parking garage across a main street that serves both staff and students. There is metered, on street parking for visitors. There is little or no onsite parking.
- There is a discrete loading dock for deliveries and trash/recycling located to the southeast end of the campus. Access is from Father Morissette Blvd.
- Fire lane and emergency access to all buildings is good.
Surfaces and Features:
- There are a number of paved courtyards and walks adjacent to the main entrance and the cafeteria. The condition of these courtyards varies greatly from good to poor. The existing canal between the two main buildings is landscaped on each side and provides for a pleasant urban park like atmosphere. Unfortunately, there is also a Trolley for tourist and visitors to Lowell that parallels one side of the canal and further divides and separates the main campus. There are two connecting enclosed bridges at the second floor that span the trolley tracks and the canal to accommodate pedestrian traffic between the two buildings.
- The constrained site does not provide for any outside athletic or physical education opportunities.
- No apparent site drainage issues were identified. Drainage is handled by the city storm system.

Lowell Freshman Academy- 92,758 SF (1900 & 1939 portions)
Lowell HS Steam Plant – 2,500 SF, no additions
Lowell High School - 1922 Building (Kouloheras) – 322,000 (whole facility)
Lowell High School - 1980 Buildings (Lord & Fieldhouse) – 211,300 GSF, no additions
TOTAL: 628,558 GSF

ADDRESS OF FACILITY: Please type address, including number, street name and city/town, if available, or describe the location of the site. (Maximum of 300 characters)

Lowell Freshman Academy, 40 Paige Street, Lowell, MA 01852
Lowell HS Steam Plant, Paige Street, Lowell, MA 01852
Lowell High School - 1922 Building (Kouloheras), 50 Father Morissette Blvd, Lowell MA 01852
Lowell High School - 1980 Buildings (Lord & Fieldhouse), 50 Father Morissette Blvd, Lowell M

BUILDING ENVELOPE: Please provide a detailed description of the building envelope, types of construction materials used, and any known problems or existing conditions (maximum of 5000 characters).

Exterior Envelope:
- Exterior windows appear to be in fair to poor condition with a few exceptions; plastic lexan glazing and insulated units

with broken seals should be replaced. In most cases the operable hardware needs to be replaced or maintained. Security screens should be replaced or refurbished. Perimeter sealants and glazing beads for the most part are in need of replacement. Buildings have brick veneers in all cases. Size and type of brick varies depending on the age of the building or addition. Some buildings/additions have traditional masonry back up while the newer buildings have metal studs. The condition of the exterior envelope is generally good with limited, but specific some areas requiring immediate attention. Interestingly, the older buildings in many cases are faring better than the newer construction.
- Painted/anodized aluminum door and frames generally appear to be in poor condition with a couple of exceptions. Painted steel door frames with transoms have failed. In general all storefront/curtain wall systems require maintenance and/or replacement. The fixed acrylic glazing for one of the two bridges is in good condition the other bridge will require re-glazing at some point in the future.
- All exterior door hardware is in fair to poor condition and should be replaced or repaired.
- Buildings have brick veneers in all cases. Size and type of brick varies depending on the age of the building or addition. Some buildings/additions have traditional masonry back up while the newer buildings have metal studs. The condition of the exterior envelope is generally good but with limited areas requiring immediate attention. Interestingly, the older buildings in many cases are faring better than the newer construction. The spit faced concrete block at the 1980's Building is in good condition. Existing cement asbestos cladding needs attention and/or replacement in some cases. The lintels over openings in the 1922 building appear to be compromised and should be investigated for potential repair and/or replacement. Existing skylights are original to the 1922 Building and need replacement. The Kalwall translucent glazing within the lightwell has far exceed it useful life and should be replaced.
Roof:
- The roofing membranes/flashings vary in age and condition. Most roofs are in fair condition with one notable exception; a large area of the 1922 Building has failed. In contrast, the pitched (and flat) roof of the 1892 building has been recently been replaced with artificial slate and new copper gutters/leaders. The workmanship is of the highest quality. The field house has a sloped corrugated metal roof with built in gutters and downspouts that appear to have reached or exceeded their life expectancy. Some sections of the built in gutter have failed and have damaged the façade. Ponding is occurring in many flat roof locations. Roof drains appear to be clogged in some locations and will require periodic maintenance.

Has there been a Major Repair or Replacement of the EXTERIOR WALLS ? NO
Year of Last Major Repair or Replacement: 1995
Description of Last Major Repair or Replacement:
Partial window and entrance retrofits and other miscellaneous projects.

Has there been a Major Repair or Replacement of the ROOF? YES
Year of Last Major Repair or Replacement: 2012
Type Of ROOF: EPDM/Slate(2012)/Metal - Partial replacement and repair.
Description of Last Major Repair or Replacement:
A full replacement of the slate roof on the 1892 Building. This is a small portion of the high school roof, the other sections have not been repair or replaced.

Has there been a Major Repair or Replacement of the WINDOWS? YES
Year of Last Major Repair or Replacement: 1995
Type Of WINDOWS: Aluminum, single hung
Description of Last Major Repair or Replacement:
New windows retrofit in 1980 and 1996 in the 1922 Bldg.

MECHANICAL and ELECTRICAL SYSTEMS: Please provide a detailed description of the current mechanical and electrical systems and any known problems or existing conditions (maximum of 5000 characters).

MEPFP: Freshman Academy
FIRE PROTECTION - There are areas of the building without coverage of a wet sprinkler system. The system should be supplemented to cover all areas of the building.
HVAC- Heating and ventilating units are in fair to poor condition. Heat exchangers show signs of having corrosion. Both will be required to be replaced in the near future. It is recommended that the present pneumatic automatic temperature controls be replaced with a DDC system. Exhaust systems should be replaced.

ELECTRICAL - The main service is in poor condition and should be replaced. Branch circuits are in fair condition except neutral conductors appear to be shared and many outlets that are near sinks are not GFCI protected. These items should be corrected. There is no emergency source of power. It is recommended that an emergency generator be provided. The fire alarm system is in poor condition and should be replaced. Lighting fixtures have recently been upgraded with more energy efficient lamps and ballasts, however there are a number of damaged fixtures which should be replaced.

MEPFP: 1922 and 1980 Buildings
FIRE PROTECTION- The building is mostly protected with an automatic dry sprinkler and wet stand pipe system. Sprinklers should be added at areas without coverage.
HVAC- Steam from the boiler plant is converted to hot water which serves fin tube radiators throughout the building. Gas fired roof top units provide ventilation for the building. Cooling for the auditorium is provided by rooftop units and a chiller. These systems are in fair condition. However the heat exchangers and circulation pumps are corroded and will need to be replaced soon. The automatic temperature controls system should be supplemented with DDC thermostats. All pneumatic control systems should be replaced with new DDC systems.
ELECTRICAL – The main service installed in 1990 is in fair condition but the secondary switch board which dates earlier should be replaced. Panel feeders are in fair condition but panel boards should be replaced. Branch circuits require updating to separate neutral conductors. Lighting fixtures are in fair condition. Lamping and ballasts have recently been updated. Emergency power is provided by a generator located in the Boiler Plant. An abandoned generator in the basement should be removed. It is recommended that the clock and paging systems be replaced.
The fire alarm system is outdated and should be replaced.

Has there been a Major Repair or Replacement of the BOILERS? NO
Year of Last Major Repair or Replacement: 1996
Description of Last Major Repair or Replacement:
Units were retubed in 2009

Has there been a Major Repair or Replacement of the HVAC SYSTEM ? NO
Year of Last Major Repair or Replacement: 2005
Description of Last Major Repair or Replacement:
Several roof top units on the 1980 Building were replaced in 2005

Has there been a Major Repair or Replacement of the ELECTRICAL SERVICES AND DISTRIBUTION SYSTEM? NO
Year of Last Major Repair or Replacement: 1997
Description of Last Major Repair or Replacement:
Several sections of the High School were upgraded as part of the 1997 Renovation

HEATING FUEL: Which of the heating fuel types below does your building primarily rely on for heating?

Natural Gas

BUILDING INTERIOR: Please provide a detailed description of the current building interior including a description of the flooring systems, finishes, ceilings, lighting, etc. (maximum of 5000 characters).

Finishes:
- Masonry and GWB walls require painting especially corridors and shared core spaces.
- Sagging and damaged acoustic ceilings systems should be replaced – condensation and/or roof leaks above ceilings require repair.
- Carpet is being replaced in many locations with resilient tile as part of an ongoing project.
- VCT in fair to good condition in many areas and new in others – replace damaged tiles as needed.
- Given the age and the number of buildings there are many different floor finishes and, of course, their condition varies greatly. Generally, wood, older ACT and VCT, rubber and sheet vinyl floors are in poor condition. Terrazzo floors are old but are in good condition except for an occasional crack. Existing painted concrete floors in the basement of the 1922 Building are spauling with shrinkage and settlement cracks. Ceramic tile floors (and walls) are recent for the most part with

the notable exception of the locker/shower rooms in the Fieldhouse. Most of these spaces (toilet rooms) benefit from an ongoing maintenance commitment. This includes toilet partitions and accessories.
- Gymnasium synthetic flooring is in fair to fair/poor condition. Floor needs courts and lanes to be restriped. The synthetic floor extends into the lobby area and has failed due to excessive traffic.
- Casework/Millwork and hardware conditions vary greatly from poor to good depending on location and age. Millwork is non-conforming to current ADA/MAAB requirements.
Openings:
- The condition of interior doors and hardware vary greatly depending on age and location. In many cases the hardware is non-conforming. It should be noted that the oldest buildings date back to the late 1800's and early 1900's the doors and frames are original to that period. Other locations are as new as 1980 and 1995 and, as would be expected, in good conditions and mostly conforming. Unfortunately, this represents only about half of the overall campus.
- Hollow metal door and frames should be painted and/or replaced
- Magnetic hold open devices require repair and/or replacement at some locations
Vertical Circulation:
- There are a total of 4 elevators. Three of which are old and non-conforming. The elevator in the oldest building is the newest and is in good condition.
- Stairs handrails and guardrails do not meet current building code requirements and should be modified.
- Access to stage is by way of a lift and meet currents ADA/MAAB requirements. There is handicapped seating in the auditorium. The balcony and control booth are not accessible.
Lighting: in general is in fair condition. Classrooms consist of continuous rows of surface fluorescent wrap around type fixtures with a (2) lamp cross section electronic ballast powering 32WT8 lamps. The gymnasium fixtures have recently been upgraded to (4) lamp T5HO high bays with occupancy sensors and wire guards. Library fixtures are pendant direct/indirect (2) lamp cross section with electronic ballasts and 32WT8 lamps. Corridors consist of recessed fluorescent 2X2 fixtures with acrylic lens. The auditorium house lighting contains fluorescent strips mounted in coves for indirect lighting and incandescent PAR down lights. General areas consist of surface mounted 2X2's and 8" fluorescent down lights. Light levels seem adequate. Lighting control consists of occupancy sensors in the classrooms and time clocks for exterior lighting. All other lights are controlled with local live voltage switching.

PROGRAMS and OPERATIONS: Please provide a detailed description of the current programs offered and indicate whether there are program components that cannot be offered due to facility constraints, operational constraints, etc. (maximum of 5000 characters).

Lowell High School currently serves approximately 3,200 students and employs 400 full-time staff members. LHS provides a comprehensive high school offering of programs for all Lowell Public School students in grade 9 – 12, as well as ROTC, Culinary arts, and swimming. In particular, the science related program offerings are constrained due to outdated and inadequate education spaces with the buildings. The facility also houses city-wide services programmed for the students including a community health center, bank, CCTV, DARE, UP and a thrift shop. See space summary attachment.

CORE EDUCATIONAL SPACES: Please provide a detailed description of the Core Educational Spaces within the facility, a description of the number and sizes (in square feet) of classrooms, a description of science rooms/labs including ages and most recent updates, and a description of the media center/library (maximum of 5000 characters).

The core educational space of Lowell High School is spread across three separate buildings, two of which are connected via two above ground tunnels. The third building, which houses only 9th graders, is a standalone academic building.

The original building, consists of 77 traditional classrooms, 2 computer labs, 1music lab, 1 digital photography lab, 1 graphic design lab, and 1 language lab (currently not in working order). The average square footage of a traditional classroom in this building is approximately 850 square ft. There are no dedicated science labs in this building. The designated chemistry lab is within a classroom. There is working gas, with working gas lines. The total square footage of workable lab space in this room is 480 square ft. There is no fume hood installed in this room. There have been no major

updates or renovations to this lab/room in the past 25 years.

The second building which was constructed in 1980 has 34 classrooms and 2 dedicated computer labs. This building also houses the LHS television studio. The average square footage of a traditional classroom in this building is approximately 661 square ft. The 1980 building has 4 dedicated science labs. The total size of the four science labs is 3,083 square ft. One of the labs has working gas and a fume hood. One of these labs has an inoperable fume hood. The four science labs have not been updated since the original build out in 1980.

The 3rd building, designated as the Freshman Academy is a standalone academic facility. This building has 37 traditional classrooms and two computer labs. The average size of the traditional classrooms in this building is approximately 730 square ft. There is one dedicated room for science experiences, this room has running water. There are no eye wash stations or fume hoods in this lab. This room was a former home economics room, and has never been fully updated as a dedicated science lab.

The Lowell High School Media Center is located in the 1980 building. The media center has 10 computer stations for student use. The Media Center was last updated in 1997. One of the dedicated computer labs is off the back of the media center.

CAPACITY and UTILIZATION: Please provide a detailed description of the current capacity and utilization of the school facility. If the school is overcrowded, please describe steps taken by the administration to address capacity issues. Please also describe in detail any spaces that have been converted from their intended use to be used as classroom space (maximum of 5000 characters).

Lowell High School currently serves approximately 3,200 students and employs 400 full-time staff members. LHS provides a comprehensive high school offering of programs for all Lowell Public School students in grade 9 – 12.

See space summary attachment.

MAINTENANCE and CAPITAL REPAIR: Please provide a detailed description of the district's current maintenance practices, its capital repair program, and the maintenance program in place at the facility that is the subject of this SOI. Please include specific examples of capital repair projects undertaken in the past, including any override or debt exclusion votes that were necessary (maximum of 5000 characters).

The district is responsible for the daily cleaning and maintenance of the School, while the City of Lowell DPW is responsible for the major repairs associated with the school facility. The Lowell Public Schools employs a full-time custodial crew of twenty (20) building custodians to clean and maintain the facilities on a daily basis. The City of Lowell Department of Public Works (DPW) provides for the repair of broken furnishings and equipment and major repairs. The district, in conjunction with the City of Lowell, prepares an annual capital plan for inclusion in the City's overall budget. The Lowell Public Schools has recently concluded a comprehensive facilities assessment with the assistance of OMR Architects to assess and document the needs of each school facility city-wide. A copy of the facilities assessment pertaining to this school is attached to the SOI to serve as additional backup for consideration of this project. No overrides or debt exclusion votes have been necessary in the past to fund school related capital projects with the MSBA's assistance.

Priority 4

Question 1: Please describe the conditions within the community and School District that are expected to result in increased enrollment.

The school district projected enrollment is significantly higher than the current 2013-2014 enrollment of 11,043 students in grades PK-8 and 3,134 students in grades 9-12. NESDEC's 10-year average enrollment projection for the Lowell Public School District shows a need for school buildings sized appropriately to house 11,811 students in grades PK-8 and 3,900 students in grades 9-12. In addition, givenLowell's complex, district-wide, school assignment policy and regular mid-year fluctuation of class sizes, it is recommended that 15 additional swing classrooms be provided in the PK-8 space program across the district.

Understanding the current overcrowding situation though, the elementary, middle and PK-8 schools are showing physical space needs across the board in most student-designated spaces, especially in core academic classrooms due to the current overcrowding. Grades K-4 are currently overcrowded by 593 students and based on enrollment projections will be overcrowded by 924 students in the next four years. Grades 5-8 are currently overcrowded by 594 students and based on enrollment projections will be overcrowded by 1,174 students in the next six years. Add to this the 15 swing classroom need. Therefore with the projected population added into the already overcrowded classrooms, there is a documented space need for approximately 2,500 additional seats in theLowellPublic Schoolsystem in the upcoming years.

Given the confirmed need to expand the grade PK-8 schools by 2,500 additional seats, it is agreed that it will be necessary to build additional school buildings or a comprehensive expansion of the existing facilities. There is a desire to keep the strand sizes small and keep school enrollments below 1,000 students at grades PK-8, but there is also a scarcity of suitable land to build additional schools in the City ofLowell. The committee considered moving PK out of the elementary and middle schools and consolidating those services in smaller facilities around the city. And they considered reconfiguring the existing schools to place fifth graders in the elementary schools. Each of these reconfiguration solutions freed up existing square footage to accommodate more students in the current facilities, but the City feels most comfortable retaining the PK in the schools and maintaining the existing grade configuration. The continuation of increasing enrollment throughoutLowellwill mean that the district will need to bring in modular classrooms in subsequent years to many of the PK-8 facilities. There is little space to build new in the City, busing around the city is too expensive and parents want neighborhood schools.

This may seem to not affect the high school, but knowing the full needs of the total school district system, provides a complete understanding of the much larger problem thatLowellfaces in the next decade. Since every child inLowellgoes through the one high school, the city feels that this grouping of buildings has the most need at this time.

Priority 4

Question 2: Please describe the measures the School District has taken or is planning to take in the immediate future to mitigate the problem(s) described above.

The school district and the city recognize the issue of current and projected overcrowding. The district began by hiring OMR Architects to analyze the bigger issues of the existing facilities and develop a 10 year plan to resolve the issues in a systematic fashion. Coupled with that was the enrollment changes that were discovered during the process as what once was thought of as an enrollment bubble, seems to have become a constant that is more significant than can be handled with minor classroom changes. In addition, this summer, the district is planning on renovating the Rogers PK-K school (once served as a middle school and now houses district offices and some PK-K) to take on the developing elementary school problem in a systematic fashion.

There is only one high school in Lowell, made up of multiple buildings. It is at the center of the city. There is overwhelming support to keep it in the city center for a number of reasons including: it is a historical building; one unified school is important to school pride; busing to multiple locations is reduced as there is a city bus system used by many students; location near UMASS Lowell and the City Municipal buildings brings opportunities for the students and the education; the urban presence of the school adds to the pride of the city; parking for students and teachers is simplified by city parking garages; and building a new school for 3,900 students is cost prohibitive. Knowing that these school parcels are important to theLowellSchool District, they are discussing acquiring a small parcel of land to the SW of the current 1980 facility to help with future construction phasing. The Lowell Planning Department has also started considering the extension ofDutton Streetto meet up withFather Morrisette Blvd, if the 1980s building is demolished. This would allow a safer drop-off and pick up scenario for students in the future.

Priority 4

Question 3: Please provide a detailed explanation of the impact of the problem described in this priority on your district's educational program. Please include specific examples of how the problem prevents the district from delivering the educational program it is required to deliver and how students and/or teachers are directly affected by the problem identified.

Students and teachers are directly affected as the available room for instruction is reduced. This is felt within the regular education classrooms and special population classrooms. Small rooms and/or spaces for teachers to meet in small groups or for 1:1 instruction are very difficult to come by in the facility. The school facility also lacks dedicated spaces for required services (OT/PT, speech, etc.) to be delivered to students. The school is at capacity for adding additional sub-separate programs, such as CSA (autism) classrooms to provide instruction in the district as opposed to tuitioning CSA students to out-of-district placements.

Please also provide the following:

Cafeteria Seating Capacity: 350

Number of lunch seatings per day: 8

Are modular units currently present on-site and being used for classroom space?: NO

If "YES", indicate the number of years that the modular units have been in use:

Number of Modular Units:

Classroom count in Modular Units:

Seating Capacity of Modular classrooms:

What was the original anticipated useful life in years of the modular units when they were installed?:

Have non-traditional classroom spaces been converted to be used for classroom space?: NO

If "YES", indicate the number of non-traditional classroom spaces in use:

Please provide a description of each non-traditional classroom space, its originally-intended use and how it is currently used (maximum of 1000 characters).:

Please explain any recent changes to the district's educational program, school assignment polices, grade configurations, class size policy, school closures, changes in administrative space, or any other changes that impact the district's enrollment capacity (maximum of 5000 characters). :

As a short-term measure to reduce current class size enrollment at the elementary school grade levels, the Lowell School Committee recently voted to re-open the Rogers School to serve students in grades Pre-K – 2 for the upcoming 2014/15 school year. This is a short-term solution to begin to address overcrowding at the elementary school level, however when this population reaches the 5th grade at the start of the 2016/17 school year, the current middle school configuration (number of classes) will not be able to accommodate the entering 5th grade students.

What are the district's current class size policies (maximum of 500 characters)?:

There are no class size policies, but the preferred class sizes are 20-22 at elementary, 22-24 at middle and under 25 at high school. The preferred school strand sizes are four at elementary schools, six at middle schools and two at Washington, Moody and K-8 schools. To solve the overcrowding issue, and due to the lack of available land, there is a willingness to expand middle schools to eight strand and K-8 to four strand schools with additions.

Priority 7

Question 1: Please provide a detailed description of the programs not currently available due to facility constraints, the state or local requirement for such programs, and the facility limitations precluding the programs from being offered.

With the current overcrowding conditions -- which has intensified the problematic issues with the existing conditions of the buildings related to maintenance, building systems and other larger capital projects -- and the magnitude of the future enrollment projections, and the changing methodologies and space needs necessary to meet 21st century teaching and learning standards, there is a significant shortfall in the current net and gross square footage in the great majority of the Lowell school buildings, including the high school.

Coupled with this is the desire to bring special needs students and their associated programs, back into this school for a better educational environment for the students and teachers. Currently, many special needs students are displaced for partial semesters to one of the alternative or day schools in the city, and are brought back into the mainstream at different intervals throughout the year. This disrupts the educational experience for all the students and contributes to additional and sometimes unplanned overcrowding in classrooms throughout the school year. Additions to this school should include much needed special needs spaces and programs.

The district desires to have21st century-style, flexible spacesfor the development of critical thinking, creative problem solving, independent learning, and student and teacher collaboration at each school. This facility is obsolete and not conducive to 21st century teaching and learning methodologies. These standards in school design include:

Flexible spaces for student collaboration, interaction and creative thinking, such as small seminar, large group and breakout spaces

Adaptable and varied spaces that allow for personalization, differentiated instruction and student choice

Distributed spaces adjacent to classrooms to build student - teacher and teacher - teacher connections, such as teacher planning spaces

Spaces for visibility to experiential and hands on activities or project-based learning, which include places to work and display, such as Fabrication Labs and non-passive learning environments.

The evolution of the Library toMediaCenterto Information Commons to today's series of spaces that form the Learning Commons

Right sized spaces that allow for today's seamless and interactive technology, evolving tools and accessibility needs

Efficient, interdisciplinary layouts to optimize the time and ways we educate our students

Buildings with a sense of place, indoor / outdoor connections, natural daylight and appropriate environmental systems for sustainability and student engagement

And the changing tools and systems required to make secure and safe buildings

The single high school in Lowell, serving grades 9-12 across a sprawling urban campus of buildings, is showing insufficient space in the areas of core academic, vocations and technology and media center, with a clear need for state-of-the-art science and fabrication labs, small and large group seminar, and group work spaces for the students. The current science labs are both under-sized and under- engineered and therefore do not meet state and local standards and codes. At the present time, the current number and configuration of science classrooms/laboratories constrain the staff from providing science programming that meets state and local requirements, including the Common Core initiative. Teacher offices are not integrated into the educational areas making it difficult for interactions between the faculty and students as well as faculty to faculty. There are also student-designated spaces which are oversized based on current MSBA guidelines, such as the physical education and auditorium/ drama spaces, but without further, in-depth, educational programming with the users, a reasonable and probable conclusion is that these spaces fill a much needed role in scheduling and usage throughout the

school day. The considerable size of the student population, a model seen in few other high schools inMassachusetts, will need further discussions with the MSBA. Bringing theFreshmanAcademyinto the folds of the main building in a wing of their own, will provide more safety and security for these students, help develop four year teacher interactions, and provide efficiency in their day to day movement through campus. This HS facility will see a need in the next decade for educating 3,900 students each year as well as provide community-integrated spaces for the City.

Priority 7

Question 2: Please describe the measures the district has taken or is planning to take in the immediate future to mitigate the problem(s) described above.

In April 2013, OMR Architects was hired to prepare a Comprehensive Facilities Assessment and Master Plan which included 29 Lowell school facilities- elementary, middle, PK-8, high, alternative, day and the adult education center. The goals of the study were: 1) Perform a Physical and Programmatic Assessment of the Lowell Public School facilities, and 2) Develop a 10 Year Master Plan for critical maintenance, renovations and additions and/or building replacements.

The facilities assessment and master plan included: reviewing the schools and their relationships within the City of Lowell and their defining neighborhoods; analyzing the existing conditions of all of the facilities (architecture, site, structure, MEP/FP) and providing baseline repair estimates; three educational visioning sessions with school and district administration and educational leaders to set the goals and values for the master plan study; analysis of NESDEC enrollment projections for ten years; educational programming space analysis comparing the existing and projected population and facilities to MSBA guidelines; understanding site availability in Lowell; developing multiple masterplan options and comparing these with cost and value; developing preferred options; and developing a 10 year capital plan for the design and construction work of this report.

The Lowell High School fits into the Masterplan as the Preferred Solution Option 1D/E with a total project cost of $245.4M, not including escalation or land acquisition. This 650,000 GSF solution requires the possession of adjacent land and includes an addition/ demolition/ renovation/ repurposing response to the existing Lowell High School facilities. The same Masterplan includes the Elementary, Middle & K-8 School Preferred Solution of Option 1H with a total project cost of $270M, not including escalation or land acquisition. This solution includes: additions and renovations to Wang, Daley and Robinson Middle Schools to make eight-strand schools serving 792 students each; an addition/ renovation/ conversion of Rogers School to be a four-strand PK-8 facility serving 960 students; a new, four-strand PK-8 facility serving 960 students; and major and minor repairs of 23 other school facilities.

As a short-term measure to reduce current class size enrollment at the elementary school grade levels, the Lowell School Committee recently voted to re-open theRogersSchoolto serve students in grades Pre-K – 2 for the upcoming 2014/15 school year. This is a short-term solution to begin to address overcrowding at the elementary school level, however when this population reaches the 5thgrade at the start of the 2016/17 school year, the current middle school configuration (number of classes) will not be able to accommodate the entering 5thgrade students.

Priority 7

Question 3: Please provide a detailed explanation of the impact of the problem described in this priority on your district's educational program. Please include specific examples of how the problem prevents the district from delivering the educational program it is required to deliver and how students and/or teachers are directly affected by the problem identified.

An example of the facility deficiency may be observed in Room 314 in the 1922BuildingofLHS, a science lab. There is a working gas with working gas lines. The total square footage of workable the lab space in this room is 480 square ft. Science labs in the 1980BuildingofLHSalso have working gas with working gas lines, however the total square footage of workable the lab space in this room is 661 square ft.

Understand that the number of occupants allowed in the laboratory must be set at a safe level based on building and fire safety codes, size and design of the laboratory teaching facility, chemical/physical/biological hazards, and students" needs (NSTA 2000; Roy 2006). Science classes should have no more than 24 students to allow for adequate supervision during science activities, even if the occupancy load limit might accommodate more (NSTA 2004). It is equally important to ensure adequate workspace for each student. NSTA recommends 60 sq. ft. for each secondary student.

Research data show that accidents rise dramatically as class enrollments exceed 24 students or when inadequate individual workspace is provided (West et al. 2005).

Recommended lab size:

60 sq. ft. x 25 students =1500 sq. ft.

Room 314 at 480 square feet of lab space falls short of NSTA recommendations by1120 sq. ft.

The labs in the 600's at 661 square feet of lab space fall short of NSTA recommendations by 839 square feet (this calculates to 26.5 square feet of workable lab space per student).

ADAcompliance is also an issue.

Another example of facility deficiency may be observed in theLibraryMediaCenter. The library has 110 seats in addition to 25 computer stations in the library and 30 computer stations in the attached computer lab. Due to area constraints only two classes can be in the library at any one time comfortably. The number of classes running each period range from 125 classes to 167.

REQUIRED FORM OF VOTE TO SUBMIT AN SOI

REQUIRED VOTES

If a City or Town, a vote in the following form is required from both the City Council/Board of Aldermen **OR** the Board of Selectmen/equivalent governing body **AND** the School Committee.

If a regional school district, a vote in the following form is required from the Regional School Committee only. FORM OF VOTE Please use the text below to prepare your City's, Town's or District's required vote(s).

FORM OF VOTE

Please use the text below to prepare your City's, Town's or District's required vote(s).

Resolved: Having convened in an open meeting on _____, prior to the closing date, the _____ *[City Council/Board of Aldermen, Board of Selectmen/Equivalent Governing Body/School Committee]* of _____*[City/Town]*, in accordance with its charter, by-laws, and ordinances, has voted to authorize the Superintendent to submit to the Massachusetts School Building Authority the Statement of Interest dated _____ for the _____*[Name of School]* located at _____*[Address]* which describes and explains the following deficiencies and the priority category(s) for which an application may be submitted to the Massachusetts School Building Authority in the future

_____

_____

_____

_____

_____

_____; *[Insert a description of the priority(s) checked off on the Statement of Interest Form and a brief description of the deficiency described therein for each priority];* and hereby further specifically acknowledges that by submitting this Statement of Interest Form, the Massachusetts School Building Authority in no way guarantees the acceptance or the approval of an application, the awarding of a grant or any other funding commitment from the Massachusetts School Building Authority, or commits the City/Town/Regional School District to filing an application for funding with the Massachusetts School Building Authority.

CERTIFICATIONS

The undersigned hereby certifies that, to the best of his/her knowledge, information and belief, the statements and information contained in this statement of Interest and attached hereto are true and accurate and that this Statement of Interest has been prepared under the direction of the district school committee and the undersigned is duly authorized to submit this Statement of Interest to the Massachusetts School Building Authority. The undersigned also hereby acknowledges and agrees to provide the Massachusetts School Building Authority, upon request by the Authority, any additional information relating to this Statement of Interest that may be required by the Authority.

Re: City of Lowell, Lowell High School

Dear Mr. Murphy:

I am pleased to report that the Board of the Massachusetts School Building Authority (the "MSBA") has voted to invite the City of Lowell (the "City") to partner with the MSBA in conducting a Feasibility Study for the Lowell High School. The Board's vote follows the City's timely completion of all of the requirements of the MSBA's Eligibility Period.

I do want to emphasize that this invitation to partner on a Feasibility Study is ***not*** approval of a project, but is strictly an invitation to the City to work with the MSBA to explore potential solutions to the problems that have been identified. Moving forward in the MSBA's process requires collaboration with the MSBA, and communities that "get ahead" of the MSBA without MSBA approval will not be eligible for grant funding. To qualify for any funding from the MSBA, local communities must follow the MSBA's statute, regulations, and policies which require MSBA collaboration and approval at each step of the process.

During the Feasibility Study phase, the City and the MSBA will partner pursuant to the terms of the Feasibility Study Agreement to find the most fiscally responsible and educationally appropriate solution to the problems identified at the Lowell High School. The Feasibility Study, which will be conducted pursuant to the MSBA's regulations and policies, requires the City to work with the MSBA on the procurement of an Owner's Project Manager and Designer, which will help bring the City's Feasibility Study to fruition.

We will be contacting you soon to discuss these next steps in more detail. In the meantime, however, I wanted to share with you the Board's decision and provide a brief overview of what this means for the City of Lowell.

I look forward to continuing to work with you as part of the MSBA's grant program. As always, feel free to contact me or my staff at (617) 720-4466 should you have any questions.

Sincerely,

John K. McCarthy
Executive Director

Re: City of Lowell, Lowell High School

Dear Mr. Murphy:

I would like to thank you and your team for meeting with Massachusetts School Building Authority (the "MSBA") staff on October 5, 2015 during which enrollment projections and methodologies were reviewed for Lowell High School (the "Proposed Project") in the City of Lowell (the "District"). As discussed, the next critical step is for the MSBA and the District to agree on the design enrollment for the Lowell High School.

The Lowell High School presently serves the District's entire grade 9-12 enrollment, and accordingly, this analysis will be particularly focused on the enrollment projections for those grades. The table below illustrates the District's K-12 enrollment during the most recent ten year period, including enrollment for the most recent school year (2014-2015) as reported by the Department of Elementary and Secondary Education (the "DESE"). The total grade 9-12 enrollment in Lowell as reported by the District for the 2014-2015 school year was 3,040 students which reflects a decrease of 682 students (-18%) from the grade 9-12 enrollment reported in 2005-2006 which was the maximum grade 9-12 enrollment reported in the preceding ten years. Additionally, the current year's grade 9-12 enrollment reflects a decrease of approximately 307 students (-9%) from the average grade 9-12 enrollment reported during the preceding ten year period.

YEAR	K-5	6-8	9-12	TOTAL
2005	6,374	3,553	3,722	13,649
2006	6,277	3,425	3,711	13,413
2007	6,177	3,303	3,573	13,053
2008	6,286	3,246	3,396	12,928
2009	6,375	3,165	3,290	12,830

2014	7,133	3,289	3,040	13,462

The MSBA understands that the District is proposing a design enrollment to accommodate approximately 3,900 students in grades 9-12 at the Lowell High School. The enrollment in grades 9-12 reported to the DESE for the 2014-2015 school year at Lowell High School was 3,040 students.

With respect to future enrollments, the MSBA's base enrollment forecast indicates the District's grade 9-12 enrollment will increase through 2020-2021 then decline through 2024-2025. The average grade 9-12 base enrollment forecast for the projected period through the 2024-2025 school year is 3,355 students.

As a result of a sensitivity analysis performed by the MSBA on this base enrollment projection and further discussion with the District, the following adjustments have been made to the base enrollment projection:

- Out-of-District Enrollment
    - In order to adjust for fluctuations to the out-of-district enrollment patterns of the District's residents over time, the MBSA has made an additional adjustment to the base enrollment projection.
    - In order to make this adjustment, the MSBA adjusted the grade to grade survival ratios for grades K-5 by a total of 3.3% throughout a four year period in the projection.
    - This adjustment added approximately 85 students to the average grade 9-12 enrollment as compared to the projection without this adjustment.

- Development
    - Based on the discussions between the District and the MSBA, and the anticipated development information provided by the District, the MSBA enrollment model has been adjusted to use the five-year 75th percentile cohort survival rate for 2015-2016 rather than the five-year average cohort survival rate, which is utilized throughout the base enrollment forecast.
    - This adjustment added approximately 80 students to the average total grade 9-12 enrollment as compared to the projection without this adjustment.

As a result of analysis on the base enrollment projection, the adjustment to the base projection described above, and based on the historical enrollment trends of the District, the MSBA recommends a design enrollment of 3,520 students for the Lowell High School.

The MSBA believes that this design enrollment recommendation will position the District to efficiently meet space capacity needs throughout future enrollment variations. Please sign and return the attached certification within 7 calendar days to confirm agreement on this design enrollment. If the District feels that this design enrollment does not meet the needs of the District, please respond to this letter via e-mail to Sarah Blache and propose three meeting/conference call times for which the District can be available to discuss enrollment.

If you have any questions regarding this matter, please do not hesitate to contact me or Sarah Blache (Sarah.Blache@MassSchoolBuildings.org) at 617-720-4466.

Sincerely,

Mary Pichetti
Director of Capital Planning

MASSACHUSETTS SCHOOL BUILDING AUTHORITY
CITY OF LOWELL
LOWELL HIGH SCHOOL
DESIGN ENROLLMENT CERTIFICATION

As a result of a collaborative analysis with the Massachusetts School Building Authority (the "MSBA") of enrollment projections and space capacity needs for the proposed project at the Lowell High School, the City of Lowell hereby acknowledges and agrees that the design of the proposed project at the Lowell School shall be based on an enrollment of no more than 3,520 students in grades 9-12. The City of Lowell further acknowledges and agrees that, pursuant to 963 CMR 2.00 *et seq.*, the MSBA shall determine the square feet per student space allowance and total square footage for a high school serving 3,520 students in grades 9-12. The City of Lowell acknowledges and agrees that it has no right or entitlement to any particular design enrollment, square feet per student space allowance, or total square footage and that it has no right or entitlement to a design enrollment any greater than 3,520 students for the Lowell High School, and further acknowledges and agrees that it shall not bring any claim or action, legal or equitable, against the MSBA, or any of its officers or employees, for the purpose of obtaining an increase in the design enrollment of the Lowell High School that it has acknowledged and agreed to herein. The City of Lowell further acknowledges and agrees that, among other things, the design enrollment, square feet per student space allowance, and total square footage of the Lowell High School shall be subject to the approval of the MSBA's Board and that the final approval of a proposed project at the Lowell High School shall be within the sole discretion of the MSBA's Board.

The undersigned, for themselves and the City of Lowell, hereby certify that they have read and understand the contents of this Design Enrollment Certification and that each of the above statements is true, complete and accurate. The undersigned also hereby certify that they have been duly authorized by the appropriate governmental body to execute this Certification on behalf of the City of Lowell and to bind the City of Lowell to its terms.

Educational Visioning Workshop Overview and Notes

During October and November of 2016, the Lowell High School Educational Working Group (EWG), a group of approximately 50 Lowell Area Schools (LAS) administrative leaders, and Lowell High School (LHS) teachers, administrators, students, parents, and community partners, participated in three Educational Visioning Workshops run by New Vista Design and Perkins Eastman. Each workshop was a collaborative session designed to inform the LHS design process. Participants were led through a step-by-step visioning process aimed at capturing their best thinking about LAS's/LHS's current and future educational goals and priorities, and connecting them to best practices and possibilities in innovative school facility design.

On **October 14, 2016**, the Lowell High School EWG participated in the first Educational Visioning Workshop.
The four- hour workshop explored the following topics:

- **Priority Goals** for the renovated/new facility
- **21st century teaching and learning practices** that are being influenced by digital technology and our changing economy
- **Strengths, Challenges, Opportunities, and Goals (SCOG Analysis)** associated with Lowell High School's current academic program as well as the vision for its new facility
- **21st Century Learning Goals** that distill the group's best thinking with regard to Lowell High School's current and future educational programming and priorities

On **November 1, 2016**, the Lowell High School EWG participated in the second Educational Visioning Workshop.
The four-hour workshop explored the following topics:

- **21st Century Design Patterns 1.0** that innovative schools throughout the country have put into practice in order to make their forward-thinking learning goals come alive on the level of facility design
- **Guiding Principles 1.0** for design of the renovated/new facility

On **November 17, 2016**, the Lowell High School EWG participated in the third Educational Visioning Workshop.
The four-hour workshop explored the following topics:

- **Blue Sky Ideas** for the renovated/new facility
- **Key Spaces and Adjacencies** for the renovated/new facility
- **Bubble and Adjacency Diagramming** for the renovated/new facility

The following pages offer a summary of notes taken and information gathered during each workshop. If you would like to add comments or ideas to this evolving narrative please contact Dr. Roxanne Howe at rhowe@lowell.k12.ma.us .

Agendas for each of the three workshops can be found at the end of this document.

Facility Design Visioning Workshop One Notes

Friday, October 14, 2016

Priority Goals

The following list of priority goals for the design of the new and/or renovated Lowell High School was recorded during the participant introduction section of the Educational Working Group's (EWG) Workshop One, with each participant offering one priority goal. The EWG is a group of approximately 50 participants that includes Lowell Area Schools leadership, as well as school administrators, teachers, students, parents and community partners. The following priorities have been grouped by the themes they touch upon.

- Meets needs of whole child
- Fosters collaboration
- Builds community
- Welcoming environment for students and teachers
- Joyful environment
- Multiple spaces to celebrate student work and achievement
- Education as transformational act
- Engagement of all stakeholders
- A dynamic K-PHD environment
- Handle capacity – if you build they will come
- Multi-purpose – and multi-functional
- 21 century learning spaces
- Attractive
- Lasting curb appeal
- High quality programming
- Maintain 3 clusters
- Maintain Freshman Academy
- Historic context
- Buildings that integrate into the community
- Aligned new construction and old building
- More welcoming and updated first impressions are important
- Access to the Lowell community (i.e. restaurants, businesses, cultural institutions)
- A campus feel / access for ALL
- A common space for departments to meet and collaborate
- Breakout rooms for project-based learning and differentiated instruction
- Flexible and adaptable learning spaces that foster collaboration and community
- Flexible classrooms and furniture
- Classrooms with robust and consistent technology
- Explore grade level and departmental organization
- Redundant infrastructure
- Integrated technology / evolving
- Data center – real world data training
- Good IT bandwidth and storage
- Every classroom – interactive with integral projector – integral
- Real world integration of subjects such as Science and English
- Community integration in real world way – UMass Lowell / Park
- New school as part of National Park and vice-versa – contextual
- Integration with National Park

- Multiple dining options (school garden as part of curriculum)
- Space to create food
- Thinks about students' wellness / ergonomics
- Inter-departmental collaboration
- Facilitates collaboration within departments
- Synergy (including Fine Arts programs, TV and Media adjacencies)
- Spaces that inspire pride and excitement in staff and students
- Sustainability
- Clean energy
- Natural light – windows
- LEED certified – form follows function / PYS – PSYCH
- Hybrid labs
- Clean energy
- Sustainability – LEED
- Training areas for Life Skills – common and accessible (kitchen/home/bathrooms)
- Designed for 20-50 years / cost efficient $250m /100m!
- Be forward-thinking and mindful of security
- Industry best practices – auto lock doors / vestibule
- Safe building – more space for movement
- Safety – up to code – lock down
- Safe and comfortable
- Safety issues around Trolley
- Access control (40 doors nightmare)
- School safety
- School safety – address difficulties and challenges
- Feel safe
- Handicap access
- More bathrooms
- Gender neutral bathroom
- Maintain and upgrade auditorium
- A lot more space / areas dedicated to departments
- Space dedicated to 400 ROTC cadets
- ROTC space(s)
- More common areas interior and exterior
- Quiet and contemplative spaces
- Improved hallway traffic
- Upgrades to auditorium – box office / handicap seating
- Science wing – with research facility (belong HS)
- Library with multiple uses and functions, and supportive of collaboration
- Tunnels inadequate
- Traffic flow
- Daycare for student's children
- Student support service office

Essential and Cutting Edge LHS Programs

The following list of essential and cutting edge programs at Lowell High School was brainstormed by the Educational Working Group's (EWG).

.

An increasing number of co-taught classrooms:

- General Ed and Special Education Teachers in 7 classrooms
- Share responsibilities
- Gives both sets of students collaborative
- Teamwork experiences

Activities outside the classroom include:

- Internships
- Field studies
- Authentic contexts

Community involvement – both ways

- I.e. Jeanne D'Arc Credit Union

New Programs Include:

- Generation citizen – action citizenship
  - Students interact with local businesses to solve community problems
- Tsongas Industrial History Center talks
  - Living history
- Engineering
  - Project Lead the Way
  - PBL – 21st century learning and collaboration

Cultural Diversity

- ELL and Refugees
  - From competency to absorption to diffusion
  - Insight health clinic +/- 1/3 students
  - Food programs
  - International Institute

Lowell Latin Lyceum

- A gifted and talented program with fewer than 200 students
- Test-in / application
- Cohort model – for 4 years
- All core subjects for first two years
- In Senior year just English

Freshman Academy

- Important transition
- 8 core teachers > 200 students
- 3 teams of 8 core teachers

Enrichment Programming

- Fine and performing arts
- Student activities (clubs and student government)
- Athletic programs

STEM Program

- Engineering
- Maker Space – opened last year
- 9th grade revamp
- NGSS – science
- Clean Energy Pathway
- Offer science in pathways
- 120+ students
- Integral course offerings

Essential and Cutting Edge LHS Programs (continued)

Downtown Lowell Activities

- The Merrimack River
- Boarding House Park
- City Hall
- Monuments
- Volunteer work at Lowell National Historical Park
- School store (expanded location in downtown)
- Sports activities and clubs
  - Crew
- Important transportation links

University Partnerships

- Dual enrollment partnerships (Junior and Senior year)
  - Middlesex Community College (MCC) partnership
  - University of Mass Lowell (UML) partnership

Junior Reserve Officer Training Corp (JROTC)

- Grades 9-12
- Sense of belonging
- Ell / SPED / LYCEUM students
- Leadership, integrity, competitiveness

Diversity of Curriculum

- Variety of programs meet student needs and inspire student interest and engagement
- Advanced Placement courses
- Cultural diversity and awareness – flags / programs
- Need to add more languages
- Assist student in priority setting and time management

Vocational Offerings

- Culinary
- Bank
- TV Communications
- Job prep for special needs students
- Local business
- Aiming to meet the needs of the 10-15% of students who will not go on to college

Explore notion of "pathways"

- Course selection
- Capstone projects
- Intern / extern program

College and Career Center

- Naviance (college & careers)
- Part-time work resource
- Resume building

21st Century Learning Goals 1.0

The following set of priority "21st Century Learning Goals" for Lowell High School students was developed by the Educational Working Group (EWG). Seven teams of six participants worked to create their own set of learning goals, after which each team presented to the larger group. Participants were then given the opportunity to prioritize their top learning goals. Each team's list has been grouped by like goals, which are listed in order of the priority votes they received, with each learning goal starting with 6 votes (based on their initial selection) and earning one additional vote for each red dot that it received from group members during the subsequent larger group priority voting process.

- **Empathy, Global Perspective and Civic Engagement** (135 votes)
  - Cultural Awareness
  - Productive Social Interactions
  - Awareness of Community and Global Society
- **Complex Communication** (86 votes)
  - Oral, Written and Digital
  - Digital Competence
- **Joy, Curiosity and Imagination** (73 votes)
  - Creativity
  - Inventive Thinking
- **Critical Thinking and Problem Solving** (69 votes)
  - Critical Reasoning
- **Agility, Adaptability and Risk Taking** (60 votes)
  - Academic Mindset
  - Integrating and Applying Learned Material in All Subjects
  - Personal, Social and Civic Responsibility
  - Multi-Cultural Literacy
- **Real World Interconnectivity** (53 votes)
  - Career Preparation
  - Real World Collaboration
  - Vocational Opportunities
- **Teaming and Collaboration** (47 votes)
  - Collaborative Learning
  - Teamwork
  - Interpersonal Skills
- **Holistic Awareness** (24 votes)
  - Self-Advocacy
  - Wellness
  - The Natural World

SCOG Analysis

The Educational Working Group (EWG) conducted a "SCOG Analysis" of what it sees as the current strengths, challenges, opportunities and goals with regard to Easthampton Public School's elementary and middle school academic programs and facilities. The EWG is a group of approximately 35 participants that includes Easthampton Public School's leadership, as well as school administrators, teachers, students, parents and community partners.
The following is a compilation of participants' responses and ideas.

STRENGTHS

- Students
- Staff
- Workforce (administration, custodial, health, faculty)
- Community partnerships
- Location (access, connections, academic/business/comm./transportation)
- Academic arc – physical links
- TLT (that Lowell thing)
  "the school is the city / city is the school"
  - Gateway city
  - Belief in public education
  - Vibrant middle class
- School history
- One school community / 2 day schools connected
- Services
- Multi-cultural (diversity)
- Academic choice
- Student support services
- College and Career Center
- Dual enrollment
- Partnerships
- Sense of belonging
- Curricular evolving
- Working with what we have
- Tutoring (can do work before and after school)
- House model
- Extended day hours
- Extra-curricular hours
- Extra-curricular activities
- Scheduling (student-driven)
- Outside agencies
- Co-taught classes
- Breakfast and lunch (free) mobility
- Parking garage
- ASPEN portal + Naviance
- Student involvement
- Advisory time

Facility Design Visioning Workshop One Notes

Friday, October 14, 2016

SCOG Analysis (continued)

CHALLENGES

- Rapidity of technology & cultural change
- Multiple buildings & divides
- Physical conditions … including technology
- Universal design
- Paring (note pay at garage / backups & limited availability)
- Scale of student / teacher
- Diversity / equity
- Schedule (lunch driven) doesn't max student time or account for passing time
- Scheduling
- Number of students vs. space
- Diversity within staff
- Transitional planning for students
- Equity in technology in school
- Lack of technology at home
- Adapting curriculum as technology changes
- Maintaining healthy lifestyle and balance with academics / activities / work
- Parental pressures
- Parental involvement
- Lack of opportunities for movement
- Cultural competence
- Lack of green space
- Students drug and alcohol involvement
- Getting outside agencies into building
- Parking
- More space for tutoring/time to use classrooms
- Use of advisory
- Communication with students
- Size staffing and maintaining communication
- Alternate scheduling
- Website not as user friendly as could be
- Limited time to address multiple needs
- Lunch time schedule
- Lack of time to collaborate
- Current traditional schedule
- Workable classroom spaces / storage space
- Lack of places to display work
- Consistency in houses (house model)
- Extended day coverage/ supervision/ safety
- Lack of marketing/ telling our story
- Antiquated phone system / interior rooms
- Building navigating
- Relationships with students + teacher
- Differentiation – more student voice & choice

Facility Design Visioning Workshop One Notes

Friday, October 14, 2016

SCOG Analysis (continued)

OPPORTUNITIES

- Blank slate (starting project)
- Students
- Constant renewal (people) & continuity of community
- Constant expansion of partnerships
- Create national model (civic, cultural, engagement, global classroom)
- Head & hand / service learning
- More community partnerships into school
- Ability to gather broad and diverse input on school design
- Community involvement / partnerships
- Cultural competency
- Green space
- New layout could provide increased space for
  - Health and wellness center
  - Parent space
  - 3 lunch model
- Time and space for collaboration
- Create more workable classroom space
- An opportunity to think outside the box
- Increase the reputation of LHS and LHS students
- Marketing
- How we can better expand opportunities with the city businesses
- Differentiation for all students and learning styles
- Self examination
- Go green
- Increase collaborative student working spaces – peer work/tutoring
- Classroom set up (a shared space) will encourage collaboration
- Communication with students
- Alternate scheduling
- Website can be used to communicate out
- Increase opportunities for student engagement in activities (Pep Rally's events)

Facility Design Visioning Workshop One Notes

Friday, October 14, 2016

SCOG Analysis (continued)

GOALS

- Equity in supporting whole students
- Minimize educational disruptions
- Flexible / adaptable space
- Transformative renovation (capture great existing space)
- Aesthetic belonging / purpose and functional belonging
- Holistic design
- Visible learning (showcase success and hard work of students)
- Supports experiential learning
- Self directed learning
- Student voice and choice
- Partnerships with community
- Diversity in staff
- Technology equity school / home
- Adapting the curriculum
- Community partnerships/ Family Involvement Center
- Cultural competency
- Green space
- Wellness Center
- Collaboration time
- Workable classroom spaces/storage
- Exhibition spaces
- Extended communal spaces / day
- Positive marketing and visibility
- Way-finding system
- Lunch modification
- Expand co-taught classrooms
- "Go Green"
- Relevance
- Student involvement in policy/planning
- Homework and tutoring during class time
- Common space for students
- Use of advisory
- Communication with advisory/students
- More school spirit/ build morale / positive culture

Facility Design Visioning Workshop One Notes

Friday, October 14, 2016

Visions for the Evolution of Lowell High School

Before leaving Workshop One, each Educational Working Group member was asked to describe one way in which they would like to see the LHS educational program evolve as it moves into the future with its new and/or renovated facility. Following are workshop participant's responses.

- I would like to see LHS evolve to be truly student-centered, with teachers differentiating and facilitating learning, and students willingly taking more responsibility for their own learning –in all the ways it can occur (direct instruction and project based activities and outside (real world) collaborations, etc.)
- I would like to see LHS have a more welcoming and "user friendly" student support services office and have it as the "Hub" of the school entrance. It would create a sense of what LHS is all about and what it has to offer.
- I would like LHS to use this new facility to become a model of urban education for the Nation. With our diversity and partnerships, I truly believe this CAN happen!!!
- I would like to see the program evolve to make sure all students -ELL, SPED, Latin Lyceum, High Honors, Honors but especially our college level, all leave LHS with purpose! That we not only teach academic skills but also life skills so that all will be productive members of society.
- I would like to see the HS break the traditional model and move more to a college/campus model. Specifically I would like to see Fine Arts finally have a center.
- I would like to see a university model, where like-minded courses can collaborate and provide integrated opportunities for students.
- Have new construction better relate to the surrounding context in a contemporary but sensitive way (unlike the existing 1981 building).
- One way I would like to see LHS evolve is to see an increase of technology that can be accessible to every single class and every single student in the school.
- I would like the new space to flow in a manner that will help the students learn and the teachers instruct.
- New buildings should be appropriate to the context of the historic district.
- Opportunity for retail and restaurant to face canal and maybe include outdoor dining.
- I would like to see a better environment at LHS. Limited number of classes per day, like instead of 7 we have 4-5 classes, so students can focus better and learn in an effective and deeper way.
- I'd like to see LHS evolve into an inviting and functional space that promotes learning during the school day and after hours. It should be the city's community flagship, where collaborations of all kinds take place.
- I would like to see a building that thinks of educating the WHOLE person… takes into consideration a person's wellbeing –the emotional, physical, and intellectual aspects of learning.
- I would like it to be based around experiential learning across disciplines and holistic design to meet diverse learning needs.
- Developing a building that serves our students for many years to come. Maximizing wants vs. needs. Aligning with the districts 5 pillars.
- I think that LHS should evolve into a fun, joyful place were kids like to go to LHS instead of other schools in the area.

- Quality spaces for great kids and outstanding programs.
- Planning for students to transition into adult life and community. In particular working with 18 – 22 year old students. A facility that provides a separate area (not in a classroom as it is presently organized) for a kitchen, laundry room, mail-room, etc., to be available for all staff to access without interrupting or moving a class. Many students outside of life skills even outside of special education can utilize some services in these facilities. Of course, building to accommodate does not address the issue of personnel.
- Would like to see LHS to evolve into a communication rich, collaborative environment where curriculum adapts as the life outside changes and adapts at a breakneck speed.
- I hope the new LHS will be a welcoming and nurturing facility. It already has a fantastic staff and student body. We need to give them a building that will provide an expanding atmosphere well into the 21st century.
- LHS evolve into a closer collaborative community with space that allows for flexibility in scheduling.
- Create a safe, joyful learning environment with a focus on life skills and community.
- My hope is that a new facility that allows for improved communication, connections with students, security, and space to expand all the great things we already do, will also improve students engagement, curiosity, and opportunities.
- A school that not only welcomes all students, but also provides the choices/supports students need to be successful.
- LHS has many moving pieces. This includes programming classes, cultures, needs, teaching/learning styles, community partnerships, etc. I would really like to see more integration of all of these things as we go forward.
- I would like the school plan to be based on the idea "if we weren't already doing it this way, would this be the way we would do it." Schools are slow to evolve and we need to create spaces that foster learning and togetherness and not just build a better version of what we already have.
- I would like to see more openness to change in curriculum because there are so many studies that we could take ideas from and create a learning environment that works for everyone.
- I would like to see LHS become a more interactive, equal opportunity, collaborative teaching and learning facility. I would like to see it equipped with the proper technology and materials to make this happen.
- I would like to see LHS evolve into a first class education that students and staff can be proud of 21st century technology, support services to meet students' needs and an inclusive environment.
- A campus, community, and refreshing spirit. This is a factor of the appearance, and social behavior.
- I want to see reliable technology incorporated seamlessly throughout the building.
- To be a place of development for students, teachers, staff, etc. So as a total system we are better prepared to meet the challenges of a changing world and contribute positively.
- I would like to see LHS evolve to create more opportunity to build relation ships within community.
- More open space learning and outdoor classes.
- I want to see a welcoming space where students feel free to take risks and are challenged to explore their community and world.

Facility Design Visioning Workshop Two Notes

November 1, 2016

21st Century Learning Goals 2.0

The following set of priority "21st Century Learning Goals 2.0" for Lowell High School students was developed based on feedback from the Educational Working Group (EWG). Seven teams of six participants worked to review and edit the Learning Goals 1.0 document that was created during Workshop One, with the resulting reprioritization and grouping of desired Learning Goals.

- **Empathy, Global Perspective and Civic Engagement**
  - Cultural Awareness
  - Personal, Social and Civic Responsibility
  - Awareness of Community and Global Society
  - Multi-Cultural Literacy
- **Critical and Inventive Thinking**
  - Critical Reasoning and Problem Solving
  - Agility, Adaptability and Risk-Taking
  - Joy, Curiosity and Imagination
  - Motivation and Creativity

- **Communication and Collaboration**
  - Oral and Written Communication
  - Teamwork and Interpersonal Skills
  - Media Literacy and Digital Competence
  - Accuracy of Information
- **Real World Interconnectivity**
  - Executive and Organizational Skills
  - Competency in Core Skills and Content
  - Career Preparation and Life Skills
  - Vocational Opportunities and Certifications
- **Holistic Awareness**
  - Self-Advocacy
  - Wellness
  - The Natural World

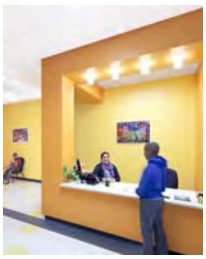
21st Century Design Patterns 1.0

The following set of priority "21st Century Design Patterns" for the design of the new and/or renovated Lowell High School was developed by the Educational Working Group (EWG). Seven teams of six participants each worked to create their own set of priority Design Patterns, after which each team presented to the larger group. Participants were then given the opportunity to prioritize their top Design Patterns. These are listed below in order of the number of votes they received, with each Design Pattern given six points for each time it appeared on one of the original team lists and one additional point for every red dot it received during the subsequent larger group priority voting process.

- **Secure and Welcoming Arrival** (64 votes)
- **Community Access** (58 votes)
- **Distributed Dining** (53 votes)
- **Between Spaces/Commons/Breakout** (46 votes)
- **Civic Presence** (45 votes)
- **Agile and High Performance Classrooms** (43 votes)
- **Display and Exhibition of Student Work (Locker Alternatives)** (38 votes)
- **Flexible Furniture/Flexible Everything** (35 votes)
- **Cyber Dining** (29 votes)



- **Clusters of Learning** (25 votes)
- **Wellness Center** (22 votes)
- **Distributed Resources** (13 votes)
- **Adequate and Flexible Space** (13 votes)
- **Outdoor Space** (11 votes)
- **Teacher Space/Work Stations** (11 votes)
- **Confidential Spaces** (11 votes)
- **Building as Teacher/Sustainability** (11 votes)
- **Enrichment Spaces** (11 votes)
- **Flexible Science Labs/Maker Space** (10 votes)
- **Special Ed Training Facilities** (10 votes)
- **Hallway Trafficking** (10 votes)
- **Teacher Teaming** (9 votes)
- **Breaks of Institutional Norms** (8 votes)
  - Soft Seating, Locker Alternatives, Commons Spaces
- **Flexible Storage** (8 votes)
- **Wayfinding** (8 votes)
- **Heart of School** (6 votes)

DRAFT Guiding Design Principles 1.0

The following set of DRAFT "Guiding Design Principles 1.0" for design of the new and/or renovated Lowell High School was developed by the Educational Working Group (EWG) during the Educational Visioning Workshop that took place on November 1, 2016. Seven teams of six participants worked to create their own listings of Guiding Design Principles, after which each team presented to the larger group. Team lists were then displayed in a gallery format and participants were given the opportunity to vote for their top six priority Guiding Design Principles. These are listed below in order of the number of priority votes they received, with each Guiding Design Principle given six base points for appearing on one of the original team lists, and each subsequent priority vote given one point. Guiding Design Principles offer a framework of educational priorities that prove invaluable in helping stakeholders and design team members to set design goals and focus their work. This first iteration of Guiding Principles may continue to develop as the design process unfolds.

A Program and Place for Every Student
(109 votes)

- Small School Identity, Big School Pride
- Neighborhoods and Personalization
- Belonging, Identity and Ownership
- Ownership and Connection
- Sustainability and Inclusivity
- Centralized Support Services with Personalized House Offices
- Opportunity for ALL Students (Including SPED, ELL)

Community and Civic Connections (104)

- School as Community Resource
- Community and Civic Connections
- LHS as Part of Fabric of Community
- Incubation Spaces for Local Businesses and Partners
- Community Outreach

Adaptability and Evolution (77 votes)

- Teaching and Learning
- Curriculum and Scheduling
- Tradition to 21st Century and Beyond
- Support of High Quality Programming and Innovation

Learning by Thinking and Doing
(76 votes)

- Real Connections to 21st Century Skills
- High Expectations and Personal Responsibility
- Mastery-Based Learning
- Explore, Create, Learn
- Inquiry and Problem-Based
- Real World Connections
- Pathways
- Collaboration

Joy, Curiosity and Imagination (60 votes)

- Joyful Environment
- Visible Learning
- Varied Spaces, Including Reflection Spaces
- Empathic Engagement

Indoor/Outdoor Connections (44 votes)

Building as Teacher (19 votes)

- Clean Energy

Safety (16 votes)

Facility Design Visioning Workshop Three Notes

21st Century Design Patterns 2.0

The following set of priority "21st Century Design Patterns 2.0" for the design of the new and/or renovated Lowell High School has been modified from the original list that was developed by the Educational Working Group in Workshop One, based on participants' comments and suggested changes during Workshop Two.

- **Flexible Everything**
  - **Agile and High Performance Classrooms**
  - **Flexible Furniture**
  - **Flexible Science Labs and Maker Space**
  - **Flexible Multi-Purpose Spaces**
  - **Flexible Performance Spaces**
- **Secure and Welcoming Arrival**
- **Community Access**
- **Distributed Dining**
  - **Explore as a Possibility**
  - **Cyber Dining**
- **Between Spaces/Commons/Breakout**
- **Civic Presence**
- **Display and Exhibition of Student Work (Locker Alternatives)**
- **Clusters of Learning**

- Special Ed Training Facilities
- Athletics
  - Space for Band and Marching Band
  - Space for ROTC
- Distributed Resources
- Adequate and Flexible Space
- Outdoor Space
- Teacher Space/Work Stations
- Confidential Spaces
- Building as Teacher/Sustainability
- Enrichment Spaces
- Hallway Trafficking
- Teacher Teaming
- Breaks of Institutional Norms
  - Soft Seating, Locker Alternatives, Commons Spaces
- Flexible Storage
- Wayfinding
- Heart of School

DRAFT Guiding Design Principles 2.0

The following set of priority "Guiding Design Principles 2.0" for the design of the new and/or renovated Lowell High School has been modified from the original list that was developed by the Educational Working Group in Workshop One, based on participants' comments and suggested changes during Workshop Two.

A School for Everyone

- A Program and Place for Every Student
- Small School Identity, Big School Pride
- Neighborhoods and Personalization
- Belonging, Identity and Ownership
- Safety and Security
- Ownership and Connection
- Sustainability and Inclusivity
- Centralized Support Services with Personalized House Offices
- Opportunity for ALL Students (Including SPED, ELL)

Learning by Thinking and Doing

- Real Connections to 21st Century Skills
- High Expectations and Personal Responsibility
- Mastery-Based Learning
- Explore, Create, Learn
- Inquiry and Problem-Based
- Real World Connections
- Building as Teacher
- Pathways
- Collaboration
- Clean Energy

Adaptability and Evolution

- Teaching and Learning
- Curriculum and Scheduling
- Tradition to 21st Century and Beyond
- Support of High Quality Programming and Innovation

Joy, Curiosity and Imagination

- Joyful Environment
- Visible Learning
- Varied Spaces, Including Reflection Spaces
- Empathic Engagement
- Indoor/Outdoor Connections

Community and Civic Connections

- School as Community Resource
- Community and Civic Connections
- LHS as Part of Fabric of Community
- Incubation Spaces for Local Businesses and Partners
- Community Outreach

Facility Design Visioning Workshop Three Notes

November 17, 2016

Blue Sky Ideas

The following Blue Sky Ideas for the design of the new and/or renovated Lowell High School were brainstormed by the Educational Working Group during Workshop Three.

Science Classroom
- Run on microbial cells that come from the canal

Digital Message Board
- Displays events and announcements outside
- Gives positive messages
- Like the Tsongas Center

Childcare for Students and Faculty

Rooftop Community Garden
- Terrace between buildings with gardens
- Sheltered space for band and ROTC

Giant Fieldhouse
- Indoor track
- Multiple basketball courts
- Movable walls for different activities

Recreation of Scroll of "On the Road"
- On walls

Performance Space
- AV rich
- Indoor/outdoor
- Auditorium, but different
- Flexible seating for small and large performances
- Visible to outside

Incubator/Business Space
- A way to connect students to professional work environments

Dorm Space
- For homeless and transitional students

Integration with Canal
- Take advantage of historic context
- Get students across tracks

Renovated Auditorium
- Center for major events
- Meet current needs
- New seating

Parents Center

Community Art
- Incorporated into design
- Public art and murals
- Reflect city's history

Colorful and Comfortable Furniture

Private Art Gallery
- Exhibitions of local and student artists

Coffee Shop
- Student run
- Like Mill #5
- Open after school

Central Book Storage
- Like college access

Medical Office/Clinic

Beautiful Entry Lobby
- Plant-filled
- Lots of natural light

Soft and non-institutional furniture
- Conference Room
- Welcoming color
- Coffee Shop
- Parent Center
- Water feature – with water filtered from canal

Lowell Archive Museum
- House and curate historical artifacts

Facility Design Visioning Workshop Three Notes

November 17, 2016

Key Spaces and Adjacencies

The following Key Spaces for the new and/or renovated Lowell High School were brainstormed by the Educational Working Group during Workshop Three.

Entry Lobby

- Centrally located, welcoming and inspiring
- Administration, security, seating
- Meeting breakout space, accessibility to public/parents
- Easy access from the street
- Large lobby with check-in in the center with multiple rooms surrounding for the different House's administrators offices… include ALL House Offices lined together, as well as the student support services office and college and career center. Sending visitors all over the school trying to navigate to find an office is both inconvenient and unsafe
- We could add a small security room in the old building to address the security issue with having all houses near the entrance. This is critical
- A plant filled-natural lighting with soft furniture and walls lined with student work and fountain with a security kiosk in the middle and several conference rooms around the periphery
- Entrance could have large displays dedicated to department or pathway work as well as history of Lowell, art in Lowell, etc. There should be a ways that students, parents, and visitors could easily learn more about these

Neighborhoods and Clustered Adjacencies

- Academic pods with 6 classrooms 3/3
- Multi-purpose Commons Space in center with classrooms and administrative spaces surrounding it
- Breakout and quiet spaces
- For Freshman Academy accommodate 3 cluster teams, pods of 8 classroom teachers
- Humanities Pods and STEM Pods
- 2 -3 computer carts per pod
- Art/Dance etc., could have a shared display/performance space and student work area in the center
- Adjacencies between Graphics, TV, Media

Flexible and Agile Classrooms

- Technology on walls
- Flexible furniture
- Tables that can move easily, including height, to change space needs for group collaboration and projects
- Chairs that can move easily or swivel
- Magnetic walls
- Flexible desks/table for varied instruction
- White board paint on (1) wall, soft colors
- Magnetic, cork, etc. to display work/information
- Stability ball chairs/ flexible seating
- Closet space -backpacks, supplies -storage
- Natural light / H2O in room
- Bluetooth speakers, ceiling mounted projector
- Wall comp screen to display lesson of day, do now, important information

Key Spaces and Adjacencies (Continued)

Cafeteria

- Use cafeteria as a HUB that is flexible but actually has all school functions around.
- Dining space becomes large conference space off which other school activities feeds
- Natural light
- Always center of activity -open even after school hours
- Colorful, has a lot of traffic through
- Noisy, lively, fun use for night activities – movies, school productions

Science and Engineering Lab

- Students can perform authentic research but also learn engineering / maintenance skills of equipment
- Incubators, fume and safety hoods, functional equipment, plenty of storage
- Ways to look up info to communicate with mentors, UML/MCC, etc. (computers)

Health Center

- Large space to accommodate Nurse's Office, LCHS Teen Clinic
- Waiting room with soft lighting, comfortable chairs, soft soothing colors, soft music, fish tank
- Work space for each nurse with rooms off main room for confidentiality
- TVs with Health info and education material
- Exam rooms for teen clinic as well as sports physicals
- Lactation room for staff and/or students
- Adjacent to student support services
- Parking spot for parent/ student pickup
- Nurse's office close to this parking spot, near café

Gym

- Athletic training facilities
- Weight room and trainers room to recover
- Locker room
- Playing fields close by
- Multiple basketball courts
- Banked indoor track
- Smaller Wellness Rooms (Yoga, Project Adventure)
- Big field house
- Safe and adequate space for Adapted Classes

Parent Center

- Transition services
- Internet Access
- Welcoming with easy access

Lecture Hall

- For history presentations, choir, science, ELA, clubs, renting, homework hall
- Invites more flexible and creative learning
- Community involvement
- Guest speakers
- Technology
- Note taking/review room
- Hardwood floor (great acoustics)

Library

- Multiple use space
- Room for at least 3 classes
- A combination of collaboration spaces, quiet space, meeting space
- Designated reading space -comfortable chairs, moveable
- Presentation area (screen, computer)
- An upgraded library catalog/database (would incorporate electronic resources)
- Flexible/moveable furniture (bookcases) that would permit combining classes
- Technology (at least 50-60) -laptops (many of our students do not have computers)
- Multi-use meeting rooms
- Upgrade security SYMS
- Very big library with all necessary materials but also quiet

Key Spaces and Adjacencies (Continued)

Special Education

- Kitchen area -both regular and handicap accessible
- Stoves both electric/gas… fully equipped kitchen
- Laundry area - several washers/dryers, folding area, racks for hanging, cabinets for supplies
- Washroom -shower stall(s), sink, toilet area to teach health care, brushing teeth, toilet training, showering, etc.
- Living area - room that allows students to experience realistic cleaning, work, socialize fun skills. A room they would care for as well as enjoying
- Work area -to teach soft skills - voc. skills -to include the schools copy center, mail area, areas to teach skills i.e. filing, computer work, shelf stocking (i.e. food pantry included) etc.
- Bedroom with closet and bureau to teach making beds, putting away materials/clothes, cleaning
- No carpets

Language Labs

- All students -language, ELL and special educations would be able to use this room or these rooms with a real focus on the listening and speaking domains which are often not emphasized in this very 'connected' society
- Room for language labs. Computers but not placed in a way that restricts the amount of interaction between students
- Soft seating bookshelves on wall with language textbooks and dictionaries
- Separate more private spaces where only the target language is spoken
- Space for an independent foreign language study
- Tutoring spaces for students who don't speak English as a first language. Maybe a language exchange between English speaking students and ELL students
- More secluded from the rest of the school but open in itself -people feel self-conscious/uncomfortable speaking a foreign language so have a private oasis feel where everyone in the space has the same goal
- Soft comfortable furniture in spaces for students who want to practice what they've learned
- Bulletin/white board for setting up meetings/language exchanged
- One wall lined with bookshelves - dictionaries/texbooks
- Computer section for students who wish to learn online
- Tables for students doing an independent language study program
- Separation of quiet rooms and conversation rooms

Garden/Green Space

- Used for contemplation, science activities, recreation, writing/drawing, performance
- Setting for meetings (all sorts); parent-teacher, student-student, teacher-student, community-school
- Possible use for vocational prep? (landscaping, arborist, gardening)

Bridges

- One for each floor area
- The “canal” with moving sidewalks that efficiently moves students/staff between buildings

Performance Space

- An auditorium renovation with wider seats, better electrical, sound, WiFi, and lighting services
- Provides the opportunity for the facility to be better used
- A center for the school to present speakers, educational events, music concerts (cultural exposure for students) and music programs
- A well-known place for parents and the public for school related orientations for briefings and special events
- A loading area (lack of which is a big problem) if grand piano is needed
- School parties can happen there, like homecoming, harvest, prom, etc.
- Dance classes can also be included in that
- Music and dance spaces on the 1st floor to have ready access to the stage
- A collapsible wall could be used to section off the balcony from the main theatre/can section off the under balcony space for smaller classrooms

Key Spaces and Adjacencies (Continued)

ROTC

- A space that belongs to ROTC where we can practice or maybe compete
- An award room
- A gym for normal cadets
- Inspection room
- Instructor's office
- A drill pad area (2500 sq feet) / PT area / storage area
- Min 400 sq feet = 4 sq feet/cadet)
- Accommodate 385-420 cadets annually (2500sq feet is built out 100 cadets not 400)
- Classroom teaching -60% of curriculum and 40% is PT/Drill/uniform wear/community service

Facility Design Visioning Workshop One

Friday, October 14, 2016

Agenda

EXPECTED OUTCOMES: By the end of the session we will have begun to…

- Share **Priority Goals** for the design of Lowell High School's new and/or renovated facility
- Discuss 21st century teaching and learning and identify **21st Century Learning Goals** and initiatives for Lowell Area Schools and Lowell High School
- Assess LHS's **Strengths, Challenges, Opportunities, and Goals** with regard to the development of its academic programs and the design of a new and/or renovated facility
- Review LHS's most essential **and innovative initiatives and programs** and discuss the implications they hold for the design of the new and/or renovated facility

Time	Activity	Purpose
7:15 – 7:30	***Coffee and Informal Socializing***	Meet and orient for the day.
7:30 – 8:15	***Workshop Goals and Introductions*** • Workshop overview: Creating a Design Guide • Introductions • Priority Goals for the new facility	Introduce participants, and clarify agenda and desired outcomes for this workshop and subsequent workshops. Share some of our Priority Goals for the new facility.
8:15 – 8:45	***21st Century Schools*** • Presentation: 21st Century Teaching and Learning • Media Saves the Beach Video	Identify and discuss changing paradigms in education, and elements of 21st century teaching and learning as connected the LHS's academic goals and mission.

8:45 – 9:30	***21st Century Learning Goals*** • Small group review of 21st century learning goals and outcomes and creation of priority listings • Large group prioritization	Ground our thinking about design guidelines and desired building features in a discussion and exploration of priority Learning Goals for Lowell High School.
9:30 – 9:45	***BREAK***	
9:45 – 10:30	***Lowell High School:*** ***Present and Future Educational Priorities*** • Mini presentations by departments/programs • Group discussion and recording of essential and innovative educational approaches and initiatives presently in practice or on the horizon at LHS	Identify present and future educational initiatives and programs Lowell High School and discuss their effect on the design of the new and/or renovated facility.
10:30– 11:20	***Lowell High School SCOG Analysis*** • Brainstorm Lowell High School's Strengths, Challenges, Opportunities, and Goals with respect to its academic programming and making the most of the facility design opportunity	Identify what is presently working well within Lowell High School and Lowell Area Schools, what is challenging, and what opportunities exist with regard to the further development of programs and facilities.
11:20 –11:30	***Next Steps and Exit Ticket*** • One way in which you would like to see Lowell High School evolve within its new and/or renovated facility	Review next steps for visioning. Reflect on the ways in which participants would like to see the school develop as it meets the future.

Facility Design Visioning Workshop Two

November 1, 2016

Agenda

EXPECTED OUTCOMES: By the end of the session we will have begun to…

- Review a compilation of notes from Workshop One, including: Lowell High School's **Priority Goals; SCOG Analysis, and 21st Century Learning Goals**
- Explore and prioritize a range of architectural **Design Patterns** that support 21st century teaching and learning
- Brainstorm a list of **Blue Sky Ideas** for the new and/or renovated LHS facility
- Understand the role that **Guiding Principles** play in setting facility design priorities and intent
- Create a set of **Guiding Principles and priorities for design** of Lowell High School's renovated and/or new facility

Time	Activity	Purpose
7:15 – 7:30	***Coffee and Informal Socializing***	Meet and orient for the day.
7:30 – 8:15	***Workshop Goals and WS One Debrief*** • Introduction of new members • Review of: o Design Priorities o SCOG Analysis o Learning Goals • What strikes us? What's missing?	Debrief the October 14th workshop activities and discuss key themes and takeaways.
8:15 – 9:30	***21st Century School Facility Design Patterns*** • Presentation and Q&A • Small group review of assorted facility Design Patterns • Creation of priority listings • Large group prioritization	Ground our thinking about design guidelines and desired building features in a discussion and exploration of priority Design Patterns for the new and/or renovated Lowell High School facility.

9:30 – 9:45	***BREAK***	
9:45– 11:00	***Guiding Principles for Design*** • Presentation and Q&A • Small group review of assorted Guiding Principles and creation of priority listings • Large group sharing and prioritization	Explore the connections between Guiding Principles and school design solutions. Translate our LHS Learning Goals and Design Patterns into a listing of priority Guiding Principles for design of the new building.
11:00 – 11:25	***Blue Sky Ideas*** • What no-holds-barred, over-the-top, idea(s) and/or space(s) would you like to see take shape in the new and/or renovated Lowell High School.	Share creative ideas, the seeds of which may begin to take root in our ideas for the new and/or renovated facility.
11:25 –11:30	***Next Steps and Exit Ticket*** • Exit Ticket: "I used to think_____, and now I think_____"	Review next steps for visioning. Reflect on the ways in which participants would like to see the school develop as it meets the future.

Facility Design Visioning Workshop Three

November 17, 2016

Agenda

EXPECTED OUTCOMES: By the end of the session we will have begun to…

- Review a compilation of notes from Workshop Two, including: Lowell High School's priority **Design Patterns** and **Guiding Principles**
- Generate a listing of **Key Spaces and Adjacencies** for the new facility
- Engage in a **Bubble Diagramming Activity** to identify important spaces and adjacencies within the new school
- Move forward on **Ed Plan framing** and the articulation of program priorities and approaches

Time	Activity	Purpose
7:15 – 7:30	***Coffee and Informal Socializing***	Meet and orient for the day.
7:30 – 8:15	***Workshop Goals and WS Two Debrief*** • Introduction of new members • Review of: o Learning Goals 2.0 o Priority Design Patterns 1.0 o Guiding Principles for Design 1.0 • What strikes us? What's missing?	Debrief the November 1st workshop activities and discuss key themes and takeaways.
8:15 – 9:30	***Key Spaces and Adjacencies*** • Individual reflections • Small group discussion • Large group discussion of key spaces and desired adjacencies	Share practical and creative design ideas that will help us to reach our Learning Goals, implement desired Design Patterns and put our Guiding Principles into practice.
9:30 – 9:45	***BREAK***	

9:45– 11:15	***Bubble Diagramming*** • Individual and small group diagramming of key spaces and desired adjacencies within the new and/or renovated Lowell High School • Large group sharing	Identify important adjacencies and design ideas that can be explored further in the planning and design process.
11:15 –11:30	***Next Steps Overview*** • Exit Ticket: "I used to think_____, and now I think_____"	Review next steps and timeline for design.

STATEMENT ON LIMITATIONS

THE DISTRIBUTION, USE, AND SCOPE OF THE VISITING COMMITTEE REPORT

The Committee on Public Secondary Schools of the New England Association of Schools and Colleges considers this visiting committee report of Lowell High School to be a privileged document submitted by the Committee on Public Secondary Schools of the New England Association of Schools and Colleges to the principal of the school and by the principal to the state department of education. Distribution of the report within the school community is the responsibility of the school principal. The final visiting committee report must be released in its entirety within sixty days (60) of its completion to the superintendent, school board, public library or town office, and the appropriate news media.

The prime concern of the visiting committee has been to assess the quality of the educational program at Lowell High School in terms of the Committee's Standards for Accreditation. Neither the total report nor any of its subsections is to be considered an evaluation of any individual staff member but rather a professional appraisal of the school as it appeared to the visiting committee.

INTRODUCTION

The New England Association of Schools and Colleges (NEASC) is the oldest of the six regional accrediting agencies in the United States. Since its inception in 1885, the Association has awarded membership and accreditation to those educational institutions in the six-state New England region who seek voluntary affiliation.

The governing body of the Association is its Board of Trustees which supervises the work of four Commissions: the Commission on Institutions of Higher Education (CIHE); the Commission on Independent Schools (CIS); the Commission on Public Schools which is comprised of the Committee on Public Secondary Schools (CPSS), the Committee on Technical and Career Institutions (CTCI), and the Committee on Public Elementary and Middle Schools (CPEMS); and the Commission on International Education (CIE).

As the responsible agency for matters of the evaluation and accreditation of public secondary school member institutions, CPSS requires visiting committees to assess the degree to which the evaluated schools meet the qualitative Standards for Accreditation of the Committee. Those Standards are:

Teaching and Learning Standards
- Core Values, Beliefs, and Learning Expectations
- Curriculum
- Instruction
- Assessment of and for Student Learning

Support of Teaching and Learning Standards
- School Culture and Leadership
- School Resources for Learning
- Community Resources for Learning

The accreditation program for public schools involves a threefold process: the self-study conducted by the local professional staff, the on-site evaluation conducted by the Committee's visiting committee, and the follow-up program carried out by the school to implement the findings of its own self-study and the valid recommendations of the visiting committee and those identified by the Committee in the Follow-Up process. Continued accreditation requires that the school be reevaluated at least once every ten years and that it show continued progress addressing identified needs.

Preparation for the Accreditation Visit - The School Self-Study

A steering committee of the professional staff was appointed to supervise the myriad details inherent in the school's self-study. At Lowell High School, a committee of eleven members, including the headmaster, supervised all aspects of the self-study. The steering committee assigned all teachers and administrators in the school to appropriate subcommittees to determine the quality of all programs, activities, and facilities available for young people. The self-study of Lowell High School extended over a period of 13 months from June 2014 to June 2015. The visiting committee was pleased to note that the entire professional staff of over 250 participated in the self-study deliberations.

Public schools evaluated by the Committee on Public Secondary Schools must complete appropriate materials to assess their adherence to the Standards for Accreditation and the quality of their educational offerings in light of the school's mission, learning expectations, and unique student population. In addition to using the Self-Study Guides developed by a representative group of New England educators and approved by the Committee, Lowell High School also used questionnaires developed by The Research Center at Endicott College to reflect the concepts contained in the Standards for Accreditation. These materials provided discussion items for a comprehensive assessment of the school by the professional staff during the self-study.

It is important that the reader understand that every subcommittee appointed by the steering committee was required to present its report to the entire professional staff for approval. No single report developed in the self-study became part of the official self-study documents until it had been approved by the entire professional staff.

The Process Used by the Visiting Committee

A visiting committee of 23 evaluators was assigned by the Committee on Public Secondary Schools to evaluate the Lowell High School. The Committee members spent four days in Lowell, reviewed the self-study documents which had been prepared for their examination, met with administrators, teachers, other school and system personnel, students and parents, shadowed students, visited classes, and interviewed teachers to determine the degree to which the school meets the Committee's Standards for Accreditation. Since the evaluators represented public schools, central office administrators, principals, teachers and guidance and special education personnel diverse points of view were brought to bear on the evaluation of Lowell High School.

The visiting committee built its professional judgment on evidence collected from the following sources:

- review of the school's self-study materials
- sixty-nine hours shadowing twenty-three students for a half day
- a total of 18 hours of classroom observation (in addition to time shadowing students)
- numerous informal observations in and around the school
- tours of the facility
- individual meetings with thirty-one teachers about their work, instructional approaches, and the assessment of student learning
- group meetings with students, parents, school and district administrators, and teachers
- the examination of student work including a selection of work collected by the school

Each conclusion in the report was agreed to by visiting committee consensus. Sources of evidence for each conclusion drawn by the visiting committee appear in parenthesis in the Standards sections of the report. The seven Standards for Accreditation reports include commendations and recommendations that in the visiting committee's judgment will be helpful to the school as it works to improve teaching and learning and to better meet Committee Standards.

The visiting team was pleased with the frankness of the school's self-study documents. The Lowell High School community entered into the self-study with honesty and commitment. The participants were not afraid to judge themselves against the demands of the Standards for Accreditation. They identified and acknowledged areas needing attention and in turn spoke glowingly regarding those areas where the school is more than adequately adhering to the Standards for Accreditation. The self-study displayed a good and growing grasp of the major thrusts and features of the Standards for Accreditation. During the visit Lowell High School personnel were forthright as well in responding to the team members' inquiries during the teacher interviews on Sunday and in the various group meeting during the school day on Monday and Tuesday. Because of the quality of the self-study and the full participation by Lowell High School personnel at the various meetings, the visiting team was able to spend the vast

majority of its time evaluating and discussing the level of the school's adherence to the Standard and its identified strengths and needs and therefore spent a minimum of time chasing data.

Lowell High School is at a critical point in its existence. It has capable leadership at both the school and the district level; it has a dedicated faculty and support staff. It has a student body that displays pride in its community and in the school and in their accomplishments. The following evaluation will detail major accomplishments and will identify existing shortcomings. Those shortcomings are remediable. The community to its credit has embarked upon a plan to address the shortcomings and the impediments that the high school site and plant places in the way of student learning. Those issues are obvious and acknowledged by the school community. The school community does not dispute the identified needs, particularly in terms of the facility's inability to provide resources that fully support 21st century education curriculum and instructional practice. The building has been well cared for and enhanced somewhat with piecemeal but needed renovations undertaken as needs arise and as budgets allow, but so many of the infrastructure issues significantly impede the delivery of services that that fully support 21st century education curriculum and instructional practice. The visiting committee was pleased to have encountered during our visit committed, focused administrators and dedicated educators who do their best to work around these facility and resource shortcomings.

This report of the findings of the visiting committee will be forwarded to the Committee on Public Secondary Schools which will make a decision on the accreditation of Lowell High School.

School and Community Summary

The City of Lowell, Middlesex County, is located 30 miles northwest of Boston in the Merrimack Valley region of Massachusetts. Lowell is the fourth largest city in the Commonwealth of Massachusetts with a population of 108,861 contained in 14.54 square miles, making its population density 7,842 per square mile. The population is very diverse: 59.1% white, 20.1% Asian, 14.2% Hispanic, and 6.6% African American. Twenty five percent of Lowell's population was born in foreign countries, almost twice the state average.

The socioeconomic profile of the city is as diverse as its population. The per capita income is $22,278. The city's median household income is $45,271 compared to the $65,339 state average. The percentage of families living below poverty level is 19.1%. The number of residents employed is 57,976; the unemployment rate in Lowell is 7.6%. The total employed in Lowell breaks down as: educational services and healthcare 12,964; services 11,730; manufacturing 8,562; trade 6,842; government 6,552; construction 2,698; transportation, communication, and public utilities 2,406; all others 6,222. (US Census Bureau – http://factfinder2.census.gov).

The Commonwealth of Massachusetts's average expenditure per pupil is $14,021. The city of Lowell's per pupil expenditure is $13,167. Educational funding is obtained through the following sources: state 78.62%, federal 9.47%, and 8.35% local. The allocation of local property tax to the public schools is 48.05%.

The total number of students in the Lowell Public School District is 14,075 for the 2014-15 school year in 13 elementary schools, 7 middle schools, 1 comprehensive K-8 school, 4 alternative schools, and one high school.

The ethnic/racial/cultural composition of the student body in the Lowell Public Schools makes it one of the most diverse districts in the Commonwealth: African American students 7.1%, Asian students 29.4%, Hispanic students 30.1%, white students 30.1%, and all other students 3.2%. In the district, 75.1% of the student body qualifies as low-income, 15.1% are classified as Special Education (SPED), and the English language learner (ELL) population is 26.6%.

Enrollment at Lowell High School, which includes grades 9 through 12, is 3,034 students for the 2014-15 school year, comprised 1530 males and 1504 females: 889 9th graders, 792 10th graders, 687 11th graders and 645 12th graders, and 21 SPED students beyond grade 12. The two-year average dropout rate at LHS is 3.25%. The two-year average graduation rate is 74.9%.

Teachers number 215 at Lowell High School, creating a student/teacher ratio of 14.2:1. The two-year average staff attendance rate is 94.26%. Individual teachers teach 5 classes a day, facilitate an Advisory for 20 minutes a day, and have one duty and one prep period each day. They carry an average load of 140 students, as the school strives to create class sizes the fall between 26-28 students. Class sizes, however, fluctuate greatly due to the school's substantially separate programs and the range of

specialized courses throughout the building. Students at Lowell High School attend school for 180 days and for a minimum of 975 hours. There are five different levels of courses at Lowell High School: Advanced Placement (AP)/Dual Enrollment (DE), High Honors (HH), Honors (H), College (C), and non-weighted.

Incoming freshmen students are predominantly housed in one building of the high school that serves as the Freshman Academy, which has its own Director. Freshman Academy students are taught by a team of teachers in a cluster of four courses: English, social studies, math, and science. The interdisciplinary teams meet weekly to determine strategies for maximizing potential of the students in their cluster. This cluster environment is most responsive to the emerging needs and talents of students who are making the transition to a high school setting. Freshman Academy students also take a non-weighted Seminar course which focuses on a range of topics throughout the year, including establishing goals, learning solid study habits, exploring career interests and pathways, and being exposed to financial literacy. The challenges students meet and the experiences they gain in the Freshmen Academy will help ensure their continued success at Lowell High School.

Lowell also has a number of Pathway Programs directly connected to the skills and knowledge that students need for post-secondary education and careers. The Pathway Programs use an applied hands-on/minds-on approach that is connected to real-world work experiences and provide opportunities for all students and their different abilities, interests, and talents. The Pathway Programs include: Air Force Junior ROTC, Business Marketing and Finance, Communications, Culinary Arts, Engineering, Fine Arts, Health and Bioscience, and Public Service and Civic Engagement. Students in these programs also have access to some unique facilities including: a newly renovated restaurant, the Jeanne D'Arc Credit Union, the 1826 School Store, an in-house television/media center, and state-of-the-art robotics equipment.

Another significant program within the high school is the Latin Lyceum, an academically rigorous exam program that challenges students to an intellectually stimulating environment. Latin Lyceum students participate in an intensive program aimed at rigorous and integrated academic preparation in a classical education model.

Lowell High School has established effective partnerships with two of the local institutions of higher education. Juniors and seniors may enroll in Dual Enrollment courses, taught on the Lowell High campus, from Middlesex Community College and the University of Massachusetts Lowell at no cost. For the 2014-2015 school year, 156 students took a total of 401 Dual Enrollment courses, earning a total of 1237 college credits translating into savings of $217,712.

Lowell High has established strong partnerships with several community organizations. The Career Center of Lowell visits Lowell High every Wednesday in the Lowell High College and Career Center to link students to part-time job opportunities. The Career center also conducts an annual job fair in the Lowell High cafe during the spring for students interested in summer opportunities. Community Team

Work plays an important role in many of our students in greatest need by providing assistance to students and families with housing, food, and home fuel needs.

The academic awards at Lowell High School are numerous and varied. The most traditional awards are the Carney medals, first awarded in 1859 and named in honor of James C. Carney of the Lowell Institution for Savings. Carney Medals are awarded to the top three male and female graduating students for excellence in character, scholarship, and attendance. The Senator Paul E. Tsongas (LHS Class of '58) Award provides 2 full scholarships to University of Massachusetts Lowell for both undergraduate and graduate study. In addition, Lowell High School annually awards over $400,000 of in-house scholarships to graduating seniors.

Lowell High students are committed, life-long learners as demonstrated by their post-secondary educational choices: 85% attend college; 47% attend 4-year colleges; 38% attend 2-year colleges; and 12% enter directly to the workforce.

LOWELL HIGH SCHOOL MISSION STATEMENT

Commitment to excellence in <u>everything</u> we do: academics, activities and citizenship.

Lowell High School provides a secure and cooperative environment where the emphasis is on mutual respect, curiosity, the free exchange of ideas, and the appreciation of education both as a process and a means to betterment.

We are a community

- That values a curriculum incorporating the best practices of both traditional and contemporary instruction.
- That creates and supports an atmosphere promoting high expectations for student achievement.
- That believes student accomplishment is a shared responsibility of students, parents, staff, administration, school committee, and community.
- That provides all students the curriculum to meet school and state graduation requirements, and assesses learning continuously in a variety of ways including mandatory state testing.

LHS EXPECTATIONS FOR STUDENT LEARNING

Lowell High School expects all students

- To attain an understanding of the educational standards, core knowledge, skills, and concepts defined by the Massachusetts Curriculum Frameworks.
- To take increasing responsibility for educational decisions on a daily and long-term basis.
- To complete academic work both independently and cooperatively in a productive manner.
- To think critically and solve problems using inductive and deductive reasoning.
- To read effectively and communicate ideas and information using a variety of formats.
- To develop an ability to use a variety of mediums—including the creative and the technological—in the process of learning, and demonstrate their acquired learning through use of those mediums.
- To demonstrate respect for individual differences and appreciation for the diversity of a multicultural world.
- To understand and demonstrate a sense of community.

Core Values

- Responsibility
- Integrity
- Determination
- Engagement
- Respect

COMMITTEE ON PUBLIC SECONDARY SCHOOLS

TEACHING AND LEARNING STANDARDS

CORE VALUES, BELIEFS, AND LEARNING EXPECTATIONS

CURRICULUM

INSTRUCTION

ASSESSMENT OF AND FOR STUDENT LEARNING

1 Core Values, Beliefs, and Learning Expectations

Effective schools identify core values and beliefs about learning that function as explicit foundational commitments to students and the community. Decision-making remains focused on and aligned with these critical commitments. Core values and beliefs manifest themselves in research-based, school-wide 21st century learning expectations. Every component of the school is driven by the core values and beliefs and supports all students' achievement of the school's learning expectations.

1. The school community engages in a dynamic, collaborative, and inclusive process informed by current research-based best practices to identify and commit to its core values and beliefs about learning.

2. The school has challenging and measurable 21st century learning expectations for all students which address academic, social, and civic competencies, and are defined by school-wide analytic rubrics that identify targeted high levels of achievement.

3. The school's core values, beliefs, and 21st century learning expectations are actively reflected in the culture of the school, drive curriculum, instruction, and assessment in every classroom, and guide the school's policies, procedures, decisions, and resource allocations.

4. The school regularly reviews and revises its core values, beliefs, and 21st century learning expectations based on research, multiple data sources, as well as district and school community priorities.

Conclusions

The school community engaged in a dynamic, collaborative, and a partially inclusive process informed by current research-based best practices to identify and commit to its core values and beliefs about learning. While Lowell High School engaged in a collaborative process, informed by current research-based best practices to identify and commit to its core values in the Freshman Academy, the entire school community did not engage in a dynamic and inclusive process to identify and commit to their beliefs about learning. Two consultant programs, Positive Behavior Intervention & Support (PBIS) and the University of Connecticut's Center for Behavioral Education and Research, supported the Freshman Academy in its implementation of the pilot program. The participants involved in this process documented the 20+ meetings of the PBIS committee and developed the PBIS manual which was the end product of this work. In November 2012, 80 percent of the Freshman Academy faculty voted to accept the core values developed in the process. In June 2015, over 80 percent of the entire school's staff voted favorably to accept the core values that were originally accepted by the Freshman Academy. When members of the school community are asked about core values, many referenced the acronym "RIDER" (responsibility, integrity, determination, engagement, and respect) and then referenced their ID badges which display Lowell High School's core values. While there is ample evidence that core values were identified and adopted within the Freshman Academy, any momentum driven by them to align core values and beliefs within the entire school community is not so clearly evident. The faculty discussed the core values in a May 2015 assembly and then voted on and accepted them in June of 2015. The work to integrate the core values across the entire school community has been happening this current year. The school established committee a and it has spent time during early release days looking at the PBIS work in the FA and making a plan to share out with the entire faculty later this year. The greater the level of involvement in the identification of a school's core values, the greater the level of commitment will be as the potential driving force in all school endeavors. (self-study, panel presentation, Endicott survey, teacher interviews, students, parents, school leadership, teachers)

The school has some challenging and measurable 21st century learning expectations for all students which address academic, social, and civic competencies, but are not yet defined by school-wide analytic rubrics that identify targeted high levels of achievement. Lowell's levels of achievement of the school's eight 21st century learning expectations are currently not all measurable nor are they defined by school-wide analytic rubrics that identify targeted high levels of achievement. Lowell High School has identified eight challenging learning expectations for every student and some are not measurable. For example, "to attain an understanding of the educational standards" and "to read effectively" are not specific and measureable. Furthermore, common analytic rubrics that can be used on a school-wide basis and that identify high levels of achievement are necessary to measure the 21st century learning expectations; such rubrics and their use were not in evidence in classrooms. Instead, the school uses a range of rubrics within departments, for example, a history research paper rubric and World-Class Instructional Design (WiDA) rubrics, that are disparate in style and format and contain no common language with other rubrics. As the Endicott survey indicates, only 33.5 percent of teachers is in

agreement with the statement, "The school has adopted school-wide analytic rubrics that define all the 21st century learning expectations." Teachers and administrators agree that the school's 21st century learning expectations and corresponding rubrics require additional development time in order for the school to create and implement them effectively in all grade levels. Social and civic competencies are identified and located in murals, banners, and signs in high traffic areas of the school through the RIDER acronym. During the examination of student work, any reference to 21st century learning expectations was rare. When 21st century learning expectations are not assessed through analytic rubrics, students are not provided concrete and consistent feedback as to how to improve their essential skills to be successful in the 21st century. (self-study, student shadowing, panel presentation, facility tour, student work, teacher interviews, students, Endicott survey, school leadership)

The school's core values and beliefs, as summarized in the RIDER acronym, are actively reflective of the culture of the school, its curriculum, its instruction, and its assessment in every classroom, and guide the school's policies, procedures, decisions, and resource allocations, but that is much less the case for the school's 21st century learning expectations. The work done to identify the RIDER acronym clearly reflects the beliefs prevalent in the Lowell High School community at large. While the school's recently developed core values are actively reflected in the culture of the Freshman Academy and to a growing extent in the school's upper grades, the school's 21st century learning expectations are not actively reflected in the culture of the school and do not sufficiently drive curriculum, instruction, assessment, the school's policies, procedures, decisions, and resource allocations. The RIDER values are beginning to be embraced by the school at-large. Some of the expectations for student learning appear in curriculum maps; however, the school has not established who/which department is responsible for teaching each of the expectations for student learning, nor are the expectations explicitly defined in curriculum, instruction, and assessments. For example, the 21st century expectation "to read effectively and communicate ideas and information using a variety of formats" can be aligned to "active, close reading of literature" which can be found in Unit 2 of the English II college curriculum. This is also an example of the lack of common language in defining the meanings of the school's expectations. Also, virtually all of the expectations for student learning are not embedded into all of the curriculum maps. Teachers generally do not acknowledge individual responsibility of identifying the 21st century skills for which they are responsible. Of the teachers formally interviewed by the visiting committee, only about one quarter identified the expectation(s) for which they feel a responsibility. Most were not able to explain how their sample lesson outline they presented was related to any of the school's 21st century learning expectations. While teachers in the Freshman Academy teach the core values in the Seminar class (a support class to help students acclimate to the academic expectations of high school) in the 9th grade, most members of the upper grade levels do not reference the core values, beliefs, and 21st century learning expectations in their classrooms or advisories. Currently, a school-wide grading policy committee has been established and has met with the goal of having a working policy in place to present to the school by the end of the year and to be finalized for implementation for the 2016-2017 school year. Administrators have stated that their expectation is that analytic rubrics will be discussed in this committee as well. According to meeting notes from June 2014, the expectation was to allow the accreditation process to take place and then revisit core values and beliefs after recommendations from the committee. Only when comprehensive core values, beliefs, and the 21st century learning expectations

are actively reflected in the culture of the school and when they drive curriculum, instruction, and assessment in every classroom, will policies, procedures, decisions, and resource allocations be more likely to improve mastery of the school's academic expectations. (self-study, student work, teacher interviews, student shadowing, school leadership, teachers)

Although the school has a number of targets for analyzing data and reviewing programs in the Two- and Five-Year Follow-Up Plans, the school does not have a codified plan for the regular review and revision as may be necessary of its core values, beliefs, and 21st century learning expectations based on research, multiple data sources, as well as on district and school community priorities. Understandably, given the very recent adoption, the school has not conducted any review and/or revision of its core values, beliefs, and 21st century learning expectations based on research, multiple data sources, as well as on district and school community priorities. Additionally, the school has yet to develop a framework and a formal systematic review of the core values, beliefs, and 21st century learning expectations. Without a process for review based on input from all stakeholders and research and multiple data sources, the school has no way of assessing the validity and soundness of its core values, beliefs, and expectations. (self-study, teacher interviews, community members, panel presentation, central office personnel, school leadership)

Commendations:

1. The orderly, comprehensive process of adopting the PBIS model in the Freshman Academy
2. The identification of and the growth of the use of the RIDER acronym for succinctly encompassing major features of the Lowell High School Core Values, Beliefs, and Learning Expectations
3. The commitment to the school's social and civic competencies as demonstrated by being highlighted and in murals, banners, and signs in high traffic areas of the school

Recommendations:

1. Ensure that a sufficiently wide range of stakeholders are involved throughout any processes for the development and future review of the school's core values, beliefs, and learning expectations
2. Ensure that the Lowell High School 21st century academic, civic, and social learning expectations for student learning are stated in measurable terms
3. Create school-wide analytic rubrics for each of the LHS student expectations that identify targeted high levels of achievements
4. Develop a procedure to ensure that the LHS core values, beliefs, and student expectations are actively reflected in the culture of the school, drive curriculum, instruction, assessment in every classroom, and guide the school's policies, procedures, decisions, and resource allocations
5. Develop a dynamic, collaborative, and inclusive process for regular review and revision, as needed, of the LHS expectations for student learning, based on research, multiple data sources, as well as on district and school community priorities

2 Curriculum

The written and taught curriculum is designed to result in all students achieving the school's 21st century expectations for student learning. The written curriculum is the framework within which a school aligns and personalizes the school's 21st century learning expectations. The curriculum includes a purposefully designed set of course offerings, co-curricular programs, and other learning opportunities. The curriculum reflects the school's core values, beliefs, and learning expectations. The curriculum is collaboratively developed, implemented, reviewed, and revised based on analysis of student performance and current research.

1. The curriculum is purposefully designed to ensure that all students practice and achieve each of the school's 21st century learning expectations.

2. The curriculum is written in a common format that includes:
   - units of study with essential questions, concepts, content, and skills
   - the school's 21st century learning expectations
   - instructional strategies
   - assessment practices that include the use of school-wide analytic and course-specific rubrics.

3. The curriculum emphasizes depth of understanding and application of knowledge through:
   - inquiry and problem-solving
   - higher order thinking
   - cross-disciplinary learning
   - authentic learning opportunities both in and out of school
   - informed and ethical use of technology.

4. There is clear alignment between the written and taught curriculum.

5. Effective curricular coordination and vertical articulation exist between and among all academic areas within the school as well as with sending schools in the district.

6. Staffing levels, instructional materials, technology, equipment, supplies, facilities, and the resources of the library/media center are sufficient to fully implement the curriculum, including the co-curricular programs and other learning opportunities.

7. The district provides the school's professional staff with sufficient personnel, time, and financial resources for ongoing and collaborative development, evaluation, and revision of the curriculum using assessment results and current research.

Conclusions

The curriculum at Lowell High School is currently not designed to ensure that all students practice and achieve 21st century learning expectations. The core curriculum for all students is not explicitly aligned with the Lowell High School expectations for student learning. Most of the current curriculum maps are not designed to ensure each student has multiple learning experiences that will by design address each of those learning expectations. They also contain no other appropriate, alternative paths, programs, and time options for additional student support. The school has types of tiered interventions that address instructional practices but they are not built directly into curriculum maps. Lowell High School has identified specific student learning expectations that reflect 21st century skills as noted in the Lowell High School Core Values, Beliefs, and Learning Expectations. The learning expectations are embedded, yet not necessarily delineated, in some curriculum documents. The curriculum maps and syllabi are completely in alignment with Common Core State Standards (CCSS), the newly updated Next Generation Science Standards, the WIDA standards, the CVTE standards, and the Massachusetts frameworks, yet not all are consistent in referencing the school's or any other version of 21st century learning expectations. The subject areas which use CCSS as the touchstone for curriculum development do include a version of 21st century learning expectations in their curriculum maps.

In order to graduate, LHS students must complete 90 credits, 50 of which are in core curriculum subject areas. Core subject areas, such as English, science, social studies, and math routinely provide students with opportunities to practice spoken and written communication, creative and critical thinking, collaboration, and responsible use of technology. Additionally, all incoming freshmen are required to take a freshman seminar course that reinforces these skills and emphasizes citizenship, general high school coping strategies, study skills, and responsible academic behavior. So, much of what drives the NEASC Curriculum Standard is present, but not necessarily by comprehensive design, but the teachers do it, as good teachers intuitively know what should be done. Lowell High School's wide range of academic programming is designed to serve all students, including special education and ELL populations. Elective courses ensure students have multiple opportunities for diverse learning experiences, but they are not always tied to a diversity of 21st century learning skills. Elective courses include the fine arts, business, culinary arts, social sciences, world languages, technology, and U.S. Air Force Junior ROTC Aerospace Science. The school has also established strong working relationships with Middlesex Community College and UMASS Lowell which serve to expand the available curriculum well beyond the school campus. There are strong examples present of courses that most clearly are responsive to and driven by the school's expectations for student learning. For instance, Advanced Quantitative Reasoning, a course specifically focused on problem solving, collaboration, and presentation skills, is based on the theory of discovery learning, an example of one of the few courses specifically focusing on 21st century learning skills. Another course, Engineering the Future, targets real-life application of critical and creative thinking. The school is rejuvenating its Pathways program which is designed to provide hands-on experiences that connect high school work to the skills and knowledge students need to be successful in post-secondary education and in their careers. LHS also

developed programs like the Latin Lyceum and offers a range of Advanced Placement and dual enrollment courses designed to mirror college level experiences. In addition to courses in the school's course catalog, Lowell High School provides students an eclectic mix of opportunities to expand their high school experience beyond the school campus and the confines of the classroom. In addition to the school's standard academic and sports offerings, teachers and staff advisors support approximately 32 diverse activities and clubs. Most, but not all, courses show evidence that each curriculum area assumes some responsibility for teaching at least one or more of the 21st century learning expectations, but most courses appear to address only one of the 21st century learning expectations as defined by Lowell High School which calls into question if every student is being exposed and assessed frequently enough regarding that expectation to ensure that the students have sufficient opportunity to practice and achieve it. When the curriculum manages to provide to each student numerous and broad experiences focused on each of the school's expectations, students will have a higher likelihood of achieving all of the school's expectations. (self-study, curriculum maps, syllabi freshman seminar course, pathways program, culinary arts lesson plan, teacher interviews)

Most curriculum documents are written in a format that includes units of study with essential questions, concepts, content and resources; only some curriculum documents also include instructional strategies and assessment practices including the use of school-wide analytic and course-specific rubrics. The school used Race to the Top funds, which allowed teachers to be compensated for developing the curriculum maps during after-school hours. After the completion of this initiative, the school has made little additional progress toward the goal of writing the curriculum maps in a common format. The school's 21st century learning expectations and instructional strategies are identified in some curriculum documents. Some teachers have incorporated instructional strategies and activities into their own curricula/syllabi, although there is no formal place on the common template for entering this information. A limited number of curriculum maps also include some course-specific rubrics and/or 21st century learning expectations. Since the College Board, CVTE, and the Perkins-funded elective Pathways prescribe stringent syllabus requirements, AP and dual enrollment courses are understandably excluded from the school's efforts to develop a common curriculum map.

Mention of assessment practices that include the use of school-wide analytic and course-specific rubrics is also not consistent. Curriculum maps are arranged by units of study with identification of essential questions, concepts, content, resources, and skills. Some of curriculum maps also include course-specific common assessment practices. For example, curriculum documents for English II, Advanced ESL, Google this, and Physical Education 1 and 2 are all organized similarly to include standards, essential skills/concepts to be targeted, and assessment evidence. Developing and using curriculum documents that comprise units of study including essential questions, content, and skills; the school's learning expectations; instructional strategies; and assessment practices that include the use of school-wide analytic and course-specific rubrics sufficiently exposes all students to a range of experiences which provides them numerous opportunities to practice and achieve the school's learning expectations. **(**self-study, Endicott survey, student work, teacher interviews, curriculum documents, teachers)

The Lowell High School curriculum emphasizes depth of understanding and to a lesser degree the application of learning. In that curriculum documents do include essential questions, they do provide for inquiry, problem solving, and higher order thinking. According to the Endicott survey, 75 percent of students agrees that the courses they take challenge them to think critically and to solve problems. Roughly 72 percent of parents agrees that the Lowell High School curriculum encourages their children to question things that they are curious about, and roughly 80 percent feels that the existing curriculum supports the development of higher order thinking and problem-solving skills. This is echoed by 72 percent of staff members agreeing that, "the curriculum in [their] department/content area emphasizes depth of understanding and application of knowledge." Academic departments at LHS have worked to emphasize these skills during recent curriculum refinement and alignment efforts. The Lowell High School Pathways program is an example of an approach that provides hands-on experiences connecting high school course work to the skills students need for post-secondary education and careers.

The LHS curriculum does not currently emphasize cross-disciplinary learning, although classroom observations did provide evidence that teachers do, on their own, make cross-disciplinary connections. Bearing this out, according to the Endicott survey, 62.3 percent of students agrees that "[their] teachers include topics from other subject areas in [their] classes," and 72.9 percent agrees that, "information [they] learn in one class can be used in other classes." Despite this high rating by students, only 36.2 percent of staff agrees. Cross-disciplinary learning does not occur and is not evident in any curriculum documents. The school is lacking sufficient formal curriculum documents that are jointly developed and supported by more than one department. Curriculum documents also lack consistent inclusion of connections or enhancements that encourage or formally guide teachers and students to stretch their learning acquisition across departmental boundaries.

Despite the presence of examples such as culinary arts, fine and performing arts, and business, across the entire span of the curriculum authentic learning opportunities both in and out of school could be more prevalent. On the positive side, in the last school year (2014-15), excluding the 30 days of testing when field trips not allowed, the school approved 134 field trips which means that the school on average had field trips go out on 90% of the eligible days last year. Additionally, including the students who are interning in the school restaurant, the school store (at in-school and downtown sites), and the bank located within LHS, the school had just over 200 students out on internships this year.

The school has developed a policy for the in and out of school informed and ethical use of technology as well as an online acceptable use policy for students. While students and parents believe the ethical use of technology is emphasized in the LHS curriculum (79.1 percent and 63.4 percent, respectively), a smaller number of teachers agrees (56.9 percent). The freshman seminar curriculum, which was recently rewritten, includes lessons on technology resources available to students, and refers to the core values (responsibility, integrity, determination, engagement, and respect) and in doing so, is a good example of using core values to drive school policies and programs. The ethical use of technology is also emphasized in some of the taught English curricula, although it is not included in the curriculum documents. For example, the English I curriculum includes a lesson on "Digital Citizenship and Acceptable Use Policies," and a quarterly assessment in English II clearly establishes the requirements

for citing sources, the methods for doing so, and the consequences for plagiarism on a research paper. Lab science teachers provide similar directions on lab report assignments. Technology skills and informed use are also a consideration. The *Pride and Prejudice* project requires the use of iMovie, which is one example of a 21st century technology skill. While the ethical and regular use of technology is present, the curriculum does not consistently reference the understanding of that concept as a goal. A truly comprehensive curriculum will include a consistent focus on depth of understanding, inquiry and problem solving, higher order thinking, opportunities for cross-disciplinary learning, authentic learning, and the integration of technology as a tool for learning and teaching thereby allowing students "to complete academic work both independently and cooperatively in a productive manner." (self-study, Endicott survey, curriculum documents, student work, shadowing students, teachers, freshman seminar curriculum)

There is clear alignment between the written and taught curriculum at LHS. Common assessments, common writing prompts, emphasis on instructional pacing, and common questions on midterms and finals help to maintain that alignment. Common assessments seem to be the most prevalent and effective tool to regulate the teaching of the written curriculum. The common assessments also serve as a source of data to inform and modify future instruction not just for a teacher but for the department. In support of the achievement of this goal, staff members meet to create the common assessments, and then are responsible for delivering curriculum content, the mastery of which will then be assessed. Also, Lowell High School is in the process of clearly strengthening the alignment of the written and taught curricula by incrementally increasing common planning time among staff members. Currently, not all staff members have common planning time, with some staff sacrificing prep periods or before or after school time to collaborate. As a partial remedy to this, the school embeds opportunities for collaboration are in the monthly professional development/early release time, which is devoted to departmental work around curriculum, instruction, and assessment and to teacher-led workshops focused on sharing and collaborating around best practices. Additionally, the math department's recent institution of a highly collaborative professional learning network (PLN) for groups of geometry, algebra, and pre-calculus teachers can serve to advance the goal of alignment between the written and the taught curriculum. According to the Endicott survey, 64.9 percent of the staff believes the written and taught curricula are aligned. Also, administrators and department heads conduct frequent, informal walk-through observations one of the goals of which is to assess whether the written curriculum is being delivered. Continued attention to ensuring the clear alignment between the written and the taught curriculum ensures equity of opportunity for all students to achieve the school's academic expectations. (self-study, Endicott survey, classroom observations, curriculum documents, student work, student shadowing, teachers)

Vertical curricular coordination and articulation does not effectively exist with sending schools in the district with there being no coordination among departments or between sending schools. No formal opportunities exist, however, that allow departments to collaborate formally with the teachers in the sending schools. The school/district lack(s) a formal, codified process for curriculum collaboration and information sharing between sending schools and LHS, potentially impeding student academic success when transitioning to the high school by duplicating taught curriculum and/or not recognizing gaps in

curriculum coverage. Similarly, the curriculum is not aligned across disciplines which would provide opportunities for developing cross-disciplinary curricula. Teachers voice suggestions and concerns to the department head, who in turn shares the suggestions and concerns with the curriculum coordinator. The curriculum coordinator then shares the information with sending schools. Increased communication and collaboration between among sending schools and the high school will increase student academic support and provide additional data to track progress or challenges. The process of providing direct and timely feedback related to curriculum alignment should be more direct. The weakness is between the sending schools and the high school, not from 9-12. At LHS the department structure, with a lead teacher and a department head overseeing curriculum, ensures that there is clear articulation between grades 9-12 in every department. The school/district, however, does not have an established curriculum review cycle which would by its very nature provide formal opportunity for teachers to collaborate along both vertical and horizontal lines within departments as part of the process for the development, review, and evaluation of the curriculum.

Although some teachers claim that the curriculum maps have not been updated since 2012, central administration, department chairs, and the curriculum coordinators report the maps as being living documents and under constant review and revision. The current curriculum maps were created in 2012 through the use of the Race to the Top grant funds with a particular focus on aligning them with the Common Core and with a substantial amount of work being completed through departmental initiatives and compensated professional development. The current maps, updated on a continuing basis as they are revised, are easily accessible on each department's shared Google drive in an electronic format.

Department heads hold regular meetings with teachers to address instruction and curriculum to the degree that time allows. On occasion (e.g., discussion about safety issues), some of the meeting time is set aside for district priorities. During the past two-years, as is typically the case for schools planning an accreditation visit, significant meeting time, the early release time, normally devoted to that activity has been devoted to the preparations for the NEASC visit. Under the normal format, i.e., in years not involving significant allocations of time to accreditation, two hours out of the three-hour time block is spent with the departments focusing on curriculum, instruction, and assessment. Also, every year core departments receive PD hours allowing teachers to revisit curriculum maps in the courses that need updating. This represents an annual expenditure of approximately $10,000 of local funding.

The cluster system implemented in the Freshman Academy fosters communication across the academic areas at that level providing frequent opportunities for consultation between the core area teachers. A fully integrated curriculum covering the years leading up to the high school and the high school years ensures smooth learning transitions and a full opportunity for all students to succeed. (self-study, Endicott survey, curriculum documents, student work, student shadowing, teacher interviews, department heads, teachers, central office personnel, students, curriculum coordinator)

Staffing levels, instructional materials, technology, equipment, supplies, facilities, and the resources of the library/media center are not consistently sufficient to fully implement the curriculum including the co-curricular programs and other learning opportunities. School expenditures for instructional materials,

supplies and technology to properly implement the curriculum have varied over recent years. Staff members do not all have equitable and dependable access to technology and materials for curriculum instruction, including limited access to updated textbooks, access to computers, and access to technology within the classroom. Put more broadly, not all areas of the curriculum are fully supported to implement the actual delivery of the school's curriculum. At LHS, class sizes vary widely among departments, course sections, and classes. Decisions about class size reflect an effort to balance the needs of students with available resources. Classes that serve challenging, high-risk populations are intentionally kept under 23 whenever possible. A number of noteworthy trends are evident. For instance, the enrollment demand in world languages and the desire to maintain a rich catalog appear to be factors in course size discrepancies. Honors Latin 3 and 4 have average class sizes of 33 students, while there are only five students enrolled in AP Latin 4. Spanish classes at honors level I and II exceed 30 students, while there are 20-25 at the college level; French classes at beginning levels have average enrollments of 25-30 students; Khmer courses average in the high 20s (26-29). The school clearly is making decisions on faculty allocations to best meet needs but with limited resources. In the science department, similar enrollment discrepancies exist. For example, there are currently 11 students enrolled in the off-site University of Massachusetts Lowell (UML) M2D2 course, while AP, Honors, Lyceum, and other UML partner courses have average class sizes in the low to mid-20s. High demand and specialization are reasons for large class sizes in business courses. More than half the classes in the business department have 25-30 students. In general, social studies, English, and math appear to have the most even distribution of larger class sizes among required courses at all levels. In social studies, 11 of 26 total courses have average student enrollments of 25 or greater, with the highest being 30. Eight of the total classes offered have average enrollments of 20 to 24 students. Similarly, 20 of 24 total English courses have average class enrollments of 20 students or greater, with 7 having average class sizes between 25 and 28 students. Math, which offers 30 different courses, has 19 courses with average class sizes of 20 students or greater, with most (12) falling in the 25 to 29 average class size range.

Overall funding has been fairly consistent with some variance year due to enrolment variations and the identification of student needs, e.g., increases/decreases in the ELL population. Over the past three years, the budget has provided about $330,000 in categories such as technology, textbooks, instructional supplies, and library/media. Currently, 10 computers labs are shared by over 200 staff members and over 3,000 students. Most computer labs have at least 30 computers. While the current facility includes 33 classrooms equipped with Apple TVs and mobile iPad carts, and ten classrooms recently outfitted with SMARTBoards, the use of such technology is generally limited to those classrooms and the trained teachers using them. While the current budget does not contain specific earmarks for the expansion of new technology to other classrooms, the library media center, or to the computer labs, the school does purchase document cameras and projectors when the budget allows. Twenty of these were added to classrooms across all academic departments in 2014-2015. A few classrooms have older model PCs dedicated to student use, but LHS does not provide classroom sets of mobile laptop computers or other digital devices for general use by teachers or students except in the Apple TV/iPad equipped rooms. The school is making headway to the extent that the budget currently allows. One recent technological improvement this past summer was the installation of Wi-Fi hotspots in most classrooms, which has improved connection to the Internet throughout the school via personal mobile devices. Technology

access is not equitable among all staff. Most staff members have at least a document projector; a few teachers have access to an interactive white board, while others in the EdGE classes have three Apple monitors in their classrooms. Some teachers have to share a document projector. Other teachers have iPad carts, but the electronic devices are designated for that teacher's classroom use alone. The school has 5 iPad carts with one tied specifically to one classroom and 3 Macbook Pro carts for teachers to share.

Library facility and resources are critically lacking. The LHS Comprehensive Facilities Assessment completed as part of the preparations for the proposal for a new/refurbished Lowell High School makes that clear. Library technology resources are a key area of need for LHS, a school with a potentially significant student population that needs access to technology while present in school. Space and technology to meet those student needs is at a critical stage. At present, the library also assumes responsibility for the general management of the nine computer labs and a new language lab. The Comprehensive Facilities Assessment also makes note of the general inadequacy of available academic spaces which include general purpose classrooms, seminar areas, science labs and classrooms, and teacher work areas. LHS student activities have been consistently funded by a budget of $35,000 per year since 2010-2011. Level funding over time, however, does not necessarily translate into level services. The school's sports program is extensive, partially due to the school's ability to offer athletic programs at no cost. When all of the components of a strong school curriculum are not only existent, but are fully supported, students have the highest likelihood of achieving the school's expectations for learning. (self-study, teacher interviews, Endicott survey, curriculum maps, examination of student work, student shadowing, LHS Comprehensive Facilities Assessment, Curriculum Standard Subcommittee)

The district does not provide the school's professional staff with sufficient personnel, time, and financial resources for ongoing and collaborative development, evaluation, and revision of the curriculum using assessment results and current research. If there is time, teachers review the data from common assessments, target gaps in the curriculum, and make changes to course components and assessments. Since the completion of the NEASC preparatory activities the early release days have been devoted to a two-hour department meeting (focused on curriculum, instruction, and assessment) and a one-hour, teacher-led workshop focused on sharing best practices. Not all faculty members and student support service personnel are involved in the development, evaluation, and revision of curriculum. On this topic, the resounding request from staff members is for common planning time. The last full scale revision of the curriculum occurred with the planning of the curriculum maps four years ago. There is no evidence of a full scale comprehensive curriculum revision since. Curriculum revision does occur, however, in response to an identified need, for example, work on curricular changes based on MCAS data; that usually happens during regular above mentioned department meetings/early release days. Common planning time is provided to the Freshman Academy, among teachers of co-taught classes. Math teacher PLNs and teachers of courses selected by also have common planning time for curriculum and assessment work. This data conflicts with the teacher response to the Endicott survey where only 14.9 percent of staff members believes that they "have sufficient time to be engaged in formal curriculum evaluation, and to review and revise work." The district provides leadership for curriculum

coordination and articulation via a stipend position. Teachers work on curriculum development after hours or during the summer. Through the use of professional development funds during the past two years, the school leadership team has enabled departments to pay teachers to focus on curriculum development and revision for courses in need of review and revision. In addition the school has also used professional development funds to secure ten days of subs for a group of teachers to work on curriculum writing and revision. This is done as a stipend after-work opportunity for teachers who choose to take it. As noted in the above example, MCAS-linked courses are subject to more frequent evaluation and revision of the curriculum. Other courses are not as frequently evaluated and revised. As evident in the curriculum maps, even within departments, staff members are not in synch with curriculum expectations. Providing sufficient personnel, time, and financial resources to curriculum revision and full scale involvement of the entire professional staff ensure the maintenance and full support for a vibrant, ever-evolving, organic curriculum. (self-study, teacher interviews, Endicott survey, curriculum maps, student work, student shadowing)

Commendations:

1. The Lowell High School's Pathways program that provides hands-on, minds-on experiences connecting high school course work to the skills and knowledge students need for post-secondary education and careers
2. The development of courses that provide experiences that mirror offerings at the college level, including Latin Lyceum, Advanced Placement, and dual enrollment
3. The use of essential questions in designing curriculum which strongly focuses on inquiry, problem, and higher order and big picture thinking
4. The emphasis on the ethical use of technology in some sections of the English curriculum
5. The use of the monthly department meetings which provide teachers with the opportunity to create, implement, and review common assessments, to target gaps in the curriculum, and to make changes to course components and assessments ultimately benefiting teaching and learning
6. The math department's recent institution of a highly collaborative professional learning network (PLN) for groups of geometry, algebra and pre-calculus teachers
7. The core academic departments annual use of some professional development funds to run highly effective data summits for grade-level teams

Recommendations:

1. Undertake an audit of the degree to which the current curriculum and its practitioners provide sufficient opportunities in multiple settings across the school day for students to practice and achieve each of the school's learning expectations and act on the results
2. Develop a curriculum template whose form will allow for the identification in all courses or units of study essential questions, concepts, content, and skills; the school's 21st century skills that will serve as the focus of each course; instructional strategies; and assessment practices that include the use of school-wide analytic and course-specific rubrics

3. Develop a plan to ensure that the curriculum engages students in cross-disciplinary learning, provides authentic learning opportunities, and engages student in the informed and ethical use of technology in all courses
4. In consultation with the district design a plan that will ensure sufficient vertical communication about curriculum with all sending schools to directly share and/or discuss data, trends in instruction, and curriculum, and that will ensure sufficient horizontal and vertical communication about curriculum for all curriculum areas
5. Ensure that all curricula (CCSS, NGSS, MA frameworks, etc.) identify the 21st century skills upon which they will focus
6. Conduct a needs assessment to determine the optimum levels of support for staffing, instructional materials, equitable and effective access to technology, equipment, supplies, facilities, and the resources of the library/media center
7. Develop a plan for the regular review of the curriculum that engages and supports all professional staff in the collaborative development, evaluation, and revision of the curriculum using assessment results and current research

3 Instruction

The quality of instruction is the single most important factor in students' achievement of the school's 21st century learning expectations. Instruction is responsive to student needs, deliberate in its design and delivery, and grounded in the school's core values, beliefs, and learning expectations. Instruction is supported by research in best practices. Teachers are reflective and collaborative about their instructional strategies and collaborative with their colleagues to improve student learning.

1. Teachers' instructional practices are continuously examined to ensure consistency with the school's core values, beliefs, and 21st century learning expectations.

2. Teachers' instructional practices support the achievement of the school's 21st century learning expectations by:
   - personalizing instruction
   - engaging students in cross-disciplinary learning
   - engaging students as active and self-directed learners
   - emphasizing inquiry, problem-solving, and higher order thinking
   - applying knowledge and skills to authentic tasks
   - engaging students in self-assessment and reflection
   - integrating technology.

3. Teachers adjust their instructional practices to meet the needs of each student by:
   - using formative assessment, especially during instructional time
   - strategically differentiating
   - purposefully organizing group learning activities
   - providing additional support and alternative strategies within the regular classroom.

4. Teachers, individually and collaboratively, improve their instructional practices by:
   - using student achievement data from a variety of formative and summative assessments
   - examining student work
   - using feedback from a variety of sources, including students, other teachers, supervisors, and parents
   - examining current research
   - engaging in professional discourse focused on instructional practice.

5. Teachers, as adult learners and reflective practitioners, maintain expertise in their content area and in content-specific instructional practices.

Conclusions

Teachers' instructional practices are not continuously examined to ensure consistency with the school's core values, beliefs, and 21st century learning expectations. The Freshman Academy has created and embraced the core values derived from the Positive Behavioral Intervention System (PBIS) and are consistently incorporating them into daily lessons. In the upperclassman buildings, however, the core values are less evident in guiding practice and the PBIS system has only recently been endorsed on a broad basis and is only in process of being adopted. The school's core values are displayed prevalently within the school, but they are not being integrated as a driving forced into daily lessons or goals or instructional practice. Lowell High School teachers believe that students should strive toward each facet of the Responsibility, Integrity, Determination, Engagement, and Respect (RIDER) acronym summing up the core values, but they do not necessarily use them explicitly in instructional practice nor do they consistently make reference to the school's expectations. Although the facets of RIDER are prevalently displayed in hallways and on ID tags, they are not commonly or uniformly connected to instruction in a deliberate way. In and of itself the simple existence and recognition of RIDER and the identification of the school's expectations are not sufficient to inform instruction. While teachers individually believe that students should be competent in the 21st century learning expectations and refer to them within their classes, they do not systematically align their instructional practices with them, and no formal program is currently in place to make this a reality. When teachers collectively embraced the school's core values and then identify and develop instruction practices that are driven by and serve those core values, the school will develop a strong instructional culture. (self-study, facility tour, teachers, student work, students, Endicott survey, school leadership, teacher interviews, student shadowing)

(The percentages cited below are based on the identified frequency of the appearance of the various instructional strategies spelled out in the second indicator of this Standard during classroom observations by the visiting committee. It is highly unlikely that all seven of the identified instructional practices would be employed in a single given lesson. The percentage figure, however, provides a picture of the frequency of their use in classes on a comparative basis.)

Instructional practices show varying levels of support for the achievement of the school's 21st century learning expectations, core values, and beliefs. Instructional practices do not yet show consistent support of the achievement of the school's 21st century learning expectations by personalizing instruction. According to the Endicott survey, 69 percent of parents feels that their son's/daughter's teachers personalize instruction to support his/her achievement of the school's learning expectations, but only 43 percent of students feels that teachers personalize their instruction. Options are provided to students for course selection and book choices used in several assignments, but avenues to show conceptual competency are less flexible. Only 38 percent of the visiting team's classroom observations showed evidence of personalized instruction that targets each student's learning style.

The school acknowledges that instructional practices do not uniformly support the achievement of the school's 21st century learning expectations by engaging students in cross-disciplinary learning. Instructionally driven cross-disciplinary learning was evident in only 25 percent of classroom observations. The school is able to cite some good examples of cross-disciplinary instruction (e.g., connections between social studies and English Language arts and between math and anatomy). Some programs such as special education, Latin Lyceum, and Freshman Academy are better able to engage students in cross-disciplinary learning because they are clustered and teachers have common planning time within the schedule. In other classes, some teachers work closely with other departments to create courses, but cross-disciplinary lessons occurred more informally or by happenstance rather than by purposeful planning. The school does not have a school-wide process or training to facilitate the identification, planning, and execution of cross-disciplinary lessons.

Teachers' instructional practices do not consistently support the achievement of the school's 21st century learning expectations of engaging students as active and self-directed learners. LHS is in the process, however, of shifting from a teacher-driven pedagogy to a more student-centered and outcome-driven approach. Teachers are utilizing the benefits of this educational methodology which creates more active and authentic learning by shifting the onus of responsibility to the student and developing more student-centered and project-based lessons and assessments. In 63 percent of classroom observations, students were engaged as active learners. This level of engagement was most common in the honors and AP levels, but it is unclear if this type of learning is equally common at the college prep level.

The school can cite several examples of instructional practice that emphasizes inquiry, problem solving, and higher order thinking. What is lacking is consistent evidence of those instructional traits across all disciplines and levels. Even granting the need to deal with mastery of basic concepts in foundation level classes, the need exists to make these traits evident in all classes to the extent possible considering the needs and abilities of students.

Teachers' instructional practices provide support for the achievement of the school's 21st century learning expectations by applying knowledge and skills to authentic tasks within specific subject areas. Sixty percent of classroom observations saw evidence of authentic learning taking place. The school has been working on increasing the frequency of authentic learning experiences as the school moves toward a more student-centered approach to teaching/learning. Although some classes provide these opportunities, they are not pervasive throughout the entire school. In some elective classes such as culinary, business, fine and performing arts, and broadcasting, students are able to learn real-life skills in an authentic setting such as a working restaurant, TV studio, or music performance. Students in these classes enjoy the knowledge that what they are learning is directly applicable to life post LHS. Dual enrollment classes also offer students an authentic experience with college syllabi and lectures and prepare them for what to expect at the university level.

Teachers' instructional practices do not fully support the achievement of the school's 21st century learning expectations by engaging students in self-assessment and reflection. According to the Endicott survey, over 71 percent of the students surveyed feel that their teachers provide them with opportunities

to assess their own work, but these opportunities were only witnessed in 30 percent of the visited classrooms. Graded assignments, with some exceptions, also do not allow for students to respond, reflect, or improve upon their original understanding.

While the school's instructional practices regularly integrate technology at present, the school's expectation for student learning in that regard, "To develop an ability to use a variety of mediums – including the creative and technological – in the process of learning, and demonstrate their acquired learning through the use of those mediums," as written does not provide a clear definition of what that should look like. The absence of such a clear definition creates difficulty in determining what level/type and degree of application of integration is desirable and acceptable. Technology is used in most classes in some capacity including in-class use of iPads, computer research, specialized software, EDGE classrooms, interactive whiteboards, and document cameras. Although not required, most teachers use Google classroom, Aspen pages, EdLine, or a similar class website program to make instructional materials, expectations, homework, plans, grades, and resources available for students and families to view. Students in dual enrollment classes attend college lectures from UML or MCC via a digital lecture room with a two-way microphone to allow for real-time question and answer sessions. LHS recently added a position for an instructional technology specialist to assist teachers in the incorporation of effective technology use within their classrooms. Technology is playing a greater role in classroom instruction at LHS, but resources are not distributed equitably and not all teachers have equal access to all technological tools. Although the school has 1.5 tech support personnel and 1.0 ITS person at the high school, unreliable Internet connections, a district-level issue, make it difficult to plan and deliver technology-rich lessons hinder teachers. When schools identify and expand the use of instructional practices that highly support the school's 21st century learning expectations, student are better situated to achieve at the highest levels. (self-study, facility tour, teachers, students, Instruction Standard Subcommittee, student shadowing, Endicott survey, teacher interviews, classroom observations, department heads, school leadership)

Teachers adjust their instructional practices to meet the needs of each student to varying degrees. Teachers often adjust their instructional practices to meet the needs of each student by using formative assessment, especially during instructional time. Formative assessments are mostly embedded in lessons through activities such as exit tickets, Socratic discussions, and teacher observations during activities. Teachers mainly use these formative assessments within the specific classes to provide feedback on the level of student comprehension to guide the teacher. Based on formative feedback teachers on occasion may reteach the same material to allow student to reach mastery of the material. Teachers employ activities such as journaling, K-W-L charts, dip-sticking, and exit tickets. Use of these and similar strategies varies greatly from teacher to teacher.

Teachers at Lowell High School do not consistently adjust their instructional practices to meet the needs of each student by scaffolding and strategically differentiating instruction for the success of the students. According to the Endicott survey, teachers used differentiated instructional practices to meet the learning needs of all students over 77 percent of the time. Only 47 percent of classes were observed using these strategies and there was no further evidence to invalidate the inconsistency of the data. Teachers are

generally aware of individual student needs and do target personal benchmarks and take time to work with students who need additional help. In response to the need to differentiate, teachers use sentence starters, jigsaw readings, tiered vocabulary, and graphic organizers to meet the needs and learning styles of all students. Teachers also selectively provide students opportunities to work at their own pace with teacher guidance, allowing more time to students who need more guidance and direction.

Teachers consistently adjust their instructional practices to meet the needs of each student by purposefully organizing group learning activities. Many teachers use group learning by establishing groups during instructional time for labs and problem solving as well as for out-of-class activities. Lessons involving groups are designed to be collaborative and provide opportunities for real-life experiences of working with others to create a final product.

Teachers adjust their instructional practices to meet the needs of each student by providing additional support but do not often offer alternative strategies within the regular classroom. The Endicott survey shows that over 76 percent of parents reports that teachers provide additional support to their sons/daughters when needed. Most teachers make a concerted effort to be available and responsive to student needs. Extra-help sessions are scheduled and well communicated. Alternative strategies that are employed include providing abridged texts and books on tape, and access to tutors and student teachers. Teachers care about students and often choose to give up free time both during and outside of contractual hours, to meet academic, instructional, and outside needs of students. Teachers are more concerned with the skills that the students are attaining rather than how much of the material they are able to get through in accordance with a school-wide push for more student-centered learning. Most teachers at LHS are attuned to the fact that each student is an individual with distinct needs who will progress at his/her own pace. Teacher efforts help students to find success in their own time, but not necessarily to demonstrate it in their own way. When teachers use a broad range of instructional strategies that engage students in a wide range of learning modalities, student mastery of learning increases. (self-study, student shadowing, classroom observations, teacher interviews, Instruction Standard Subcommittee, Endicott survey, facility tour, student work, teachers, students)

Teachers, individually and collaboratively, have limited time to work to improve their instructional practices by using student achievement data from a variety of formative and summative assessments; however, individually, they do attempt to find time to review current research, and to solicit feedback from colleagues. Teachers and chairs across all departments use student achievement data from standardized tests, common assessments, a variety of formative and summative assessments, and District Determined Measure (DDM) scores to identify the weaker areas upon which to focus in order to improve instruction. The schedule and locally negotiated agreements provide~~s~~ limited time during monthly early release days to analyze this data. District-wide and departmental groups meet vertically to look at student data, i.e., Massachusetts Comprehensive Assessment System (MCAS), SRI, writing folders. Teachers use prep time to collaborate with peers and express a desire for common planning time to facilitate a systematic approach to using data to inform instructional practices in that presently no formal system provides a framework for all teachers to use formative assessments to help expand the range of

instructional strategies. Department heads do create meeting times and provide coverages for teachers for those purposes.

Given the state of the current schedule teachers do not currently have the opportunity to improve their instructional practices by examining student work. With no time formally allotted in the current schedule, most teachers are unable to meet in departmental and common grade teams to examine student work. The adoption of DDMs gives teachers an avenue to analyze the completed assessments, but the degree to which they are currently used varies within the departments. In specific programs such as the Freshman Academy and special education, teachers work in clusters and are able to do this work within their assigned schedules. Teachers in the upper grades do not work in clusters and do not have the benefit of flexible scheduling. Common planning time is widely requested but extremely difficult to provide given the current schedule for the upper grades. In some instances, departments create their own time by covering classes for colleagues during their prep times or duties. In other cases, teachers independently schedule times to meet when they happen to have common prep time or during lunch times and after-school hours. The ELL department is in the midst of an initiative to meet regularly to assess the accuracy of student placement based on their skill level.

Teachers, individually and collaboratively, work to improve their instructional practices by using feedback from a variety of sources, including students, other teachers, supervisors, and parents. Department heads and lead teachers serve as instructional leaders and frequently engage in formal and informal discourse centered on instructional strategies. Teachers receive formal feedback from administrators through the evaluation system. In addition, the recent instructional rounds allow for a non-evaluative look into classes so that instructional trends can be identified within the building. A culture embedded in LHS of teacher-to-teacher observation is extant and coverage will be found for an individual teacher to observe a colleague. Parents are able to give feedback to teachers through scheduled events such as open house and conferences as well as through emails and informal conversations, but the school has not developed formal outreach processes that solicit feedback from parents and students.

Teachers improve their instructional practice by keeping abreast of current research through journals articles, book-shares, and district-based professional development. Teachers improve their instructional practice by keeping abreast of current research through journals articles, book-shares, and district-based professional development. Departments provide some of this to teachers in their departments with the goal of keeping their department on the cutting edge of best practices in teaching and learning. The school's teacher center has been recently updated and provides teacher toolkits, and the departments each have their own spaces with resources for the department. The LHS support specialists have offered specific training on using Google Aps/Classroom, iPad integration, and content-based enhancement through technology.

Most teachers, individually and collaboratively, improve their instructional practices by engaging in professional discourse focused on instructional practice. Most LHS teachers are unable to collaborate and examine instructional practices as much as they would like due to a lack of common planning time.

New teachers to LHS are assigned a mentor with whom they can discuss instructional strategies. The mentor/mentee teams attend the Lowell Teacher Academy (LTA) together. The LTA entails a three-year commitment with built-in cycles of inquiry/observation with the mentor and coursework required through the auspices of Fitchburg State. The teachers' participation is mandated as part of their employment. Teachers are also involved in consistent discourse with lead teachers and department heads both informally and through the education evaluation process. Their dedication and willingness to give their own time and to maintain their accessibility leads to students and families to feel cared for and to understand that their success is important. When teachers engage in a wide of activities focused on improving instructional strategies, they substantially improve the ability of students to more fully achieve the school's expectations for learning. (self-study**,** teachers, students, Endicott survey, student shadowing)

LHS teachers, as adult learners and reflective practitioners, maintain their expertise in their content areas and in content-specific instructional practices in a variety of ways, including in-house professional development conducted by department heads and instructional specialists, university courses, and out-of-district professional development such as Primary Source. Teachers are encouraged to attend professional learning opportunities both given by Lowell High School as well as outside sources. Teachers improve their instructional practice by keeping abreast of current research through journals articles, book-shares, and district-based professional development. All teachers within the first three years of employment are required to enroll in the Lowell Teacher Academy, an innovative mentoring program which involves enrolling in three courses devoted to developing instructional practices for graduate credit in conjunction with Fitchburg State University. According to the Endicott survey, over 80 percent of students reports that their teachers are knowledgeable about the subjects that they teach and 87 percent of teachers feels that they maintain expertise in their content area and in content-specific instructional practices. LHS hosts a variety of workshops and trainings and provides course tuition reimbursement for university-level instruction that is successfully completed. Professional development opportunities have traditionally been offered outside of the school day; however, monthly professional development is not sufficient to meet the needs of teachers to support their instruction of 21st century learning expectations. In the rapidly changing world of education, the need to keep current in pedagogical techniques and in the use of emerging technologies plays a prominent role in professional development. (self-study, teachers, Endicott survey, students, school leadership)

Commendations:

1. The full embrace by the Freshman Academy of the core values derived from the PBIS and its use of those core values to guide and shape instructional practice
2. The purposeful move from a teacher-centered to a student-centered approach to pedagogy that more fully engages students as active and engaged learners
3. The presence in a number of courses such as culinary, business, fine and applied arts, and broadcasting that are fully centered on applying knowledge and skills to authentic tasks
4. The burgeoning use of technology to support the vibrant delivery of class content and to make college courses accessible to all students

5. The strong school culture that supports non-evaluative teacher observations and an openness that creates the opportunity for peer observation and the sharing of successful instructional practices
6. The strong partnerships with local colleges that enable students to earn college credits
7. The general willingness across the faculty to give freely of their time to assist students, to examine student work, and to engage with colleagues in focused discussions about assessment results all with an eye toward improving instruction
8. The adoption of the use of the District Determined Measure (DDM) scores to identify the weaker areas upon which to focus in order to improve instruction.
9. The strength of the Lowell Teacher Academy in supporting the new teacher-mentor program and in providing professional development opportunities focused on expanding the range of effective instructional strategies

Recommendation:

1. Conduct a school-wide audit of instructional strategies and identify and advance the use of those strategies that improve the students' achievement of the Lowell High School 21st century learning expectations
2. Develop and execute a plan, with sufficient financial support and dedication of professional development time, to increase the level of use in all classes instructional strategies that personalize instruction, engage students in cross-disciplinary learning, engage students as active and self-directed learners, emphasize inquiry, problem solving, and higher order thinking, engage students in self-assessment and reflection, and further integrate technology
3. Ensure that all teachers have adequate and equitable access to resources that support the full-scale integration of technology as a tool for instructional practices and a support to student learning
4. Develop and execute a plan to increase the use of all manner of formative assessment within each classroom as a means of providing a basis for improving outcomes in instructional practice
5. Provide as feature of instructional practice more frequent opportunity for students to be able to demonstrate comprehension in a manner in keeping with their learning style
6. Increase opportunities for common planning time to improve instructional practice and to provide opportunities for relevant professional development within contractual hours
7. Develop a formal process for successfully soliciting input from students and parents focused on instructional practice

4 Assessment of and for Student Learning

Assessment informs students and stakeholders of progress and growth toward meeting the school's 21st century learning expectations. Assessment results are shared and discussed on a regular basis to improve student learning. Assessment results inform teachers about student achievement in order to adjust curriculum and instruction.

1. The professional staff continuously employs a formal process, based on school-wide rubrics, to assess whole-school and individual student progress in achieving the school's 21st century learning expectations.

2. The school's professional staff communicates:
   - individual student progress in achieving the school's 21st century learning expectations to students and their families
   - the school's progress in achieving the school's 21st century learning expectations to the school community.

3. Professional staff collects, disaggregates, and analyzes data to identify and respond to inequities in student achievement.

4. Prior to each unit of study, teachers communicate to students the school's applicable 21st century learning expectations and related unit-specific learning goals to be assessed.

5. Prior to summative assessments, teachers provide students with the corresponding rubrics.

6. In each unit of study, teachers employ a range of assessment strategies, including formative and summative assessments.

7. Teachers collaborate regularly in formal ways on the creation, analysis, and revision of formative and summative assessments, including common assessments.

8. Teachers provide specific, timely, and corrective feedback to ensure students revise and improve their work.

9. Teachers regularly use formative assessment to inform and adapt their instruction for the purpose of improving student learning.

10. Teachers and administrators, individually and collaboratively, examine a range of evidence of student learning for the purpose of revising curriculum and improving instructional practice, including all of the following:
    - student work
    - common course and common grade-level assessments
    - individual and school-wide progress in achieving the school's 21st century learning expectations
    - standardized assessments
    - data from sending schools, receiving schools, and post-secondary institutions
    - survey data from current students and alumni.

11. Grading and reporting practices are regularly reviewed and revised to ensure alignment with the school's core values and beliefs about learning.

Conclusions

Lowell High School does not employ a formal process, based on school-wide rubrics, to assess whole-school and individual student progress in achieving the school's 21st century learning expectations. As a first step, the school has not developed school-wide rubrics to assess the school's 21st century learning expectations. Then, in turn, the school's 21st century learning expectations are not embedded in curriculum maps in any organized or systematic fashion and therefore are not as well known as they should be by teachers and students. Many teachers, however, do use rubrics to assess learning expectations in the classroom and some departments use common rubrics to assess student progress in achieving course-specific learning expectations. According to the Endicott survey, 76.2 percent of students reports that their teachers use rubrics to assess their work. Some departments use common planning time and data summits to assess common assessment results, such as Massachusetts Comprehensive Assessment System (MCAS), Assessing Comprehension and Communication in English State-to-State (ACCESS), and other data; however, this is not widely undertaken across the school. Without a formal process to assess whole-school and individual student progress in achieving 21st century learning expectations, Lowell High School does not have sufficient data to continuously evaluate the level of achievement by the school of its learning expectations, to adjust instruction, or to revise curriculum. (self-study, teacher interviews, panel presentation, teachers, Assessment Standard Subcommittee, department chairs, school leadership)

The school does not communicate individual student progress specifically in terms of the achievement of the school's 21st century learning expectations to students and their families. The school does employ traditional processes to report elements of student progress to students and their families, including student report cards, MCAS results mailed to parents, and by way of the Aspen parent and student portal. Most individual teachers communicate student progress with students and families using email, EdLine, and teacher websites. The school also does not communicate its progress in terms of the achievement of identified 21st century learning expectations to the school community at large. The school sends home a copy of the school NCLB Report Card with each student. Because there is no formal process for evaluating the school's progress in terms of meeting its 21st century learning expectations, the school is unable to communicate that progress to the community in that manner. Given the lack a formal process for evaluating individual and student progress in terms of the student's achievement of the school's 21st century learning expectations, data is not available to effectively assess and report student and school progress in meeting the school's learning expectations. (self-study, panel presentation, Assessment Standard Subcommittee, school leadership)

Professional staff members inconsistently collect, disaggregate, and analyze data to identify and respond to inequity in student achievement. For example, student scheduling is informed by numerous student assessments. ACCUPLACER qualifies students for dual-enrollment courses; MCAS results inform math course selection; and ACCESS testing identifies and guides placement of English language learners (ELL). On a school-wide basis, all instructional leaders and their departments have examined

MCAS performance and student growth measures, focusing on improving the numbers of students scoring at advanced levels, increasing attendance rates, and in raising graduation rates. The lack of broadly applied common planning time (school-wide departmental planning time occurs once per month on early release days), however, impedes the undertaking of frequent and course-specific data analysis across the school. The school does examine Pass/Fail data across all core departments with teachers looking at their own P/F rates and comparing them with those of colleagues in the same course and department. Data summits, (now called common assessment meetings, formerly referred to as "quarterly data summits"), do occur, during which professional staff members collect and analyze data on common assessments each semester for every course at LHS and does 1 DDM (District Determined Measure) each semester for every course at LHS. This analysis enables the school to identify areas of strength, areas of growth, and next steps, which include pedagogical decisions, minor curricular/assessment modifications, and paths for remediation. The school cannot demonstrate consistently that the implemented next steps have been evaluated for effectiveness or that the cycle of data collection, analysis, reflection, and action has been consistently maintained. Frequently, individual teachers and small teams of teachers collect and informally analyze their own student work data and occasionally analyze other student work from within the same content area. This data is tracked on a traditional grade-book model, so it is difficult to examine progress and mastery of specific standards in order to identify and respond to an individual student's performance. Consistent collection, disaggregation, and analysis of student data are essential processes to identify those students in the most need of support. (self-study, district administration, teachers, Assessment Standard Subcommittee, teacher interviews)

Prior to each unit of study, teachers do not communicate to students the school's applicable 21st century learning expectations; however, they do identify course-specific expectations. Thirty-four of 69 observed classrooms have posted goals and objectives in their classrooms, but these are not based on the school-wide learning expectations. Curriculum maps and course syllabi provide students with essential questions and enduring understandings, and while all teachers have these documents, the communication of these expectations to students is inconsistent. The vast majority of teachers, however, do identify the course-specific expectations in all types of assignments using classroom and electronic postings, oral assignments, and in the outlines of major projects. Teachers use a variety of methods to post course-specific expectations, including EdLine, Google Docs/Classroom, Aspen/X2, and assignment sheets. When teachers provide students with clear expectation prior to each unit of study, students are better able to connect daily learning objectives to enduring understandings and essential questions of the unit of study. (self-study, student shadowing, Assessment Standard Subcommittee, lesson plans, parents, students, Endicott survey)

Prior to summative assessments, most teachers provide students with corresponding rubrics. While the school has not developed any school-wide analytic rubrics in order to identify for students the relevant expectation(s), teachers do provide students with assessment-specific expectation sheets and/or rubrics. For example, the science and English departments utilize common rubrics to target various skilled learned within their curricula. According to the Endicott survey, 80 percent of students agrees that they understand in advance what work they need to accomplish in order to meet teachers' expectations. These expectations and rubrics, however, vary in their formatting and nomenclature, and do not always

provide students with examples of learning outcomes or exemplars to guide students in the successful demonstration of learning. When the school creates and systematically adopts the use of school-wide rubrics, students will have a consistent set of learning expectations based on school-wide goals, enabling teachers to identify gaps in achievement. (self-study, artifacts, student shadowing, Endicott survey, teacher interviews)

Teachers inconsistently employ a range of assessment strategies, including formative and summative assessments. Many teachers frequently and consistently employ traditional summative assessments, including multiple choice or short response exams, formal writing assignments, and problem sets. Many teachers, however, inconsistently use formative assessments in class and prior to summative assessments other than teacher-directed questioning and entrance/exit tickets. Because teachers' pedagogical beliefs about assessments differ, formative assessments do not often scaffold to summative assessments, and higher order thinking skills are not widely present in either form of assessment. Additionally, teachers provide inconsistent opportunity for student choice in assessment type. Summative assessments at times allow for alternative measures of student progress and mastery, such as portfolios, options for multimedia projects like digital storybooks, class presentations, and varying prompts in lieu of the original summative assessment. Implementing a range of formative and summative assessments and assessment strategies allows for the variation in student learning styles, while also monitoring progress and mastery of learning expectations. (self-study, student work, Assessment Standard Subcommittee, teacher interviews, student shadowing, classroom observations, students, teachers)

The school does not provide the majority of teachers the time to collaborate regularly on the creation, analysis, and revision of formative and summative assessments, including common assessments. Although only some teachers are scheduled common planning time, many other teachers willingly use their free periods or lunches to collaborate. Any additional collaborative time for teachers is only available during the school day and awarded by department heads, subject to logistical issues, to purposefully create opportunities for collaborative time based on the needs of given course teams. Given the lack of dedicated time, most discussion of assessments among teachers is conducted sporadically and informally. Regular collaboration on the creation, analysis, and revision of assessment practices will ensure that all students across teachers, content areas, and grades are more effectively meeting learning expectations. (self-study, department heads, Assessment Standard Subcommittee, teachers, students, Endicott survey, teacher interviews)

Most teachers assess schoolwork in a reasonable amount of time and many teachers provide specific, corrective feedback. Major assessments are typically returned in a timely manner. Many teachers provide useful feedback, comments, and suggestions to help students improve their work. Some teachers, however, continue to use a plus-minus grading system for assessments with little or no feedback or simply grade for participation and not accuracy. Revision of work is also an area in need of stronger focus. In most cases, students have no opportunity to revise work on formative and summative assessments. Timely feedback and opportunities for revision are essential for student growth and skill development. (self-study, teachers, classroom observations, teacher interviews, students, Endicott survey, student work)

Teachers do not regularly use formative assessment to inform and adapt their instruction for the purpose of improving student learning. Teachers have a variety of ideas about what constitutes formative assessment and what grades mean. Understanding of formative assessment ranges from behavioral expectations, participation and attendance, to summative indications of knowledge acquisition. Data summits have begun to create common nomenclature and a consistent vocabulary around grading and assessment, but that work is neither frequent nor formally focused.

Currently, Lowell High School uses standardized test scores such as MCAS, district determined measures (DDM), common assessments, the pass/fail rate, and other summative assessments to drive changes to the curriculum. Data from summative assessments influence building-level and district-level decisions. While this work is in its infancy, a disconnection between standardized assessment data and classroom grades has demonstrated a need for horizontal consistency across departments and a closer focus on the school's 21st century expectations. When the school implements a formal process for defining effective formative assessment used across the content areas, then teachers can efficiently alter their instructional practices prior to the end of a learning unit and address student misunderstandings and misconceptions immediately. (self-study, departmental administrators, testing data, central office personnel, teacher interviews, school leadership, Assessment Standard Subcommittee)

Teachers and administrators, individually and collaboratively, regularly examine a range of evidence of student learning for the purpose of revising curriculum and improving instructional practice. Many teachers individually examine student work, standardized testing data, and common assessment results to adjust instruction and to inform their work in revising curriculum. In some cases, there is a formal process for teachers and administrators to examine student work. For example, teachers in the Freshman Academy use dedicated department meeting time to examine student assessments and make adjustments to curriculum and instruction. Department meetings held during early release days provide some opportunity for teachers and administrators to examine data. Data summits, held during the September and October early release days as a district mandate, provide opportunities for teachers in all departments to analyze student performance on DDMs. Department chairs regularly examine a variety of student data, including student work, results of common assessments, and standardized testing data, which inform their work in developing curriculum and supporting instructional practice. Some teachers collaborate with other teachers informally during prep time, lunchtime, and before or after school. The guidance department meets with personnel from the Lowell middle schools to review individual student data, MCAS scores, and grades for students entering ninth grade. The school has developed partnerships with receiving schools such as Middlesex Community College and the University of Massachusetts at Lowell. The school's dual-enrollment program with Middlesex Community College (MCC) and the University of Massachusetts at Lowell (UMass Lowell) provides the school with the opportunity to define college readiness. For example, Middlesex Community College provides feedback on the readiness of Lowell High School graduates to complete college work. This opportunity does not currently inform curriculum or instruction at Lowell High School. The English department and the university partners, however, have been focusing on curriculum that better prepares students for college. This outreach also includes inter-visitation between university professors and LHS English teachers. Currently, the school does not use any student or alumni survey data to revise curriculum or improve

instructional practice; however, the school did convene an alumni/ae panel last August. When the professional staff regularly reviews a variety of student data, the school is able to make adjustments in curriculum and instructional practices to meet the needs of its students. (self-study, teacher interviews, panel presentation, teachers, department heads, Assessment Standard Subcommittee)

Grading and reporting practices are not regularly reviewed or revised by design to ensure alignment with the school's core values and beliefs about learning. While Lowell High School regularly reports student progress using an established formal process, including student progress reports, report cards, MCAS results, and the Aspen parent and student portals, the evidence does not make a strong connection to the school's core values or beliefs about learning. The professional staff attempts to balance its use of formative and common summative assessments. The evidence most specifically supports the formal, school-wide use of common quarterly assessments across many departments. Teachers consider homework, quizzes, laboratory reports, short writing assignments, exits slips, reading note checks, and question and answer discussions as some of the formative assessments used. Because school-wide rubrics do not exist, the professional staff is unable to review any data from teachers' use of school-wide analytic rubrics for determining individual student progress in achieving the school's learning expectations. Many teachers, however, do use individual assignment rubrics and those rubrics at times are shared amongst teachers who may teach the same course, but this is an informal practice. The school has no formal system allowing professional staff to ensure that grading practices are consistent within all subject areas and by all teachers. Data summits have been a practice that is helping to shape teacher goals; however, inconsistencies in grading practices from one teacher to another are evident which is why the school has established a grading policy committee to create and implement a more uniform school-wide grading policy. The professional staff is limited in its focus on standards-based grading practices that both measure student proficiency and promote mixed-ability grouping. The implementation of a formal process to regularly review and revise grading and reporting practices in order to align them with the school's core values will allow assessments to drive the future values of the school and to ensure the values are present within the instructional practices being used in the classroom. (self-study, teacher interviews, student work, parents, panel presentation, district personnel, school leadership)

Commendations:

1. The broad use by a majority of teachers of classroom and departmental rubrics to provide students with clear direction and connection to learning goals
2. The regular scheduling of data summits for analyzing student performance common assessments in all core areas to create goals to improve student achievement and to shape district and building level goals to better accommodate student needs
3. The focused analysis of specific assessment data sources such as ACCUPLACER, MCAS results, ACCESS testing, to inform math course selection and student placement for English language learners (ELL)
4. The dedication of time at Freshman Academy weekly department meetings and dedicated department meeting time during early release to analyze student work and student achievement data, to examine student assessments, and to make adjustments to curriculum and instruction

5. The practice by a majority of teachers of identifying the course-specific expectations in all types of assignments
6. The provision by most teachers prior to summative assessments of the corresponding rubrics
7. The establishment of partnerships with Middlesex Community College and UMass Lowell that provide data on the readiness of Lowell High School graduates to complete college work
8. The establishment of a grading policy committee to create and implement a uniform school-wide grading policy

Recommendations:

1. Develop a formal process, based on the use of school-wide rubrics, for assessing whole-school and individual student progress in achieving the school's 21st century expectations
2. Develop a process for communicating to students, families, and the school community at large the individual and whole-school progress in terms of the success of students in meeting the school's 21st century learning expectations
3. Maintain data summits for all content areas based on common assessments in order to provide the school with meaningful data to inform the development of curricula and instruction
4. Develop a process to ensure that all teachers identify prior to each unit of study the school's applicable 21st century learning expectation
5. Create a process by which teachers establish a common understanding of formative assessment in order to master and employ formative assessments among a wide range of assessment strategies and use their accumulated data to inform and adapt their instructional practices to improve student learning
6. Ensure that all teachers provide students with timely, substantive feedback and also provide opportunities for revision on both formative and summative assessments so as to demonstrate mastery of a given lesson
7. Provide dedicated time for all teachers to regularly examine student work and to have full access to other assessment data for the purposes of revising curriculum, instruction, and assessment
8. Further develop partnerships with post-secondary schools, using data gathered therefrom to inform the revision of curriculum and instruction through data analysis
9. Collect data from current students and alumni and use them to inform the revision of curriculum and instruction
10. Develop and implement a formal assessment plan that includes the regular use of both formative and summative assessments in all subject areas

SUPPORT STANDARDS

SCHOOL CULTURE AND LEADERSHIP

SCHOOL RESOURCES FOR LEARNING

COMMUNITY RESOURCES FOR LEARNING

5 School Culture and Leadership

The school culture is equitable and inclusive, and it embodies the school's foundational core values and beliefs about student learning. It is characterized by reflective, collaborative, and constructive dialogue about research-based practices that support high expectations for the learning of all students. The leadership of the school fosters a safe, positive culture by promoting learning, cultivating shared leadership, and engaging all members of the school community in efforts to improve teaching and learning.

1. The school community consciously and continuously builds a safe, positive, respectful, and supportive culture that fosters student responsibility for learning and results in shared ownership, pride, and high expectations for all.

2. The school is equitable, inclusive, and fosters heterogeneity where every student over the course of the high school experience is enrolled in a minimum of one heterogeneously grouped core course (English/language arts, social studies, math, science, or world languages).

3. There is a formal, ongoing program through which each student has an adult in the school, in addition to the school counselor, who knows the student well and assists the student in achieving the school's 21st century learning expectations.

4. In order to improve student learning through professional development, the principal and professional staff:
   - engage in professional discourse for reflection, inquiry, and analysis of teaching and learning
   - use resources outside of the school to maintain currency with best practices
   - dedicate formal time to implement professional development
   - apply the skills, practices, and ideas gained in order to improve curriculum, instruction, and assessment.

5. School leaders regularly use research-based evaluation and supervision processes that focus on improved student learning.

6. The organization of time supports research-based instruction, professional collaboration among teachers, and the learning needs of all students.

7. Student load and class size enable teachers to meet the learning needs of individual students.

8. The principal, working with other building leaders, provides instructional leadership that is rooted in the school's core values, beliefs, and learning expectations.

9. Teachers, students, and parents are involved in meaningful and defined roles in decision-making that promote responsibility and ownership.

10. Teachers exercise initiative and leadership essential to the improvement of the school and to increase students' engagement in learning.

11. The school board, superintendent, and principal are collaborative, reflective, and constructive in achieving the school's 21st century learning expectations.

12. The school board and superintendent provide the principal with sufficient decision-making authority to lead the school.

Conclusions

The school community consciously and continuously builds a safe, positive, respectful, and supportive culture that fosters student responsibility for learning and results in shared ownership, pride, and high expectations for all in most areas. The Lowell High School community consciously works to create a safe school culture. LHS emergency protocols are current and include detailed staff responsibilities during various potential safety issues including fire, lockdown, and evacuation drills. Each of the three buildings has a safety plan and drills are conducted regularly in accordance with state requirements. Security personnel, four school resource officers (SROs) and six security guards are present in the hallways and outside school entrances. The SROs responsibilities are demanding due to the need to cover the three main LHS buildings as well as the alternative school campus. The school uses closed circuit cameras for monitoring school activity but some of the 91 cameras are damaged. During the school day, students move freely in the corridors without overt supervision. Although, according the LHS handbook, the school scheduled students for all periods, ostensibly leaving little opportunity for students to be in the hallways during class time. All students are required to wear ID badges for easy identification. When students are found not to be wearing their badges, they are approached by an adult in the building and are subject to disciplinary consequences. The Endicott survey results indicate that 62 percent of students feels safe at school while at the same time, 33 percent of the student population feels bullying is a concern at LHS. Seventy-one percent of parents reports that the school provides a safe school culture. The LHS school community consciously works to create a positive school culture. The school publically recognizes student achievements in a variety of ways: on bulletin boards, with high five cards, on the school's website and social media outlets, with gift cards, lunches in the school restaurant, and paper bucks at the school store. School administrators and teachers regularly attend school plays, sporting events, and other school functions. The Endicott survey results indicate that 60 percent of students says they are proud of their school and school hallways are visibly free of trash and graffiti. LHS gear is worn proudly during the school day at school events and graduates continue to wear their LHS attire. Although the school has exercised initiative to display the core values and vision statement in hallways and classrooms, LHS has yet to embed them fully into the school culture. The LHS school community consciously works to create a respectful school culture in many ways. Recognizing that diversity is a strength and a challenge, the LHS school community promotes tolerance and awareness through school social activities and academic coursework. The International Language Club, with over 500 members, programs a series of monthly cultural awareness events and celebrations involving food, music, dance, and other traditions of the many ethnicities in the LHS community. Events include a Day of the Dead festival, Cambodian New Year, and Three Kings Day. In addition to the many celebrations, LHS offers an English elective for all students called Race, Ethnicity and the Written Word and a social studies elective called Seminar on American Diversity. The LHS school community consciously works to create a supportive school culture in many ways. House improvement plans detail action steps for high-risk students that include calls to parents, home visits, and a weekly review of high-risk student progress. Endicott survey results show that 64 percent of students believes teachers care about their learning, and 60 percent of students feels teachers respect them, but responses

also indicate that only 42 percent of students respects teachers and 42 percent of students respects students. Some classrooms have signage in multiple languages indicating room subjects to assist ELL learners in finding the right classroom. School organizations like the National Honor Society, JROTC, and other student organizations contribute tens of thousands of volunteer hours to their school and the wider community. A continuous emphasis on safety, positivity, respect, and support ensures positive core values upon which to base all teaching and learning. (self-study, emergency protocol plans, students, teachers, School Culture and Leadership Standard Subcommittee, facility tour, student shadowing, classroom observations, Endicott survey, PBIS data, parents, LHS course catalog)

The school is not equitable and inclusive because it does not provide equitable access to challenging experiences for all students in that it fails to ensure that courses throughout the curriculum are populated with students reflecting the diversity of the student body with the goal of fostering heterogeneity in support of the achievement by all students of the school's 21st century expectations. The course catalog indicates a total of 50 non-weighted classes; however, only thirteen of them are in core class areas: 7 in English: (3 for MCAS or SAT prep); 4 in mathematics (3 for ACCUPLACER, SAT, or MCAS); 1 in science (MCAS prep); and none in social studies or world languages. The rest of the non-weighted classes are electives or English language learner (ELL) classes. Broad data about the level of student enrollment numbers in non-weighted classes is lacking; however, a review of student (22) and teacher (17) schedules (including 9 core class and 8 SPED/ELL classes) indicates no evidence of student enrollment in a core class that was heterogeneously grouped. Additionally, no core class teacher taught any non-weighted classes. Special education students are included in classrooms across all academic levels; however, ELL students tend to be grouped within class/grade levels. Only 25 percent of parents believes their children can enroll in heterogeneous classes. LHS, however, was awarded the Gaston Caperton Award from the College Board which recognizes districts for creating opportunities for traditionally underrepresented students; expanding access to higher education by providing students with rigorous academic offerings and innovative college-preparation programs; and demonstrating significant and consistent growth in the number of traditionally underrepresented students and low-income students taking college-level courses, and applying to four or more colleges. LHS is not yet ready to fully tackle the complex issue of heterogeneous grouping. Emphasis on equity is paramount to ensure that all students are in positions to achieve at their highest levels. (self-study, classroom observations, student schedules, teacher schedules, school leadership team, School Culture and Leadership Standard Subcommittee, teachers, Endicott survey, classroom observations, student shadowing)

The school does have formal, ongoing programs in addition to the guidance counselors which connect students to adults in the school and have the potential to assist students in achieving the school's 21st century learning expectations. In the Freshman Academy, the school uses PBIS (Positive Behavior Intervention System) to connect students to adults and to reduce discipline problems. Freshman seminar is a requirement for all students to ease their transition to the high school and to pair them with an adult mentor in the school. All students at LHS have a daily advisory period which provides the opportunity for staff members and students to form connections over a three-year loop. Endicott survey results show that 62 percent of students says they feel connected with an adult in the school. Forty-four percent of the staff members, including administrators, serves as a mentor or advisor for students and/or student

activities. Sixty-eight percent of parents reports that their children have multiple adults at the school who function as a mentor/advisor. When individual students know that a trusted adult is present to assist them in achieving success, the likelihood of them achieving that success increases. (self-study, panel presentation, students, teachers, classroom observations, Endicott survey, student shadowing)

Collectively, the headmaster and professional staff members have not been able to fully and effectively use professional development to improve student learning. The headmaster and the teachers have had limited opportunities to avail themselves to engage in professional discourse for reflection, inquiry, and analysis of teaching and learning. Since there are limited resources available, the school cannot consistently engage outside agencies/consultants to expand the range of professional development options. Although the school has dedicated some formal time to implement professional development, its current schedule, in which teachers meet once a month, is not sufficient to advance their skills and practices or to improve curriculum, instruction, and assessment in support of student learning. Additionally, the time is often devoted to worthwhile school-wide and district initiatives, but not the extent needed is it responsive to departmental and focused curricular and instructional needs. As a result of these limited opportunities for professional development, the faculty has been unable to nurture a collaborative ethos of reflection and inquiry. Teachers do not have the time, both within and across departments, to routinely and effectively engage in conversations about learning expectations, consistent grading standards, quality of student work, instructional practices, curriculum revision, current research, and best practices. Providing sufficient time for professional development will allow teachers to sharpen and advance their skills, practices, curriculum, instruction, and assessment in support of student learning. (self-study, panel presentation, teacher interviews, administrative leadership team, School Culture and Leadership Standard Subcommittee, Endicott survey, headmaster)

School leaders regularly use two forms of research-based evaluation and supervision processes that focus on improved student learning. LHS is currently piloting the Massachusetts Department of Elementary and Secondary Education's recommended model evaluation process for teacher evaluation. The process focuses on using data to document whether or not teachers are meeting SMART goals for student learning and achieving overall expectations for effective teaching. The LHS department heads are responsible for implementing the Massachusetts teacher evaluations. Additionally, the director of curriculum and instruction initiated Instructional Rounds, based on the text *Instructional Rounds in Education*. The Instructional Rounds are carried out by teams of lead teachers and administrators who make short 10-15 minute observations of a variety of classes and then report back to the leadership team. The Instructional Rounds data is not used for evaluation purposes, and direct feedback is not given to the teachers observed. Instead, the Instructional Rounds data is used to improve student learning at scale, and to anonymously address trends and patterns observed with the whole staff. The state evaluation tool has already provided the department heads with the opening to have focused conversations with teachers, to give constructive feedback, and to refer teachers to observe other teachers. For example, a teacher who is struggling with or is new to leading a Socratic seminar would be referred to observe a teacher who has great experience and success with Socratic seminars. At the district level, administrators completed training in the use of the new state evaluation tool; those administrators in turn trained the headmaster and department heads. As a direct result of the new state evaluation tool, the department heads have

shifted their focus (and worked with teachers to help shift their focus) from delivery of instruction to student outcomes. This difficult shift was greatly facilitated by the format of and conversations around the new state evaluation tool. Because the state evaluation tool has been in place for only two years, administrators do not yet have a data set for more than that same time period. On the other hand, Instructional Rounds provide data that administrators share out in a debriefing, and the administrators have been keeping track of trends both within departments and across the entire faculty. As a result of these observations and conversations, the number of teachers who post their clear objectives visibly for each class has increased from approximately 33 percent to approximately 75 percent. Department heads have also implemented the "launch, explore, and summarize" model as a direct outcome of the Instructional Rounds. Many teachers would like to see the Instructional Rounds teams expanded to include additional classroom teachers, beyond simply lead teachers. Administrators have said they, too, hope to expand the teams as the program grows. In addition, LHS has dedicated instructional specialists who review testing data regularly and offer instructional support to teachers. Teachers recognize the value of data-driven instruction, but express a hope for timely and increased access to student data, as well as for additional training on how to analyze available data and apply it to practice. When school leaders regularly use research-based evaluation and supervision processes that focus on improved student learning and include the teachers as active participants and observers, the process, the quality of delivery of content, and student learning improves. (self-study, panel presentation, teacher interviews, department leaders, school leadership, teachers)

The organization of time does not comprehensively support research-based instruction, professional collaboration among teachers, and the learning needs of all students. The master schedule, although reviewed annually to ensure that all students are able to be enrolled in courses that support the school's core values and beliefs about learning, does not allow for formal time on a regular basis for teachers to collaborate which is not conducive to supporting implementation of effective instructional practices (e.g., collaborative learning, inquiry-based instruction). More basically, many teachers do not have time to formally collaborate across content areas, and few teachers can collaborate regularly with teachers within their content areas. The school leadership estimates that up to 50% do have some formal opportunity to collaborate (all Freshmen Academy teachers, those provided collaborative time by department heads, and other groups such as the PLN groups for geometry, algebra, and pre-calculus teachers). During past reviews of the master schedule, the school has considered and explored variations in said schedule (e.g., flipped schedule). The school has already divided into houses as an organizational strategy, in order to meet the needs of its students and teachers; however, the school has been unable to adequately meet identified faculty needs and desires. A master schedule that collectively supports research-based instruction, professional collaboration among teachers, and the learning needs of all students, advances the interests of all stakeholders. (self-study, panel presentation, teacher interviews, School Culture and Leadership Standard Subcommittee, Endicott survey, headmaster, guidance counselors, master schedule)

Current student load and average class sizes enable teachers to meet the learning needs of individual students. The average class size for core courses is fewer than 30 students per class and between 20-25

students per class for non-core courses. The ratios have been maintained despite financing/budgetary issues. LHS currently offers over 1,000 courses. Given the large number of courses offered, there are only eight with 30-plus students enrolled. Additionally, the Endicott survey supports the reasonability of class sizes. Seventy-seven percent of students agrees that class sizes are reasonable and meet their learning needs; 64 percent of parents agrees that the current class sizes are reasonable and meet their children's needs. Only 11 percent disagrees. The survey results from faculty were mixed: 43 percent of LHS staff agrees and 42 percent disagrees. Maintaining workable class sizes enables teachers to effectively meet the learning needs of individual students. (self-study, master schedule, Endicott survey, guidance counselors)

The headmaster, working with other building leaders, consistently provides instructional leadership that is rooted in the school's core values, beliefs, and learning expectations to the degree that they currently understand them. It is not entirely clear that teachers and students truly understand how in practical application the school's core values, beliefs, and learning expectations should be driving all endeavors in the school. The Endicott survey results mirror the fact that the headmaster has made championing students as his central focus, while delegating faculty leadership and support to the director of curriculum and instruction. Sixty-seven percent of the students agrees and only 10.1 percent disagrees that the headmaster is clear about what he wants the school to accomplish for all of the students, while only 55.3 percent of the faculty agrees and 22.3 percent disagrees that the headmaster and other school-based administrators provide instructional leadership that is consistent with the school's core values, beliefs, and learning expectations. The headmaster very publicly models the core values of the school by the breadth of his direct interactions with and positive support of the students and the many programs he has established to benefit them. The headmaster usually starts his day standing outside the school in the morning greeting students; he is seen regularly walking through the halls of the school interacting with students; and he can be seen at virtually every school event, talking with students, encouraging them, praising them, and shaking their hands. The headmaster visits classes regularly, sits down in the cafeteria to dine and converse with students, and implemented the policy that mandates that most administrators assume responsibility for an advisory group in order to stay in touch with the students. The headmaster ensures that the teachers are focused on the school's beliefs about learning and instructional practices by providing them with a clearly delineated organizational chart, which has been newly revised for greater clarity and efficiency. The director of curriculum and instruction has immediate responsibility for providing instructional leadership in keeping with the school's core values and beliefs. Under the leadership of the current director of curriculum and instruction, the school has launched Instructional Rounds in an effort to improve student learning and mastery of the school's 21st century expectations. Additionally, the school has started an LHS Educator Workshop Series that allows current school leaders to share their knowledge and experience on various best practices in classroom management, differentiated instruction, working collaboratively, and using technology, all based around the main focus of strategies to improve instruction in secondary classroom. The school has also adopted the Positive Behavior Intervention and Support (PBIS) program for the Freshman Academy, which ties in directly with the school's core values as encapsulated in the school's RIDER acronym: Responsibility, Integrity, Determination, Engagement and Respect. Maintaining a clear focus on instructional practice to advance the level of achievement of the school's learning expectations provides the best circumstances for

maximum achievement by students. (self-study, teachers, school board, central office personnel, school leadership, Endicott survey, teacher interviews)

When it comes to making decisions, the headmaster consults with a variety of groups of administrators for input and discussion; however, teachers, students, and parents are not as involved in formal, meaningful, and defined roles in decision-making that promote responsibility and ownership. The headmaster uses information to inform his decision-making process, but not necessarily as the final word on what the decision will be. An example that the headmaster's decisions support the learning of every student and are generally consistent and fair is that in the past, certain groups would go on field trips during the school day on an ability-to-pay basis. The headmaster decided that if the field trip organizer could not make the trip accessible to all students, it could only happen after school, rather than during the school day. As a result of this decision, some teachers do not pursue field trips unless they are free, but others have gotten creative and sought out grant funding so that all students can partake in the trip; for example, a group going to see a production at the Mass Repertory Theatre was funded entirely by a grant. Faculty meeting time is only scheduled once a month on an early release day. The school has increased effort to utilize meeting time to promote discussion about teaching and learning through collaborative planning, curriculum design and alignment, and the examination of student work. The headmaster has made the students his primary focus: he believes strongly in helping students and aims to find ways to support students achieve success. Beyond his focus on students, the headmaster has made his primary focus establishing community partnerships, such as the dual enrollment programs with UMass Lowell and Middlesex Community College. He meets with housemasters regularly to strategize on how to increase attendance rates and decrease dropout rates, both of which have already improved in his tenure at LHS. The headmaster attends department meetings and department head meetings. There are LHS graduates who are currently in college only because the headmaster made calls to the get the students the financial and academic support they needed get into and stay in college. The headmaster has established many vehicles, which demonstrate to students that their learning is paramount. The headmaster has initiated both an alumni interview program to find out what LHS did well to prepare them for life beyond the school and in what areas LHS needs to improve in order to better prepare their students. He also has established various panels of successful alumni and local successful business people of color speak to speak inspirationally to the students. Historically, the Headmaster's Award was given for the highest GPA; the current headmaster changed the criteria: now the award is given on the basis of greatest amount of student perseverance. The headmaster has used his broad network of community connections for the greatest benefits of learning by building up an extremely large scholarship base. Specifically, last year over 220 graduating students received scholarships spread out over different areas of success. The headmaster has redecorated the school main entryway from an athletic trophy and sports photo display area with a banner that proclaims that LHS is a teaching and learning community. He also volunteered to use a DESE survey, which gives students the opportunity to voice direct feedback about teachers and the administration. When the headmaster, working with other building leaders, consistently provides instructional leadership that is rooted in the school's core values, beliefs, and learning expectations, the resulting broad range of learning opportunities presented to students greatly increases the likelihood of student success. (self-study, panel presentation, facility tour,

teacher interviews, students, school board, department leaders, school leadership, teachers, Endicott survey)

The headmaster religiously maintains office hours attends all "friends" meetings, Lyceum parents meetings, maintains an open door policy at open house nights, seeks teacher input from the Cultural Competence Task Force, and volunteers for the grading policy committee and the PBIS committee. What is less in evidence is any clearly defined structure for securing input on a broad basis from parents, students, and teachers and for providing a formal role in decision-making for those key stakeholders. Accessibility and openness to feedback from parents, students, and teachers is not modeled and does not allow stakeholder voices to be sufficiently heard. There are currently no formal mechanisms for staff, students, or parents to provide input into school initiatives. Endicott survey data indicates that only 28 percent of teachers feels their input is important, and there are indicators that staff feels their input is sought only after the decision has already been made. Rapid changes in leaders and leadership styles at the headmaster level coupled with the adoption of a new evaluation system have left the teachers feeling disengaged. Parent data reflects that 53 percent respondents feels they have input into decisions despite no formal method for doing so. Only 48 percent of students feels they have input into decision-making, and there is no formal method to provide input and/or effect change. Staff, student, and parent involvement in initiatives and decision-making is limited and inconsistent. Involving teachers, students and parents in meaningful and defined roles in decision-making promotes responsibility and ownership in the school community. (self-study, student, parents, Endicott survey, School Culture and Leadership Standard Subcommittee, teachers, department leaders)

Teachers exercise initiative and leadership essential to the improvement of the school and to increase students' engagement in learning on a limited basis. Although teachers do not serve broadly on committees that review and revise curriculum and instructional practices, they do actively engage in leading or participating in other initiatives in the school, including after-school clubs and activities such as the LHS physics and engineering clubs. Lowell High School teachers serve as lead teachers and represent the high school on vertical teams. Additional teachers serve as members of the district STEM committee and as liaisons with the DESE. Successfully applying for grants, LHS teachers have designed focused STEM after-school projects and have facilitated curriculum development. Some teachers train and coach their colleagues. Significantly, teachers played an important role in creating the Welcome Wall near the main entrance that promotes the value of diversity. Although most teachers are limited to the once a month professional development offered by the school, they collaborate with some fellow colleagues when time permits on a limited basis. When teachers exercise initiative and leadership essential to the improvement of the school, students' engagement in learning increases. (self-study, teacher interviews, School Culture and Leadership Standard Subcommittee, administrative leadership team, teachers)

The school committee, superintendent, and headmaster are collaborative, reflective, and constructive but not specifically focused toward achieving the school's identified 21st century learning expectations. The current superintendent has been in the position since July 2015. The superintendent holds two meetings a month with two different groups of school principals; because there is only one high school, the LHS

headmaster attends both meetings. In these meetings with the superintendent, principals and the headmaster are able to bring both long- and short-term visions, goals, and issues to the table and receive feedback. The superintendent also meets on a weekly basis with the LHS headmaster. The school board uses a subcommittee model for dealing with the wide range of areas affecting the management of the city's school. Ten different subcommittees support handle topics as they arise. When the curriculum and instruction and the LHS subcommittees meet, the superintendent (or one of his designees) and the LHS headmaster also attend the meeting. Agenda items from past meetings, for instance, comprised the following: assessment, PARCC, MCAS, DDMs, Teachpoint, technology updates, Naviance, Race to the Top planning, instructional leadership, Virtual High School, Youthbuild, Career Academy, Latin Lyceum update, UTeach Partnership, and summer school. Although the above listed agenda items are relevant to the school's learning goals, they do not always represent an intentional focus on or a full encompassing of the goal of achieving the school's 21st century learning expectations. The lack of a directed focus on achieving the school's 21st century learning expectations can hinder at the district level the ability of students to achieve those learning expectations. (self-study, school board, central office personnel, school leadership)

The school board and superintendent definitely provide the headmaster with sufficient decision-making authority to lead the school. The duties and responsibilities of the headmaster, as documented in the job description, focus on administrative, instructional, and student leadership skills, as well as on requirements for community relationships. The job requirements, however, do not include specific reference to upholding the schools' core values and beliefs about learning. Nonetheless, the district policy and procedure manual and the superintendent and the school board do show the sufficiency of the headmaster's decision-making authority. At the request of the principals and the headmaster in their first meeting with the new superintendent, the superintendent granted them more autonomy in their budgets. The headmaster has received autonomy to create the professional development that is relevant to the high school. The district and headmaster/school leaders collaborate regularly. For example, the district leaders and principals/headmaster collaborated to develop and implement both a tutoring policy and an allergy policy. Another example is that there is an annual budget meeting day during which all principals and headmasters collaborate to establish the budget. The granting of sufficient autonomy to the headmaster ensures that decisions will be closer and in concert with those stakeholders who will be most affected by the outcome of the various decisions. (self-study, teachers, school board, central office personnel, superintendent, headmaster, school leadership)

Commendations:

1. The numerous strategies adopted to ensure a safe school culture, including the development of emergency protocols for lockdowns and evacuation drills, the use of closed circuit cameras to remotely supervise areas throughout the building, and the employment of security personnel and school resource officers (SROs)
2. The wide range of strategies employed to maintain a positive school culture such as celebrating student achievement on bulletin boards, with "high five" cards, on the school's website and

social media outlets, and the redesign of the of the main entryway with an emphasis on LHS as a teaching and learning community

3. The numerous school social and academic practices that support a respectful school culture such as The International Club; monthly cultural awareness events and celebrations such as the Day of the Dead Festival, Cambodian New Year, and Three Kings Day; and the establishment of an English elective course for all students called Race and Ethnicity
4. The highly effective adoption of the advisory period (for grades 10-12) and the freshman seminar (for grade 9) to encourage connections between students and an adult who knows them well who can assist them in achieving the school's 21st century expectations
5. The adoption and the ongoing expansion of the Positive Behavior Intervention System as a mode for developing and maintaining a positive, unified culture on a school-wide basis
6. The strong commitment to improve student learning as demonstrated by the willingness of the school to piloting the new Massachusetts DESE model for teacher supervision and evaluation
7. The director of curriculum and instruction's adoption of positive initiatives aimed at improving teaching and learning such as the introduction of the Instructional Rounds protocol for gathering data on instructional practice across the faculty
8. The commitment to maintain/reducing class sizes as evidenced by maintaining staffing levels even in the light of declining enrollment to enable teacher to better met individual student needs
9. The headmaster's consistently strong individualized support and broad-ranging advocacy for student success, including the establishment of community partnerships, the emphasis on increasing attendance rates and decreasing the dropout rate, the initiation of an alumni interview program, the development of a large scholarship base, and strongly emphasizing community partnerships, such as the dual enrollments with UMass Lowell and Middlesex Community College
10. The establishment of the LHS Educator Workshop Series allowing current school leaders to share their knowledge and experience on various best practices in classroom management, differentiated instruction, working collaboratively, and using technology with the main focus of improving instruction
11. The positive presence of collaborative and supportive structures and open lines of communication in place between and among the school committee, superintendent, and headmaster

Recommendations:

1. Assess the reasons behind the relatively large number (33 percent) of students who identified bullying as concern and pursue remedies to address this perception
2. Complete a needs assessment and develop a plan, with both short- and long-term components, to continue to increase the level of equitable access to challenging students for all students
3. Develop, with sufficient input from faculty members and LHS administrators, fund and implement a comprehensive professional development schedule that will avail teachers and allow sufficient time to meet for a broad range of professional development opportunities

4. Develop a plan to expand Instructional Rounds groups as a method of expanding the school's range of instructional strategies to include more classroom teachers, not simply lead teachers
5. Develop and implement a comprehensive master schedule that will, not only, meet the learning needs of the LHS students but also, create flexibility for teachers to collaborate with other teachers both horizontally and vertically to ensure smooth curricular transitions and the spread of best practices
6. With input from all appropriate stakeholders, develop a comprehensive plan to guide the use of faculty meeting time (more collaborative time and less administrative housekeeping), department meeting time (more opportunity for collaboration among teachers), and non-instructional teacher time (more designated common planning time) to focus more clearly on the achievement of the school's 21st century expectations
7. Identify and develop various structures and procedures which will provide parents, students, and teachers the opportunity for input into the school's decision-making process and will establish formal roles for them as key stakeholders in the advancement of the school and the achievement of its expectations

6 School Resources for Learning

Student learning and well-being are dependent upon adequate and appropriate support. The school is responsible for providing an effective range of coordinated programs and services. These resources enhance and improve student learning and well-being and support the school's core values and beliefs. Student support services enable each student to achieve the school's 21st century learning expectations.

1. The school has timely, coordinated, and directive intervention strategies for all students, including identified and at-risk students, that support each student's achievement of the school's 21st century learning expectations.

2. The school provides information to families, especially to those most in need, about available student support services.

3. Support services staff use technology to deliver an effective range of coordinated services for each student.

4. School counseling services have an adequate number of certified/licensed personnel and support staff who:
   - deliver a written, developmental program
   - meet regularly with students to provide personal, academic, career, and college counseling
   - engage in individual and group meetings with all students
   - deliver collaborative outreach and referral to community and area mental health agencies and social service providers
   - use ongoing, relevant assessment data, including feedback from the school community, to improve services and ensure each student achieves the school's 21st century learning expectations.

5. The school's health services have an adequate number of certified/licensed personnel and support staff who:
   - provide preventative health services and direct intervention services
   - use an appropriate referral process
   - conduct ongoing student health assessments
   - use ongoing, relevant assessment data, including feedback from the school community, to improve services and ensure each student achieves the school's 21st century learning expectations.

6. Library/media services are integrated into curriculum and instructional practices and have an adequate number of certified/licensed personnel and support staff who:
   - are actively engaged in the implementation of the school's curriculum
   - provide a wide range of materials, technologies, and other information services in support of the school's curriculum
   - ensure that the facility is available and staffed for students and teachers before, during, and after school
   - are responsive to students' interests and needs in order to support independent learning
   - conduct ongoing assessment using relevant data, including feedback from the school community, to improve services and ensure each student achieves the school's 21st century learning expectations.

7. Support services for identified students, including special education, Section 504 of the ADA, and English language learners, have an adequate number of certified/licensed personnel and support staff who:

   - collaborate with all teachers, counselors, targeted services, and other support staff in order to achieve the school's 21st century learning expectations
   - provide inclusive learning opportunities for all students
   - perform ongoing assessment using relevant data, including feedback from the school community, to improve services and ensure each student achieves the school's 21st century learning expectations.

Conclusions

The school has an effective system for implementing timely, coordinated, and directive intervention strategies for all students, including identified and at-risk students, which support each student's achievement of the school's 21st century learning expectations. Teachers and administrators are very responsive to parent communications about struggling students, and students feel teachers are approachable and available for extra help, as needed. Teachers refer students who are not meeting with success to a teacher assistance team (TAT) which reviews data, suggests classroom interventions, contacts parents, and alerts necessary student support services. The school formulates a plan, if necessary, with specific interventions, and the plan is reviewed four weeks later. Further actions also can include more intensive interventions, referrals to outside agencies, and referrals for special education testing. Appropriately licensed personnel schedule identified special education students into classes that honor the least restrictive environment and connect them with services, accommodations, and modifications that allow the students access to the curriculum in a manner that is appropriate for them. All students are expected to access and achieve the same expectations as their general education peers, to the extent that is appropriate for them. Systems are in place to address the needs of homeless students and students who are hospitalized for extended periods. Alternative placements are available for students who require them, including the LeBlanc Day School and Lowell High School Career Academy. LHS has pursued several grant-funded programs to provide comprehensive educational opportunities to various at-risk populations within the student body. These programs include a therapeutic day school (LeBlanc Day School), the student leadership and mentoring program for upperclassmen, compensatory services for students who have been suspended for long periods of time or who are not meeting with success in a traditional high school, and a before and after school tutoring program in the library. Because the school has a system, involving teachers, parents, students, and staff, to identify students in need of support, researching and communicating those needs to all stakeholders, and providing adequate resources for intervention, students have the opportunity to make academic progress in a fashion that is appropriate for them. These processes adequately meet the needs of the student population, with the exception of a growing population of students who present with the possibility of being both English language learners (ELL) and in need of special education involvement. Resources are scant for providing valid, reliable, and authentic assessments for special education consideration in students who are involved with ELL services. Standardized assessment materials and services (intelligence, achievement, behavioral/emotional, speech/language testing) in a student's native language are rarely, or not at all available. Maintaining access to intervention and special services for all students ensures that each student has equitable access to the services needed for achieving the mastery of the school's 21st century expectations. (self-study, teacher interviews, classroom observations, student shadowing, student work, parents, teachers, school leadership, school support staff)

The school provides a wealth of information to families about available student support services. This information in written form, however, is almost exclusively available in English, denying access to those most in need, a significant shortcoming particularly given that 45 percent of students reports a primary

home language other than English. The school provides a wide range of information about educational opportunities outside of LHS for struggling students (e.g., JobCorps, YouthBuild, UTEC), for health services (e.g., suicide hotlines, birth control and pregnancy support, drug and alcohol prevention, eating disorder support), for partner programs (e.g., Catie's Closet, SCORE, Upward Bound), and for after-school programs. The LHS Parent and Student Handbook is online on the school's website, as is helpful information about programs such as free and reduced price lunch. Attached forms, however, are posted only in English. The school communicates reminders to families via *Connect-Ed* on a consistent basis, although these calls are primarily in English. Families also communicate with other families at sporting events, helping spread the word about available services. The school informs students of opportunities by way of visits to their advisory by guidance counselors; students can then pass that information on to their families. Teachers are responsive to emails from families about student progress and regularly keep online records updated. LHS teachers, however, use a variety of different programs to report student progress (X2, EdLine, and Google Classroom), which can be confusing for families. The ELL department supports family access to these programs by holding an annual event for families of ELL students to learn how to use X2 for checking attendance and grades for their students. While the school's website can be translated automatically by Google, there is no availability of materials in other languages, with a few exceptions (parent handbooks from 2013-2014 in Spanish, Portuguese, and Khmer). A significant portion of ELL students are refugees and their families may not be literate in their native language or proficient in using the Internet. Part-time liaisons in the student support office speak Spanish, Burmese, French, and Khmer. Tutors on staff sometimes serve as translators. A consistent or reliable system for translation is lacking, nor are there always translators available for different specialized situations. The Endicott survey shows 76.7 percent of families is in agreement that student support service information is provided; however, all 1,150 families responding were surveyed in English only. Given the large diverse population at LHS, it is likely that families who are not proficient in English are in need of support services but have no reliable way to communicate with LHS staff. These families will not benefit from the wealth of options available for student support due to the lack of appropriate translation services undermining the ability of the school to meet all student needs. Access to critical information is the key to bringing services to bear on student needs. (self-study, parents, department leaders, School Resources Standard Subcommittee, Endicott survey, cafeteria manager)

Across all special service areas, support services staff use technology to oversee and enhance the delivery of an effective range of coordinated services for each student. Technology resources are readily available to staff members for the purpose of recording, developing, and maintaining grade reports, transcripts, special education and 504 plans, and student health records. The special education staff members use Easy IEP for plan development, and accommodations are uploaded to X2 for teacher access. Guidance counselors use Naviance, X2, Parchment, the DESE data warehouse, the College Board's website, EdLine, and Google Docs. Nurses manage student health documentation with Healthmaster software and upload medical alerts into X2. The library/media services program uses an automated student management system for checking books in and out and for writing resource reports. Additional examples of technologies used are a Brightlinks interactive screen for teaching research skills, the 30 computers in the main library class use area, and an additional lab adjacent to that room. Google Docs is the save mode of choice. The library media specialist uses virtual resources such as

databases and electronic books as well as audiobooks to supplement classroom materials for teaching and research. When the student support services staff members can and do leverage their efforts through the use of technology, they more effectively provide a wide range of coordinated and efficient services to a student body with diverse needs. (self-study, teacher interviews, classroom observations, teachers, student shadowing, student work, parents, school leadership, school support staff)

Student counseling services have an adequate number of certified/licensed personnel and support staff members who deliver a wide array of services but without formal coordination. Student counseling services at LHS are plentiful and high quality and are coordinated through the director of student support services through weekly meetings and delivered by house offices to meet the needs of students. Guidance counselors have begun to deliver a written, developmental program through the advisory period. They meet regularly with individual students to provide personal, academic, career, and college counseling. They engage in individual and group meetings with all students, although much more frequently with 12th grade than with younger grades. With the newly developed comprehensive guidance curriculum, students in grades 9-11 are receiving significantly more services and information than in years past. House social workers and housemasters partner with guidance counselors to deliver collaborative outreach and to make referrals to community and area mental health agencies and social service providers. House teams use ongoing, relevant assessment data, including feedback from the school community, to improve services and ensure each student achieves the school's 21st century learning expectations, through the teacher assistance team (TAT) process. The house team is an effective structure for ensuring school counseling services are implemented well for all students. Students receive myriad supports through their house team. Each of the four houses serving grades 10-12 has a housemaster, two guidance counselors, a social worker, and two clerks, a team that works collaboratively to deliver services to the students under its care. The Freshman Academy has a similar structure with one extra guidance counselor. A crisis coordinator works across houses to investigate bullying, self-harm issues, and staff/student conflicts. Eight additional staff (four from TRIO/Upward Bound and four from Talent Search/Gear Up) support college and career access. Three guidance counselors staff a college and career center. A mediation coordinator trains students annually and maintains an active roster of trained peer mediators. The coordinator of student support services supervises these individuals. Guidance counselors attend advisories regularly to deliver announcements, share information, and connect with students. Each guidance counselor works with about 13-15 advisories from grades 10-12 (including 9th grade repeaters). Guidance counselors have created a month-by-month schedule with key goals for these meetings and have also designed lesson plans for advisory sessions.

Guidance counselors meet all students individually at least once a year for scheduling. They meet with seniors at the start of the school year, and then have numerous follow-up sessions as they complete post-secondary planning. Students are very comfortable going to their guidance counselors and find them to be supportive. Guidance counselors have an overall caseload of 260-300 students. Guidance and career counselors expose non-college bound students to a variety of post-secondary planning options, including community-based job training and placement opportunities, adult education services, resources for ELL students, and military career centers. House social workers work with the rest of the house team to make external referrals for students when necessary. A quarterly newsletter called "Connections" helps inform

staff and families of services provided by the social workers, and includes their contact information. Students can also be referred to one of LHS's alternative programs through the house team. Each house team conducts a quarterly review of student performance.

As noted above, services are coordinated through the house office and the director of student support services. All outreach and support is logged through Aspen, creating a record so to enable the school to track any interventions and supports that each student receives. Weekly house team meetings run by housemasters and weekly guidance meetings run by the director student support services allow for collaboration and open communication to ensure the coordination of services provided. The school provides a wide variety of available student support service programs; however, there is no one single source where all student support services are listed and can be easily accessed by all LHS community members. For example, the Boys and Girls Club serves about 80 LHS students, but not all student support service staff are familiar with what kinds of services the Club provides. Different students could receive different student support service options, depending on which staff member they work with. The newly created guidance curriculum was designed to improve the consistency in services provided throughout the school. Weekly guidance meetings are used to review the curriculum/calendar and to inform counselors of all student support services and options available. A student who needs a particular program may not be connected to it because of a lack of consistent access to knowledge about the range of available options. House teams use the teacher assistance team (TAT) process to support students who are struggling. Students can be identified by any stakeholder, but most frequently by classroom teachers; upon referral, the guidance counselor then oversees the creation and implementation of an intervention plan. The team follows students for a four-week cycle focused on improvement. The connection between the TAT process and 21st century learning expectations is unclear. The school lacks any codified process for conducting ongoing assessment using relevant data, including feedback from the school community, to improve services and ensure each student achieves the school's 21st century learning expectations. Being able to effectively track student support service delivery enables the school to assess whether all students are given equitable access across all subgroups. (self-study, student shadowing, panel presentation, students, parents, department leaders, school support staff, School Resources Standard Subcommittee, Endicott survey)

The school's health services have an adequate number of certified/licensed personnel and support staff who provide preventative health services and direct intervention services; use an appropriate referral process; conduct ongoing student health assessments; and use ongoing, relevant assessment data, including feedback from the school community, to improve services and ensure each student achieves the school's 21st century learning expectations. The health services at LHS are comprehensive, accessible, integrated, and responsive to the needs of the student body. LHS uses a traditional school nurse office model with an office in both the Freshman Academy and the 1980 building. The Freshman Academy nurse office houses one full-time nurse and one support staff. The nurse's office in the 1980 building houses three full-time nurses and one full-time Spanish/Portuguese translator. These offices provide traditional school nurse health management services that include records management, triage, attention to minor injuries, parent contact, and referral services. The nurse office maintains a supply of emergency medication including EpiPens and Narcan. Students must have their student ID and a pass

from a teacher to access services at the nurse offices. No walk-in services are available without a pass. The nurse refers students with further needs to the school-based health center (SBHC) or outside agencies on an as-needed basis. Translation services available to the school nurse office, however, are inadequate, and sometimes health professionals must ask another student to translate for them, which is potentially a violation of HIPPA.

School nurse office spaces are adequate for confidential service delivery and for meeting the needs of the student body. The school is seeking to conserve office space by, instead of keeping paper copies, increasing the usage of paperless systems, including entering medical records into the Healthmaster system. The school is equipped with several automatic defibrillators stationed throughout the building and the school has identified and trained health emergency response personnel in their use. Two full-time nurses staff the special education department and tend to the needs of students with disabilities, including tube feeding and instruction in hygiene and personal care.

LHS also houses a school-based health center (SBHC), a satellite of the Lowell Community Health Center, funded by a state grant, and thereby is able to bill out to private health insurance. SBHC services are available by referral or walk-in and include sick visits, physical and sports exams, mental health and nutrition counseling, preventive education and immunization clinics, reproductive health, and referrals to outside agencies. SBHC staff comprises a nurse family practitioner, licensed clinical social worker, and medical assistant. This center is a vital resource that improves and encourages a positive relationship between the students and the community. SBHC falls under the jurisdiction of Massachusetts Department of Public Health and the US Health resources and Services Administration. SBHC has access to a phone line which offers reliable, professional, and immediate translation services in any language; this service is only used by the SBHC. The SBHC also refers out to other agencies on an as-needed basis, and is often able to connect a student with health-related services within the Lowell Community Health Center. All health care services housed within LHS follow appropriate guidelines which govern confidentiality and privacy. Student health assessments are ongoing and comprehensive. School nurses review student health data annually for compliance with immunization requirements and can refer students to SBHC for immunization clinics. School nurses also perform hearing, vision, posture, and BMI screenings and follow-ups with related services as needed. SBHC staff review data and adjust practice in accordance with their own governing body's procedures. The school nurse office reviews dismissal data annually and look for patterns and areas of concern. Clinical practice is reviewed and altered in response to this data, including increased collaborative management of chronic health issues, parent permission, and doctor's orders for over-the-counter medication for individual students. Students at LHS have access to a responsive, well-staffed array of health service options, which allows them to quickly manage their health-related needs and remain focused on academics. The school lacks any codified process for conducting ongoing assessment using relevant data, including feedback from the school community, to improve services and ensure each student achieves the school's 21st century learning expectations. When comprehensive services, including those provided by the SBHC, are responsive to student needs and are provided on-site promptly, the amount of time students must spend off-campus addressing their healthcare needs is minimized. (self-study, teacher interviews, classroom

observations, student shadowing, student work, parents, teachers, school leadership, school support staff)

Library/media services are partially integrated into curriculum and instructional practices; have an adequate number of certified/licensed personnel and support staff but who are not fully engaged in the implementation of the school's curriculum; provide a wide range of materials, technologies, and other information services in support of the school's curriculum; ensure that the facility is available and staffed for students and teachers before, during, and after school; are responsive to students' interests and needs in order to support independent learning; but do not conduct ongoing assessment using relevant data including feedback from the school community, to improve services and ensure each student achieves the school's 21st century learning expectations.

The Lowell High School library is sufficiently staffed with a licensed library media specialist supported by two assistants, a level of staffing adequate to support the school's curriculum and the curriculum frameworks. According to the Endicott survey, 51.1 percent of staff members states that library/media services has sufficient certified/licensed personnel and support staff; 28.2 percent disagrees. The library media services are integrated into the curriculum but not fully integrated in the implementation of the school's instructional practices. To that end, the library media specialist regularly meets with the director of curriculum and instruction, department heads, and teachers. She provides a two-day orientation program for all thirty-two 9th grade classes that targets 21st century skills: research, higher order thinking, and decision-making. The librarian focuses on the search processes for both print and non-print materials, the independent use of resources, the use of databases and Google Docs, the proper citation of sources, and the evaluation of websites. The library media specialist offers some professional development using 21st century resources such as databases and eBooks for teachers to use as part of their assignments; however, attendance has been limited at those professional development sessions. Teachers attend the technology professional development presented twice per week by the technology integration staff member who trains teachers how to use Google Docs and other technology functions with their classes when doing assignments.

The library/media specialist provides a wide range of 21st century materials, technologies, and other information services in support of the school's curriculum and student expectations. The center contains over 25,528 books but, based on copyright dates, some are outdated. Books are accessible through a computerized checkout system before, during, and after school. The library media center has periodicals, newspapers, classroom video services, and tapes for teacher use. According to the Endicott survey, 75.9 percent of students strongly agrees/agrees that the library provides them with a wide range of materials, technology, and other information services. The library media specialist, who orders the materials teachers need as well as books requested by students, has secured digital eBooks free from the state library to increase the number of titles and currency of the dated book collection and has acquired access to the state's new eBooks contract which offers over 100,000 electronic books for a few hundred dollars.

The district provides instructional technology support and funding for building-wide equipment; however, the library media specialist also purchases equipment from her own budget. She also has the

responsibility for booking reservations for the library computer labs around the building. Thirty computers are available in the main library room, with a computer lab adjacent to the library. Computers are available through the computer labs in the building, and the 21st century resources are made available through the library's website as a solution to outdated books in the library. Students who do not have computers at home come to the library to access information and work on assignments.

Library media services, coordinated by the librarian and supported by a Shannon Grant, ensure that the facility is available and staffed for students and teachers before, during, and after school to the best degree possible for the population of the school. Teachers report that they do not have the opportunity to use the library because the size limits its availability and use. Significantly, the Freshman Academy building has no library facility. The library is open after school for additional uses. For example, grant-funded tutoring services are available at that time and a library paraprofessional is available to help students who come in. According to the Endicott survey, 86.2 percent of students agrees that the school library is available to them before, during, and after-school hours. The library serves 600-1,000 students on a typical day and the library media specialist schedules teachers into the library via an online calendar. Some teachers and library staff report, however, that the facility and its resources are inadequate to meet the needs of the student population as well as the curricular and instructional programs. The physical size and configuration of the facility limit opportunities for staff members to schedule whole classroom use of the library media center. They do use the computer labs.

Library/media services are responsive to students' interests and needs in support of independent learning. Eighty percent of students agrees that the library staff is willing to help them find information they need or want. The library media specialist rearranged the library to create small seating areas, including soft comfortable seating for students to gather in groups. The library hosts 50-60 students or more a day during any given period. During advisory students have the opportunity to come to the library to complete work, work on projects together, or sit and read. The library media specialist orders book titles suggested by students. Students work on projects, use the Internet, or search for items of interest during and before and after school. The librarian orders multiple fiction copies per title to promote reading inside and outside of the center and has reorganized the library's print book layout to organize her fiction collection by genre in an attempt to increase reading. Due to limited budgets, materials to support bilingual studies are developing slowly. Recently however, the library media specialist added 202 English language learner books with some of the materials are at various reading levels according to the library's database statistics. Library/media services do not conduct ongoing assessment using relevant data, including feedback from the school's community, to improve services and ensure each student achieves the school's 21st century learning expectations; however the library media specialist does use several informal methods to gain feedback about the programs and services. An adequately staffed, sufficiently sized, appropriately equipped with an adequate collection and supportive technology, and responsive to the demands of the school's expectations for learning will enhance the ability of students to achieve the school's expectations for learning at the highest possible level. (self-study, library media specialist, library observations, panel presentation, facility tour, teacher interviews, department leaders, student shadowing, Endicott survey)

Support services for identified students, including special education students, students receiving services Section 504 of the ADA, and English language learners, have an adequate number of certified/licensed personnel and support staff who provide an adequate range of service for LHS, with the specific exception of the life skills program. Staff members generally collaborate with all teachers, counselors, targeted services, and other support staff in order to achieve the school's 21st century learning expectations, formally when possible, and informally when schedules do not align. Staff members regularly perform ongoing assessments using relevant data, including feedback from the school community, to improve services. Staff members, however, do not specifically measure student achievement in terms of the mastery of the school's 21st century learning expectations. LHS special education staff comprises a department chair, over 20 certified special education teachers, several paraprofessionals, in-house OT, PT, speech/language pathology professionals, school psychologists, and an adaptive PE teacher. The ELL staff includes a department chair, 17 certified ELL teachers, several ELL tutors, as well as a school-wide instructional specialist and an integrated technology specialist who also support teachers. Some co-teachers are intentionally scheduled with common planning time. Additionally, the school has created two teacher positions that are responsible for all the achievement testing for the special education process. This allows other special education staff members to spend their working hours delivering instruction and addressing student needs consistently and without interruption. Special education teachers without common planning time with general education teachers collaborate via email, telephone, or on an as-needed basis, but the school does not employ a consistent model for collaboration. LHS provides several different levels of inclusion opportunities for students with special needs: inclusion with consultation, inclusion with co-teaching, pull-out services for study skills, instructional support, reading, targeted math interventions, and social dynamics instruction. The special education department also provides instruction in core subjects by way of a special education teacher in a small size class. The school has established substantially separate classrooms for students with autism, severe or multiple disabilities, and behavioral/emotional disorders. These substantially separate classrooms have one or two certified teachers and paraprofessionals. The level of staffing at these levels is not adequate. Specifically the school lacks adequate, competent, and well-trained 1:1 staffing for students with severe disabilities during transition times, emergencies, and when covering for staff breaks and lunches. Considerable concern exists regarding the quality of materials available in the sensory room, and regarding the hygienic nature of cleaning for medical feeding tubing in the small sink designated for general classroom use in the intensive life skills classroom. Job coaching is part of the life skills transitional services, but there is no existing job coach position at LHS. Transition services are critical for students between the ages of 18-22, and without a job coach there is a significant gap in skills and necessary time spent training students to be successful employees. Classroom teachers have attempted to provide these essential services to their students but are not able to do so because of other classroom responsibilities. The school has little to no adaptive technology assessment for students with special needs. Adaptive technology services are currently provided through ancillary services — occupational, physical and speech/language therapists, and only to those students with the most severe needs. No adaptive technology assessments or services are provided for inclusion students, or students with a 504 plan. No students were observed using technology, and staff were unaware of the potential for students to use adaptive technology in a general education setting. Students who require services under Section 504 bring plan documentation outlining accommodations and strategies to their house

office where house administrative personnel then create the required documents and arrange for parent signatures. The information is then distributed to staff as soon as it is signed.

Students receive ELL instruction in a sheltered setting, with English classes leveled by basic, intermediate, advanced, and transitioning courses. English classes may have students with a mix of grade levels. Content courses may have students with a mix of grade levels and English language development (ELD) levels. The ELL team has the flexibility to move students up or down levels depending on their progress in acquiring English. Some teachers are able to collaborate through common planning time, while others must rely on email, before-school meetings, or after-school meetings. ELL teachers have also created an emergent literacy lab to address the needs of students with limited or interrupted formal education (SLIFE). This flexibility allows the team to adequately instruct students who are below the basic proficiency level. Expanded mental health and counseling services are needed for students who exhibit post-traumatic stress, often affecting students who arrived as refugees, in order for students to achieve the school's 21st century learning expectations. ELL students are included in many LHS programs. While 9th grade ELL students do not attend courses in the Freshman Academy building, they are served by a Freshman Academy guidance counselor. ELL students in the 10th, 11th, and 12th grades are integrated into houses and the advisory program. The school includes ELL students in school-wide programs such as COMPASS, student activities, clubs, and sports. ELL teachers employ regular formative assessments in classes and assess students via the annual ACCESS test. Incoming ELL students are assessed with the W-APT with placements then verified by classroom teachers. The support for teachers of ELLs in general education classrooms is limited to a school-wide instructional support specialist. While most general education teachers are trained in Rethinking Equity and Teaching for English language learners (RETELL), this training is not sufficient to adequately meet the diverse needs of the higher level ELL students at LHS. Additional support, and widely available ACCESS data, especially reported by domain (reading, writing, listening, speaking) is needed. Overall, when LHS identified students are well supported in special education and ELL programs by a large number of well-trained staff, students make comparable academic progress to their general education peers. The provision of sufficient services to address a broad spectrum of student needs especially for supporting former refugee students further enhances the ability for students to make progress toward the maximum achievement of the school's 21st century learning expectations. (self-study, teacher interviews, classroom observations, student shadowing, student work, teachers, parents, School Resources Standard Subcommittee, school leadership, school support staff)

Commendations:

1. The successful pursuit of grant-funded programs to provide comprehensive educational opportunities to various at-risk populations within the student body, including a therapeutic day school (LeBlanc Day School), the student leadership and mentoring program for upperclassmen, compensatory services for students who have been suspended for long periods of time or who are not meeting with success in a traditional high school, and a before- and after-school tutoring program in the library
2. The wealth of strong options for student support, both in and out of school, for almost any need that may arise, including services for struggling students (e.g., JobCorps, YouthBuild, UTEC),

for health services (e.g., suicide hotlines, birth control and pregnancy support, drug and alcohol prevention, eating disorder support), for partner programs (e.g., Catie's Closet, SCORE, Upward Bound), and after-school programs

3. The effective use of a wide array of technology to support the delivery of services to all students
4. The design and highly effective functioning of equitably staffed house-based teams in both grades 10-12 and in the Freshman Academy to ensure that counseling and support services are available for all students
5. The provision of a comprehensive range of varied health service options within the school including preventive health services, health assessments, referrals to outside providers, and the added resource of the school-based health center (SBHC)
6. The high level of engagement of the library media specialist in the integration of library/media services in the school's curriculum by way of regular meetings with the curriculum and instruction supervisor, department heads, and teachers; the orientation to program provided to all grade nine students focused on 21st century skills such as research strategies, higher order thinking, and decision-making; and increasing the range of electronic resources such as eBooks and data bases
7. The library media specialist's redesign of the library through the creation of many small seating areas to make it more welcoming to students and to make it a center for learning for all disciplines
8. The Compass Program pilot program (21st century program grant funded) designed to transition approximately 40 students from 8th to 9th grade during the summer of 2015
9. The maintenance of effective systems for implementing timely, coordinated, and directive intervention strategies for all students, including the focused use of the teacher assistance team (TAT) to support struggling students by reviewing assessment data, suggesting classroom interventions, and bringing to bear necessary support services
10. The provision of training in Rethinking Equity and Teaching for English Language Learners (RETELL) to most general education teachers

Recommendations:

1. Continue to ensure full access to all families to available support services for identified students by providing consistently reliable translation services by translators who are appropriately trained for a given situation (i.e., registration, discipline, initial assessment, crisis, medical needs) in student/parent home languages for both printed materials and in-person meetings
2. Create a coordinated method across all curriculum areas by which students continue to build upon the library media specialist's pre-existing 9th grade 21st century training in independent research strategies, the use of information resources to enhance the achievement of the school's student expectations through higher order thinking, inductive, deductive reasoning, and independent work
3. Develop a codified process for fully engaging the library/media personnel in discussions about curriculum and instruction to ensure appropriate communication about library/media purchases that support teaching and learning

4. Undertake an inventory of available resources in the library media center focusing on the overall age of the collection, its level of integration with the school's 21st century learning expectations, and the suitability of range of resources for English language learners
5. Ensure that the physical size of the library media facility is capable of presenting a fully integrated library/information services program and that funding is sufficient to build and maintain a collection of library materials that fully support ELL students the achievement of the school's identified 21st century expectations for learning
6. Establish a resource for job coaching to help life skills students engage in meaningful employment in a real-world setting
7. Establish a system including special education testing in low-incidence languages to ensure the accurate assessments, distinguishing between student needs in ELL, special education, and/or mental health counseling
8. Ensure that all support service area (counseling, health, library/media services, support services for identified students) regularly conduct ongoing assessments using relevant data including feedback from the school community to improve student services and to ensure that each student achieves the school's s 21st century learning expectations

7 Community Resources for Learning

The achievement of the school's 21st century learning expectations requires active community, governing board, and parent advocacy. Through dependable and adequate funding, the community provides the personnel, resources, and facilities to support the delivery of curriculum, instruction, programs, and services.

1. The community and the district's governing body provide dependable funding for:
   - a wide range of school programs and services
   - sufficient professional and support staff
   - ongoing professional development and curriculum revision
   - a full range of technology support
   - sufficient equipment
   - sufficient instructional materials and supplies.

2. The school develops, plans, and funds programs:
   - to ensure the maintenance and repair of the building and school plant
   - to properly maintain, catalogue, and replace equipment
   - to keep the school clean on a daily basis.

3. The community funds and the school implements a long-range plan that addresses:
   - programs and services
   - enrollment changes and staffing needs
   - facility needs
   - technology
   - capital improvements.

4. Faculty and building administrators are actively involved in the development and implementation of the budget.

5. The school site and plant support the delivery of high quality school programs and services.

6. The school maintains documentation that the physical plant and facilities meet all applicable federal and state laws and are in compliance with local fire, health, and safety regulations.

7. All professional staff actively engage parents and families as partners in each student's education and reach out specifically to those families who have been less connected with the school.

8. The school develops productive parent, community, business, and higher education partnerships that support student learning.

Conclusions

The community and the district's governing body provide funding for a wide range of school programs and services, sufficient professional and support staff, some professional development and curriculum revision, technology support, equipment and instructional materials and supplies, but the funding is not dependable. Lowell High School has numerous and varied course offerings and programs for students. The school catalog describes dozens of different courses and electives in most of the ten departments. The school offers several Pathways in various disciplines (e.g., engineering, culinary, business). The school offers most classes at the honors and college level and also provides numerous AP and dual enrollment offerings as well as a range of targeted ELL and special education courses. Teachers may propose new classes, and classes will run if there is enough student interest. In addition to these academic classes, the school provides curricular enrichment through many student clubs and student support programs such as Trio/Upward Bound. The school maintained appropriate staffing levels for the 2014-2015 school; however, staff assignments are not always equitable, as the size of classes assigned to individual teachers can vary widely due to the constraints of the master schedule. A class size report from May 2015, shows average class sizes range from 17-23 students in most departments with smaller averages in special education and larger in some electives like band. It should be noted that as a strategy of assigning staffing to meet the greatest needs of students, remedial classes have a smaller average size than honors and AP. In 2014-2015 teachers carries a caseload of around 120 students. In the area of professional support personnel, along with the guidance counselors assigned to each house, the support staff includes three additional counselors without specific caseloads who work to support various programs across the school. Some programs rely on grant funding which jeopardizes their long-term existence which becomes dependent on the vagaries of the funding process/sources. For instance, the summer school grant was eliminated recently thus making the recovery of credits needed for graduation more difficult. The tutoring program funded by the Shannon Grant is based on the calendar year and not the academic year which delays the disbursement of funds for several weeks in January. Other grants, such as the Commonwealth Corp initiative for job training and work opportunities and the Perkins grants for career, vocational, and technical education also expand the range of school programs. The school also uses grant funds, which can be uncertain in nature, to underwrite the cost of additional personnel who supplement the teaching and support staff (e.g., Youth Harbors and ELL tutors). The school has provided limited outside professional development in recent years due to lack of funding which has led to a shift in mindset about using existing staff to share their expertise and good practices. The commitment to somewhat of an in-house training model has benefits. Through this model, identified lead teachers in each department provide opportunities for faculty observation of innovative practices, and they also contribute to curriculum revision in some departments. The district supports their additional work through stipends.

Technology personnel complete needed repairs through a ticket request process but repairs are not consistently completed in a timely manner. Technology staffing includes a network manager and 1.5 technicians in the school. In addition, district-wide technicians complete special projects or high volume

ticket requests, a system that works sufficiently well. The tracking of the tickets shows the submission of over 8,500 in a two-year period. The school employs a technology integrations specialist (ITS) who works with the 32 Educating for Growth and Excellence (EdGE) classroom teachers. The ITS serves the needs of the entire school, 200+ teachers, not just EdGE classrooms, for instance helping to roll out and train the staff on the use of new Macbook airs (for every teacher) and to provide workshops and in-class training for all staff at LHS. The EdGE classrooms are equipped with a wide range of technology that supports instructional practice. Students have the instructional materials and supplies that they need, often including a textbook that they can leave at home with another copy in their classroom. Chapter 70 of the Massachusetts General laws requires the city of Lowell to meet net school spending requirements, but this rarely occurs. Once the district finalizes all of the staffing needs and non-personnel numbers (for transportation, special education, equipment, and technology) in the spring, the school department determines what the gap is between spending and revenue and determines how much funding is needed from the city. In 2013, the city fell short of the requirement set by the state by $3.8 million. The 2014-15 school year was the first time that the city met the school spending requirement. The failure to provide consistent funding aligned with the Massachusetts guidelines for net school spending will undermine the ability of the district to provide personnel, resources, and facilities to support the delivery of curriculum, instruction, programs, and services. (self-study, online course selection guide, school leadership, parents, student shadowing, Community Resources Standard Subcommittee, panel presentation, central office personnel)

The school does not adequately develop, plan, and fund programs to ensure the maintenance and repair of the building and school plant or to properly maintain, catalogue, and replace equipment, but does ensure that the school is clean on a daily basis. The city of Lowell rather than the school department handles much of the maintenance and repair at Lowell High School. According to the Endicott survey, only 19 percent of teachers reports that needed repairs are completed in a timely manner. Building custodians have responsibility for some maintenance and repair in the building. For example, they annually refinish floors and clean classrooms and furniture. The school has an in-house HVAC technician who is the first to respond to relevant concerns. If he is unable to respond, the school department brings the issue to the attention of the appropriate city department. Repairs in other areas are also the responsibility of the city of Lowell rather than the school includes plumbing and electrical systems. The multiple layers that exist in the spending process can also interfere with effective and timely maintenance and repair. Maintenance issues contribute to safety concerns in all of the LHS buildings. Handrails in stairwells are not connected to walls, the HVAC system is inconsistent and creates temperature fluctuation, safety equipment (fire hoses) have damaged glass casings which can impair their function, sections of the roof leak and as a result, create puddles which have caused injury. At the same time, the city and school department have made significant investment in the high school buildings over the past three years, including replacement of some exterior doors, roofing, and floors and the repair or renovation of the special education suite, the cafeteria service area, the little theater, and the auditorium in the Freshman Academy. Additionally, the school renovated the Kane Courtyard, repaired/replaced water bubblers, upgraded lighting and controls in all buildings, and added signage both inside and outside the school building.

The school properly maintains accurate lists of equipment on site, but the ongoing maintenance and the replacement of equipment is not consistent. The district puts out to bid a preventative maintenance and repair contract every three years which requires two preventative maintenance visits per year. Needed repairs, however, for items like windows, doors, and lights are handled by a ticketing system through which school custodians submit requests to the city's land and building department. With these repairs dependent on the city staff and not school personnel, the availability of city workers can often delay the needed repairs. The school's custodial staff is responsible for the day-to-day cleaning of the school. The school uses a custodial duties checklist that night custodians are expected to complete daily. Three custodians are available during the school day and fourteen work at night (from 3:00 p.m. to 11 p.m.). Although only 42 percent of teachers reported that the school is clean and well-maintained on a daily basis, the facility tour and general movement of the visiting team around the building revealed few concerns around cleanliness and very little graffiti. Areas where daily maintenance is challenging are in snow removal and in cleaning the pool. The school lacks proper equipment for the removal of snow and ice. The development and full funding of plans for maintaining and repairing the school plant will positively impact teaching and learning. (self-study, Endicott survey, facility tour, student shadowing, school support staff, superintendent)

The community does not fully fund a long-range plan that addresses programs and services, enrollment changes and staffing needs, facility needs, technology, capital improvements, and sufficient instructional materials and supplies. The central office is open to new program proposals when possible, such as the Freshman Academy or the grant-funded Career Academy, but the school district does not have a clear process for evaluating the effectiveness of various programs or for prioritizing where to spend money. At the high school, while there is no formal oversight committee, a few years ago building administrators began to review current programs and took steps to make changes. For example, the career pathways programs (culinary arts, business) were found to be in need of reorganization. As a result the Perkins Grant was rewritten to better meet student needs. The headmaster plans to use the recommendations in the upcoming NEASC report to guide planning for moving forward. Enrollment increases and decreases have not led to an increase or decrease in staffing. High school enrollment has decreased over the past several years according to the New England School Development Council report, but the school administration has sought to maintain consistent staffing levels. Positively, this has resulted in reasonable average class sizes and caseloads in 2015 that allow teachers to more fully meet student needs. The school is in the process of implementing a long-term plan for technology through the year 2017. This has resulted, for example, in the addition of a dedicated technology specialist, but technology funding remains a concern. As a result, although efforts have been made to strengthen the technology at LHS, problems with networks, equity, and access still exist.

The school district submits a list of facility needs to the city and the individual requests are prioritized and then approved or denied by the city officials. This process does not lead to concerns about the building being addressed in a timely and efficient manner. The city and the school district have invested in several large-scale renovations, such as in the theater in the Freshman Academy, but many capital improvement needs remain unfunded. In the 2013-2014 school year, a comprehensive facilities assessment by OMR Architects determined that the building's needs, based on enrollment trends for the

next ten years and the fluctuations in enrollment, provide justification for a renovation or for the construction of a new high school. A request has been submitted to the Massachusetts School Building Authority (MSBA) and has been accepted and is being looked upon favorably. The city of Lowell and the Lowell School Department are unified in their support for this petition to the MSBA. The adoption and funding of a comprehensive, long-range plan for programs and services, facility needs, technology, and capital improvement will ensure the ability of Lowell High School students to achieve the school's expectations for learning. (self-study, panel presentation, central office personnel, school support staff, school board, OMR Architects Study)

Building administrators are involved in the development and implementation of the budget for the school, but faculty members are only indirectly and inconsistently involved in the process. In a facility with over 300 faculty and staff, the budgeting is not a collaborative process. The leadership team of 15 people (the headmaster; the director of curriculum, instruction, and assessment; the student support services coordinator; and the department heads) has input into the budget and represents the faculty from their departments in these decisions. The Massachusetts Chapter 70 state aid formula mainly determines the amount of funding available in the district each year. Once the school's funding level is finalized using a formula based on October 1 enrollment numbers, at the school level the headmaster and the director of curriculum determine the further allocation of funds (e.g., amounts for office supplies, textbooks, technology, library/media, and professional development). They can make changes between line items as the year progresses. Building administrators work with the department chairs to develop budgets for each department. Teachers do not have a clear understanding of how much money is available for course-related materials or how the department money is distributed. According to the Endicott survey, 82 percent of teachers disagrees with the statement, "I have input into the development of the school budget." In some cases, teachers request specific materials in the spring needed at the beginning of the year, while others may be encouraged to make requests at the end of the year if money should still be available. With regard to supplies, the accounts payable clerk at the high school sends a list of requested supplies to the city in July. Some of these supplies are ordered, some are changed to less expensive items, and some are not ordered at all. Throughout the school year, teachers can request basic supplies through their department chair. As the end of the year comes, however, teachers cannot predict if needed supplies (e.g., scantron sheets, white board markers) will be available. The dependence on grant funding for some programs also contributes to a sense of distance from the process for some teachers. The lack of real input into budget development leads to a sense of fruitlessness about the budget process and raises questions about equity. (self-study, teachers, Community Resources Standard Subcommittee, teacher interviews, school board)

The school site and plant support to a limited extent the delivery of high quality school programs and services. Dedicated spaces support a wide variety of programs. The school's large auditorium, a smaller theater in the main building, and a newly renovated auditorium in the Freshman Academy allow for concurrent performing arts classes and multiple after school activities and events. The school also has a student-run restaurant, a store, and a television studio all of which are connected to one of the Pathways. The field house complex has sufficient space for physical education classes and athletics, including a pool, weight room, and gym space. The Junior ROTC program has a cluster of classrooms available,

and other community partners, such as Youth Harbors and Trio, also have space within the school. The school has recently invested, through a grant, in 32 EdGE classrooms, which are state-of-the-art classrooms that allow teachers to share content in various modalities over multiple displays or share differentiated content on various displays using iPads or iPhones that connect to three large screen Apple TVs. The teachers who volunteered or were selected for participation in the five-year implementation of the program received training around how to adapt their curricula to take full advantage of the technology. The school is currently in the third year of the EdGE implementation.

At the same time, physical plant issues many of them related to the age or design of the buildings interfere with the school's ability to support programming and preserve a fully supportive learning environment. These issues include leaks both in the roof, the tunnel, and from sinks; temperature fluctuations where one room is considerably warm while another is considerably colder; and the presence of pests in the building. The leaks in the bridges have created a slip/fall hazard. Many rooms in all three building have windows in need of repair. The nurse's office in the 1980 building is small and not easily navigated by wheelchair-bound students. Additionally, the 1922 building in particular is not fully accessible to individuals with physical handicaps. The dining area in the main cafeteria is at or near capacity, so that during the more crowded lunch period, tables are set up in the foyer outside the student support office. The resulting need to run four lunch periods has significant impact on the flexibility of scheduling students, classes, and common planning time. The OMR Comprehensive Facilities Assessment identified concerns about the lack of capacity of the electrical system resulting in the inability to support upgrades in technology. Physical plant issues also interfere with the ability to fully implement the school's curricula. For example, the art department, with its location in the center rooms of the old building, does not have natural light or adequate ventilation in its classrooms. One frequently cited issue was the ability of the science labs in both the 1922 and the 1980 buildings to support modern science curriculum and pedagogy. Specifically, the labs in the 1922 building are outdated and in need of repairs to drainage systems and teachers in the 1980 building share access to labs only through a sign-up system. Due to the inadequacies of these lab spaces, teachers sometimes use computer-based simulations instead of actual labs. Even within a given department, the facility supports the curriculum at different levels of effectiveness and equity. Thus, while there is newly renovated space for older life skills students to engage in their curriculum, the parallel facilities for other life skills students do not allow for full service delivery. In terms of technology, while some classrooms are outfitted with cutting edge technological support, others are not, severely limiting the school's ability to provide equitable access to up to date technology for all students. The lack of strong facility features that support the delivery of the school's curriculum and the use of best instructional practice severely hampers students' ability to fully achieve the school's academic expectations. (self-study, facility tour, student support services, teachers, students, Community Resources Standard Subcommittee, student shadowing)

The city of Lowell and the school do not maintain comprehensive documentation that the physical plant and facilities meet all applicable federal and state laws and are in compliance with local fire, health, and safety regulations. The city of Lowell owns the school buildings, thus city departments maintain many of the documents related to compliance with federal and state laws. Within the school department, the

superintendent for finance and operations coordinates document maintenance with the headmaster. Occupancy permits for each of the three buildings (1922, 1980, and Freshman Academy) are verified by the city's building department and kept at the school. Specific occupancy permits, however, for given spaces (i.e., the Burgoyne Theater in the Freshman Academy and the two cafeterias) are not posted in the building. ASAP Fire and Prevention maintains records relating to fire and safety. Aramark food service confirms that there are monthly inspections and reports to DESE and twice-yearly audits by the health department. The school acknowledges concerns about accessibility for the physically challenged, especially in the 1922 building and the Freshman Academy. The 1922 building has no ground level access for wheelchairs which require the use of a lift to enter. The ramp for emergencies is not up to code. All of the buildings are equipped with elevators and elevator inspections are up to date and clearly displayed. The elevators are not all big enough to fit a gurney or a wheelchair and do not provide access to all parts of the facility. The comprehensive facilities assessment done by OMR Architects in March 2014 cited several areas of concern where stairs and handrails also are not up to code. A lack of handicap access throughout all three buildings limits students' access to an equitable educational experience. (self-study, facility tour, school board, support staff, teachers)

Most professional staff members actively reach out to engage parents and families as partners in each student's education and some reach out specifically to those families who have been less connected with the school. Teachers and administrators are required to actively engage in outreach activities, a topic which is included as part of the evaluation tool for administrators and teachers. The school assigns students to one of four houses which consist of a headmaster, two guidance counselors, and a social worker. The school provides parents an orientation to the house system both when their children are freshmen at the Freshman Academy and then again when they enter the tenth grade. The student remains in the same house and families with multiple students are also placed in the same house to provide consistency for the family. The Freshman Academy runs regular parent outreach events. Most teachers have an online presence, but not all. Most teachers post homework assignments on various online sites. Some teachers are also collecting work using various online platforms. The school uses *Connect-Ed* to inform parents of events that are occurring at the school, such as open house, Friends of Lowell High meetings, and college information nights. The school places some of these calls in the more prevalent students' native languages to encourage broader involvement. All teachers are using Aspen to record students' progress and some parents feel this is a very efficient way for them to track their children's progress. Some parents feel comfortable using email to contact teachers and they report getting very quick responses to their inquiries. Friends of Lowell High School is an established parent group that works in conjunction with administration to promote activities and open communication between parents and the school. They also reach out to all the boosters clubs at the beginning of the season to encourage new members to join. The school keeps its website up to date with daily announcements of activities. The headmaster posts a blog which highlights major events. The Latin Lyceum also hosts a parent group. Teachers in the ELL department communicate with parents as much as possible. Without data to show the effectiveness of the school's multiple attempts and strategies to engage parents, it is not possible to assess the current level of success of the various outreach initiatives and establish goals for improvement. The higher the level of parent involvement in the daily life of the

school, more likely is the higher the level of student success. (self-study, student shadow, teacher interview, parents, school leadership, school support services, school website)

The school develops productive parent, community, business, and higher education partnerships that support student learning. The school has a number of strong partnerships. The Friends of Lowell High School is a parent group that meets monthly with the headmaster, the athletic director, and the student activities director. Other administrators also cycle through the meetings depending on the agenda. This group was originally intended to support athletics at the high school but has since developed into one that focuses on a variety of issues, including curriculum, scheduling, safety, and college and career planning. They also raise money to support scholarships. The school fosters this group by scheduling Freshman Academy events to coincide with Friends of Lowell High School meetings working to funnel parents from one to the other. The school or individuals in the school have sought and maintained a huge number of community and business connections which engage students in learning beyond the classroom. These partnerships range from national organizations like Air Force Junior ROTC to local businesses like the Jeanne D'Arc Credit Union. The Junior ROTC program has about 400 student participants and is a four-year program devoted to developing character through a program of academic courses combined with service alongside community organizations such as the Merrimack Valley Food Bank and the Lowell Housing Authority. On a more local level, the school engages with Catie's Closet a community organization that does in-school distribution of donated clothing and other necessities directly to needy students. Lowell High School and the Jeanne D'Arc Credit Union maintain a close alliance. Along with the credit union branch that is in the school and staffed by students who are in the business, marketing, and finance pathway, Jeanne D'Arc runs an annual "credit fair," where students are given an identity (i.e., income, family) and participate in a simulation. All seniors are invited to attend; approximately 300 participated last year. The other Lowell High School Pathway programs have developed their own links to local organizations and businesses for both learning opportunities and internship placements. Both Middlesex Community College and UMASS Lowell have a very strong presence at Lowell High School. Approximately 200 students participate in dual enrollment courses at the high school at no cost to the student. Along with dual enrollment, the school maintains several articulation agreements through which students who take classes at LHS (e.g., in the business department or culinary arts program) do not need to repeat the classes at the community college. The school maintains an easy relationship between the high school and the nearby higher education institutions. For example, teachers can easily secure classroom speakers for a wide variety of topics or audience members or judges for student presentations. Strong partnerships between the school and parents, the community, businesses, and higher education support rich educational options and experiences for students which greatly expands real-world learning beyond the walls of the school. (self-study, facility tour, panel presentation, teachers, parents, school board, school support staff, Endicott survey, Community Resources Standard Subcommittee)

Commendations:

1. The community and the district's support for a wide range of courses and high-interest electives offered at different levels in most departments

2. The district's strong financial commitment to maintaining reasonable class sizes that allows teachers to meet individual student needs
3. The city of Lowell and the school district for meeting the Massachusetts net school spending requirements under Chapter 70 for 2014-2015 school year
4. The city of Lowell and the school department's strong commitment to investing in needed upgrades over the past three years such as the replacement of some exterior doors, roofing, the renovation of the special education suite, and the renovation of the auditorium in the Freshman Academy
5. The focused renovations of the school's various auditorium and performance spaces that support the delivery of expanded learning opportunities such as guest speakers and various student productions
6. The daily maintenance of a remarkably clean building that reflects a high degree of student respect for Lowell High School
7. The clear and consistent commitment of the community, city officials, and the school district to securing funding for the renovation/construction of a new Lowell High School as evidenced by the funding of the OMR Comprehensive Facilities Assessment and the ongoing pursuit of a grant from the Massachusetts School Building Authority to underwrite a portion of the associated costs
8. The development and nurturing of strong partnerships with Middlesex Community College and UMASS Lowell which expand curricular offerings and provide opportunities to earn community college and for dual enrollment credits
9. The numerous partnerships with organizations, institutions, and businesses in the surrounding community that give rich opportunities for students to learn and grow outside of the standard classroom

Recommendations:

1. Consistently provide a dependable funding stream for school programs and supplies
2. Provide sufficient funding for a range of professional development activities including, where needed, expertise from outside the school/district to support and enhance the achievement of the school's vision and goals
3. Undertake an audit of the process for timeliness of maintenance and repairs at Lowell High School and respond accordingly
4. Report to the Commission on the district's success in developing and actuating the long-term technology plan through 2017
5. Create an inclusive, equitable, and transparent method for the development and implementation of the school budget that instrumentally involves all stakeholders
6. Report to the Commission the school's and the city of Lowell's progress in securing authorization and funding from the Massachusetts School Building Authority for siting and renovating/building a new Lowell High School
7. Immediately repair any leaks in the bridges joining the individual school buildings
8. Schedule an audit by an appropriately certified entity that clearly and fully assesses all issues related to handicap accessibility and respond as needed
9. Ensure that all documentation that the physical plant and facilities meet all applicable federal and state laws and are in compliance with local fire, health, and safety regulations
10. Build on the authentic learning experiences that community organizations and higher education institutions offer by making explicit connections to the school's core values, beliefs, and learning expectations

11. Identify an effective method to track the level of parent involvement at various activities with the goal of establishing baseline data to be used to identify methods to increase that involvement

FOLLOW-UP RESPONSIBILITIES

This comprehensive evaluation report reflects the findings of the school's self-study and those of the visiting committee. It provides a blueprint for the faculty, administration, and other officials to use to improve the quality of programs and services for the students in Lowell High School. The faculty, school board, and superintendent should be apprised by the building administration yearly of progress made addressing visiting committee recommendations.

Since it is in the best interest of the students that the citizens of the district become aware of the strengths and limitations of the school and suggested recommendations for improvement, the Committee requires that the evaluation report be made public in accordance with the Committee's Policy on Distribution, Use and Scope of the Visiting Committee Report.

A school's initial/continued accreditation is based on satisfactory progress implementing valid recommendations of the visiting committee and others identified by the Committee as it monitors the school's progress and changes which occur at the school throughout the decennial cycle. To monitor the school's progress in the Follow-Up Program the Committee requires that the headmaster of Lowell High School submit routine Two- and Five-Year Progress Reports documenting the current status of all evaluation report recommendations, with particular detail provided for any recommendation which may have been rejected or those items on which no action has been taken. In addition, responses must be detailed on all recommendations highlighted by the Committee in its notification letters to the school. School officials are expected to have completed or be in the final stages of completion of all valid visiting committee recommendations by the time the Five-Year Progress Report is submitted. The Committee may request additional Special Progress Reports if one or more of the Standards are not being met in a satisfactory manner or if additional information is needed on matters relating to evaluation report recommendations or substantive changes in the school.

To ensure that it has current information about the school, the Committee has an established Policy on Substantive Change requiring that principals of member schools report to the Committee within sixty days (60) of occurrence any substantive change which negatively impacts on the school's adherence to the Committee's Standards for Accreditation. The report of substantive change must describe the change itself and detail any impact which the change has had on the school's ability to meet the Standards for Accreditation. The Committee's Substantive Change Policy is included in the Appendix on page 79. All other substantive changes should be included in the Two- and Five-Year Progress Reports and/or the Annual Report which is required of each member school to ensure that the Committee office has current statistical data on the school.

The Committee urges school officials to establish a formal follow-up program at once to review and implement all findings of the self-study and valid recommendations identified in the evaluation report. An outline of the Follow-Up Program is available in the Committee's *Accreditation Handbook* which was given to the school at the onset of the self-study. Additional direction regarding suggested procedures and reporting requirements is provided at Follow-Up Seminars offered by Committee staff following the on-site visit.

NEW ENGLAND ASSOCIATION OF SCHOOLS & COLLEGES

Committee on Public Secondary Schools

SUBSTANTIVE CHANGE POLICY

Principals of member schools must report to the Committee within sixty (60) days of occurrence any substantive change in the school which has a *negative impact* on the school's ability to meet any of the Committee's Standards for Accreditation. The report of a substantive change must describe the change itself as well as detail the impact on the school's ability to meet the Standards. The following are potential areas where there might be negative substantive changes which must be reported:

- elimination of fine arts, practical arts and student activities
- diminished upkeep and maintenance of facilities
- significantly decreased funding
- cuts in the level of administrative and supervisory staffing
- cuts in the number of teachers and/or guidance counselors
- grade level responsibilities of the principal
- cuts in the number of support staff
- decreases in student services
- cuts in the educational media staffing
- increases in student enrollment that cannot be accommodated
- takeover by the state
- inordinate user fees
- changes in the student population that warrant program or staffing modification(s) that cannot be accommodated, e.g., the number of special needs students or vocational students or students with limited English proficiency

Lowell High School

Commendations:

Standard 1 – Core Values, Beliefs, and Learning Expectations

1. The orderly, comprehensive process of adopting the PBIS model in the Freshman Academy
2. The identification of and the growth of the use of the RIDER acronym for succinctly encompassing major features of the Lowell High School Core Values, Beliefs, and Learning Expectations
3. The commitment to the school's social and civic competencies as demonstrated by being highlighted and in murals, banners, and signs in high traffic areas of the school

Standard 2 – Curriculum

1. The Lowell High School's Pathways program that provides hands-on, minds-on experiences connecting high school course work to the skills and knowledge students need for post-secondary education and careers
2. The development of courses that provide experiences that mirror offerings at the college level, including Latin Lyceum, Advanced Placement, and dual enrollment
3. The use of essential questions in designing curriculum which strongly focuses on inquiry, problem, and higher order and big picture thinking
4. The emphasis on the ethical use of technology in some sections of the English curriculum
5. The use of the monthly department meetings which provide teachers with the opportunity to create, implement, and review common assessments, to target gaps in the curriculum, and to make changes to course components and assessments ultimately benefiting teaching and learning
6. The math department's recent institution of a highly collaborative professional learning network (PLN) for groups of geometry, algebra and pre-calculus teachers
7. The core academic departments annual use of some professional development funds to run highly effective data summits for grade-level teams

Standard 3 - Instruction

1. The full embrace by the Freshman Academy of the core values derived from the PBIS and its use of those core values to guide and shape instructional practice
2. The purposeful move from a teacher-centered to a student-centered approach to pedagogy that more fully engages students as active and engaged learners
3. The presence in a number of courses such as culinary, business, fine and applied arts, and broadcasting that are fully centered on applying knowledge and skills to authentic tasks
4. The burgeoning use of technology to support the vibrant delivery of class content and to make college courses accessible to all students
5. The strong school culture that supports non-evaluative teacher observations and an openness that creates the opportunity for peer observation and the sharing of successful instructional practices
6. The strong partnerships with local colleges that enable students to earn college credits

7. The general willingness across the faculty to give freely of their time to assist students, to examine student work, and to engage with colleagues in focused discussions about assessment results all with an eye toward improving instruction
8. The adoption of the use of the District Determined Measure (DDM) scores to identify the weaker areas upon which to focus in order to improve instruction.
9. The strength of the Lowell Teacher Academy in supporting the new teacher-mentor program and in providing professional development opportunities focused on expanding the range of effective instructional strategies

Standard 4 – Assessment of and for Student Learning

1. The broad use by a majority of teachers of classroom and departmental rubrics to provide students with clear direction and connection to learning goals
2. The regular scheduling of data summits for analyzing student performance common assessments in all core areas to create goals to improve student achievement and to shape district and building level goals to better accommodate student needs
3. The focused analysis of specific assessment data sources such as ACCUPLACER, MCAS results, ACCESS testing, to inform math course selection and student placement for English language learners (ELL)
4. The dedication of time at Freshman Academy weekly department meetings and dedicated department meeting time during early release to analyze student work and student achievement data, to examine student assessments, and to make adjustments to curriculum and instruction
5. The practice by a majority of teachers of identifying the course-specific expectations in all types of assignments
6. The provision by most teachers prior to summative assessments of the corresponding rubrics
7. The establishment of partnerships with Middlesex Community College and UMass Lowell that provide data on the readiness of Lowell High School graduates to complete college work
8. The establishment of a grading policy committee to create and implement a uniform school-wide grading policy

Standard 5 – School Culture and Leadership

1. The numerous strategies adopted to ensure a safe school culture, including the development of emergency protocols for lockdowns and evacuation drills, the use of closed circuit cameras to remotely supervise areas throughout the building, and the employment of security personnel and school resource officers (SROs)
2. The wide range of strategies employed to maintain a positive school culture such as celebrating student achievement on bulletin boards, with “high five” cards, on the school’s website and social media outlets, and the redesign of the of the main entryway with an emphasis on LHS as a teaching and learning community
3. The numerous school social and academic practices that support a respectful school culture such as The International Club; monthly cultural awareness events and celebrations such as the Day of the Dead Festival, Cambodian New Year, and Three Kings Day; and the establishment of an English elective course for all students called Race and Ethnicity

4. The highly effective adoption of the advisory period (for grades 10-12) and the freshman seminar (for grade 9) to encourage connections between students and an adult who knows them well who can assist them in achieving the school's 21st century expectations
5. The adoption and the ongoing expansion of the Positive Behavior Intervention System as a mode for developing and maintaining a positive, unified culture on a school-wide basis
6. The strong commitment to improve student learning as demonstrated by the willingness of the school to piloting the new Massachusetts DESE model for teacher supervision and evaluation
7. The director of curriculum and instruction's adoption of positive initiatives aimed at improving teaching and learning such as the introduction of the Instructional Rounds protocol for gathering data on instructional practice across the faculty
8. The commitment to maintain/reducing class sizes as evidenced by maintaining staffing levels even in the light of declining enrollment to enable teacher to better met individual student needs
9. The headmaster's consistently strong individualized support and broad-ranging advocacy for student success, including the establishment of community partnerships, the emphasis on increasing attendance rates and decreasing the dropout rate, the initiation of an alumni interview program, the development of a large scholarship base, and strongly emphasizing community partnerships, such as the dual enrollments with UMass Lowell and Middlesex Community College
10. The establishment of the LHS Educator Workshop Series allowing current school leaders to share their knowledge and experience on various best practices in classroom management, differentiated instruction, working collaboratively, and using technology with the main focus of improving instruction
11. The positive presence of collaborative and supportive structures and open lines of communication in place between and among the school committee, superintendent, and headmaster

Standard 6 – School Resources for Learning

1. The successful pursuit of grant-funded programs to provide comprehensive educational opportunities to various at-risk populations within the student body, including a therapeutic day school (LeBlanc Day School), the student leadership and mentoring program for upperclassmen, compensatory services for students who have been suspended for long periods of time or who are not meeting with success in a traditional high school, and a before- and after-school tutoring program in the library
2. The wealth of strong options for student support, both in and out of school, for almost any need that may arise, including services for struggling students (e.g., JobCorps, YouthBuild, UTEC), for health services (e.g., suicide hotlines, birth control and pregnancy support, drug and alcohol prevention, eating disorder support), for partner programs (e.g., Catie's Closet, SCORE, Upward Bound), and after-school programs
3. The effective use of a wide array of technology to support the delivery of services to all students
4. The design and highly effective functioning of equitably staffed house-based teams in both grades 10-12 and in the Freshman Academy to ensure that counseling and support services are available for all students

5. The provision of a comprehensive range of varied health service options within the school including preventive health services, health assessments, referrals to outside providers, and the added resource of the school-based health center (SBHC)
6. The high level of engagement of the library media specialist in the integration of library/media services in the school's curriculum by way of regular meetings with the curriculum and instruction supervisor, department heads, and teachers; the orientation to program provided to all grade nine students focused on 21st century skills such as research strategies, higher order thinking, and decision-making; and increasing the range of electronic resources such as eBooks and data bases
7. The library media specialist's redesign of the library through the creation of many small seating areas to make it more welcoming to students and to make it a center for learning for all disciplines
8. The Compass Program pilot program (21st century program grant funded) designed to transition approximately 40 students from 8th to 9th grade during the summer of 2015
9. The maintenance of effective systems for implementing timely, coordinated, and directive intervention strategies for all students, including the focused use of the teacher assistance team (TAT) to support struggling students by reviewing assessment data, suggesting classroom interventions, and bringing to bear necessary support services
10. The provision of training in Rethinking Equity and Teaching for English Language Learners (RETELL) to most general education teachers

Standard 7 – Community Resources for Learning

1. The community and the district's support for a wide range of courses and high-interest electives offered at different levels in most departments
2. The district's strong financial commitment to maintaining reasonable class sizes that allows teachers to meet individual student needs
3. The city of Lowell and the school district for meeting the Massachusetts net school spending requirements under Chapter 70 for 2014-2015 school year
4. The city of Lowell and the school department's strong commitment to investing in needed upgrades over the past three years such as the replacement of some exterior doors, roofing, the renovation of the special education suite, and the renovation of the auditorium in the Freshman Academy
5. The focused renovations of the school's various auditorium and performance spaces that support the delivery of expanded learning opportunities such as guest speakers and various student productions
6. The daily maintenance of a remarkably clean building that reflects a high degree of student respect for Lowell High School
7. The clear and consistent commitment of the community, city officials, and the school district to securing funding for the renovation/construction of a new Lowell High School as evidenced by the funding of the OMR Comprehensive Facilities Assessment and the ongoing pursuit of a grant from the Massachusetts School Building Authority to underwrite a portion of the associated costs
8. The development and nurturing of strong partnerships with Middlesex Community College and UMASS Lowell which expand curricular offerings and provide opportunities to earn community college and for dual enrollment credits

9. The numerous partnerships with organizations, institutions, and businesses in the surrounding community that give rich opportunities for students to learn and grow outside of the standard classroom

Recommendations:

Standard 1 – Core Values, Beliefs, and Learning Expectations

1. Ensure that a sufficiently wide range of stakeholders are involved throughout any processes for the development and future review of the school's core values, beliefs, and learning expectations
2. Ensure that the Lowell High School 21st century academic, civic, and social learning expectations for student learning are stated in measurable terms
3. Create school-wide analytic rubrics for each of the LHS student expectations that identify targeted high levels of achievements
4. Develop a procedure to ensure that the LHS core values, beliefs, and student expectations are actively reflected in the culture of the school, drive curriculum, instruction, assessment in every classroom, and guide the school's policies, procedures, decisions, and resource allocations
5. Develop a dynamic, collaborative, and inclusive process for regular review and revision, as needed, of the LHS expectations for student learning, based on research, multiple data sources, as well as on district and school community priorities

Standard 2 – Curriculum

1. Undertake an audit of the degree to which the current curriculum and its practitioners provide sufficient opportunities in multiple settings across the school day for students to practice and achieve each of the school's learning expectations and act on the results
2. Develop a curriculum template whose form will allow for the identification in all courses or units of study essential questions, concepts, content, and skills; the school's 21st century skills that will serve as the focus of each course; instructional strategies; and assessment practices that include the use of school-wide analytic and course-specific rubrics
3. Develop a plan to ensure that the curriculum engages students in cross-disciplinary learning, provides authentic learning opportunities, and engages student in the informed and ethical use of technology in all courses
4. In consultation with the district design a plan that will ensure sufficient vertical communication about curriculum with all sending schools to directly share and/or discuss data, trends in instruction, and curriculum, and that will ensure sufficient horizontal and vertical communication about curriculum for all curriculum areas
5. Ensure that all curricula (CCSS, NGSS, MA frameworks, etc.) identify the 21st century skills upon which they will focus
6. Conduct a needs assessment to determine the optimum levels of support for staffing, instructional materials, equitable and effective access to technology, equipment, supplies, facilities, and the resources of the library/media center

7. Develop a plan for the regular review of the curriculum that engages and supports all professional staff in the collaborative development, evaluation, and revision of the curriculum using assessment results and current research

Standard 3 – Instruction

1. Conduct a school-wide audit of instructional strategies and identify and advance the use of those strategies that improve the students' achievement of the Lowell High School 21st century learning expectations
2. Develop and execute a plan, with sufficient financial support and dedication of professional development time, to increase the level of use in all classes instructional strategies that personalize instruction, engage students in cross-disciplinary learning, engage students as active and self-directed learners, emphasize inquiry, problem solving, and higher order thinking, engage students in self-assessment and reflection, and further integrate technology
3. Ensure that all teachers have adequate and equitable access to resources that support the full-scale integration of technology as a tool for instructional practices and a support to student learning
4. Develop and execute a plan to increase the use of all manner of formative assessment within each classroom as a means of providing a basis for improving outcomes in instructional practice
5. Provide as feature of instructional practice more frequent opportunity for students to be able to demonstrate comprehension in a manner in keeping with their learning style
6. Increase opportunities for common planning time to improve instructional practice and to provide opportunities for relevant professional development within contractual hours
7. Develop a formal process for successfully soliciting input from students and parents focused on instructional practice

Standard 4 – Assessment of and for Student Learning

1. Develop a formal process, based on the use of school-wide rubrics, for assessing whole-school and individual student progress in achieving the school's 21st century expectations
2. Develop a process for communicating to students, families, and the school community at large the individual and whole-school progress in terms of the success of students in meeting the school's 21st century learning expectations
3. Maintain data summits for all content areas based on common assessments in order to provide the school with meaningful data to inform the development of curricula and instruction
4. Develop a process to ensure that all teachers identify prior to each unit of study the school's applicable 21st century learning expectation
5. Create a process by which teachers establish a common understanding of formative assessment in order to master and employ formative assessments among a wide range of assessment strategies and use their accumulated data to inform and adapt their instructional practices to improve student learning
6. Ensure that all teachers provide students with timely, substantive feedback and also provide opportunities for revision on both formative and summative assessments so as to demonstrate mastery of a given lesson

7. Provide dedicated time for all teachers to regularly examine student work and to have full access to other assessment data for the purposes of revising curriculum, instruction, and assessment
8. Further develop partnerships with post-secondary schools, using data gathered therefrom to inform the revision of curriculum and instruction through data analysis
9. Collect data from current students and alumni and use them to inform the revision of curriculum and instruction
10. Develop and implement a formal assessment plan that includes the regular use of both formative and summative assessments in all subject areas

Standard 5 – School Culture and Leadership

1. Assess the reasons behind the relatively large number (33 percent) of students who identified bullying as concern and pursue remedies to address this perception
2. Complete a needs assessment and develop a plan, with both short- and long-term components, to continue to increase the level of equitable access to challenging students for all students
3. Develop, with sufficient input from faculty members and LHS administrators, fund and implement a comprehensive professional development schedule that will avail teachers and allow sufficient time to meet for a broad range of professional development opportunities
4. Develop a plan to expand Instructional Rounds groups as a method of expanding the school's range of instructional strategies to include more classroom teachers, not simply lead teachers
5. Develop and implement a comprehensive master schedule that will, not only, meet the learning needs of the LHS students but also, create flexibility for teachers to collaborate with other teachers both horizontally and vertically to ensure smooth curricular transitions and the spread of best practices
6. With input from all appropriate stakeholders, develop a comprehensive plan to guide the use of faculty meeting time (more collaborative time and less administrative housekeeping), department meeting time (more opportunity for collaboration among teachers), and non-instructional teacher time (more designated common planning time) to focus more clearly on the achievement of the school's 21st century expectations
7. Identify and develop various structures and procedures which will provide parents, students, and teachers the opportunity for input into the school's decision-making process and will establish formal roles for them as key stakeholders in the advancement of the school and the achievement of its expectations

Standard 6 – School Resources for Learning

1. Continue to ensure full access to all families to available support services for identified students by providing consistently reliable translation services by translators who are appropriately trained for a given situation (i.e., registration, discipline, initial assessment, crisis, medical needs) in student/parent home languages for both printed materials and in-person meetings
2. Create a coordinated method across all curriculum areas by which students continue to build upon the library media specialist's pre-existing 9th grade 21st century training in independent research strategies, the use of information resources to enhance the achievement of the school's

student expectations through higher order thinking, inductive, deductive reasoning, and independent work

3. Develop a codified process for fully engaging the library/media personnel in discussions about curriculum and instruction to ensure appropriate communication about library/media purchases that support teaching and learning
4. Undertake an inventory of available resources in the library media center focusing on the overall age of the collection, its level of integration with the school's 21st century learning expectations, and the suitability of range of resources for English language learners
5. Ensure that the physical size of the library media facility is capable of presenting a fully integrated library/information services program and that funding is sufficient to build and maintain a collection of library materials that fully support ELL students the achievement of the school's identified 21st century expectations for learning
6. Establish a resource for job coaching to help life skills students engage in meaningful employment in a real-world setting
7. Establish a system including special education testing in low-incidence languages to ensure the accurate assessments, distinguishing between student needs in ELL, special education, and/or mental health counseling
8. Ensure that all support service area (counseling, health, library/media services, support services for identified students) regularly conduct ongoing assessments using relevant data including feedback from the school community to improve student services and to ensure that each student achieves the school's s 21st century learning expectations

Standard 7 – Community Resources for Learning

1. Consistently provide a dependable funding stream for school programs and supplies
2. Provide sufficient funding for a range of professional development activities including, where needed, expertise from outside the school/district to support and enhance the achievement of the school's vision and goals
3. Undertake an audit of the process for timeliness of maintenance and repairs at Lowell High School and respond accordingly
4. Report to the Commission on the district's success in developing and actuating the long-term technology plan through 2017
5. Create an inclusive, equitable, and transparent method for the development and implementation of the school budget that instrumentally involves all stakeholders
6. Report to the Commission the school's and the city of Lowell's progress in securing authorization and funding from the Massachusetts School Building Authority for siting and renovating/building a new Lowell High School
7. Immediately repair any leaks in the bridges joining the individual school buildings
8. Schedule an audit by an appropriately certified entity that clearly and fully assesses all issues related to handicap accessibility and respond as needed
9. Ensure that all documentation that the physical plant and facilities meet all applicable federal and state laws and are in compliance with local fire, health, and safety regulations

10. Build on the authentic learning experiences that community organizations and higher education institutions offer by making explicit connections to the school's core values, beliefs, and learning expectations
11. Identify an effective method to track the level of parent involvement at various activities with the goal of establishing baseline data to be used to identify methods to increase that involvement

Date Prepared	12/20/2016	
Project Name	Lowell High School	
Project Number	67150.00	
Subject	Focus Groups- Feasibility Study (v4)	
Meeting Location	LHS Lord Building Head of School Conference Room	
Meeting Dates	11/15/2016	
	11/16/2016	
Prepared By	Robert Bell, Alicia Caritano	a.caritano@perkinseastman.com
	T: 617-449-4001	F: 617-449-4049
Participants	Perkins Eastman: Robert Bell (all meetings), Alicia Caritano (11/15 am) Point Line Space: Peter Constable, Aaron Constable (11/16 all sessions except Custodial) Crabtree McGrath: 11/16/16 Culinary & 11/22/16 Foodservice only. LHS: See specific meetings below.	

Agenda Items		Notes
11/15/16 & 11/16/16	**All Focus Groups**	LHS Attendees: Refer to specific Focus Groups attendees noted below.
		Focus Group Process Overview: The LHS design & drawing process will take approximately 3 years before proceeding into construction. We are currently in the earliest phase, called Feasibility Study. We are gathering information, determining the space needs and developing goals/objectives with the City, School & Community. Through the design & drawing process, we will be meeting with LHS in the form of Focus Groups (+/- 4 times during the design process) and as full faculty forums (first one 12/7). Our objective in this first round of meetings is to understand the spaces needed, where they should be located & and any major equipment of functional requirements that might affect the shape/size and position of rooms. Current enrollment +/- 3,128 students. MSBA planned enrollment 3,520 students. MSBA average is 23 students per classroom. We will design layouts for average of 28-32 students per classroom LHS is currently experiencing. Current LHS teacher contracts are for 5 of 7 periods which is 71% efficiency. MSBA requires 85% efficiency & effective non-ownership of classroom. Refer to attached Process Overview Form with questions that were distributed prior to the meeting that serves as a framework for these Focus Group Meetings.

This Meeting Record is our understanding of the items as they were discussed. Please report any discrepancies to Perkins Eastman. If no discrepancies are reported in five working days, this Meeting Record will stand as published.

11/15/16 7:15-8:00	Safet;y & Security	LHS Attendees: Jeannine Durkin-Deputy Superintendent, Roxane Howe DIS/OPS, David Peaslee-LPD
		• At the start of the day students/staff come into both buildings; only main entrance is manned. • Future goal is to secure all entrances per recommendation in safety audit; 32 entrances exist • Existing sign-in sheet at security desk (Raptor), not totally secure • Plan is for freshman to be part of campus in future; separate entrance pending layout • Kirk St. one entrance is open currently for Gr.9 travel between bldgs • Over 10,000 visitors per year • Vestibule control options; fully controlled w/ check-in and separate manned security as opposed to reporting to administration office; astounding number of people pass through the building in a day; would prefer secure vestibule in each building. • Restaurant: Current Public access to restaurant from Kirk Street with a buzzer but no security, students can provide access via buzzer. Future possible storefront at restaurant for visibility/draw for restaurant as well as security. Ideal design would have visibility of security desk. • Also public access to bank and store • TV studio and maker space no public draw currently • Field House Auditorium & Cafeteria need thought re; after hours; design should allow for zoning & controlled access • Deliveries occur from multiple access points currently: maintenance area (not always manned), main entrance, & freshman academy; bulk of deliveries at Lord Building currently – difficult access for trucks that requires shuffling cars, delivery would need to be reconfigured. • Security Space Needs: Existing 3 in Lord Building – Police/Security/Dare and 1 at Freshman Academy. Future: ideally 1 for Freshman Academy if remote, SRO offices w/ meeting space approx. 150 sf, computer is remote w/ a couple of monitors, some schools secure command and control center w/ consoles or interior bunker type locked and secured room. Security Staff: also space for a couple of security staff, DARE is same space -needs to feel welcoming and accessible to students • Other security space needs pending Lobby design • House offices have a lot of traffic and would be good to be centrally located near the entrance • Student support office for enrollments also very busy and should be located near entrance • Field House has a lot of traffic and should be near security office • Unique challenges of canal & trolley including response time due to remoteness of buildings, if staffing permits would be beneficial to have staff in each building. • Multi-level bridges would help alleviate congestion and keep students in the buildings • Some open dining on the west side of the canal; a few incidents of issues with kids adjacent to tracks; option for cafeteria w/ contained outdoor dining (currently no recess option for air and sunshine; existing cafeteria is very contained and crowded and

This Meeting Record is our understanding of the items as they were discussed. Please report any discrepancies to Perkins Eastman. If no discrepancies are reported in five working days, this Meeting Record will stand as published.

		outdoors is a release- perhaps double duty space for outdoor dining and classes • No current student roof access • Special safety / security equipment: licenses by FCC use of the radios, need 1 antenna for repeater of the radios (currently roof of the old building)
11/15/16 8:00-9:00	**Health & Bioscience Pathway**	LHS Attendees: Roger Morneau-Dept. Chair, Killian McAnaney-Science Teacher
		• Pathway created after building was designed, so current configuration is not ideal • Core course microbiology; currently 1 room Bio Lab scheduled, future ideally micro & bio tech lab w/ clean room • Vision for pathway: medical side like teaching hospital demonstration /mock-training area or patient, if get Certified Nursing Assistant (CAN) program which is a goal, regular lab w/ curtained off area and exam table • CNA Training Area would need to be authorized by department of Education; LHS to confirm if this space should be included • Would like health and bioscience cluster in each building, • MSBA standard for lab 1440 sf plus Prep Room 400sf: Lab is one large space w/ fixed perimeter casework and loose interior furniture which can include mobile demonstration tables which floats, and prep room with 2-sided fume hoods, and standardized sizes gas etc. • Microbiology: ideally specialized Clean Room w/ fume hoods • New Clean Energy Pathway w/one course spearheaded by Killian; idea to include renewable teaching tool in building i.e. PV, geothermal, wind. PE noted that if budget does not allow for renewables at outset could plan for renewables to be included in the future. Collaborating w/ U Mass Lowell and Middlesex Community College – speakers and field trips. Part of class is field development, and getting credits. Curriculum is developing. • Clean Energy is a grant from Mass Clean Energy Center: **LHS to provide copy of Grant.** • Grants received would be subtracted from MSBA reimbursement • # of students in pathway varies; students can get in and out of pathways, hard to predict number currently, need to understand space needs pathway vs. larger science curriculum (can design to fit up to 28) • Combined Old “Kouloheras” Building East Side of Campus: no Health and Bioscience, Room 304A, 1 chemistry mixed use room 314, 304 mixed use • Flex Teaching Room could be lab room; medical terminology & procedures • State mandate: nobody owns a room, typically need to plan for 85% utilization (maybe less for Science due to labs) • Central Department Room: possibly a collaborative space for teachers that is not just for Science; proximity helps with efficiency • Organizational Models: Want collaborative clusters w/ Science in each, STEM school. Science is critical organizer because of specific rooms that are not interchangeable, possibly cluster w/ disciplines ie. Biology, Physics, Chemistry

This Meeting Record is our understanding of the items as they were discussed. Please report any discrepancies to Perkins Eastman. If no discrepancies are reported in five working days, this Meeting Record will stand as published.

		• Other Specialty Needs: Greenhouse, growing, rooftop equipment i.e. Weather Monitor • Big push in Lowell for gardens as a teaching tool; D House/coffee center (was a plant room), and greenhouse space Plant Room 650 – both are too small and not utilized; green space could tie to all levels of Bio and honors genetics, both existing spaces too small • Weather Center would be beneficial for Meteorology classes • Can the Canal/Bridges be featured in the design & educational mission / Building as a Teaching Tool i.e. hydroelectric power for clean energy, deflection of bridges, PV panels on bridge portions elevations (energy & shading) • Student and Department Input That Would be Beneficial: Future of teaching and learning? Students learning at their own pace? The flipped classroom? • Technology: Target at this time; 1 to 1- timing pending funding. • Biotech: None at this time, but was previously discussed with MCC, would like to pursue this – possible certified pathway. MCC Biotechnician program. Need to confirm if this program will be included in planning. • Microbiology vs. Biotech: both would need a clean room. • 9th grade: teams of 4 or 5 classrooms including a science lab? • Dual Enrollment: biology, U Lowell removed credit because LHS has no physical labs & resources for credit; UML Chemistry and Biology • Offices: currently Dept. Head in Teacher's Dept. Mezzanine in old building • **LHS to coordinate representation from U Mass Lowell & Possibly Middlesex Community College in next round of Focus Group Meetings.**
11/15/16 9:00-10:00	**Freshman Academy**	LHS Attendees: Jill Lang-Director, Bopha Boutselis-9th Grade Math Teacher, Mark Cullen-9th Grade History Teacher
		• Very important that Freshman Academy is separate: Freshman Academy model separates Freshman to accomplish a smooth transition between middle school and high school • Statistically separation helps; students need extra support beyond that of house model • Currently 760 students, typically 750-850, highest was 1000, surge anticipated next year • Currently 3 teams organized in clusters, originally 4 teams of 8 , 4th cluster removed a few years ago due to staffing cuts; plan for 4 clusters of 8 teachers of 110 students • Director w/ 2 support staff per cluster helps minimize behavioral incidents • Course offerings were less, now have more high honors, geometry and algebra • Team: Math, Science, English, Social Studies • Outside of clusters: 2 full time and 1 part-time Specialists, 2 specialist classrooms + 2 SPED that work w/ all classes, full-time suspension, balanced literature teacher, adjustment program, emotional disabilities (moved to main building 2 years ago due to space shortage but should be with FA) ,3? foreign language (spanish, Kamir, French) and 2 health, Missing Latin Lyceum, and ELL spaces (separate now due to space) – need direct connection to FA

This Meeting Record is our understanding of the items as they were discussed. Please report any discrepancies to Perkins Eastman. If no discrepancies are reported in five working days, this Meeting Record will stand as published.

		• Key to have guidance and social worker in Academy for quick response time to correct behavioral issues • Existing FA was middle school so layout does not reflect current HS needs. • Smaller communities w/in each cluster helps minimize class cuts and improve behavioral issues, staff recognizes students and knows who should/shouldn't be on the floor • Currently separate cafeteria and theatre; inherited the theatre which is currently used for seminar and assemblies but not crucial for future • Some Freshman activities on Main Campus help ease students into upper class campus: existing - gym, library & theatre, future possibly others i.e. Foreign Language? • Cafeteria: distributed dining w/ choice and scaled social dining vs. large area w/ multiple seatings. What is the ideal for the FA? Possibly dine on main campus? Need to explore safety benefits of smaller cafeteria but possible benefits of larger integrated cafeteria Freshmen can be vulnerable and need a safe space that is not too crowded. Freshman start as timid and unsure and some may not feel comfortable eating lunch in a large scale situation with all classes together; explore both separate and integrated dining. • Teachers Rooms: Currently 1 large teachers room on 1st floor. May be difficult to convince teachers not to have their own rooms for belongings, materials books etc. and time to travel to common area. Also concerned with space to leave their materials. State provides 100 sf / teacher/classroom for space for teacher. Friday 11/18 tour to Essex Tech w/ teacher planning rooms outside of the classrooms. Planning space includes some limited file cabinets/storage. Storage planned into classrooms as well as additional general storage. • Would like some separate area w/in room for multiple situations/flexibility i.e. separate cubicles for tests. • Teacher space: shared technology • Classrooms: how to personalize and share space? Concept "primary ownership" 85% utilization, plan for flexibility • Still have 100 sf/ for teachers which could be Teacher Planning Rooms or other • Classrooms: Flexibility, possible break out or pull-out /spaces (enclosure could vary), option shared space in the corridor w/ good visibility. • Existing Corridors: A bit small and can cause congestion, but also intimacy and no nooks and easy teacher insertion to prevent incidents, no cross corridors and no unsupervised areas, only one near nurses in existing, easy to supervise id and makes for good eye/contact and conversation w/ teachers, all corridors visible good line of site no hiding • Maker Space: created last year, part of integrated science used by science ea. cluster and Latin Lyceum, functions as a lab and need to schedule, directly related w/ curriculum, 3-D and laser printers w/ lab tables, large touch screen monitor part of a grant • Maker Space: Space can vary greatly pending on district needs.Where should space be located- proximity to 9th grade classrooms is part of Grant, adjacent to Media Center? could be beneficial to entire campus. **Roger to provide copy of Grant.**

This Meeting Record is our understanding of the items as they were discussed. Please report any discrepancies to Perkins Eastman. If no discrepancies are reported in five working days, this Meeting Record will stand as published.

		• Media Center: FA uses Main Campus library currently • Computer Lab: Rms 810 and 903, issues, 903 not enough room for notebooks at desks, State does not have an allowance for general computer labs that are not specific i.e. Graphics, expect this to be in Library or other space. Currently need to schedule rooms for classes to use this space. Alternate Idea: computer carts in each classroom, technology FFE/Technology budgets for computers etc. • Guidance/Social Work: Office 716A, 717Teachers: currently separated but not desired, just an existing space constraint • Main Office: 800, In-House Suspension 715, 1st,middle office Cluster 7 / ELL, next Rose Cluster 8 Guidance, last Gina Social Worker, Side Office Storage, Reception is 1 Clerk, need a security and check in office not currently available, all buzz in and go to Main Office; ideally want separate waiting room for parents separate from Office and students/ copy etc. 800 main office: 1 person works there, top left office 100 was 2nd student support specialist that was eliminated budget cuts would be beneficial, Student Support, Special Ed Testing, Conference, • Rm 811: Gear Up and Talent Search w/ Middlesex Community College: small classroom, need an office and a few desks and small table; need to check if Grant extends / funding, good to include office for outside partner or school counselors, but then would need large office and no classroom • Rm 902: Was teacher's room, now used for screen testing, hearing and vision, plus 2 nurses office 1 has 2 cots, the other has none • Rm 901: science but no classes scheduled, used sim to Maker Space, kitchen not used –was inherited, includes large lab tables which are missing in existing science rooms • Rm 852: Copy Room and Teachers' Lounge • Rm 850 / 851: captured room in back, now used as teacher room but not teaching because open and acoustical issues • Storage above theatre used as dressing rooms associated w/ Fine Arts dept.; MCC rents the theatre too, would need storage and props storage if theatre stays, • Special Ed & Testing: speech and testing, varies from year to year • 859 Room for speech and hearing impaired, this is not only a freshman class (in FA due to space issue); some freshman but also upper class
11/15/16 10:15-11:15	**ELL/Foreign Language**	LHS Attendees: Stephen Gervais-ELL/Foreign Language Dept. Chair, Barbara Hodgson-ELL, Jeannine Ameduri-French Teacher
		• Will have distinct Freshman Academy currently 3 teachers (French, Spanish, Kumai – currently feeling isolated) teachers are there because of shortage of rooms on Main Campus • ELL:many ELL students have tutors (currently 8 tutors), would like adjoining pull-out area not in classroom for extra help/attention, law is no wall or door allowed between tutor & teacher, would like 3-4 normal sized student study rooms for before & after school tutoring and projects during day, also would like another Language Lab w/ integrated technology for daily ELL use (currently in room 237 in "Kouloharas" building, trend is mobile labs, like carrels for writing and listening and helps overcome shyness, privacy encourages students to speak w/out intimidation, also fewer distractions then mobile labs, Room 237 is not a scheduled room

This Meeting Record is our understanding of the items as they were discussed. Please report any discrepancies to Perkins Eastman. If no discrepancies are reported in five working days, this Meeting Record will stand as published.

		currently, one lab shared by 2 departments, the state doesn't fund dedicated labs(they expect media center to be used, but we can make the case for language labs) • Carrels would not work well in the classrooms • ELL: like these distributed/integrated in pairs of 2(for a buddy) as opposed to ELL wing which can be isolating and "against the law". The students sometime feel that they "are not part of LHS", Also good for teachers to integrate w/ other teachers in their discipline. Students need to be exposed to what students in Gen Ed classes are doing. • Foreign Language: How should this be organized – an area or wing, a cluster on the cusp of academic classrooms? Either could work, need to query other teachers. Benefits to collaboration. We can test options. Foreign language tends to want to be accessible and possible on the cusp of academic language similar to science (would have windows). Like to collaborate in a language cluster. • Flexible Learning; want more Independent Spaces w/ good visibility. Won't work in a corridor but could work in smaller pull-out or study space that is not a traditional classroom for smaller groups of students. Need some separation i.e. an arch that provides some enclosure but is not full wall. • ELL/Foreign Language: "Lab" surround sound, or sound proof; existing requirements for sound are much higher than older traditional classroom designs, also options integrated sound security in a classroom need to discuss the value of this vs. budget constraints, sound reinforcement – wire separate system w/ speakers and teacher wears device, every room short throw data projection w/ built-in sound reinforcement, centralized sound system center room picks up sound system (acoustical consultant part of team to help create effective learning environments and also evaluate acoustics for mechanical systems – issues w/ rooms on courtyard currently) • ELL enrollment can creep from 16-30+ during the year; can some rooms be expandable? • Teacher Work Rooms and Offices: Most located in the Mezzanine of "Kouloheras", would like to be with other Academic Chairs Colleagues. Idea of large Teacher Center or dispersed Teacher Centers. There used to be a Foreign. Language common meeting areas. • Student Support area: Need to acknowledge distance and privacy when considering teacher center design. • Other spaces: Storage, Dept. Offices, would like central storage or w/in classroom areas, text books are still used. Some storage can be included in rooms. • Lockers: need places to store and lock things up. Like the old built-in cabinets form the 1922, like the glass for visibility and helps with dust.
11/15/16 11:15-12:15	**Wellness & Physical Education**	LHS Attendees: Jim DeProfio-PE Chair/AD, Pat Swett-PE Teacher, Krisi Keegan-PE Teacher/Coach
		• MSBA funds Physical Education including 12,000 sf gyms but not "Field Houses" or Athletic Team locker rooms • Want flexibility • Desire to get mats up off of floor to use space for Zumba or other

		• Athletics only permanent equipment set up is gymnastics • Have both a boys and girls interscholastic team, beyond that separate rooms off of gym are all used for PE program with athletics use after school and weekends • All spaces well utilized between 8am-8pm • Plan diagram provided is ideal sketch (not to scale) reviewed w/ all coaches and tried to be realistic and practical. PE noted that this diagrams contained more stations than is typically funded by MSBA • Gym: synthetic floor w/ lines to delineate basketball and track • Long jump (LJ) and triple jump (TJ) have are sand pits that can be closed w/ covers for PE application. • If need to compress footprint could be on multiple floors • Wrestling 42x84 full set up with soft divider • Gymnastics need layout assist: **LHS to provide diagram** • Yoga/Weigh Functional Strength: 35-37 students at a time, current room is a little small • Weight Room: Olympic lift/traditional type room free weights, weight training more than core training, kettle bells, weights, storage on perimeter, fitness balls, medicine balls, • Desire small size instruction, variety of very active kids • Functional vs. weight separate rooms: should there be transparency? • Long wall looking out into gym: top safety glass & bottom solid, opportunity for shades for privacy on glazing • Mens' / Womens' Room: want to avoid students returning to the locker room mid-period, would like return to be monitored w/ teacher supervision; don't want students left unsupervised, • Main gym lacking system of dividers– curtains or others; hard vs. soft options • State standards: plan for 23 avg. size; state considers 1 gym station 3,000 sf; diagram shows 8 stations, will explore validated square footage and see how to divide to accommodate stations • State doesn't fund natatoriums • Locker/Shower Rooms: showering is activity dependent, Pool / swimming they shower, lockers are divided for PE and Athletics, Lockers are used during gym period (students bring own lock) # lockers is enough for 1 PE period = +/- 35. Varsity Locker room used in season. • Ofices for PE: There are no athletic offices, there is one PE office in each locker room, and one at pool, 1 at Varsity, and one in the hallway. Offices are shared for 2 people, some are for 3. Coaches share the spaces with the PE teachers. Envision gender offices for PE/Coaches. Seriously missing in current design is a teacher / coach spaces to change and shower that is separate from students; would like private adult dress/shower. • Storage: 2 specific types, Cage Storage for teacher instruction, open w/ locks for nets racquet sports, jump ropes etc., also permanent bleachers w/ storage below, slop sinks, Zamboni machine, storage for teachers. • Access to outside: Only green space adjacent is green triangle at Tsongas Center. Teachers would like outdoor space; creative ideas-turf top of garage. Need field space to enhance instruction. • Overlap w/ ROTC –marching upstairs in the morning in Field House

This Meeting Record is our understanding of the items as they were discussed. Please report any discrepancies to Perkins Eastman. If no discrepancies are reported in five working days, this Meeting Record will stand as published.

		• Options to lift things into the ceiling; existing baseball cage is lifting into the ceiling and used for baseball and softball, have 1 cage that lifts. • Other large equipment: Indoor shot putt (plastic casing filled w/ buckshot) needs to be caged in. Functional strength – have some equip in weight that was donated. • Functional training/fitness; moving the body in ways similar to your daily activity (picking up groceries, twisting, turning, walking carrying), PE which designed to manage physical demands of real life. Need an open space, with things that move kettle bells, sleds, medicine balls, climbing ropes, each class can re-invent itself/not structured, can change by grade level and need, could have turf. • Natatorium: 6 lanes @ 25 yards, looking for 8 @ 25, and a diving well in 2 lanes, or bump-out diving well, for Phys Ed reward is to go learn diving, also large part of program for interscholastic teams. Range – some students may not want to put their face in the water. Intent is to level the playing field for all of the kids that don't belong to gyms or have private lessons. Range: learning to swim, water polo diving, instruction life guards; divide lines to provide flexibility. • Ethnic / Cultural Specific Considerations: Changing / showering – some cultures have difficulties participating in PE because locker rooms are open space. What to plan for to accommodate these cultural issues? No gang showers. Would prefer fewer shower heads if it means more privacy – may increase participation. Existing girls room changing stalls; most use these; would like to see these again. Boys individual also get used to change; only 2 existing. • Refer to attached "Lowell High School Physical Education/Athletics Plan for Focus Group provided by Jim DeProfio that includes additional "pencil"/lowercase PE notes.
11/15/16 12:45-1:30	**ROTC**	LHS Attendees: Eileen Ironfield-Senior Instructor, David Smith-Instructor
		• Existing = 4 classrooms + cadet staff/conference classroom + classroom for supply + office + bathroom taken over for gym • 385 students in ROTC, 4 instructors (5th mandated at 350); had 232 15 yrs. ago, has increased gradually. When HS was 4000, they had 475 cadets • Students begin and end in classrooms, but they pull-out typically for inspection, drills (in hallways… they get interrupted), PT • Drills need a gym space (2500sf regulations based on units of 100) • Drill space needs height for rifle toss • 6:45am gym used for drill (to not conflict with PE/Athletics but teachers used to run, creating conflicts). Gym is used 5 of 7 periods and before school by necessity (drill, inspections) • ROTC cadets train for numerous events • See regulations; noting they are minimums and based on 2 instructors and 100 cadets. Classrooms (CR) capped at 32 seats/CR • Cadet Staff/Conf area for 14 computer carrells, 24 seat conference (also used for counseling). Could probably change to laptops if school goes that route, except for use of Turning Point Software (not mac friendly) used for teaching classes • Cadet staff have jobs, must interact with US Air Force website

This Meeting Record is our understanding of the items as they were discussed. Please report any discrepancies to Perkins Eastman. If no discrepancies are reported in five working days, this Meeting Record will stand as published.

		• ROTC office should be for 4 instructors + Director • Ideal location is with gym/drill space, but also at ground-level with access to outside
11/15/16 1:30-2:30	**Student Support Services**	LHS Attendees: ~~Dave Robinson – Coordinator Student Support Services~~, Roxane Howe, ~~Tim O'Keefe House Dean~~, Maria Bejar, Heather Brunner-Guidance Counselor, Maureen Schwartz-Social Worker, Karyn Cassidy-College & Career Counselor, Mary McLaughlin – Nurse, Pat Noonan-SSS Clerk, Lisa McHugh-Clerk Scheduler, Cindy-Obika-House Clerk, Darmery Montoya-Parent Liaison
		• 4 House offices (Dean, 2 guidance, clerk/scheduler, house clerk & social worker); 2 clerks in the general house office/waiting. Would like a small conference. Waiting for 10-12 with tardy computer station. Would like kitchenette • Note houses are just a way to break down the large no. of students into manageable groups, same support • Need separate copy machines • Consider house offices located off of main lobby (closer to entry) • Deans, Guidance & Social Work needs enough for meeting w/4 • Each guidance has about 4 or 5 lateral files • Nurse suite (waiting for 8-10, counter/desk area for 4.5, 2 private rooms for exam/conference, 6 cots, 2 bathrooms, storage for supplies, ice-maker. Need files/records • Locate nurse near Student Support; might want to locate teen clinic nearby also • Lactation room near nurse • Would like nurse access to outside for student pick-up • Student Support needs main office w/ clerk, separate registration/waiting area, (2-3) separate ELL testing cubicle areas, 4 liaison desks in open office, student support office, conference for 12-15, need room for 7yrs of student records (graduate, withdrawn, etc.); for 40 lateral files • Student Support should be located near security, main lobby, but acoustically separate • Once a year parents registering students for a week, spills into halls • College Career Center (CCC) currently is an extension of guidance, they help students with workshops, fairs, testing, etc. Currently use 2 classrooms with 3 full-time staff, 1 room is multi-purpose conference (need for 10-15) + several students computers, other room is 24 computer station lab with desk. Would like secretary/reception. • CCC needs large space w/ secretary and large laptop area with presentation capability, space lined w/ the individual offices and conference space (Nashua HS North). Locate near guidance for monthly Naviance training. Need kitchenette
11/15/16 2:45-3:45	**Athletics**	LHS Attendees: Jim DeProfio, Jen McGlauflin, Paul McCarthy, Tim Patterson, ~~Damon Amato,~~ Kevin Donahue, Jessie
		• Jim to provide full athletic program/season with participation (subsequently provided by Jim via email on 11/29/16) • Main Gym can have upward of 300 students at any one time; inter-scholastic needs are greater than PE (Gym boys/girls indoor track = 200 alone + Basketball + Cheerleading). Need water jug filler and ice-machine area for coaches • Wood Floor Gym w/ one competition basketball and 3 volleyball. Should have spectator stands on one side, not opposite

This Meeting Record is our understanding of the items as they were discussed. Please report any discrepancies to Perkins Eastman. If no discrepancies are reported in five working days, this Meeting Record will stand as published.

		• Equipment/Uniform Storage needed w/ laundry. Football is done at the stadium, but everything else done on-site • Frustrating/inefficient to bus students and commandeer other MS • Crowd control and flow is an issue, many ways to get in/out and up/down floors • A lot of space in the existing Field House is unused/inefficient • Functional Room – non cardio, more natural movement space • Weight Room to be slightly bigger than existing, size for 50+ (Jim to provide inventory); like combo Olympic lift station as one element • Cheer/Yoga space for 36 students and Cheer meet mats (45x45) • Wrestling should have subfloor suitable for dance; mat lift is ideal or space to roll-up mats. Plan for (2) 42x42 layouts • Gymnastics part-time on-site, girls off-site. Rents gym (half equipment is broken), they have about 80 kids sign-up. Needs 6000sf set up**. Jessie to send layouts.** • Trainer about 1200sf w/ separate exam room and toilet. Also need a number of taping stations • Natatorium – needs to accommodate meets (8 lanes + separate diving well w/ 2 1meter boards, separate bathrooms and 150 spectators, ideally up above pool deck, alongside); Locker/shower area can overlap and be part of main locker area. • Pool needs separate PE and athletic storage, noting the wet nature of items • See attached Physical Education / Athletics Plan for Focus Group provided by Jim DeProfio w/ additional PE handwritten notes in pencil.
11/16/16 7:15-8:00	**Custodial**	LHS Attendees: Rick Underwood-Operations & Maintenance Director, Alan Sayer-Custodian. ~~Patrick Harrigan~~
		• Loading Dock is both kitchen and custodial. Existing not big enough • Large (30yd.) mixed recycling, (2) 10yd. exist. Need more recycling dumpster. No composting • Recycling program is in all CRs, two bins each room. Tuesday barrels into hall and student group collects. • Maneuvering space for trucks not enough (2 -44' storage sheds and dumpster don't allow enough room for maneuvering) • Full tractor trailer deliveries; daily milk, bi-weekly Sysco, trash daily/recycling 1/week (not enough) • Kitchen deliveries direct to kitchen, School supplies direct to custodial. Custodial storage too small; supplies ordered as needed • Other than small custodial closets, no other major distributed storage, except basement of 1922 building (supplies and major equipment) • Gas storage is out in 44' storage (4-5 snow blowers, mowers, weed wackers, light bulbs) • Salt stored under each stairs at entry areas • One office w/ bathroom; small locker area, bathrooms and showers (need unisex) • Need freight elevator; need to accommodate pallets • Ideally distribute cleaning equipment w/ charging each floor (ride-on, walk behinds, Kaivac -bathroom machine) • Interested in non-waxable finishes

This Meeting Record is our understanding of the items as they were discussed. Please report any discrepancies to Perkins Eastman. If no discrepancies are reported in five working days, this Meeting Record will stand as published.

		• Have 2 genie lifts (one in gym, one in 1922 stair), plus an old scissor lift in the gym • Auditorium lights drop-down • Boilers on the roof of Lord; the steam plant is for freshman and Kouloheras • No neutralization tanks known • Would like access to bathroom chases; if major work required, walls/finishes will get destroyed and not replaced • Problem with drywall in classrooms, teachers move desks against walls
11/16/16 8:00-8:45	**Business/Culinary**	LHS Attendees: Margaret Overlan-Restaurant, Jacqui Taylor-School Store, Roxanne Howe
		Culinary • Marketing is only Ch.74 program, but Culinary program follows Ch.74 guidelines • Students have 2 periods a row in am, program is M/T breakfast, W-F breakfast and lunch • Culinary has front of house and back, includes restaurant w/ point of sale, bakery, kitchen w/prep (sections are split between front/back of house) • 36-40 is their current capacity; need 25 minimum • Bathrooms needed nearby (for students, staff and patrons) • 1 upright fridge and freezer in kitchen (too small); distance to dry storage and walk-ins too far (good size, but remote. • Classroom is also too far. Would like dining room to double as Classroom, with full capability • Class sizes are 18-20, would like to grow program • Students do deliveries around the school • Public access not ideal, not direct or controlled. Should have open to public, but secure door from restaurant to kitchen could be done • Location is near down town streets; might want to be toward main lobby, make showcase. The primary patrons are the school • Note; culinary program cannot compete with school's food service for students. • See attached Culinary diagram provided by LHS. See to attached Crabtreee McGrath Foodservice Equipment Meeting Minutes for 11/22/16 meeting. School Store • School store w/ classroom attached (for 25 max) and secure storage and small office. As many as 10 might work in the store at one time • Classroom equipment has large format printing, heat press, need large layout tables, need secure inventory room (sweatshirts/ t-shirts). • Would like computer stations in classrooms (currently have ipads) • Store should be connected to Classroom (one teacher supervises); • Sink needed in the store for cookies; they back with small toaster/convection ovens. They sell water, soda. Need small cooler and freezer

This Meeting Record is our understanding of the items as they were discussed. Please report any discrepancies to Perkins Eastman. If no discrepancies are reported in five working days, this Meeting Record will stand as published.

		• Store needs better display; location is ideal near cafeteria and bank with visibility outside along main entry. Needs more direct/secure public access. Would like peg or slat wall system and good lighting • Existing school store size is ok • Need two registers • Classroom needs student storage/cubbies for belongings • Store room needs to lock Business • Current rooms are primarily fixed labs (need more flexibility) • Ideal existing room has multiple LCD TV's (not on a central pole) on multiple walls with students facing different directions • Could look at perimeter computers and central
11/16/16 8:45-9:45	**Special Education**	LHS Attendees: Diane Chandonnet-Dept. Chair, Donna Newcomb-SPEDTeacher, Lenny Rapone-SPED Teacher
		Overall program has about 10% IEP, the concern is that the percent is not growing but students are shifting between programs (towards more severe needs) Acoustic treatment, between and among spaces is key, not just for SPED student needs, but also for loud/behavioral School needs multiple elevators in each building, sometimes one goes down. Also would like main lobby/multi-level ramp access for all Substantial-Separate Program (includes: Fundamentals, Adjustments & Lifeskills) Fundamentals (190 students) • 2 math, 2 eng, 2 history,2 instructional support, 1 reading, & 3 freshman academy classrooms exist. Typically 8 rooms per classroom, but growing to 12+ lately. These could be half classrooms. Locate near regular academics, incl. science, math, etc. • 1 instructional support classroom (tutoring) & transitional support to prepare for real world. Room has 2 teachers and many resources (books, computers, work tables, a few break-out/tutoring rooms connected, etc.); classes range from 12 to 22, needs larger than classroom size ("learning career enrichment center") Adjustments (40 students 9-12 grade w/ emotional or behave disability) • 7 CRs exist with about 12 students each, rooms should be set up with main space, but need a few quiet areas/cubbies w/in the room. Need flexibility for more PBL (Project Based Learning) • Traditional classroom setting, but need flexibility to do group instruction, break-out and 1:1 • Storage is important; differentiated instruction requires many means • Social Worker associated with program, should be nearby, but also need counseling space for 8-10 • Locate dispersed w/in classroom wings for integration, but would like not to be in remote corners, if somewhat close to each other, they can cross-communicate

This Meeting Record is our understanding of the items as they were discussed. Please report any discrepancies to Perkins Eastman. If no discrepancies are reported in five working days, this Meeting Record will stand as published.

		• Access to life skills kitchen suite would be beneficial (sign-up for as a pull-out lab) Life Skills (69 students); CRs are div 14-17 & 18-22 • Intensive SPED (2 CRs) 14-17 has 7 students, 18-22 has 4 in ea. classroom o Half students in wheel chairs, feeding issues, tubes o Need sinks w/ hot water o Need bathrooms and young adult changing tables; need one at these rooms and two in other locations (nurse & cafeteria) o Both rooms need to be joined with Sensory Room attached w/ large equipment closet (250sf) o Would like operable wall between rooms • Autism (2 CRs) younger has 4, older has 8 in ea. Classroom o Rooms have sectioned-off quite areas o Need direct toilet rooms (still potty training) o Need regular sized rooms, despite less students per room • Life Skills (4 CRs) younger has 12, older has 12 in each CR o Program seems to be growing o Older student classrooms set up as dual classrooms w/suite of kitchen area, mail room and laundry. The suite should be separate but adjacent. o Would like to see it as full service laundry with ironing, folding tables, closets to practice, etc. Mail room would also like to be more of a center w/ copy center, computers, filing, etc. (as work environment); would also like living center with media and reward o Would like to see hygiene lab with toilet, showers, sinks that could be used by any of the 3 major SPED groups • Need Speech Specialist w. asst. (need small office and small teaching space) • Need OT/PT space • Deaf & Hard of Hearing office • SPED Admin Team (ideally a suite, but currently dispersed a bit) o Department Chair o 1 clerk o 2 psych o 2 evaluator team chair o 2 evaluators o Conference (for 16-18) o 3 Testing rooms (for eval and psych, unless space in offices) • 2nd social worker
11/16/16 10:00-11:00	**Fine Arts**	LHS Attendees: Sharon Clark-Fine Arts Dept. Chair, ~~Pat Fitzpatrick~~
		Visual Arts • Currently have 3 Art rooms (1 sculpture w/ kiln & storage, 2 drawing/studio rooms); Class sizes run 25 to 26, Sr. portfolio is smaller. Sculpture needs 3 or 4 potting wheels • All rooms need storage within. • 1 Digital Photography Lab, including animation. Class sizes run 25-28; need flexible furniture for group an individual • Photography and drawing need access to outside

This Meeting Record is our understanding of the items as they were discussed. Please report any discrepancies to Perkins Eastman. If no discrepancies are reported in five working days, this Meeting Record will stand as published.

		• Have graphic design lab is regulation Classroom w/ 25 mac desktop computers (all digital); need flexible furniture • Graphics has a lot of in-school program for group an individual • TV production CR (separate from TV production studio), but should be connected. Classes range from 15-25; room set-up w/ cameras, 25 desktop computers & flexible furniture • TV studio falls under Communication • Ideal location for lots of light (skylights?) and not in disruptive area • They have cross-curricula within arts, but not as much w/ academics because mixed age classes which doesn't work for cross-grade level content Performing Arts (they are in basement, don't mind location) • Band has classes of 63, holding steady. They have been able to fit 115 students in existing. Current sizes are good; Band room also used for world drums and string ensemble • Current instrument storage is good; student instruments kept in school. Doorways need to be wide enough for tympani (60" wide). Also need easy ramp and elevator pathways to auditorium • Choir has classes of 65, also steady. They have been able to fit 115 students in existing. Current sizes are good, but want flat floor with platform risers that could be set up or taken down for show choir/movement. • Guitar Lab occurs in the choral room (back corner); for 20. not sure if dedicated room required • 1 Dance room, sized for 30 students (over 240 students); note existing room 137 has hardwood floors • Auditorium is used for dance also; changing via nearby restrooms • Piano/Digital audio has classes of 20; room has 20 digital piano's (2 rows of 10) • Spaces need to be near auditorium • Drama is taught in the Choral Rm; classes in low 20's. Freshman Academy has 350 seat theater that is used like a black box. They learn light, props & costume • Auditorium balcony has odd storage spaces (scenery flats); Costume storage in the basement, with some sewing/workspace. • Want more sewing/workspace • Acoustic shell is stored there • Check height/width of storage • Auditorium has 4 electrics that can be lowered. No catwalk or stage lights over the house • Would like <u>all</u> Performing arts space/storage located together in basement • Scene building is dome in hallways and on-stage • Check heights
11/16/16 11:00-11:45	**Humanities**	LHS Attendees: Suzanne Keefe-English Dept. Chair , Robert DeLossa-Social Studies, Deanna Stanford – Lead Teacher, Joseph Jussaume-Social Studies Teacher
		• Humanities as a unit but like inter-department (SS & ELA); groupings of 6 (3 and 3) are ideal with some shared space. • Like interdisciplinary, but also department working together • Need shared planning space useful for PLC clusters of 6 • Need more presentation space (want to get 2 or 3 classes together), spaces to accommodate 100

This Meeting Record is our understanding of the items as they were discussed. Please report any discrepancies to Perkins Eastman. If no discrepancies are reported in five working days, this Meeting Record will stand as published.

		• Technology in classrooms (the existing central pole with 3 monitors facing different directions was not the original plan); would rather have 4 screens, one on each wall where presentation capability could be on any wall or all 4 for small group work. • Would like technology infrastructure and phased room set-ups if budget can't afford all rooms to be set up with screens • Would like laptop carts for every 3 CRs (district is mac committed, but they prefer laptop pcs or chrome books); especially if cost for macs would limit how many carts per room • Currently 32 rooms are set up with a technology grant • Department storage not needed, moving away from text books. ELA does have books (novels, more than text). Departments do need libraries for 400 volumes. • Need nearby bathrooms for faculty and students (too much time and lack of supervision otherwise). Also non gender specific. • Teachers use hallways, send student out on occasion now. • De-escalation spaces are needed within the general population. Flowing water is a huge part. Would be good to have an area within each classroom for a quiet space (alcove) • See attached Humanities notes provided by LHS.
11/16/16 11:45-12:45	**STEM**	LHS Attendees: Roger Morneau-Dept. Chair, Tracy Estrella-Math Dept. Chair, Megan Vilcans-Sciene/English Teacher, Sam Hor-Math Teacher
		• STEM is not actually a department • Science would like to be organized in sets of dispersed pods • Science storage is important • Math is wildly spread out, they would like some semblance of clustering • Larger/fewer planning rooms not as desirable as many small planning rooms located with each grouping of classrooms • CRs need flexibility to do on all walls; would like much taller MBs or better use of full wall height • The computer poles are difficult to work around • Some teachers already doing teaching/learning and pull-out in hallways • Math is moving toward performance/projects based work… actual projects, like airplane design/angles and launch calcs. They need flexible maker-type spaces. Ideal might be to co-locate with science to create flexibility and access to lab space • Computer Science is w/in Math Dept. – need to grow program • Engineering needs a lot of storage for many materials, types of medium, tools/equipment, robotics components. Room should be outfitted with lots of table/counter top and flexibility • Need separate area for cutting equipment (medal/wood), fine soldering capability. Don't currently have large, dimensional supplies like sheets of plywood, but might in future • Book storage space needed; consider combined (inter-department) book room for ease of inventory and dispersement
11/16/16 12:45-1:45	**Food Service**	LHS Attendees: Paula Trudeau – Lead Cook, Sharon Lagasse- Aramark Crabtree McGrath: John Sousa
		• Food service is federally funded program; they can't cross paths with other school programs. They are subject to same regulations as far as what they are allowed to serve.

This Meeting Record is our understanding of the items as they were discussed. Please report any discrepancies to Perkins Eastman. If no discrepancies are reported in five working days, this Meeting Record will stand as published.

		• They serve water, chips, ice-cream and cookies at register • The restaurant can't serve to students, but can serve what they want (to teachers and public) • Food/loading is a problem (mostly due to obstruction of dumpsters and storage); 10 palettes every Tuesday; need space for them and to break-down and distribute. Might work best to have an LHS specific dry goods storage vs District. • Major rodent concerns/issues • Do not have enough storage (walk-in or dry goods) • They are one of two schools where commodities come in • Kitchen/equipment is old, not most efficient, a bit chaotic • Would like to continue with grab/go, 4 breakfast carts are very successful. Stored in kitchen. • Like existing deck oven, takes up a lot of space. Might work to have a rotating oven that is smaller, but has same output • Need more prep stations • 2 steamers and 2 kettles are ok • Serving is wide open; separate serving stations is desired to cont. They don't want to corral and overly direct. The advertising piece is important, so students can make a decision and commit. Need LCD screens • If school is designed with pods; would like kitchen central so that time is not spent delivering • They have 85% participation that may impact the idea of satellite serving, which is typically cold food. • Labor is one of the biggest expenses. They need to look at how to maximize efficiency and accommodate service points • Freshman Academy will want its own kitchen (it's a school of 1000 students) • Need 3 offices (cook & manager & cash counting), currently 27 staff (4 at freshman) • Need toilets, locker area • Pressure to start more wet waste/composting • Serve 21 cultures • See attached Food Service diagram provided by LHS. • See attached Crabtree McGrath notes for additional Foodservice meeting on 11/22 @ 2:30 pm.
11/16/16 1:45-2:45	**Communications Pathway & Library Media Center**	LHS Attendees: Kathy Downey-Library Media Specialist, Bryan Wilkins-Dreegan Media , Faye O'Leary-Digital Media / Graphics Design Teacher, ~~Sharon Clark~~
		• Would like entire digital/media spaces set up as a cluster to share space and resources, including a shared network for redundancy • Location in a quite area, doesn't necessarily need to be right with auditorium, but could envision an arts building • Outdoor space for presentation, performance & events might be of interest, but exists already across the street (across freshman academy); maybe an enhanced area off of lobbies • Would like gallery space for student work or themed shows • Video on demand available to the whole district, is managed by Media Studio. They supply multiple local cable channels (coax to every classroom internally and out to the City)

This Meeting Record is our understanding of the items as they were discussed. Please report any discrepancies to Perkins Eastman. If no discrepancies are reported in five working days, this Meeting Record will stand as published.

- TV Production classroom (see notes within Art)
  - Needs layout similar to Graphic Design
- TV/Media Studio (operates Cable Access channel)
  - Full size studio and control room (current sizes are good), but would like room for multiple sets (live music vs interviews vs other)
  - They develop video; requires desktops and utilize separate server as redundant/back-up
  - Eight editing suites (50 to 100sf each); 3-4 students computers with additional audio mikes, large display monitors
  - Need major equipment storage (2 rooms now)
  - TV/Media CR needs flexibility as a lab, but open floor space for camera set-up, or class/lecture setting
  - 3 staff have offices, they work in classrooms
  - Conference room (for 15)
  - Lobby area with waiting; also used for brainstorming/collaborating. Space has soft seating and flat screen
- Graphic Design (see notes within Art)
  - 25 computers + teacher; could see it going toward laptops. Like the idea of being more mobile
  - Have projection capability, but would like multiple LCDs
  - Current room proportions drive the layout
  - Would like movable tables
  - Need locking storage
- Digital Photo & Animation (see notes within Art)
  - Would like a digital media cluster (right now sep. digital, graphic and media studio locations)
  - Need more exhibition space (and variety of media); cork walls in rooms, but also in corridors
  - Would like small area for portrait photography or stop-motion work area (shared)
  - Plan for 25 seats/computers
  - Need ability to connect tablets (computers)
- Digital Journalism (occurs in computer lab); they do podcasting
- Digital Audio occurs in piano lab
- Public Speaking occurs in regular classroom
- Band sound system is portable and rolled into the gym (gym system has failed). ROTC also uses the Band's system. Show Choir also has a portable system. Cafeteria has a fixed sound system, not used.

Library Media Center

- Only one librarian, considers herself mobile but the media center and resources as stationary (not necessarily dispersed)
- Need to prepare students to be able to use college library and how to use on-line catalogs. How to use database, how to be efficient and effective researchers
- Volumes are reducing, they are going more digital. Estimate about 25k volumes
- Currently can accommodate 3 or 4 classes; librarian can
- Before and after school tutoring program occurs. Library also used during lunch

This Meeting Record is our understanding of the items as they were discussed. Please report any discrepancies to Perkins Eastman. If no discrepancies are reported in five working days, this Meeting Record will stand as published.

		• Library might want to accommodate maker space (like freshman academy's) • Need a balance of quite areas, collaboration areas and meeting areas • Computer area, table area and presentation area (each accommodated a class) • Would need 50 to 60 laptops (depending on time of year, students are relying on library for comp access) • Would like a dedicated reading area; with soft seating/casual • Need docking stations for charging phones. • Every discipline (except math) tends to use the Library • LHS archive and artifacts in a 250sf space • Would need security system (currently 3M system); books, computers and equipment need to be coded • See attached: Media Center Process Overview form notes,volume notes, and Media Center Studio notes provided by LHS.
11/15/16 3:00-4:00	**Outside Programs**	LHS Attendees: ~~Colleen Winn Gear Up Trio,~~Andrea Laskey-Lowell Community Health Clinic, Henry Och – Lowell Community Health Clinic COO, Anne Marie Bisson-Catie's Closet President & Jeanne D'Arc Credit Union VP Marketing & Financial Aid
		Lowell Community Health Center (room 22): • Funded by Massachusetts Department of Public Health • Licensed under ospices of the health center, subject to regulations incl. design/layout of spaces • **Health Center to send specs** • Currently 2 exams rooms, 1 recovery room (student needs to go home), clean room to store stuff and a utility room. • Need bathroom within the suite • Need waiting area and separate office space (privacy) • Clinical social worker office • They have separate contracts for operations (medical waste, etc) • No direct exterior access • Because health center is in renovation they have waivers now, but might not have them if it is in new construction • Services provide (primary care including immunization, physicals, STI, chronic disease management refugee management) staffed by medical assistant. They do individual and group therapy • Funds are not part of Dept. of Public Health; there may be federal funds available • Ideal location is to be separate and private, but some visibility • Need to discuss the future of health services (adding dental, vision, looking at utilization ratio of patients to student visits based on exam rooms) Catie's Closet: • Currently in 2 locations because of the building division with freshman academy. If 1 building, maybe 1 location, but bigger. • Ideally 400-500sf serving main building + 250sf for freshman • Each as one big space, lockable. They outfit themselves w/ rods, storage counters and equipment. • Space was provided instead of scholarship in the name

This Meeting Record is our understanding of the items as they were discussed. Please report any discrepancies to Perkins Eastman. If no discrepancies are reported in five working days, this Meeting Record will stand as published.

		• Ideal location; privacy is important, typically near nurses station but not on a main path. Currently good location across from Social Worker St. Jean D'Arc Credit Union: • Current location is perfect; students need quick/easy access • They also help the school with deposits • Shape is odd; teller too close together, vault is exposed (need to lock-off) area. • Need larger than existing at 300sf • The credit union would build out the interior; they will also provide the layout • Need to bring in cables/electric direct from outside would like a bathroom nearby • They serve anyone inside the school • They need nearby doorway for currier and armored car access near • Alarm/electrical needs specifics Gear-Up/Talent Search/Upward Down (Trio): • They serve well over 1000 students • Level funded, federal grants for each • Cannot provide their own furniture per federal regulations • 3 spaces needed o Rm 811, but could be smaller; Need 150sf in freshman academy (desk, computer, small group) o Rm 206 suite, need space for 6 offices, work one on one with students (discuss financial situations) + common area for meetings with 12 staff. Need several computers for college career guidance. Similar to career center, but not part of guidance. They supplement and focus services on coll. o Rm 126 classroom; just upward bound; includes two teachers + 2 advisors and tutors come in. They provide intensive academic support. Ideally would have separate office for 4 + CR for 20-25. • Would like all 3 to be closer together, but need one in freshman academy. They also work closely w/ guidance/career ctr.
11/15/16 & 11/16/16	**Other Broad Planning Items**	
		• Need to plan for MSBA standards • Need to plan for flexibility • Classrooms: will prioritize natural light and ventilation • This is first year Alternative School is offered as independent choice: may need this as an option in new school that is completely separate, a facility within a facility w/separate entrance. • Currently a separate "Therapeutic" school exists off site. • Library is considered by some to be very small • Cafeteria: Need larger cafeteria, prefer smaller spaces and an overflow area that is multi-purpose room. State allows seating for 1/3 population; currently have 4 seatings. Currently a lot of ELL students eat in the hallway during lunch 2. Will design larger but scaled and easily visible/supervised space. Would like to go outside w/ designed seating and eat in the "National Park"-outdoor experience beneficial

This Meeting Record is our understanding of the items as they were discussed. Please report any discrepancies to Perkins Eastman. If no discrepancies are reported in five working days, this Meeting Record will stand as published.

		• General School thought: lots of testing all the time, how is this handled, retesting MCASTS, national Latin Testing, currently use Little Theatre, meeting space for 50-60 students to discuss options career Foreign Languages • Issues w/ HC lift at North entry & HC access to auditorium need to be resolved • School needs multiple elevators in each building, sometimes one goes down (general use & Special Ed) • **Peer Mediation: This group was mentioned. LHS to clarify**

Process Overview:

The LHS design & drawing process will take approximately 3 years, before proceeding into construction. This may seem like ample time and a slow pace, but most of the critical planning decisions are made up-front (within the first 6 months) and virtually all detailed scope decisions are made within a year.

We are currently in the earliest phase, called Feasibility Study. We are gathering information, determining the spaces needs and developing goals/objectives with the City, School & Community. Throughout the design & drawing process, we will be meeting with you in the form of Focus Groups (4 times over) and as full faculty forums.

Our objective in this first round of meetings is simply to understand the spaces you need, where they should be located and any major equipment or functional requirements that might affect the shape/size and position of rooms.

MEETING MINUTES

DATE OF MEETING:	November 22, 2016 at 2:30 PM	
SUBJECT:	Foodservice Equipment Program Review	
ATTENDING:	Roxanne Howe	Business and Culinary Department Chair
	Margaret Overlan	Culinary Instructor
	Susan Brassard	Culinary Instructor
	John Sousa	Crabtree McGrath Associates, Inc.

Please contact Crabtree McGrath with any additional comments or corrections.

1. The Culinary program is generally split into two main disciplines. Baking and Ala cart with both programs supporting the retail restaurant space.
2. The Instructors asked that the two spaces have more separation. A common area between the two could be use for food preparation and instruction. This area was referred to as a classroom space.
3. An academic classroom was requested for instruction. Traditional desks and the room would be equipped with computer terminals for test taking and recipe research.
4. Bother the academic classroom and the food lab must be equipped with smart boards.
5. The filming of lessons for review at a later date by student was requested.
6. All hand sinks must have some form of hands free faucet operation. Knee or foot pedals are preferred.
7. Baking equipment needs:
    - Convection oven
    - Rotating rack oven
    - Wood topped tables
    - Stainless steel tables
    - Baking tables with sufficient power to plug and play various pieces of small counter top equipment.
    - Four burner range
    - Demo tables with mirrors
8. Ala Carte Equipment needs

161 West Main Street, Georgetown, Massachusetts 01833 phone: 978.352.8500 fax: 978.352.8588
mail@crabtree-mcgrath.com

- 2 Fryers with built in filter
- Char broiler
- Griddle
- Steamer
- 12 open burners for sauté work
- Salamander back shelf broiler
- Finishing oven on the line
- A complete chefs line to support the ala carte cooking and serve pick up station.
- A cold line to support desserts and salads

9. The Ala carte support (food lab) area shall include:
   - A kettle for stock and sauces preparation
   - Tilt braising pan for bulk production, soups, sauces etc.
   - Reuse the two existing trunion kettles
   - A range for small batch stockpot work.
10. A required pot and pan washing area convenient to both the baking program and the ala carte program is needed.
11. Dishwashing needs to be convenient to the retail dining room area. This is in addition to the pot washing area.
12. Both programs will share walk-in refrigeration and dry goods storage. Within the refrigerated rooms separation of program will be achieved with the use of aluminum fencing typical to this type of operation.
13. Both programs will support the retail restaurant space. Retail space needs
    - Pizza warmer
    - Cold display space
    - Hot food buffet space
    - Cold food buffet space (salad bar) with two soup wells
    - Retail counter for coffee service and other retail sales
    - Back support counter with support equipment.
14.
15. Office space for three staff.
16. Student will need cubbies to place personal belongings.
17. The flooring system must be a non-slip type floor. Altro sheet vinyl and epoxy flooring were discussed as options.
18. The staff requested no carpet in the dining area.

This concludes our notes.

Humanities visioning meeting 16 Nov 2016

Humanities 11/16/16

Considerations

Focus on

A. Humanities as a unit
B. Groupings of 3 SOC and 3 ELA in close proximity (pods?) in a way that allows for inter-departmental work
C. Q of whether SOC ELL and SOC SPED should be part of this (fewer teachers there, so this would be part of only two or three clusters... but this would even out ELA and SOC numbers)
D. Resources
    a. Flexible room spaces must be able to accommodate tables and chairs — not desk-chairs — in multiple configurations, but also the space should make it possible to push things to the side to create a large, open space.
    b. Can be open to other classrooms in a pod easily
    c. Central shared workspace for teachers outside of the room, so that rooms are used throughout the day, not just by one teacher; several outside telephone lines into those work spaces, there needs to be sound proofing of the shared workspace for confidential conversations
    d. Ideally hexagonal (or oval, but that's a pipe dream probably)
    e. Unisex bathroom and water fountain nearby
    f. Mobile cabinet with locked doors in each classroom — *alcove for this?* Each room should have a digital projection unit that can pivot from a smart board to other parts of the room (might be a problem for short-throw projectors, so a central long-throw projector might be better)

Other, random, thoughts:

Bathrooms - we really need to separate faculty bathrooms from student ones. A possible solution is multiple unisex, single-user bathrooms. This also helps with trans- and intersex students.

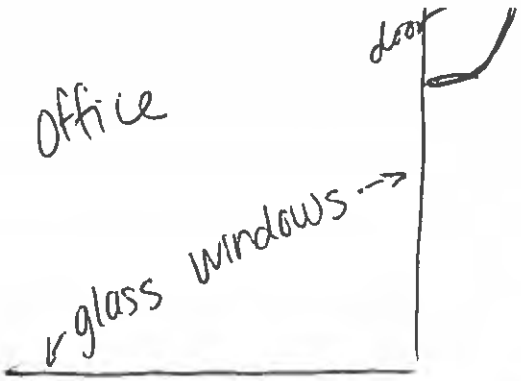
Hallways - these need to be wide enough between lockers for students to be four abreast; no choke points, as we have now

Presentation spaces - it would be good to have several interspersed around the school for student presentations. Should be able to hold minimum three classes (~100 students)

Tunnels - how many? Can we increase from 2??

Central flagpole - has thought been given to this? Maybe in conjunction with **reflection garden (zen??)**

Quiet, de-escalation space(s). Something with flowing water would be a huge plus for our students that need to de-escalate in order to avoid bad consequences.

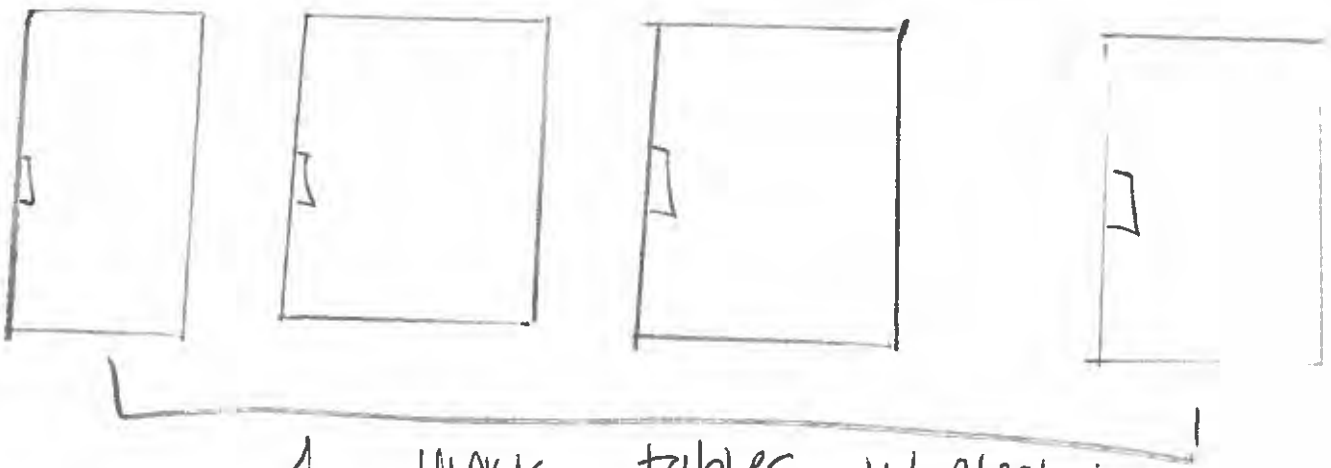


"Wish List"

- Nonslip coated floors

Must-Haves

- 1 hand sink (not shared w/ FOH/culinary
- Plugs/sockets for refrigeration, ovens
- Floor drains
- Hoods/exhaust over ovens
- All equipment on wheels
- Mop closet
- 2 offices (1 cul / 1 baker)



4 work tables w/ electrical outlets (for mixers + scales) on wheels

Bake Shop (located behind kitchen)

entrance

refrigration

areal rack for dishes to dry

3-Bay sink

TV/MEDIA STUDIO 11/16/16

COLLEN CREEGAN MEDIA STUDIO

Space Needs & Developing Objectives

About our Program

- The Creegan Media Studio houses Lowell Educational Television the educational access channel for the city of Lowell.
- Three staff members manage content and programming for channel 22 and let22.org as well as support LHS class activity.
- The Creegan Media Studio houses several pieces of equipment that provide for central storage for student & staff editing projects, video on demand servers, newer encoders that offer cable distribution, and older processors for analog channel distribution.
- We have several offices and edit rooms as well as a conference room, full sized media studio, and several storage rooms for multiple pieces of equipment.
- We have one teacher (we have had two in the past) that is teaching video production and producing a live morning show every day and also covers after school events for broadcast.
- Teacher works in media computer lab as her classroom where students create content for in school and city of Lowell broadcasts.

Uses & Functionality

- Classes are a mixture of computer lab activities, lectures in theories, and hands on activity.
- The future of this program will need two or more teachers whose classrooms are centrally located to the media studio (perhaps within a suite) and can serve as computer labs (with mounted displays for instructional purposes to include the option to screen projects), as a space for group project work, and provide the flexibility for hands on instruction and training (this requires the open floor space to set up tripods, cameras, portable light kits, and other equipment).
- Operate the city channel as well as in house cable feeds.
- House the offices for the three staff producers (these are offices that have non linear edit stations).
- Produce the live morning show from the studio
- Central location for student equipment needs.
- Provide students with private workspaces that will allow them to focus on their media projects without deterring from other students' work.
- Is a suite that stands out as a place of creativity and ultimately different from other parts of the high school.
- Provides the setting and expertise of a professional production company wherein students are producers of content.
- Space should be centered on collaboration of several other media related courses, activities, and productions.

Locations & Adjacencies

- Having the offices of the Educational Television staff near the classrooms allows for the staff members from the studio to support the class activities.
- Classes should be within the same suite as the media studio so that instruction can take place within the same space.
- As the program grows and begins to encompass several other types of media consideration should be given to locating other classes and labs in the same suite such as:
    - Journalism (can work with the Creegan Media Studio to incorporate different outlets of broadcast)
    - Music and Digital Music Production (can use the private edit rooms to work on digital music compositions)
    - Graphics (can incorporate some of the student work into website or video production)
    - Live Music production (perhaps can be added using the studio to record multi-track music pieces)
    - Web Radio Production (perhaps can be added to work as an advancement from the graphics teachings and incorporate other aspects of media)
    - Drama and Acting - perhaps having media related offerings in proximity to drama and acting classes can provide for relationships that gives students direction in diction, articulation, use of voice, posture, and other performance based media delivery.

Furnishings & Technical Needs

- Classrooms need to have high-speed network connectivity in order to connect to central media storage servers.
- Classes should also include interactive technologies that allow a teacher to project on several displays and to distribute audio for any instruction content (could be his/her computer desktop for teaching software use, video and audio examples of profound pieces, as well as the desktops of other students for critiquing).
- Student learning stations in the computer lab should look to have the latest in ergonomic design for improved instruction and interaction amongst the teacher and students.
- A continuation of the full sized production studio with adjacent control room for production crew. To include:
    - Full LED Lighting Grid
    - Professional Audio mixer and monitoring for both music and video productions.
    - The most up to date graphics system that allows for classroom creation and incorporation into video productions.
    - HD switcher and HD professional broadcast cameras.
    - Professional audio snake.
- Ample space within the control room to provide for hands on instruction in a classroom environment.
- Edit rooms should have work desks that provide for the proper rack mounted equipment and monitoring for versatile projects such as radio

production, digital music production, digital cinema and video editing, and graphic & web design.

- Several spaces for shelving and other storage and workspaces that house the hundreds of pieces of equipment the studio offers to students and staff.
- A meeting room for staff and student collaboration and planning outside of class activities.
- A screening room for presentations, dual enrollment offerings from Middlesex Community College, screening student work, analysis of famous works, and other class activities and presentations.
- A network and server room that is climate controlled which can house the network switches, editing storage servers, video on demand servers, cable distribution encoders and decoders, channel playback servers (for channel 22 and in house broadcasts), and all other video networking systems that serve the educational access channel broadcasts.
- The full lighting grid requires direct ties into the central electrical panel and power runs and drops into the media studio.

Other Information

- The next high school should look to provide the space and opportunities to expand and gather the media related programs in order to create a close-knit suite that engages students to collaborate with other students possessing different interests and skills. These programs serve as a foundation to the many media related or media inclusive jobs the world has to offer.
- The Colleen Creegan Media Studio has been a twenty-year investment through Comcast and LPS funds ultimately amounting to millions of dollars in equipment and staff salaries.
- The Lowell Public Schools has recently purchased a brand new media production truck, which is currently being outfitted for live remote broadcasting activities.
- Staff at the Creegan Media Studio also services the pre-K through 8th grade schools within the district of LPS to create content that showcases the activities happening there.
- There is a growing demand for video production services within the Lowell Public Schools to fulfill requirements for professional development content, instructional videos, and other types of staff informational videos. Consideration needs to the increase number of staff, volunteers, and interns are added to the current facility to fulfill such demands.

MEDIA CENTER 11/16/16

Peter,

I went through my NEASC material and found the information on # of volumes.

# of print volumes 23,419
other materials 2109

Total Volumes 25,528

Since these numbers were created, there has been a complete inventory of the library. (The library catalog matches the books on the shelf) We have also done a substantial amount of weeding especially of the video collection.

I will work on getting current numbers.

Kathy

The City's Partner in the School Building Project: Massachusetts School Building Authority (MSBA)

MSBA's mission: Partner with Massachusetts communities to support the design and construction of educationally appropriate, flexible, sustainable, and cost-effective public school facilities.

Massachusetts School Building Authority

Funding Affordable, Sustainable, and Efficient Schools in Partnership with Local Communities

What is the MSBA?

The MSBA is a quasi-independent government authority created in 2004 to replace the former school building assistance program administered by the Dept. of Educ. (now the Dept. of Elementary and Secondary Educ.).

They work with local communities to create affordable, sustainable, educationally effective and efficient schools.

Massachusetts School Building Authority

Funding Affordable, Sustainable, and Efficient Schools in Partnership with Local Communities

The MSBA Provides Significant Reimbursement

The MSBA establishes a base reimbursement rate for each District with potential additional incentive points available, but an overall max rate of 80% (Lowell's base is near 80%)

Reimbursement rates apply only to eligible costs

The MSBA caps costs overall and within individual scopes (caps are not intended to represent market/industry trends, but serve to provide consistent & equitable funds state-wide)

Massachusetts School Building Authority

Funding Affordable, Sustainable, and Efficient Schools in Partnership with Local Communities

The MSBA Establishes Process/Standards

The process is to be inclusive, collaborative and transparent.

The MSBA establishes the target enrollment (3520 for LHS)

The scope of studies must comprise a range of options that include new construction (exploration of alternative sites), new additions/renovations, renovation and basic repair.

Other than basic repair, all options must meet the District's educational plan/program and the MSBA's space standards

Massachusetts School Building Authority

Funding Affordable, Sustainable, and Efficient Schools in Partnership with Local Communities

The Feasibility Study (FS) is the earliest and most critical part of the process. It Includes:

- information gathering/investigation
- assessment of current conditions,
- establishment of goals/objectives,
- definition of program and needs,
- development of planning options.

What's wrong with the schools we have now?

- They Have Exceeded Their Useful Service Lives:
- They waste energy, which costs you money.
- Expensive repairs are needed in the future.
- They don't meet safety or accessibility codes to protect our children.
- They don't meet state and federal regulations.
- They no longer support the academic programs requirements being offered to our students or 21st Century Educational practices.
- They don't allow us to provide a competitive advantage to all of our children.

Existing Conditions at LHS

What about the school we have now?

- They Have Exceeded Their Useful Service Lives:
- They waste energy, which costs you money.
- Expensive repairs are needed in the future.
- They don't meet safety or accessibility codes to protect our children.
- They don't meet state and federal regulations.
- They no longer support the academic programs requirements being offered to our students or 21st Century Educational practices.
- They don't allow us to provide a competitive advantage to all of our children.

Massachusetts School Building Authority

Funding Affordable, Sustainable, and Efficient Schools in Partnership with Local Communities

The City's Partner in the School Building Project: Massachusetts School Building Authority (MSBA)

MSBA's mission: Partner with Massachusetts communities to support the design and construction of educationally appropriate, flexible, sustainable, and cost-effective public school facilities.

Massachusetts School Building Authority

Funding Affordable, Sustainable, and Efficient Schools in Partnership with Local Communities

What is the MSBA?

The MSBA is a quasi-independent government authority created in 2004 to replace the former school building assistance program administered by the Dept. of Educ. (now the Dept. of Elementary and Secondary Educ.).

They work with local communities to create affordable, sustainable, educationally effective and efficient schools.

Massachusetts School Building Authority

Funding Affordable, Sustainable, and Efficient Schools in Partnership with Local Communities

The MSBA Provides Significant Reimbursement

The MSBA establishes a base reimbursement rate for each District with potential additional incentive points available, but an overall max rate of 80% (Lowell's base is near 80%)

Reimbursement rates apply only to eligible costs

The MSBA caps costs overall and within individual scopes (caps are not intended to represent market/industry trends, but serve to provide consistent & equitable funds state-wide)

Massachusetts School Building Authority

Funding Affordable, Sustainable, and Efficient Schools in Partnership with Local Communities

The MSBA Establishes Process/Standards

The process is to be inclusive, collaborative and transparent.

The MSBA establishes the target enrollment (3520 for LHS)

The scope of studies must comprise a range of options that include new construction (exploration of alternative sites), new additions/renovations, renovation and basic repair.

Other than basic repair, all options must meet the District's educational plan/program and the MSBA's space standards

Massachusetts School Building Authority

Funding Affordable, Sustainable, and Efficient Schools in Partnership with Local Communities

The Feasibility Study (FS) is the earliest and most critical part of the process. It Includes:

- information gathering/investigation
- assessment of current conditions,
- establishment of goals/objectives,
- definition of program and needs,
- development of planning options.

Project Timeline & Decisions

Overall Design Process (will take approx. 3 yrs, + bidding/construction)

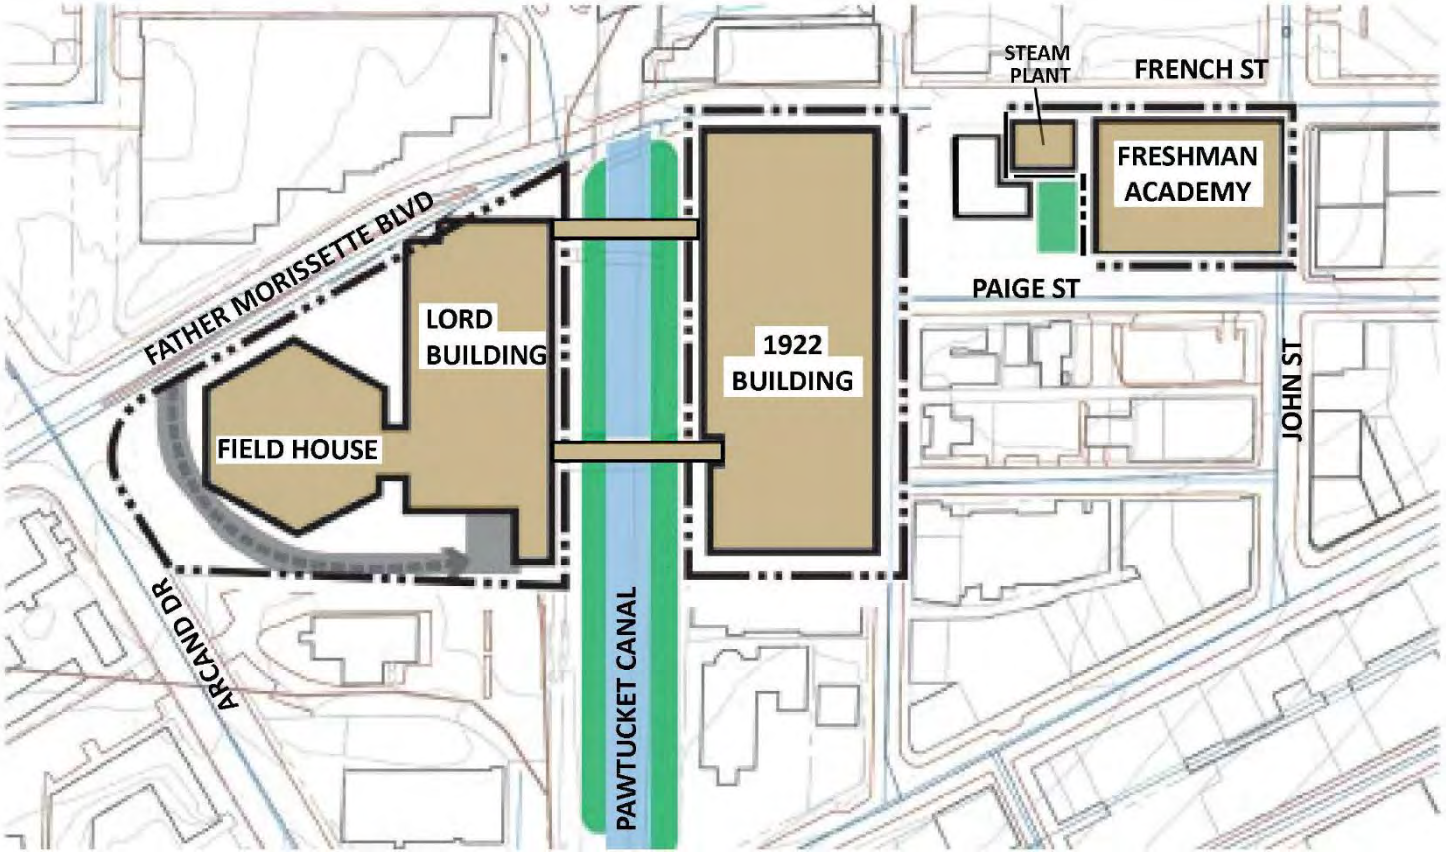
Alternative Sites - Existing High School



SCALE: 1"=100'-0

BUILDABLE AREA
= 6 ACRES
(Excludes .94 acres for Steam Plant & Freshmen Academy)

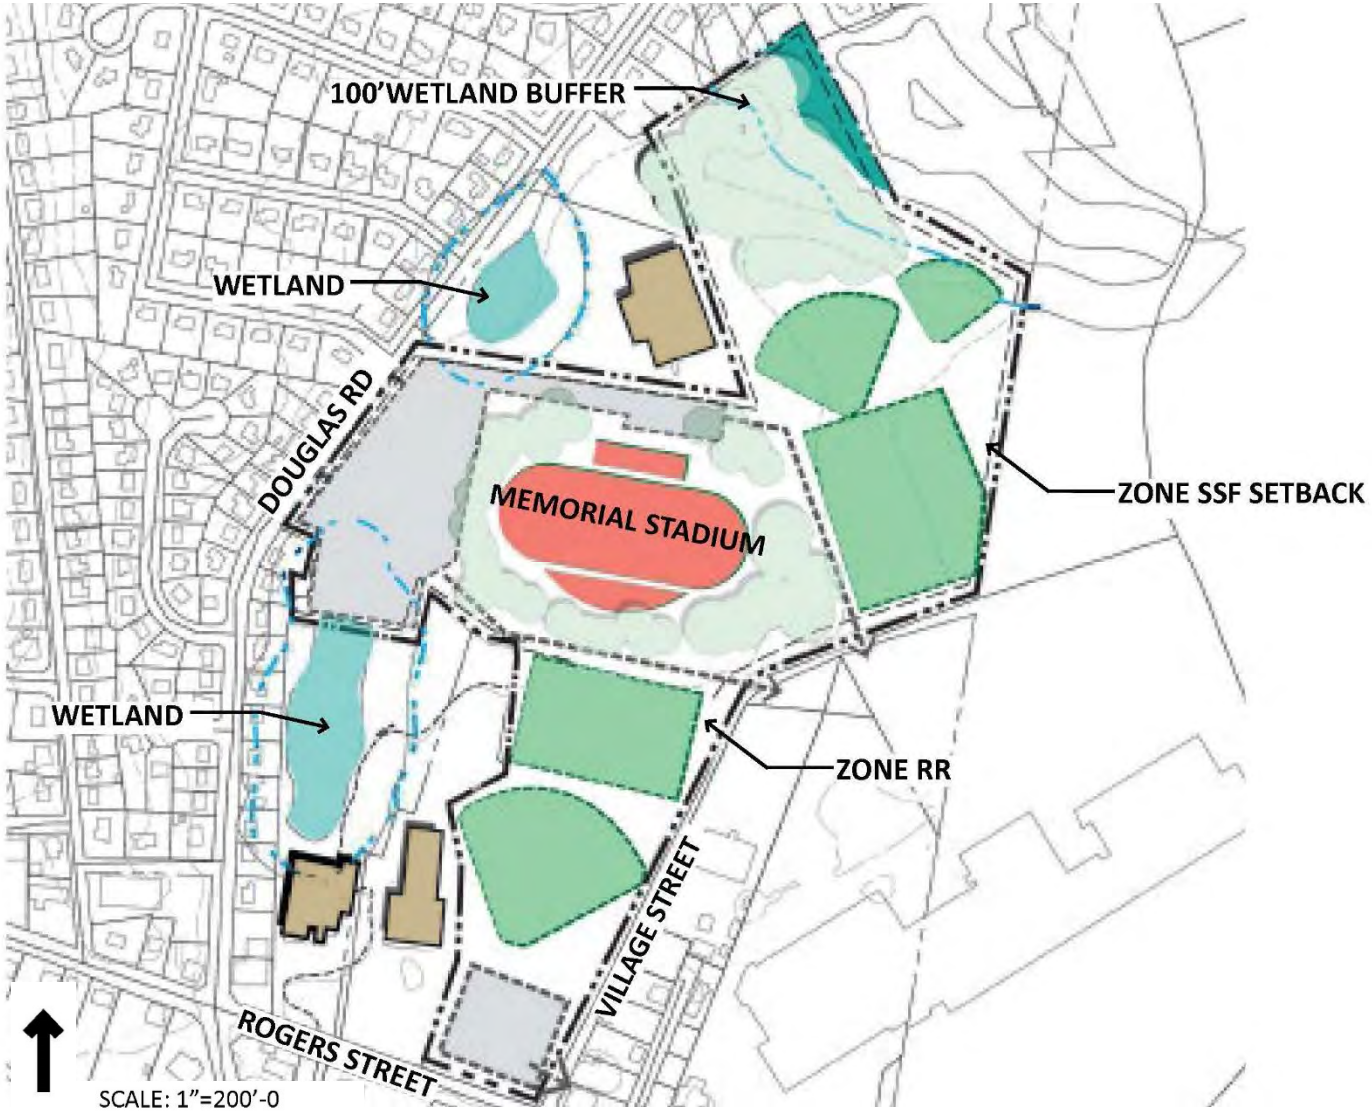
Pros:

- Proximity to Services
- Walking/Bus Proximity
- Existing Parking
- City Owner

Cons:

- Potential Environmental Issues
- Limited Site Size
- Phasing Costs

Alternative Sites - Cawley Stadium



BUILDABLE AREA
= 30 ACRES
(includes Memorial Stadium)

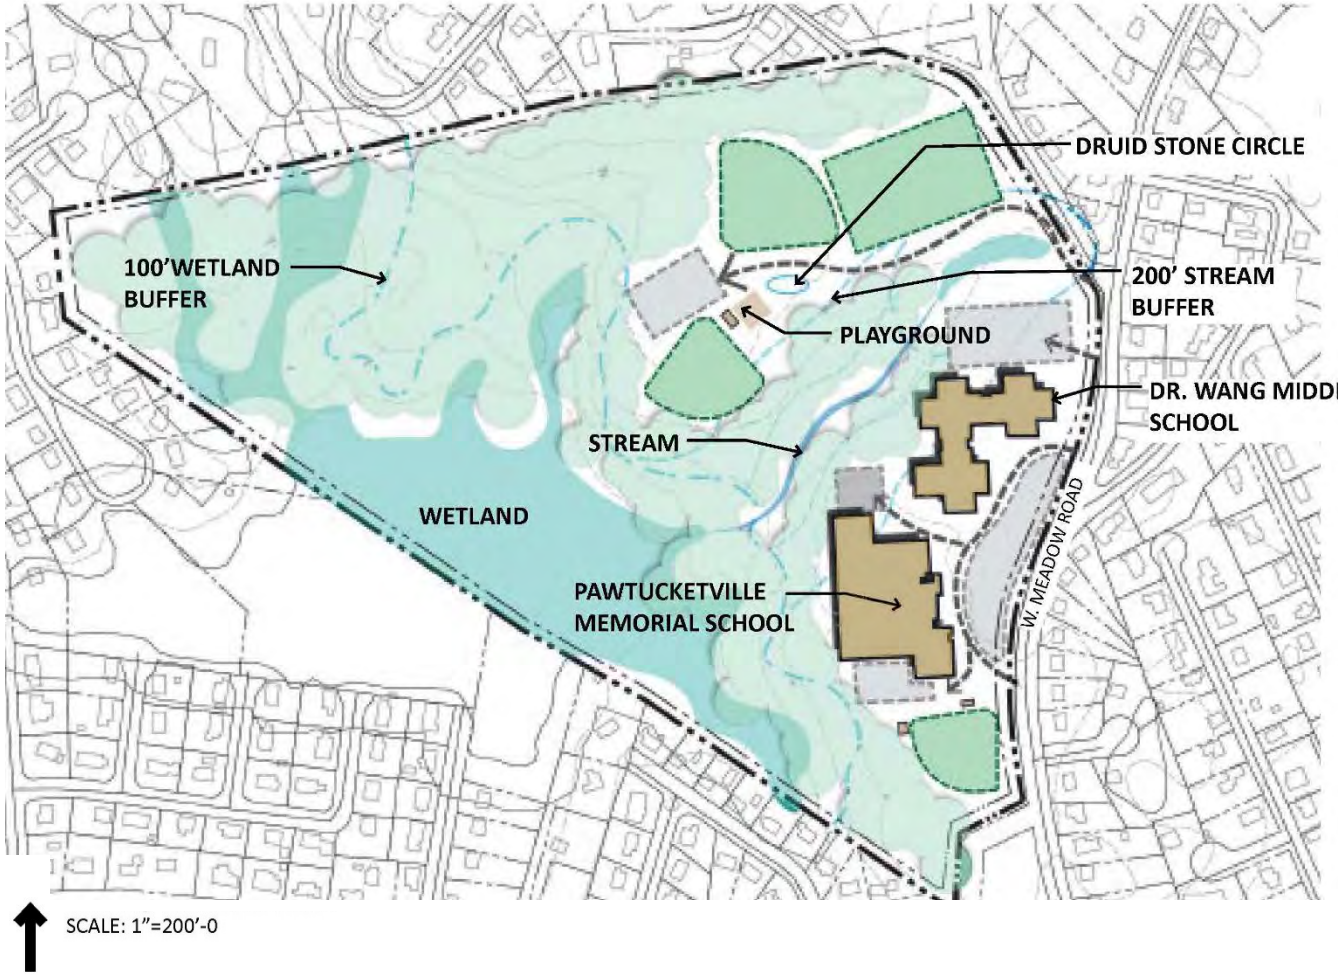
Pros:

- Useable/Buildable Area
- City Owned
- New Construction vs. Reno/Add

Cons:

- Proximity to Services
- Walking/Bus Route Proximity
- Loss of some existing fields
- Non-Reimbursable Site Development Costs

Alternative Sites -Wang/LeBlanc Park



BUILDABLE AREA
= 14.7 ACRES

Pros:

- Useable/Buildable Area
- City Owned
- New Construction vs. Reno/Add

Cons:

- Proximity to Services
- Walking/Bus Route Proximity
- Elementary/MS Students on Same Campus as High School
- Loss of Some Ball Fields

Vision & Goals

The Visioning Process

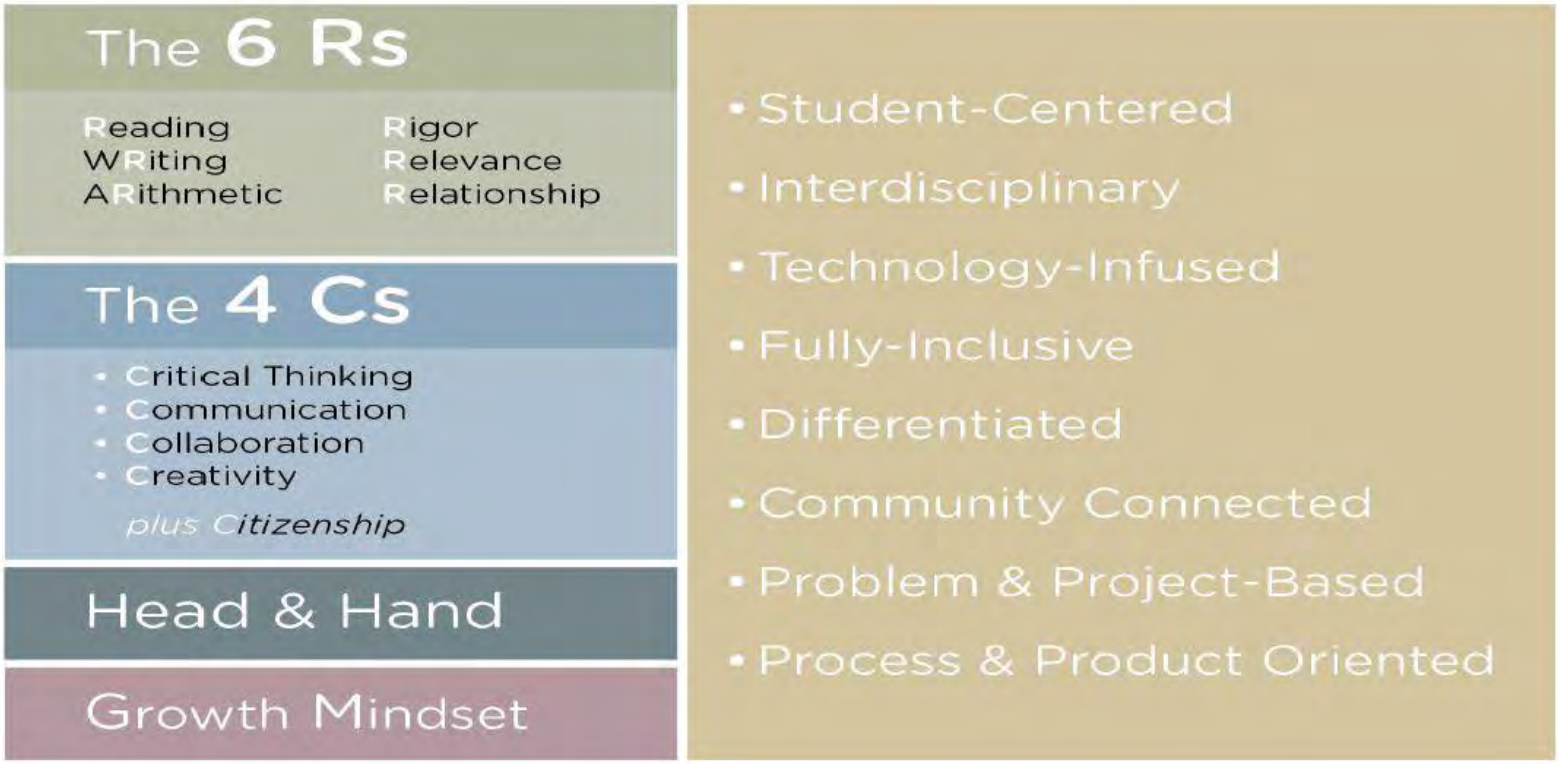
Vision & Goals

Some LHS Initiatives

- Freshman Academy
- Increasing number of co-taught classrooms
- Extended learning opportunities: internships, field studies, authentic contexts
- Generation Citizen – Action Citizenship
- Engineering – PLTW/STEM
- International Institute – ELL
- Lowell Latin Lyceum
- Fine and Performing Arts

Vision & Goals

21st Century Teaching and Learning



Vision & Goals

Priority Setting / Guiding Principles ☆

- Joyful environment ☆
- Safe and comfortable
- Flexible and adaptable ☆
- Meets needs of whole child ☆
- 21st century learning spaces
- Fosters collaboration and community
- Real-world, project-based and integrated instruction ☆
- Robust, integrated and evolving technology
- Community access and integration ☆
- Historical context

Preliminary Design Options

- **1. Base Repair** (replace systems past their useful life & code upgrades but does meet Educational Program Objectives)

- **2. Full Renovation w/ Small Addition** (requires creation of Academic swing space)
  - 2A. Renovate available space in nearby buildings(s) for ¼ population?
  - 2B. Create Temporary/Modular CRs using portion of Father Morrissette Blvd?
  - 2C. Create Temporary/Modular CRs via use of upper Garage Level?

- **3. Renovation w/ Rebuild of Freshman Academy, Gym & Portion of Lord Building** (requires temp PE/Athletics)
  - 3A. Temporary Gymnasiums(s) via use of upper Garage Level
  - 3B. PE/Athletic programs off-site for 1 yr. (use nearby Arena, Gyms, Pools?)

- **4. Renovation w/ Rebuild of Freshman Academy, Gym & Full Lord Building** (requires temp PE/Athletics)

- **5. New Construction**
  - Existing Site – New West side of the Canal/Reno East Side (requires swing space)
  - New Site

General Discussion - We Want to Hear From You

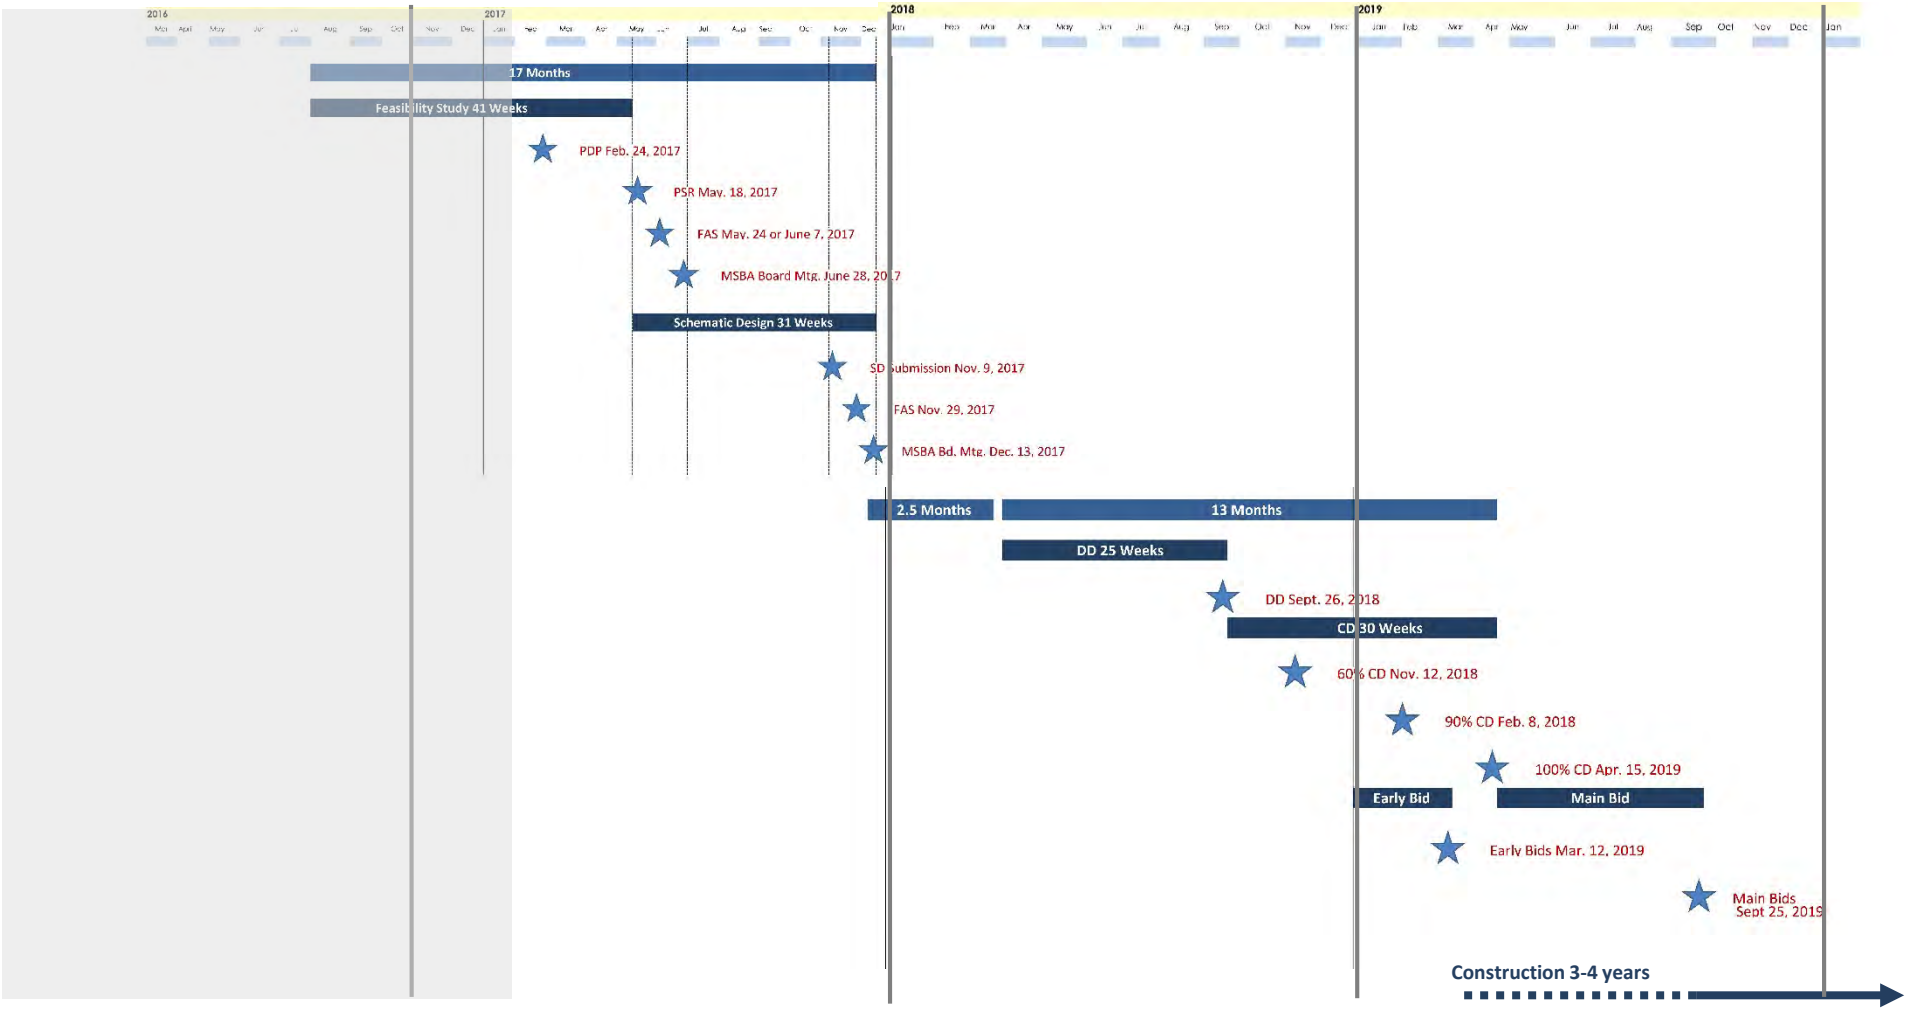
FEBRUARY 2ND 2017

Meeting with City Business Group
(original LSBC presentation 1/1/'17)

Project Timeline & Decisions

Overall Design Process (takes approximately 3 yrs, + bid/construction)



LOWELL

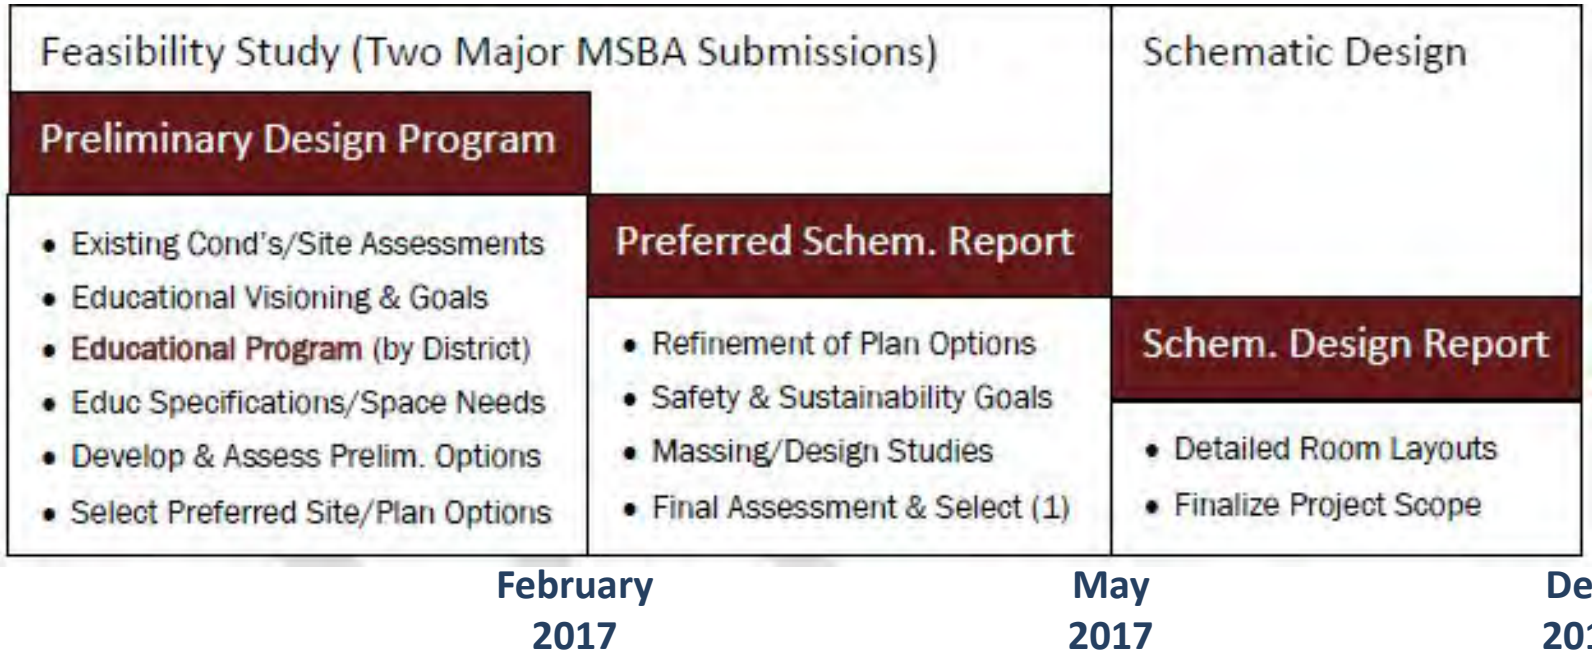
LOWELL HIGH SCHOOL PROJECT

SKANSKA

Perkins Eastman | DPC

Project Timeline & Decisions

The MSBA's study is defined in three major efforts that will occur over 17 months



Existing Site - Full Renovation

PARKING SPACES
- GEORGE AYOTTE GARAGE (1200 SPACE CAPACITY)
- 5 + HC PARKING SPACES

BUS DROP OFF: CLOSEST STOPS NOTED ON PLANS

SITE ACREAGE=6.6
USED ACREAGE=6.6+

BUILDABLE AREA = 6.94 ACRES

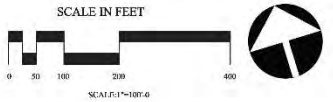
Note: Test fit in progress to determine if program fits on site

Pros:

- Proximity to Services
- Walking/Bus Proximity
- Existing Parking
- City Owner

Cons:

- Potential Environmental Issues
- Limited Site Size
- Phasing Costs
- No campus PE fields
- Internal academic spaces w/ no natural light



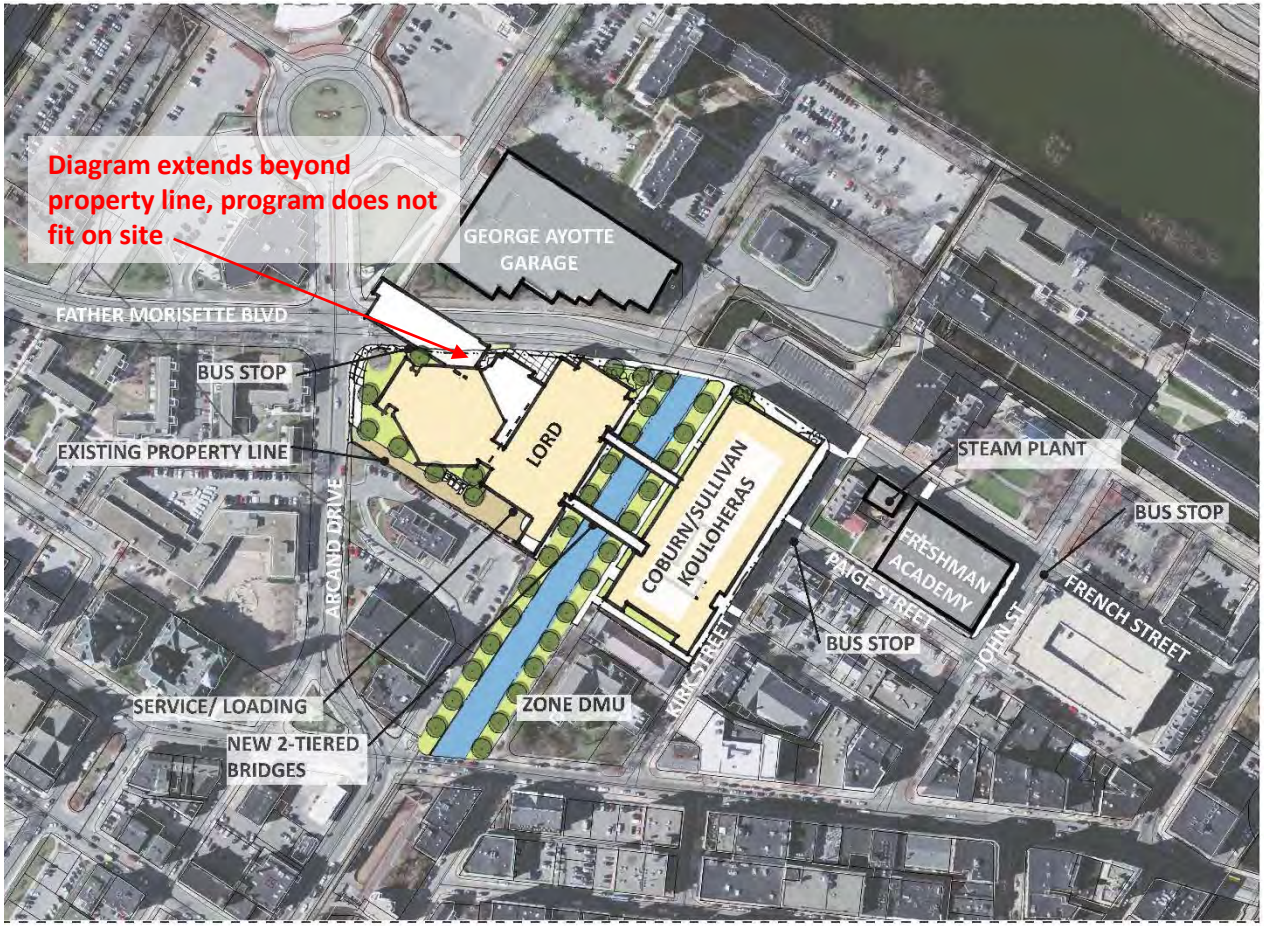
LOWELL

LOWELL HIGH SCHOOL PROJECT

SKANSKA

Perkins Eastman | DPC

Existing Site – Addition/Renovation Option 1



PARKING SPACES
- GEORGE AYOTTE GARAGE (1200 SPACE CAPACITY)
- 5 + HC PARKING SPACES

BUS DROP OFF: CLOSEST STOPS NOTED ON PLANS

SITE ACREAGE=6.6
USED ACREAGE=6.6+

BUILDABLE AREA = 6 ACRES
(Excludes .94 acres for Steam Plant & Freshmen Academy) Returns Freshman Academy & Steam Plant to City

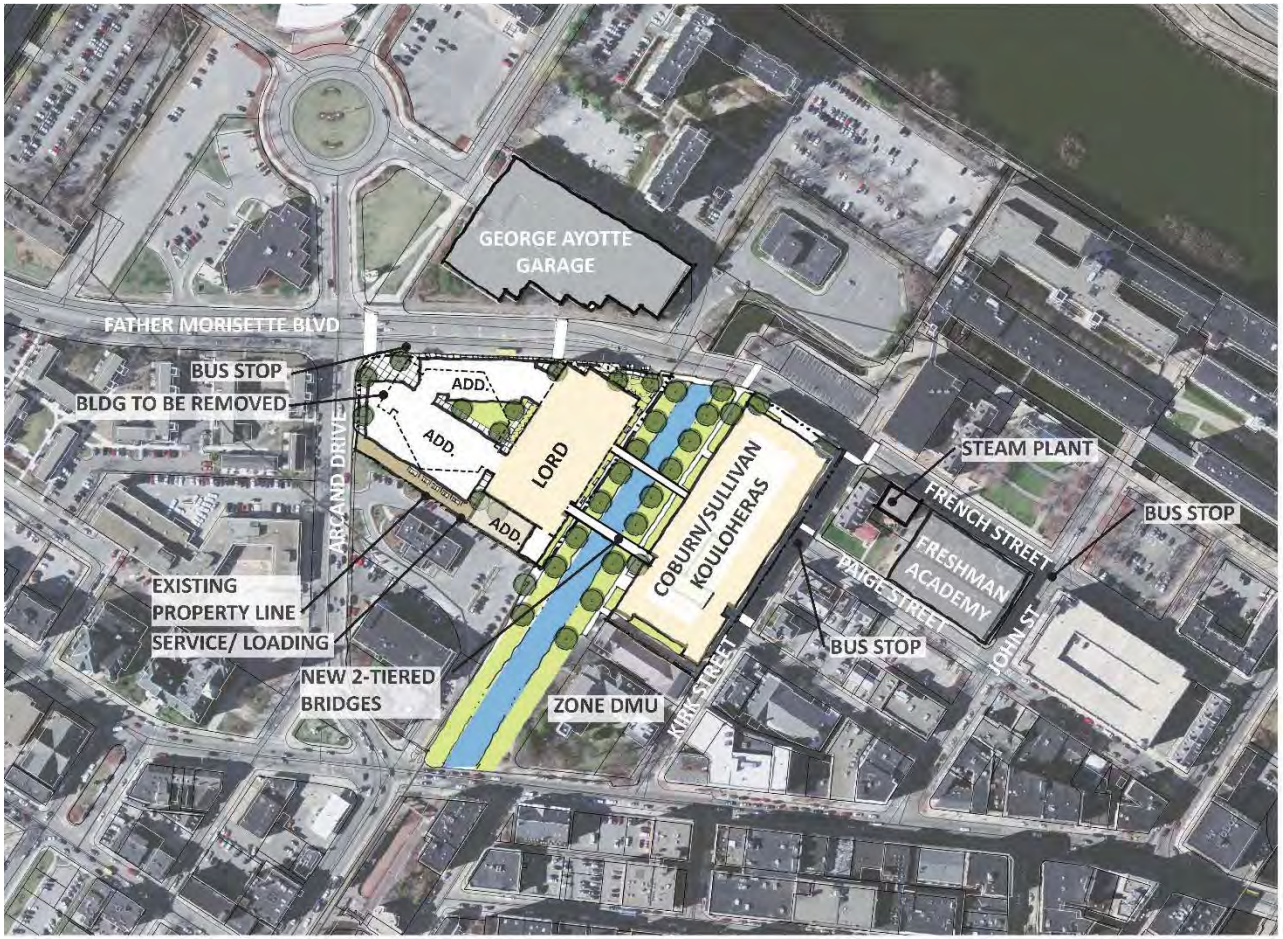
Pros:

- Proximity to Services
- Walking/Bus Proximity
- Existing Parking
- City Owner

Cons:

- Potential Environmental Issues
- Limited Site Size
- Phasing Costs
- No campus PE fields
- Program doesn't fit on site
- Internal academic spaces w/ no natural light
- Less efficient building

Existing Site – Addition/Renovation Option 2



PARKING SPACES
- GEORGE AYOTTE GARAGE (1200 SPACE CAPACITY)
- 5 + HC PARKING SPACES

BUS DROP OFF: CLOSEST STOPS NOTED ON PLANS

SITE ACREAGE=6.6
USED ACREAGE=6.6

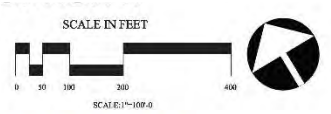
BUILDABLE AREA = 6 ACRES
(Excludes .94 acres for Steam Plant & Freshmen Academy)
Returns Freshman Academy & Steam Plant to the City

Pros:

- Proximity to Services
- Walking/Bus Proximity
- Existing Parking
- City Owner
- Meets the Program

Cons:

- Potential Environmental Issues
- Limited Site Size
- Phasing Costs
- No campus PE fields
- Internal academic spaces w/ no natural light



LOWELL

LOWELL HIGH SCHOOL PROJECT

SKANSKA

Perkins Eastman | DPC

Expanded Existing Site – Addition/Renovation Option 3

PARKING SPACES
- GEORGE AYOTTE GARAGE (1200 SPACE CAPACITY)
- 5 + HC PARKING SPACES

BUS DROP OFF: CLOSEST STOPS NOTED ON PLANS

SITE ACREAGE (WITH EXPANDED SITE)=8.0
USED ACREAGE=8.0

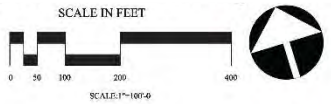
BUILDABLE AREA = 7.4 ACRES
(Excludes .94 acres for Steam Plant & Freshmen Academy)
Returns Freshman Academy & Steam Plan to the City

Pros:

- Proximity to Services
- Walking/Bus Proximity
- Existing Parking
- City Owner
- On campus PE fields
- Improved service/loading area
- Meets the Program
- Natural Light in all Academic Spaces

Cons:

- Potential Environmental Issues
- Limited Site Size
- Phasing Costs

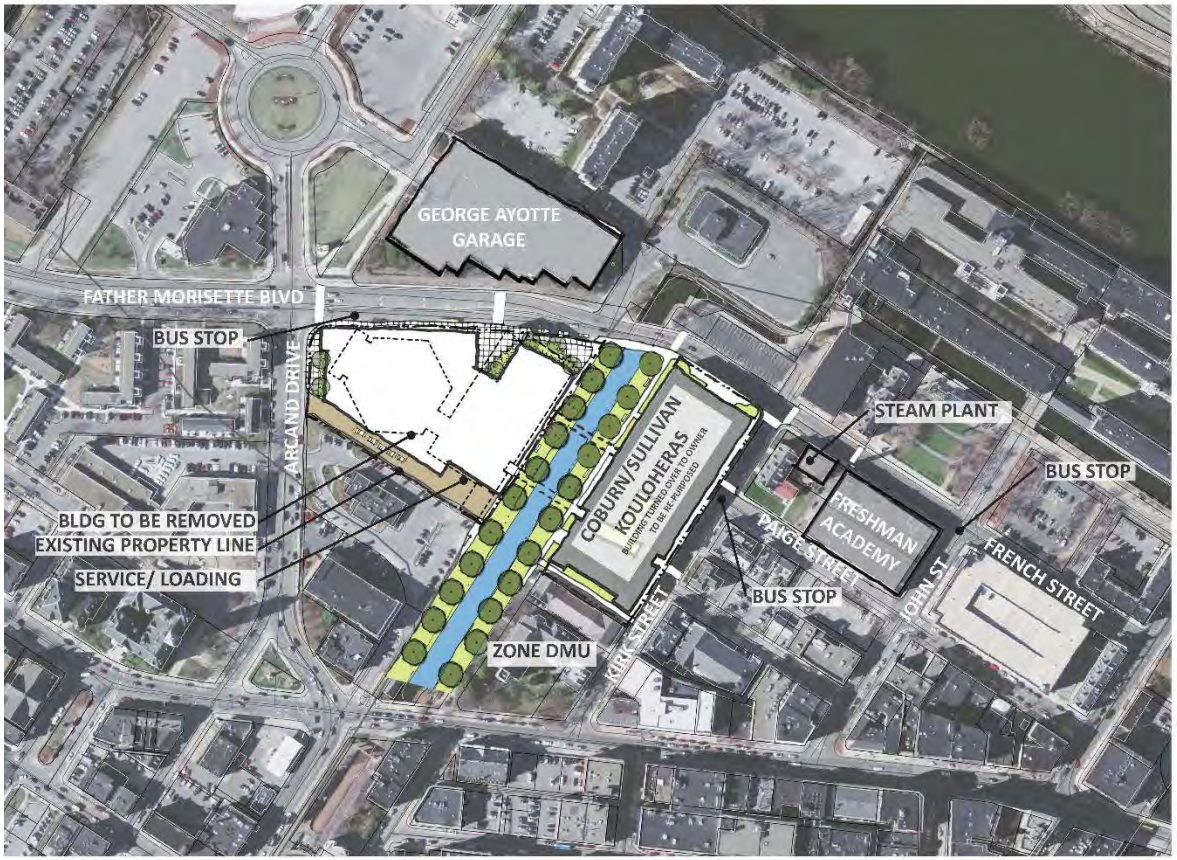


LOWELL

LOWELL HIGH SCHOOL PROJECT

SKANSKA
Perkins Eastman | DPC

New School at Existing Site



PARKING SPACES
- GEORGE AYOTTE GARAGE (1200 SPACE CAPACITY)
- 5 + HC PARKING SPACES

BUS DROP OFF: CLOSEST STOPS NOTED ON PLANS

SITE ACREAGE=6.6
USED ACREAGE=6.6

BUILDABLE AREA = 2.7 ACRES
(Excludes .94 acres for Steam Plant & Freshmen Academy & 3.3 acres for Coburn/Sullivan/Kouloheras)
Returns C/S/K, Freshman Academy, Steam Plant to City

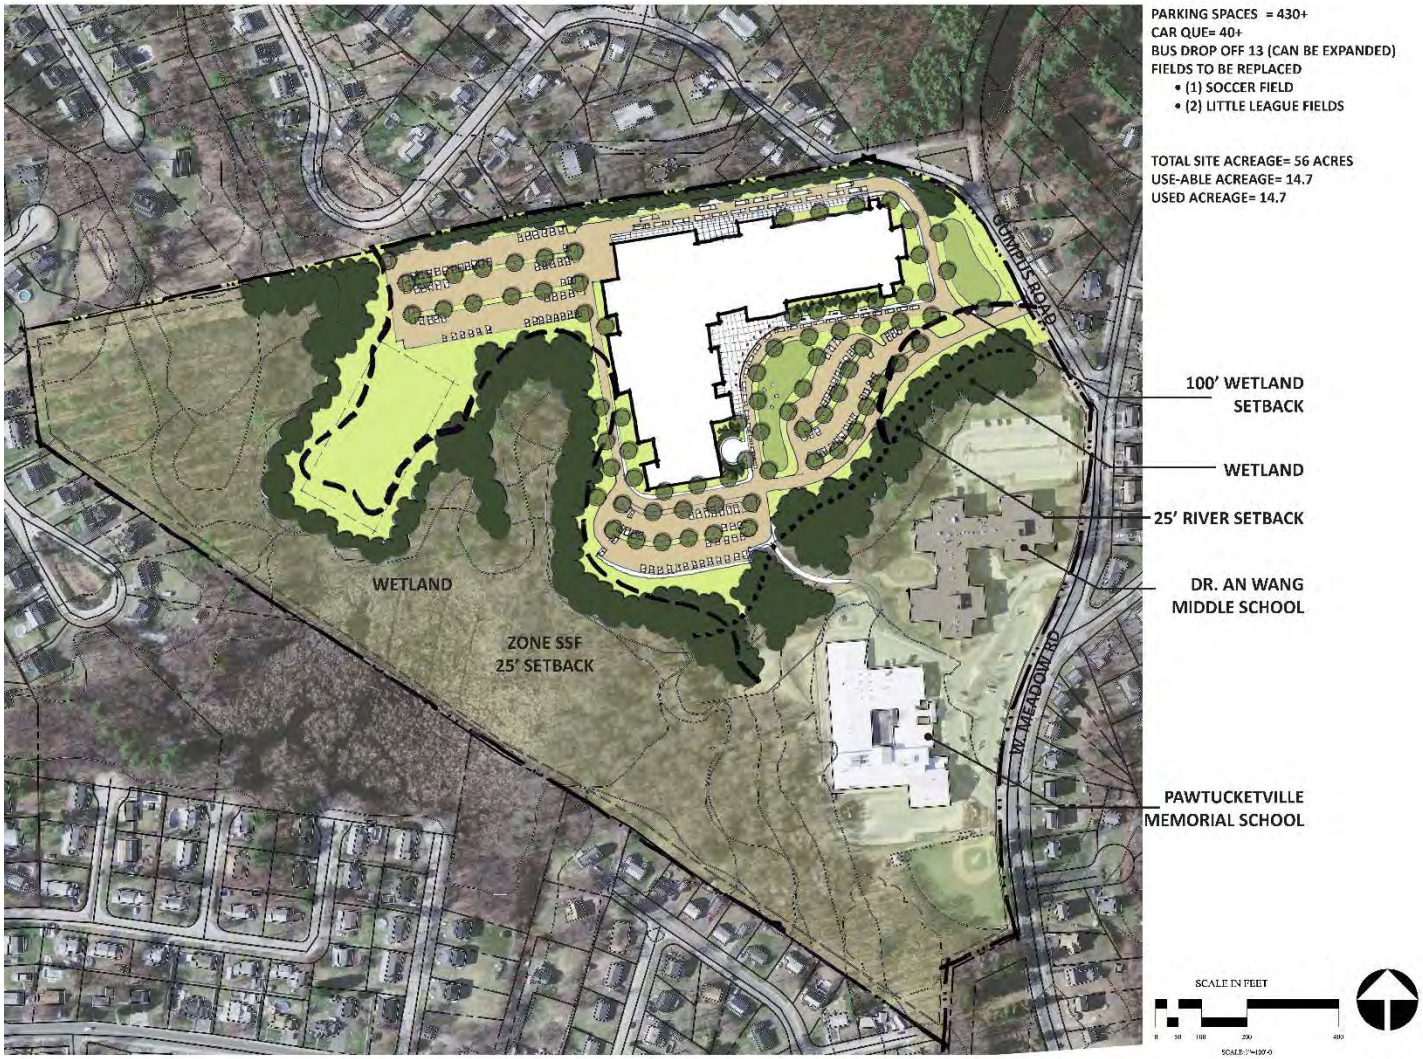
Pros:

- Proximity to Services
- Walking/Bus Proximity
- Existing Parking
- City Owner
- Meets program
- New construction
- More Efficient Building
- Fits all program

Cons:

- Potential Environmental Issues
- Limited Site Size
- Phasing Costs
- No campus PE fields
- High rise w/ additional mechanical costs
- Some internal academic spaces w/ no natural light

Wang Site



BUILDABLE AREA = 14.7 ACRES

Pros:

- Useable/Buildable Area
- City Owned
- New Construction vs. Reno/Add
- More efficient building
- No phasing
- On-site parking/bus queueing/drop off & pick-up
- On-site PE field

Cons:

- Proximity to Services
- Walking/Bus Route Proximity
- Elementary/MS Students on Same Campus as High School
- Loss of Some Ball Fields
- Heavy traffic in residential area
- Non-reimbursable site development costs

Cawley Site

BUILDABLE AREA = 30 ACRES
(includes Memorial Stadium)

Pros:

- Useable/Buildable Area
- City Owned
- New Construction vs. Reno/Add
- More efficient building
- No phasing
- On-site parking/bus queueing/drop off & pick-up
- On site PE fields

Cons:

- Proximity to Services
- Walking/Bus Route Proximity
- Loss of some existing fields
- Non-Reimbursable Site Development Costs

School Building Committee MSBA Meeting

Meeting Minutes

Date: Dec 8, 2015
Time: 11:00AM
Location: Mayor's Conference Room

1. - Introductions

Introductions showed 12 present: Kevin Murphy, Mike McGovern, Mike Vaughn, Salah Khelfaoui, Brian Martin, Robert Healy, Conor Baldwin, William Samaras, Brian Curley, Rady Mom, Steve Gendron and George Tsapatsaris.

City Manager, Kevin Murphy, presiding.

The City Manager noted that the MSBA project is the largest development project in Lowell's history. Manager Murphy explained that if the project is completed on or ahead of time, the City could pick up reimbursement rates to increase the overall reimbursement for the project. Fortunately the City is 3 months ahead of schedule so far, and the Manager expressed his wish that the project continue to proceed accordingly.

2. - Recap and Overview to Date

2.1 Description of Modules (Process Steps)

Assistant City Manager, Mike McGovern, reviewed the OMR Report and the Feasibility Study. M. McGovern discussed and passed out a copy of the City Council motion response from June 17th, 2015 regarding the modules and deliverable requirements for the project. Currently the City is in phase 2 of the project, the feasibility study.

3. - Current Module- Module II, Feasibility Study

3.1 Steps, Requirements, and Timeline

M. McGovern addressed the timeline for the next step in the current phase, selecting an OPM.

OPM Panel Meeting date: April 4th, 2016
Advertisement placed in Central Register by: Jan. 26, 2016

Advertisement appears in Central Register and Newspaper: Feb. 3, 2016
Applications due by: Feb. 17, 2016
Applications received by MSBA by: March 9, 2016
Review Committee Meeting: March 21, 2016
Panel member's recommendations due by: March 28, 2016

Brian Martin commented on applicant qualifications, City Manager noted that applicants will be MSBA approved prior to applying.

George Tsapatsaris commented on the position for OPM. City Manager noted that the OPM is responsible for selecting an architect and brings recommendations to School Building Committee for approval.

4. - Vote to Appoint a Certified MCCO (Massachusetts Certified Public Purchasing Official)

City Manager motioned for Mike Vaughn to be appointed Certified Public Purchasing Official, seconded by Robert Healy. So voted.

5. - Appointment of the OPM Selection Sub-Committee- 5 Members

City Manager motioned for: Brian Curley, Robert Healy, George Tsapatsaris, William Samaras and Brian Martin to be appointed to the OPM Selection Sub-Committee. Seconded by Salah Khelfaoui. So voted.

M. Vaughn volunteered to advise the OPM Selection Sub-Committee and assist with scheduling times and delivering applications to members. M. McGovern noted that scoring sheets will be given to members and need to be submitted to the MSBA.

6. - Required Votes

6.1 MSBA requires vote for the Building Committee empowering and authorizing the OPM selection sub-committee to "Prepare and Advertise a Request for Services for an Owner's Project Manager."

R. Healy motioned to vote for the Building Committee empowering and authorizing the OPM selection sub-committee to prepare and advertise a request for service (RFS) for an owner's project manager. Seconded by Rady Mom.

City Manager
Michael McGovern
Assistant City Manager

M. Vaughn discussed the difference RFS and RFP with the different ratings, and how the RFS will use points for the categories listed with maximums for each category.

M. Vaughn also noted the Committee will need a letter of intent from prior City Council agenda for the MSBA on the Lowell High School. Referred to Conor Baldwin.

S. Gendron commented on the application process to determine how many interviews should be held. The City Manager noted that there should be three, but also commented on how the sub-committee should not limit themselves to just three if there are multiple quality applicants. Committee agreed that the sub-committee should conduct interviews and give their recommendations to the School Building Committee for their single top applicant. W. Samaras commented on the top applicant that is recommended by the sub-committee to present to the full committee prior to making a final decision.

M. McGovern cautioned the committee on using dollar figures after attending the MSBA conference call.

W. Samaras commented on the size of the project. The City Manager noted that the High School is to accommodate 3,500 students.

The City Manager commented on the City Council vote to spend $2M without guarantee to be paid back, shows commitment from the City side of the project.

G. Tsapatsaris commented on finding a location for the school. The City Manager noted that the more sites proposed, it will increase cost as well as slow down approval by the MSBA. Manager Murphy also noted that the location and controversy over a new site should be left the feasibility study.

School Building Committee MSBA Meeting

Meeting Minutes

Date: March 7, 2016
Time: 9:30 AM
Location: Mayor's Conference Room

1. - Introductions

Introductions showed 12 present: Kevin Murphy, Mike McGovern, Mike Vaughn, Brian Martin, Robert Healy, Conor Baldwin, William Samaras, Brian Curley, Rady Mom, Steve Gendron, David Beati, and Jim Cook.

City Manager, Kevin Murphy, presiding.

The City Manager wanted to take a moment to thank the subcommittee for their hard work reviewing the voluminous proposals for OPM. The subcommittee took their time, did the work and deliberated.

M. Vaughn gave an overview of the meeting discussing the RFS, advertisement on the central register, and the process that the subcommittee followed to rank the ten proposals submitted. The subcommittee was unanimous in selecting Skanska.

The City Manager noted that G. Tsapatsaris has not been feeling well and was unable to attend. The Manager wishes to continue to have G. Tsapatsaris on the committee; he has a great wealth of information to offer. The Manager also noted that S. Khelfaoui was also unable to attend due to a conflict in his schedule.

2. - Presentation by Recommended OPM (Skanska)

Skanska representatives included Dale Caldwell (Project Executive), Jim Dowd (Project Director) and Jim Burrows (Project Manager).

D. Caldwell began the presentation with an introduction to the committee. He gave an overview of project including an example of a proposed schedule, choosing a design selection panel, the

project budget, and their previous experience with the Winchester High School project. D. Caldwell disclosed that their presentation did not include a known budget or schedule. D. Caldwell also discussed a possible solution in a phased occupied renovation. The OPM will look at all possibilities and options for the location of the LHS.

The City Manager raised his concern that the OPM discussed looking at the South Common as a potential location when it was unfeasible due to the necessary size of the school. D. Caldwell mentioned that the MSBA is looking for alternative locations and that the OPM must maintain their due diligence in selecting a location.

J. Dowd continued with a proposed phasing process. Skanska will attempt to steer away from modular class rooms because they are not reimbursed by the MSBA. J. Dowd then discussed their most difficult project, Winchester High School. During a phased renovation, like the Winchester project, it is highly important for students and teachers to know which parts of the building are on and off line. The OPM will coordinate scholarly and extracurricular activities. B. Martin mentioned the Tsongas Arena and UML scheduling be included, not just LHS schedule.

D. Caldwell noted that Skanska would find the best fit for Lowell. This included options, costs and working with the Finance department in regards to bonds. Skanska has prior work experience in Lowell, having worked with Middlesex Community College and LTC.

R. Healy wanted the committee to understand that the MSBA will reimburse $299 per square foot for construction costs. The average rate now is $400 per square foot. The MSBA will pay 80% of the $299, while the city will pay the rest. There is also a cap per square foot per student that the MSBA will reimburse the city for. The MSBA will not reimburse a municipality for a pool, yet Skanska included one in their presentation. S. Gendron raised the question that if the pool is not reimbursable, is the rest of the athletic facility? The athletic facility would be reimbursable by the MSBA.

D. Caldwell noted that Skanska are just advisors, the City will decide on alternative sites for the LHS. D. Caldwell mentioned conducting surveys to understand the community response to certain locations.

R. Mom had a question about looking at all alternative sites and if there was a time frame. D. Caldwell referred to the proposed schedule from their presentation.

Office of the City Manager
City Hall ● 375 Merrimack Street ● Lowell, MA 01852
P: 978.674.4000 ● F: 978.970.4007
www.LowellMA.gov

Kevin J. Murphy
City Manager
Michael McGovern
Assistant City Manager

M. Vaughn noted that the process for selecting an architect is similar to the OPM selection process. The city receives 3 votes while the MSBA has 13 votes.

S. Gendron asked about the traffic and bus access during renovations. Skanska will work closely with schools and LPD to figure out the logistics of the construction site and traffic flow.

W. Samaras raised his concern that construction at the present site is tight. D. Caldwell noted that workers and students will be isolated, and only certain approved individuals will be granted limited access to the building via escort. D. Caldwell also mentioned that tractor deliveries will be restricted when students arrive/ leave school.

3. - Discussion Regarding Recommended OPM

D. Caldwell, J. Dowd and J. Burrows left the Mayor's Reception Room for the committee to discuss the recommended OPM.

The Manager asked the subcommittee to discuss the applications and why they chose Skanska. The subcommittee includes B. Curley, R. Healy, G. Tsapatsaris, W. Samaras and B. Martin. B. Martin explained that out of the top four applicants, the two that stood out the most had experience MSBA and staff capacity. The experience with Winchester High School seemed to be very similar to the situation in Lowell. W. Samaras commented that the expertise of in house members of Skanska was the final determining factor.

The City Manager expressed his concern that Skanska mentioned the South Common as a potential alternative location, even if it is not feasible. The Manager continued that the committee should keep a short leash on the OPM. There will be a tight budget for the city, and it is not in the city's best interest to waste money on unfeasible sites. The Manager also brought up the fact that the MSBA requires one alternative site to be a new school building. He also mentioned that having twelve alternative sites that are unfeasible is not what the MSBA is looking for.

S. Gendron brought up the fact that a new site may be cheaper, renovating the existing building may be like opening Pandora's Box. B. Martin and R. Healy both agreed that it may be better to renovate the existing building. R. Healy noted that there are no political, cultural, social or economic reasons to split Lowell into two high schools. He also brought up the point that the OPM does have to go through the motions and the possibilities that may not appear feasible.

The City Manager is confident in the subcommittee's recommendation and believes that the firm has what is necessary at this time. B. Curley brought up that the subcommittee agreed on the paper applications that Skanska was the best, and the firm remained the best choice after the interviews were conducted.

B. Martin asked if there was a way to limit the amount of alternative sites, or if they could remove certain sites from the alternatives if they appear unfeasible. The Manager mentioned that the city will use language in the contract with the OPM that give the committee the ability to hold the OPM answerable and accountable. Rodney Conley informed the committee that the Finance team was able to save a current estimate of $360,000 negotiating the price of hourly rate with Skanska. The City Manager also mentioned a city ordinance that businesses make a "best effort" to hire Lowell residents. He hopes that although the number of new hires may be relatively small, that the company makes a best effort to hire Lowell residents.

4. - Vote to Hire OPM

City Manager motioned to vote to hire Skanska as the OPM, seconded by J. Cook and S. Gendron. All committee members present voted in favor of Skanska, none opposed. So voted.

5. - Moving Forward/ Next Steps
5.1 Schedule

March 9- Applications to MSBA
March 21- MSBA (internal) review committee of our OPM application
March 28 – MSBA (internal) documents forwarded to the MSBA OPM panel Committee
April 4 – OPM Panel Review Committee meeting date. Representatives from City and Skanska attend this meeting

5.2 Vote Add Mayor to MSBA committee.

City Manager motioned to vote to add Mayor Kennedy to the MSBA committee, seconded by S. Gendron. So voted.

The City Manager also mentioned asking Martha Howe to join the committee.

6. - Designer Selection Process.
6.1 Target approval date for a designer (architect) – July 2016

City Manager
Michael McGovern
Assistant City Manager

7. - Public Relations

7.1 Introduction of OPM at April 12 City Council meeting

M. McGovern stated that there should be a joint City Council and School Committee public meeting to introduce the OPM. The OPM would give an overview of the project and where the project will go from there. This will give an update to the Council and Committee members as well as the community. The proposed date would be in mid-April, possibly April 12th at the 6:30pm City Council meeting.

7.2 Presentation on the project at future joint Council/ School Committee meeting

7.3 Media Introduction

S. Gendron asked if committee members can discuss the OPM now that the committee has chosen Skanska. The City Manager asked the committee to not talk publicly until after April 4th, when the MSBA approves the committee's selection. He also noted that the MSBA does monitor newspaper articles, and that it is better to give the MSBA due respect until their approval.

8. - Next Meeting

M. McGovern mentioned that in the future there should be MSBA committee meetings every four to six weeks. The committee is currently six months ahead of schedule, and should stay on this track. R. Healy mentioned that the longer the project takes, the more expensive it will be.

The City Manager noted that M. McGovern and R. Conley will be the point of contract for the committee. R. Healy thanked M. McGovern, M. Vaughn and R. Conley for their hard work and keeping the committee on schedule.

Introduction

The City of Lowell ("Owner") is seeking the services of a qualified "Designer" within the meaning of M.G.L. Chapter 7C, Section 44, to provide professional design and construction administration services for the Lowell High School in Lowell, Massachusetts ("Project"). Selection of a Designer will be made by the Designer Selection Panel of the Massachusetts School Building Authority ("MSBA") in accordance with the MSBA's Designer Selection Procedures.

DUE DATE

Sealed Responses to the Requests for Services for Owner's Project Manager Services must be clearly labeled "RFS 16-91 Request for Designer Services for Lowell High School and delivered to: **May 18, 2016** at City Hall in the Purchasing Department, Room 60, 375 Merrimack Street, Lowell, MA 01852, at **11:00 AM**, EST/EDST, for the work described herein. RESPONDENTS ARE REQUIRED TO SUBMIT A COMPLETE RESPONSE INCLUDING ALL REQUIRED CERTIFICATION (ATTACHED) FORMS CONTAINED IN THIS PACKAGE. DO NOT REMOVE PAGES.

INFORMATIONAL MEETING AND SITE INSPECTION

A voluntary informational meeting and site inspection will be held: May 11, 2016. The Meeting will be held at Lowell City Hall in the Mayor's Reception Room, 2nd Floor, 375 Merrimack Street, Lowell, MA 01852, at 10:00 AM, EST/EDST with the site inspection immediately following.

CLARIFICATION REQUESTS

Any request for clarification must be submitted in writing (email is acceptable) to the attention of Chief Procurement Officer, P. Michael Vaughn at City Hall in the Purchasing Department, Room 60, 375 Merrimack Street, Lowell, MA 01852 no later than May 12, 2016 at 5pm.

Should the City make changes to any specification, stipulation, requirement, or procedure, notification will be made to all Respondents in the form of written Addenda. No officer, agent, or employee of the City is authorized to amend any provision contained in this RFS, unless such amendment is issued as an Addendum and sent to all Respondents in accordance with this Section (Clarification Requests). Respondent is required to acknowledge all addenda. (Attached is addenda form).

Invitation: The ***City*** of Lowell ("Owner") is seeking the services of a qualified "Designer" within the meaning of M.G.L. Chapter 7C, Section 44 to provide professional design and construction administration services for the Lowell High School in Lowell, Massachusetts. Selection of a Designer will be made by the Designer Selection Panel of the Massachusetts School Building Authority ("MSBA") in accordance with the MSBA's Designer Selection Procedures.

The Owner is seeking design services to conduct a Feasibility Study which will include the development and evaluation of potential alternative solutions and continue through the Schematic Design Phase of the preferred alternative initially. Subject to the approval of a Project by the MSBA and further subject to adequate funding authorized by the Owner, the contract between the Owner and the Designer may be amended to include continued designer services through design development, construction contract documents, bidding, award of construction contract(s), construction administration, final closeout and warranty period of the potential Project. A potential Project may include a renovation of the existing school, a renovation of and addition to the existing school and/or new construction.

The estimated total project budget for a potential Project may range from ***$142,000,000 to $190,000,000*** depending upon the solution that is agreed upon by the Owner and the MSBA and that is ultimately approved by a vote of the MSBA's Board of Directors. The Fee for Basic Services will be negotiated.

Pursuant to M.G.L. Chapter 7C, Section 6, the Designer must agree to contract with minority and women-owned businesses as certified by the Supplier Diversity Office (SDO) formerly known as the State Office of Minority and Women Business Assistance (SOMWBA). The amount of participation that shall be reserved for such enterprises shall not be less than seventeen and nine tenths percent (17.9%) of the contract price for combined minority business enterprises (MBE) and women-owned business enterprises (WBE). Applicants must include a reasonable representation of both MBE and WBE firms that meets or exceeds the combined goal. Proposed MBE/WBE participation plans that include solely MBE or solely WBE participation, or do not include a reasonable amount of participation by both MBE and WBE firms to meet the combined goal, will not be considered responsive. Applications from MBE and WBE firms as prime designers are encouraged. Where the prime Designer is an SDO certified MBE or WBE, the Designer must bring a reasonable amount of participation by a firm or firms that hold the certification which is not held by the prime Designer on the project.

The minority and women-owned business enterprises must be selected from those categories of work identified in Item F of this RFS or be assigned to tasks required under Basic Services as specifically set forth in the Contract for Designer Services as amended. Applicants are strongly encouraged to utilize multiple disciplines and firms to meet their MBE/WBE goals. Consultants to the prime Designer can team within their disciplines in order to meet the MBE/WBE goals but must state this relationship on the organizational chart (Section 6 of the application form).

For additional information on Designer qualifications see Sections E. and F. in this RFS.

A. Background:

Lowell, incorporated in 1826, is the fourth-largest city in the Commonwealth of Massachusetts, with an estimated population of over 108,000. The City has a total area of 14.5 square miles and eight distinct neighborhoods: the Acre, Back Central, Belvidere, Centralville, Downtown, Highlands, Pawtucketville, and South Lowell.

The City of Lowell conducted a collaborative analysis with the Massachusetts School Building Authority of enrollment projections and space capacity needs for the proposed Lowell High School Project. The City hereby acknowledges and agrees that the design shall be based on an enrollment of no more than 3,520 students in grades 9 -12. The MSBA shall determine the square feet per student space allowance and total square footage for a high school serving 3,520 students in grades 9 – 12. Lowell High School is listed on the National and State Registers of Historic Places through its inclusion within both the Lowell National Historical Park & Preservation District and the City Hall Historic District. This applies to the two buildings on Kirk Street including Colburn Hall (1892) and an addition built between 1920 -1922. The 1981 section of Lowell High School is not within either district, nor would be eligible for listing and is not historically significant. Three nearby buildings also associated with the high school, the former Lowell Trade School (1900) at 68 John Street, the Lowell High School Annex (1939) at 55 French Street as well as the powerhouse and associated smokestack on French Street are also listed on the National and State Registers of Historic Places through their inclusion within both the Lowell National Historical Park & Preservation District and the City Hall Historic District.

B. Project Goals and General Scope:

On or about***April 12*, 2014**, the Owner submitted a Statement of Interest (Attachment A) to the MSBA for Lowell High SchoolThe MSBA is an independent public authority that administers and funds a program for grants to eligible cities, towns, and regional school districts for school construction and renovation projects. The MSBA's grant program is discretionary, and no city, town, or regional school district has any entitlement to any funds from the MSBA. At the **November 18, 2015** Board of Directors meeting, the MSBA Board voted to issue an invitation to the Owner to conduct a feasibility study for this Statement of Interest to identify and study possible solutions and, through a collaborative process with the MSBA, reach a mutually-agreed upon solution. The MSBA has not approved a Project and the results of this feasibility study may or may not result in a Project approved by the MSBA.

It is anticipated that the feasibility study will review the problems identified in the Statement of Interest at the The Lowell High School facilities are comprised of multiple buildings, the original 1892 was added to in 1922 and renovated in 1971 and 1997 (minor). The 1980 facility was also renovated in 1997. These two buildings, the 1892/1922 and the 1980, are connected by two enclosed, glazed bridges which span across the canal and park below. The Freshman Academy, a completely separate structure, built in 1900, added on in 1939 and renovated in 1986 is one block away. It is anticipated that the feasibility study will review the problems identified in the Statement of Interest at Lowell High School. Prevention of severe overcrowding expected to result from increased enrollments. Replacement of or addition to obsolete buildings in order to provide for a full range of programs consistent with state and approved local requirements.

The Feasibility Study shall include a study of all alternatives and contain all information required by 963 CMR 2.10(8) and any other applicable rules, regulations, policies, guidelines and directives of the Authority, including, but not limited to, a final design program, space summary, budget statement for educational objectives, and a proposed total project budget. The Schematic Design shall include, but not be limited to, the information required by the Authority's Feasibility Study Guidelines, including, but not limited to, a site development plan, environmental assessment, geotechnical assessment, geotechnical analysis, code analysis, utility analysis, schematic building floor plans, schematic exterior building elevations, narrative building systems descriptions, MA-CHPS or LEED-S scorecard, outline specifications, cost estimates, project schedule and proposed total project budget.

Project objectives under consideration by the Owner include: The Feasibility Study includes review of the Lowell Public Schools Comprehensive Assessment – OMR Architects 2014;

- Review of School Department policies and objectives;
- Identification of community concerns that may impact study options;
- Identification of specific milestone requirements and/or constraints of the District . e.g. Local approval and votes, classroom size, enrollment; swing space, occupancy issues; Swing space would be an issue if the ultimate solution is a renovation or addition/renovation at the current site. It would not be an issue if the ultimate decision is to build a new School at new location as the students could remain in their current location until the new school is built
- Provide learning environments designed for current and future educational programs with appropriate lighting, work space, noise controls, and ventilation
- Develop a design that is high in quality, energy efficient, cost-effective, and meets the needs of the educational program
- Develop a design that conforms to the Massachusetts High Performance Green Schools Guidelines (MA-CHPS or LEED for Schools Guidelines);
- Conduct an educational visioning study and develop the educational specifications, alternative conceptual designs, and construction phasing plans
- Ensure that the School meets the Massachusetts Architectural Access Board requirements and ADA regulations
- Develop accurate and complete cost estimates, including life cycle costs of operating the school as it relates to future operational and capital budgets
- Identify community concerns that may impact study options, including septic disposal, conservation and environmental considerations
- Determine the merits of whether to proceed with the CM-at-Risk Delivery Method
- School provides career and workforce education by achieving sustainable results through the use of strategies that focus on providing innovative, data driven, best practices

  Our Pathway Programs provide opportunities for all students and their different abilities, interests and talents. Whether a student is planning to work immediately after high school, or will continue learning by attending a training program, a technical institute, a college or university, there are courses in our Pathway Programs that are right for every student.. Our Pathway Programs use an applied, hands-on/minds-on approach to learning that is connected to real-world work experiences.

- Increase productivity and cost effectiveness by providing a balance of academic environments and applied learning laboratories and shop areas that mirror the workplace and facilitate current instructional technologies.
- Utilize the latest Green technologies, strategies, materials and approaches to create an integrated heating, cooling and ventilation system that delivers both superior air quality and occupant comfort minimizing energy consumption and resulting in significant improvements in the teaching and learning environments supporting a professional learning community
- Correct flawed design flow approaches and provide students and the general public with an experience that creates and nurtures a desire for a continuing partnership with a 21st Century educational training facilityr.

C. Scope of Services:

The required scope of services is set forth in the MSBA's standard Contract for Designer Services (Contract), a copy of which is attached hereto and incorporated herein by reference. If the Owner decides to proceed with the Project beyond the Schematic Design Phase and when the project delivery method is decided (Design/Bid/Build or Construction Manager at Risk), the Contract will be amended accordingly. Copies of Designer Services Contract Amendments for Design/Bid/Build and Construction Manager at Risk are also attached hereto and incorporated herein by reference. Unless specifically excluded, the Designer's Basic Services consist of the tasks described in the Contract for Designer Services as amended and this RFS including all investigative work (to the extent provided for in the Contract), feasibility study, schematic design, and, at the Owner's option, design work, preparation of construction documents, bidding period administration, construction administration, and other related work reasonably inferred in the opinion of the Owner and the Authority as being necessary to meet the project's stated scope and goals.

This RFS will be appended to and become part of the Contract for Designer Services. Any Designer selected as a result of this RFS will be required to execute the Contract for Designer Services and applicable amendment that are attached hereto.

Basic Services include, but are not limited to, verification of existing record information including building dimensions, details and general existing conditions, cost estimating, architecture, civil, sanitary, mechanical, electrical, plumbing, fire protection, structural, site planning and landscape architecture, basic environmental permitting, graphics, lighting design, acoustics, data and communication, educational consultants, any specialty consultants for sustainable design (LEED/MA-CHPS), laboratory, library/media center and kitchen space, code consultants, accessibility, energy evaluations, detailed cost estimates; preparation of construction documents; bidding and administering the Construction Contract Documents and other design and consulting services incidental and required to fulfill the project goals. Please refer to the Contract and amendments for a complete summary of Basic Services.

Extra and reimbursable expenses are defined in Articles 8 and 9 of the Contract in Attachment B.

D. Project Phases and Work Plan:

Work under this RFS is divided into the Project Phases as listed in Article 7 of the Contract as amended and as may be augmented in this RFS. Each Project Phase will consist of one or more required submissions, and may include site visits, meetings with the Owner, Owner's Project Manager, the Authority and others, and other tasks as described.

The estimated total duration of the Contract for Designer Services from Feasibility Study through the approval of Schematic Design, inclusive of review and approval time, is estimated to be *78 weeks* as follows:

(The District should provide the estimated schedule for the preliminary program and the schematic design phase based on the project specifics.)

Preliminary Program through Final Design Program	*35*	weeks
Schematic Design Phase	*43*	weeks
Design Development through 100% CD	*TBD*	
Bidding	*TBD*	
Construction Administration Phase	*TBD*	weeks

Estimated Total Duration (Exclusive of Completion Phase)	***TBD*** **weeks**

The durations for the Bidding and Construction Administration Phases are estimates only. Actual durations may vary depending upon the agreed upon solution, the extent of required document revisions, the time required for regulatory approvals, and the construction contractor's performance.

1. Feasibility Study/Schematic Design Phase; 20 -24 months

2. Design Development/Construction Documents/Bidding Phase; 10- 12 months

3. Construction Phase. 24 - 36 months

Such variances in estimated time will not, in and of themselves, constitute a justification for an increased Fee for BasicServices, nor are they a substitute for the performance time requirements shown below.

The Designer performance times listed in the table below are requirements, not estimates. The Owner, through the Owner's Project Manager will review each submission and, if acceptable, provide notice to the Designer to proceed to the next phase.

The Designer's adherence to the performance times listed below will be part of the Owner's performance evaluation of the Designer's work, which will be conducted at the end of the Project.

	Within/Weeks	
• **Attend a "Kick-Off" meeting**	*2*	Execution of a contract with the Owner
• **Preliminary Program**	*4*	Execution of a contract with the Owner
• **Development of Alternatives**	*6*	Execution of a contract with the Owner
• **Preliminary Evaluation of Alternatives**	*4*	Approval of Alternatives
• **Final Evaluation of Alternatives**	*4*	Approval of Preliminary Evaluation
• **Recommendation of Preferred Solution**	*2*	Approval of Final Evaluation
• **Final Design Program**	*2*	Approval of Preferred Solution
• **Schematic Design**	*12*	Approval of the Final Design Program
• **Design Development**	***TBD***	Approval of the Schematic Design
• **60% Construction Documents**	***TBD***	Approval of Design Development
• **100% Construction Documents**	***TBD***	Approval of Design Development

E. Minimum qualifications:

Selection will be made by the MSBA Designer Selection Panel in accordance with the Authority's Designer Selection Procedures, attached hereto as Attachment E. The Respondent must certify in its cover letter that

it meets the following minimum requirements. Any Respondent that fails to include such certification in its response, demonstrating that these criteria have been met, will be rejected without further consideration. To be eligible for selection, the Designer must meet **all** of the following qualifications.

1. Be a qualified Designer within the meaning of M.G.L. Chapter 7C, Section 44, employing a Massachusetts registered ***architect*** responsible for and being in control of the services to be provided pursuant to the Contract.
2. The Massachusetts registered ***architect*** responsible for and in control of the services to be provided has successfully completed the Massachusetts Certified Public Purchasing Official Program seminar "Certification for School Project Designers and Owner's Project Managers" as administered by the Office of the Inspector General of the Commonwealth of Massachusetts, and must maintain certification by completing the "Recertification for School Project Designers and Owner's Project Managers" seminar every three years thereafter. Proof of recertification or registration in the next recertification seminar for which space is available must be provided.
3. Pursuant to M.G.L. Chapter 7C, Section 6, the Designer must agree to contract with minority and women-owned businesses as certified by the Supplier Diversity Office (SDO) formerly known as the State Office of Minority and Women Business Assistance (SOMWBA). The amount of participation that shall be reserved for such enterprises shall not be less than seventeen and nine tenths percent (17.9%) of the design contract price for combined minority business enterprises and women-owned business enterprises. Applicants must include a reasonable representation of both MBE and WBE firms that meets or exceeds the combined goal.

F. Selection Criteria:

In evaluating proposals, the Owner and Designer Selection Panel will consider the members of the proposed design team. Identify those member(s) of the proposed design team who will be responsible for the following categories of work: (Firm's name, individual's name and professional registration or license number, as applicable, must be listed in the application for each category of work, as well as whether the firm is SDO certified as an MBE and/or WBE).

1. ***Architecture***
2. ***Educational Programming***
3. ***Civil Engineering***
4. ***Landscape Architecture***
5. ***Structural Engineering***
6. ***Fire Protection Engineering***
7. ***Plumbing Engineering***
8. ***HVAC Engineering***
9. ***Electrical/Lighting***
10. ***Data/Communications***
11. ***Environmental Permitting***
12. ***Geotechnical Engineering***
13. ***Geoenvironmental Engineering***
14. ***Hazardous Materials***
15. ***Cost Estimating***
16. ***Kitchen/Food Service Consultant***
17. ***Laboratory Consultant***
18. ***Acoustical Consultant***
19. ***Specifications Consultant***
20. ***Library/Media***
21. ***Technology Consultant/Audio Visual Consultant***

22. *Theatrical Consultant*
23. *Sustainable/Green Design/Renewable Energy Consultant*
24. *Code Consultant*
25. *Accessibility Consultant*
26. *Traffic Consultant*
27. *Furniture, Fixtures and Equipment Consultant*
28. *Site Surveying*
29. *Security Consultant*

** N.B. –

Applicants must address each category of work listed above in their application whether it is to be performed by in-house staff or by sub-consultant(s).

The members of the team for each of the categories of work listed above must be identified including the firm's name, individual's name and professional registration or license number, as applicable, as well as whether the firm is SDO certified as an MBE and/or WBE.

Failure to address <u>each</u> category may result in the elimination of the applicant from consideration on this project.

Applicants should not list any consultants other than those for the categories of work listed above.

The minority and women-owned business enterprises must be selected to perform services addressing the categories of work listed above or be assigned to tasks required under Basic Services as specifically set forth in the Contract for Designer Services as amended. Consultants other than those proposed for the categories of work listed above or required to perform Basic Services may not be used for purposes of meeting M/WBE requirements. Applicants are strongly encouraged to utilize multiple disciplines and firms to meet their MBE/WBE goals. Consultants to the prime Designer can team within their disciplines in order to meet the MBE/WBE goals but must state this relationship on the organizational chart (Section 6 of the application form).

The Owner and Designer Selection Panel will consider the following additional criteria in evaluating proposals:

1. Prior similar experience best illustrating current qualifications for the specific project.
2. Past performance of the firm, if any with regard to public, private, DOE-funded, and MSBA funded projects across the Commonwealth, with respect to:
    a. Quality of project design.
    b. Quality, clarity, completeness and accuracy of plans and contract documents.
    c. Ability to meet established program requirements within allotted budget.
    d. Ability to meet schedules including submission of design and contract documents, processing of shop drawings, contractor requisitions and change orders.
    e. Coordination and management of consultants.
    f. Working relationship with contractors, subcontractors, local awarding authority and MSBA staff and local officials.
3. Current workload and ability to undertake the contract based on the number and scope of projects for which the firm is currently under contract.
4. The identity and qualifications of the consultants who will work on the project.
5. The financial stability of the firm.
6. The qualifications of the personnel to be assigned to the project.
7. Geographical proximity of the firm to the project site or willingness of the firm to make site visits and attend local meetings as required by the client.
8. Additional criteria that the MSBA Designer Selection Panel considers relevant to the project.

G. Proposal requirements

Persons or firms interested in applying must meet the following requirements:

1. **Applicants must have an up-to-date Master File Brochure on file at the Massachusetts School Building Authority.**

2. Applications shall be on "Standard Designer Application Form for Municipalities and Public Agencies not within DSB Jurisdiction (Updated May 2014)" as developed by the Designer Selection Board of the Commonwealth of Massachusetts. **Applications (one original, twenty (20) hard copies, and two (2) digital copies in PDF format on separate compact disks) must be received on or before 2:00 PM , _May 18, 2016.** Applications should be printed double-side and bound in such a manner that the pages lie and remain flat when opened. The specific organization and orientation of the proposal is at the applicant's discretion, but it is recommended that the proposal be laid out in such a manner that the reader doesn't need to be constantly rotating the proposal. Applications should not be provided with acetate covers.

3. Applications must be accompanied by a concise cover letter that is a maximum of two pages in length. A copy of the cover letter should be attached to each copy of the application. The cover letter must include the certifications as noted in Section E of this RFS. (A copy of the MCPPO certification should be attached to the cover letter as well as any SDO letters.)

4. Applicants may supplement this proposal with graphic materials and photographs that best demonstrate design capabilities of the team proposed for this project **subject to the page limitations as set forth in the Standard Designer Application Form.**

5. Proposals shall be addressed to:

Name	P. Michael Vaughn, Chief Procurement Officer
Address	Lowell City Hall 375 Merrimack Street, Purchasing Department, Room 60 Lowell, MA 01852
Phone Number	978-674-4110
Email	pmvaughn@lowellma.gov

6. Proposals must be clearly identified by marking the package or envelope with the following:

   "Designer Services for Lowell High School" and "Name of Applicant"

7. All questions regarding this RFS should be addressed exclusively in writing to:

Name	P. Michael Vaughn, Chief Procurement Officer
Address	Lowell City Hall 375 Merrimack Street, Purchasing Department, Room 60 Lowell, MA 01852
Phone Number	978-674-4110
Email	pmvaughn@lowellma.gov

H. Pre-Proposal Meeting

All interested parties should attend a briefing session at Lowell High School scheduled for **May 11, 2016** at **10:00 AM.**

I. Withdrawal

Applicants may withdraw an application as long as the written request to withdraw is received by the Owner prior to the time and date of the proposal opening.

J. Public Record

All responses and information submitted in response to this RFS are subject to the Massachusetts Public Records Law, M.G.L. c. 66, § 10 and c. 4, § 7(26). Any statements in submitted responses that are inconsistent with the provisions of these statutes shall be disregarded.

K. Waiver/Cure of Minor Informalities, Errors and Omissions

The Owner reserves the right to waive or permit cure of minor informalities, errors or omissions prior to the selection of a Respondent, and to conduct discussions with any qualified Respondents and to take any other measures with respect to this RFS in any manner necessary to serve the best interest of the Owner and its beneficiaries.

L. Rejection of Responses, Modification of RFS

The Owner reserves the right to reject any and all responses if the Owner determines, within its own discretion, that it is in the Owner's best interests to do so. This RFS does not commit the Owner to select any Respondent, award any contract, pay any costs in preparing a response, or procure a contract for any services. The Owner also reserves the right to cancel or modify this RFS in part or in its entirety, or to change the RFS guidelines. A Respondent may not alter the RFS or its components.

Kevin J. Murphy
City Manager
Michael McGovern
Assistant City Manager

School Building Committee MSBA Meeting

Meeting Minutes

Date: April 14, 2016
Time: 11:00AM
Location: Mayor's Conference Room

1. - Attendance

Attendees: Kevin Murphy, Mike McGovern, Mike Vaughn, Robert Healy, Conor Baldwin, William Samaras, Steve Gendron, James Cook, and David Beati

Also in attendance: Gary Frisch (representing Superintendent Khelfaoui), Richard Underwood, Rodney Conley and Celine Gettings (representing Mayor Kennedy). From Skanska: Jim Dowd, Mary Ann Williams and Dale Caldwell.

2. - Recap and Overview to Date

City Manager, K. Murphy, presiding.

The City Manager noted the attendance of G. Frisch and R. Underwood. It was determined that with Jay Lang and Brian Curley no longer in the district that both G. Frisch, as School Business Administrator, and R. Underwood, as interim Facilities Manager, would be added to the School Building Committee. The Committee was asked to vote on accepting both Frisch and Underwood as members, motioned by R. Healy and seconded by J. Cook. So voted.

The City Manager noted the joint City Council and School Committee meeting that took place on April 12th, 2016. At the meeting Skanska, the OPM team for the Lowell High School project, presented an introduction and overview to the Council and Committee members.

The Manager also noted his disappointment with the MSBA telephone conference. He then highlighted the next item in the project for the School Building Committee members, selecting a designer for the feasibility study.

3. - Designer Selection Timeline- Module II, Feasibility Study

J. Dowd addressed the timeline for the next steps in the current phase for selecting a designer.

This meeting was to discuss: 1) DSP process and form a "Designer Application Review Committee" (DARS) to review and evaluate Designer applications, recommend sub-committee of 4-6 members. Identify three individuals to represent the School District at the MSBA Designer Selection Panel (DSP) meeting.

3.1 Designer Application Review Subcommittee

M. Vaughn raised the question if the three individuals on the DSP are to be separate from those of the DARS members. D. Caldwell answered that the DSP members need to meet certain requirements from the MSBA but they can be on the DARS subcommittee.

R. Healy noted that the DARS volunteers need to understand that it is an intense schedule and to expect to spend a lot of time on the applications since it is an important function for the committee. He also shared his anticipation in receiving a lot of interest in the project in response to the RFS. M. Williams from Skanska noted that the OPM has a matrix that will be used to provide a snap shot of the designer applications making it easier to compare them on certain characteristics.

The City Manager reminded the committee that R. Healy, B. Martin, W. Samaras and B. Curley were on the subcommittee for OPM selection.

3.2 Vote to select DARS

R. Healy, B. Martin, M. Vaughn and W. Samaras volunteered to be on the subcommittee. The City Manager motioned to appoint the four volunteers to the DARS, seconded by S. Gendron. None objected, so voted.

3.3 Designer Selection Panel

According to MSBA requirements, the selection panel requires: Superintendent of Schools or a designee, Mayor or City Manager, and a representative designated by the School Committee. G. Frisch volunteered to be Superintendent Khelfaoui's designee. The City Manager will participate as executive for the City of Lowell. S. Gendron volunteered to be the School Committee's designee. The representative designated by the School Committee needs to be selected through a vote at one of their next meetings in May. The Manager noted that they would reach out to the MSBA in regards to the language needed for the vote.

The City Manager, G. Frisch (as representative for Superintendent) and a School Committee Representative (to be selected at a later date) will serve on the Selection Panel.

Kevin J. Murphy
City Manager
Michael McGovern
Assistant City Manager

3.4 Designer RFS

City Manager motioned to vote on submitting a draft of the RFS, seconded by R. Healy. All in favor, so voted.

D. Caldwell, Skanska, informed the committee that the MSBA website now includes an education plan that will be a key element of the feasibility study. He noted that he would send education plan to G. Frisch to complete at the earliest convenience.

4. - Looking Forward

M. McGovern commented on the quick turnaround from the joint City Council and School Committee meeting. He recommended the committee should meet regularly to ensure progress continues. M. McGovern proposed the committee formalize a schedule on the first Thursday of every month at 10:00am. Skanska will make a recommendation in regards to the day of the formalized schedule based on the project timeline and get back to the committee.

The City Manager noted that although Skanska is the OPM, the committee is in charge of the High School project. It is up to the committee to ensure that Lowell has the best top notch high school ever constructed. He also wanted to thank everyone for their commitment, dedication and hard work. He expressed his appreciation of all the time dedicated to the project.

The Manager motioned to adjourn the meeting, R. Healy and S. Gendron seconded. So voted.

Assistant City Manager

School Building Committee MSBA Meeting

Meeting Minutes

Date: June 2, 2016
Time: 10:00AM
Location: Mayor's Conference Room

1. - Attendance

Attendees: Kevin Murphy, Mike McGovern, Mike Vaughn, Robert Healy, Conor Baldwin, William Samaras, James Cook, Brian Martin, Gary Frisch, Richard Underwood, and Lisa DeMeo.

Also in attendance: Rodney Conley.
From Skanska: Jim Dowd and Mary Ann Williams

2. - Designer Selection Process

The SBC designated three members as the Designer Selection Panel (City Manager, Superintendent of School/designee and School Committee designee) during the April meeting. This panel will go before the MSBA in Boston on June 21, 2016 at 8:30 a.m.

The Designer Application Review Subcommittee, including R. Healy, W. Samaras, M. Vaughn and B. Martin reviewed the designer applications submitted. The subcommittee met May 26, 2016 to discuss the designer applications. The City Manager noted it is difficult second guess the selected subcommittee that conducted the designer interviews. The City Manager moved to accept recommendation of the subcommittee, seconded by R. Healy. All in favor; so voted.

M. Vaughn brought up the fact that city can only go forward with two of the eight design firms that have applied.

3. - Designer Application Review Subcommittee Report

The committee agrees that the MSBA be presented the subcommittee's recommendation, forgoing a presentation to the SBC.

M. McGovern asked what the MSBA will be looking for in determining the chosen designer. M. Williams noted that the MSBA will look at the results of the last several meetings and may spread the work around to firms specified. Firms will be judged on relevant experience, capacity, application and recent awards. The OPM suggests that the SBC list preference for two to three

firms that the committee would be comfortable with. The City Manager requested that the top three selected by the subcommittee be mentioned: 1) Perkins Eastman, 2) Arrowstreet, 3) SMMA. The OPM supplied minutes from the subcommittee meeting for the SBC members' review. The minutes discussed the application review process and how firm experience played a large part of the selection. The document also highlights the most comfortable and advantageous firm being Perkins Eastman and then Arrowstreet. M. Williams noted that the only reason that the minutes contain a list of the top three firms in alphabetical order rather than preference rank is due to regulations.

4. - Discussion of Designer Applicants

W. Samaras noted that the MSBA can reject all three of the City's selected designers and go with any designer that applied. It is not possible to control the selection, but it will be important for the Designer Selection Panel to state a clear preference to one or more designers. B. Martin asked the subcommittee to clarify their first choice. The subcommittee clearly recommends 1) Perkins Eastman and 2) Arrowstreet. M. Williams noted that in the document to the MSBA, the OPM is not able to rank the designers, but the DSP can express support for one entity.

J. Cook wanted to note that Dore and Whittier in particular have two poor reviews from North Reading. The subcommittee discussed if it was the OPM or designer that was at fault for cost control issues. G. Frisch believed that this was a strong negative aspect to this designer.

B. Martin mentioned perhaps getting talking points for each firm to the DSP, especially ones that may highlights Perkins Eastman. M. Vaughn asked if the Designer review document that was distributed to the SBC was submitted to the MSBA as well.

5. - Representatives at DSP Meeting

The DSP Representatives include City Manager K. Murphy, Superintendent of School's designee G. Frisch and the School Committee's designee S. Gendron. These representatives will be responsible for stating the City's designer preference at the meeting in Boston on June 21, 2016.

The OPM suggests that the DSP representatives set a meeting to debrief in regards to the Designer Application Review Subcommittee held on May 26, 2016. The tentative date for the second DSP meeting in Boston is between June 28th and July 14th. B. Martin asked if the SBC should be present when the DSP attends the meeting in Boston, for support. M. Williams and J. Dowd noted that if the committee would like to show support, it is allowed by the MSBA.

Office of the City Manager
City Hall ● 375 Merrimack Street ● Lowell, MA 01852
P: 978.674.4000 ● F: 978.970.4007
www.LowellMA.gov

Kevin J. Murphy
City Manager
Michael McGovern
Assistant City Manager

MSBA will provide a document for the DSP asking voting members to read the document and understand the process fully as members may be contacted directly.

6. - Education Plan Update

B. Martin noted that in regards to updating the committee to the education plan, that a walkthrough of the class rooms be done before the architect begins. This will enable the designer to talk to different department heads and teachers, as noted by R. Underwood. J. Cook mentioned the OMR report that matches the state requirements for space versus the physical space needed.

7. - Looking Forward

M. McGovern noted that the project will move into Module 3: Approve Designer, by the end of July.

B. Martin believes that this may be a good opportunity to get feedback from the communities. M. McGovern suggested reaching out to Neighborhood Groups in the fall for their feedback.

The City Manager engaged all members present to ensure that no one had any additional questions or concerns. G. Frisch wanted to thank M. McGovern and R. Conley for giving the School Committee an update regarding the School Building Committee's progress.

R. Healy motioned to adjourn, seconded by B. Martin.

Re: Feasibility and Schematic Design Services Proposal for Lowell High School, Lowell, MA

Dear Mary Ann,

We are very pleased to have been selected as the Architect for the Lowell High School Project. As requested we have examined our proposal with our design team and offer the following for your consideration.

The primary goal of our work is to plan, design, draw and budget a scope of work for the Lowell High School for an estimated construction budget of $114,000,000 to $152,000,000.

We understand the scope includes the study of problems identified in the Statement of Interest, an examination of options for renovations of the existing school, including additions and renovations and an exploration of options for a new school building as outlined in MSBA's Module 3 Feasibility Study and develop a schematic design solution per MSBA's Module 4 Schematic Design Guidelines.

The project will commence with the following two phases, Feasibility and Schematic Design. Based on the preliminary schedule developed by Skanska, we are proposing MSBA program milestone dates as follows or sooner.

- A/E Notice to Proceed – 8/4/16
- MSBA Project Kick off – TBD
- Submit Preliminary Design Program – 2/9/17 or sooner
- Submit Preferred Schematic Report – 4/6/17 or sooner
- Begin Schematic Design – 6/1/17
- Submit Schematic Design – 11/30/17 or sooner

Based on the RFS and the MSBA standard contract for designer services we understand the basic scope of services for the feasibility and schematic design portions of the project to include:

- **Architecture**
- **Educational Programming**
- **Civil Engineering**

New York
Boston
Charlotte
Chicago
Dallas
Los Angeles
Pittsburgh
San Francisco
Stamford
Washington DC
Toronto
Shanghai
Guayaquil
Mumbai
Dubai

- Landscape Architecture
- Structural Engineering
- Fire Protection Engineering
- Plumbing Engineering
- HVAC Engineering
- Electrical / Lighting Engineering
- Data/Communications
- Environmental Permitting (FS / SD – attend scoping meetings with all agencies, develop permitting matrix based on preferred design)
- Geotechnical Engineering (add service)
- Geoenvironmental Engineering Phase 1 (add service)
- Hazardous Materials (add service)
- Cost Estimating
- Kitchen / Food Service Consulting
- Laboratory Consultant
- Acoustical Consultant
- Specifications Consultant
- Library / Media
- Technology / AV Consultant
- Theatrical Consultant
- Sustainability/Green Design/Renewable Energy Consultant (Energy Modeling, Daylighting)
- Code Consulting
- Accessibility Consultant
- Traffic Consultant (add service)
- Furniture Fixtures & Equipment Consultant
- Site Surveying (add service)
- Security Consultant
- Historical Consultant

We propose a lump sum fee of One Million Ninety Five Thousand Dollars ($1,095,000) for the Feasibility and Schematic Design phases broken down as follows:

1.	Feasibility Study	$689,850
2.	Schematic Design	$405,150

Total	$1,095,000

It is our understanding that the base scope is comprehensive and includes all the services required to complete the scope as outlined in the RFP. Per articles 3.4 and 4.11 of the contract the following list of reimbursable sub consultants are provided for your reference.

- Geo-Technical Engineering $38,137
- Hazardous Materials $19,030
- Site Survey $62,700
- Geo-Environmental Phase 1 $4,400
- Traffic $19,800

Please review our proposal and if it meets your expectations please provide us with an authorization to proceed with services. We very much look forward to working with you and the Committee.

Sincerely,

PERKINS EASTMAN | DPC

Kevin J. Murphy
City Manager
Michael McGovern
Assistant City Manager

School Building Committee MSBA Meeting

Meeting Minutes

Date: August 11, 2016
Time: 10:00AM
Location: Mayor's Conference Room

1. - Attendance

Attendees: Kevin Murphy, Mike McGovern, Mike Vaughn, Robert Healy, Conor Baldwin, James Cook, Brian Martin, Rady Mom, Gary Frisch, Richard Underwood, Lisa DeMeo, Steve Gendron, Celine Gettings, Maryann Ballotta and Jay Mason.

Also in attendance: Rodney Conley
From Skanska: Jim Dowd and Mary Ann Williams
From Perkins Eastman: Joseph Drown, Alicia Caritano, Robert Bell, and Dawn Guarriello

2. - Designer Selection Process Overview

The City Manager believed it would be beneficial for everyone to introduce themselves; as the representatives from the chosen designer, Perkins Eastman, were present at the meeting. K. Murphy noted that the City has successfully negotiated a contract with the designer that is fully compliant with the MSBA. There are four executable copies for signatures, if it is approved.

3. - Presentation from Perkins Eastman

3.1 Introduction Project Designer

J. Drown began the presentation mentioning that the design firm wanted to focus on Lowell. They believed that researching the city would highlight important historical aspects, broader context such as master plan zoning, and reasonable stewardship. He stated that the city is education and knowledge based evident given the present location of UML and Middlesex Community College. Taking the time to understand the city and its inhabitants is imperative to the design firm in designing a unique high school to match the unique aspects of the city.

3.2 Programming and Planning

The design firm stated that the big project would begin in 2016 and are projected to continue to 2021. Perkins ensured the committee that they have the capacity to do a project of this scale. J.

Drown discussed developing an education program that includes visioning and space planning. He continued that understanding the students is very important. The population has a large amount of individuals in low income ranges, with some who speak English as a second language. The influx of ELL can be a challenge, but the firm believes incorporating specialty labs and workplaces can help reorganize the building to fit students' needs.

3.3 Opportunities and Constraints

D. Guarriello noted that the existing property is located in downtown Lowell. Their presentation to the committee included three possible renovations of the existing buildings. R. Bell discussed the options and which each would focus on. Option 1 would focus on developing the western side of the canal. Option 2 would take a closer look at the 1980s building and build less. Option 3 would become a hybrid of options 1 and 2. The Designers proposed a learnings common, which would create a new heart and hub of the school in the current field house. They also discussed adding outdoor space for extracurricular activities and educational use. R. Bell discussed changing the education model from STEM to STEAM (science, technology, engineering, art, and mathematics). He also mentioned the house model that is a tool used by the firm to show what clients think about the project.

3.4 Key Elements to Successful Phasing

J. Drown shared the firm's view of successful phasing including the creation of adequate swing space, separation between contractors and students, providing space for the contractors to work as well as communication of progress and next steps. An important element of phasing is understanding the construction limits of buildings. He went on to mention engineering students may become involved and learn the process of developing the project.

3.5 Budget

Perkins Eastman's team expressed the respect for operating within budget. They noted many capital projects are included in the FY17 Capital Plan. It is important to prioritize and work through the project process. J. Drown stated that the team will work hard to hone down complex decisions to make easy economical decisions. The team discussed the company track record of come in or under budget on multiple projects. J. Drown continued to talk about how Perkins Eastman will weighing life cycle costs, maintenance costs and look at material and energy costs as well. Renovation projects tend to have unknown existing complications in the building. Perkins Eastman will thoroughly examine the building to establish a base repair option.

3.6 Community Outreach

Office of the City Manager
City Hall ● 375 Merrimack Street ● Lowell, MA 01852
P: 978.674.4000 ● F: 978.970.4007
www.LowellMA.gov

Kevin J. Murphy
City Manager
Michael McGovern
Assistant City Manager

J. Drown outlined the community outreach within the city. Lowell has 29 boards and commissions; which is larger than many similar communities. In closing, he stated that the focus of the presentation and solution will be based on Lowell. Perkins Eastman wants the project to reflect the history of the city and embrace the strength of the community.

4. - Discussion

S. Gendron thanked Perkins Eastman for attending the SBC meeting. He wanted to express his wish that the designer focus on cost conscientiousness. S. Gendron commented on the widening of the bridges between the buildings, and thought it was a great idea to improve the operations and improve access. M. Williams noted that the required feasibility study is the first step, and then the next phase will entail alternate solutions to the current location. J. Mason noted that the high school project is an excellent opportunity to reinvigorate the downtown community and the neighborhood athletic field. He thought it is important to focus on sustainable component to make a model with the students into a learning process. R. Mom commented on making sure students have technological access a forefront of the project. M. Williams stated that every option supports energy efficient codes.

J. Drown discussed the current phase, the feasibility study, and its time frame. He estimated that the preliminary design plan period will continue to February 2017. In January, the SBC will be presented options and estimates to make an informed decision.

5 - Vote

K. Murphy noted that the approved DPC negotiations with Perkins Eastman saved citizens a significant amount of money. The Manager recommended that the SBC approve the final figure agreed upon. S. Gendron asked to see the document. M. Williams commented that Perkins Eastman contract is within the budget, and that all parties worked very hard to make it work. The Manager noted that the City was satisfied as well with the contract. R. Healy motioned to approve the contract, seconded by B. Martin. All in favor; none opposed.

6. - Next Steps

M. Williams discussed the next steps include presenting a fully executed copy of the contract to the MSBA and Perkins Eastman. She stated that Perkins Eastman will need to gain access to perform analysis on the existing school buildings. The Manager noted it will be important to meet with teachers, parents, students and the community prior to making any recommendations to the SBC. M. McGovern stated that Module 3 target dates are February 9, 2017 and the end of May 2017. The Manager stated that the SBC meetings will take place monthly to keep everyone up to date of the process. M. Williams reiterated that the SBC will meet the first Thursday every

month. M. Williams inquired about the SBC wanting to wait until October meeting, which was agreed in order to gather concrete information to provide the SBC so that they may have a fruitful discussion.

R. Bell broached the topic of plans such as the education program. He said that an educational leadership team would translate the progress of studies and vision process.

R. Underwood had another question about the feasibility study. He asked what the cost would be for both renovation and a new site. M. William explained that in Module 3, the SBC, OPM and designer would consider options. Phasing costs tend to be expensive and less efficient. She continued that the OPM and designer will continue to look at all aspects to help the SBC make an informed decision.

R. Healy motioned to adjourn, seconded by J. Cook.

City Manager
Michael McGovern
Assistant City Manager

School Building Committee MSBA Meeting

Meeting Minutes

Date: October 6, 2016
Time: 10:00AM
Location: Mayor's Reception Room, Lowell City Hall

1. - Attendance

Attendees: Kevin Murphy, Mike McGovern, Conor Baldwin, Robert Healy, Mike Vaughn, James Cook, Brian Martin, Steve Gendron, Gary Frisch, Richard Underwood, Lisa DeMeo, Jay Mason, David Beati.

Also in attendance: Rodney Conley.
From Skanska: Mary Ann Williams and Jim Dowd
From Perkins Eastman: Joseph Drown, Dawn Guarriello, and Robert Bell

2. - Preliminary Design Program Update

2. 1 Educational Program

Meetings for the educational program are currently ongoing. The educational program is the center piece of the entire design, it is important to have at this time and in the future. The educational leadership team will update the educational narrative. The visioning process includes half day visioning sessions that walks through what happens now and what the schools want and can do. R. Mason asked about updating the educational plan based on the visioning program. The design team stated that this was with best practices from the MSBA. R. Bell mentioned that the visioning phase would end mid-November, allowing the school department to incorporate the findings into the educational document. M. Williams stated that the opportunity presented with the existing option will be available early November to the SBC and will be able to review at the next meeting. J. Drown noted that the costs may not be calculated by the next meeting. J. Mason asked if the design team and OPM would provide data prior to the meeting allowing the members to develop questions.

2.2 Evaluation of Existing Conditions

M. Williams discussed the existing conditions of the school buildings. The consultants have toured the facilities and assessed the repair option. They will compose a document that will entail the scope of work, address and assess issues, compliance regulations and the basis for the repair option. The base repair will then be used as a benchmark to help assess the financial impact of

repairs and construction. It is important to note that the base repair option does not take into account hopes and desires of faculty, staff, students and the community; it assesses the maintenance aspect only.

M. Vaughn asked about the science labs, if they are not compliant with regulations will this be included in the costs. The design team replied that they will be repaired as are or as needed to be.

2.3 Preliminary Evaluation of Alternatives

A new option, part of the feasibility design program, is a requirement by the MSBA. The design team confirmed with the City September 30th, which locations meet the acreage requirement of 16-17 acres. Educational goals include square footage based on the number of students following MSBA guidelines. Other goals include parking, fields and traffic circulation. Three sites will be selected as part of due diligence. They will be assessed based on utilities currently available, drainage and access roads. There is an 8% cap for the site cost of $8M. The design team will create a list of pros and cons for each location to assess the options an maximum reimbursement from the state. The matrix that will be handed out to the SBC will assist visually in highlighting the most attractive options.

J. Drown touched on the subject of transportation, comparing the existing location with the new. A remote site will create a reoccurring cost. S. Gendron asked if there will be five options and the time frame that they will be made available to the SBC. The Preliminary Design Phase (PDP) will be submitted January 20th to the MSBA. The PDP will be presented publically and approved by the committee by December. The School Committee and other stakeholders also need to be informed and kept up to date.

A website will be created to post information directly for stakeholders. Local approval by the community can be discovered via surveys and multiple opportunities to understand the project and process.

D. Beati asked if there are already three sites that stand out. M. McGovern stated that there are six different locations that are owned by the City or are privately owned. DPD is currently compiling a list of the alternative locations and assessing the opportunities. There is also an opportunity to increase the number of stories to the existing building depending on business zoning in the area. The design team will ensure that the SBC can make well informed decisions based on clear understanding of the possible options.

B. Martin stressed how important the website will be to the project. The site will enable the community to understand how the project will be managed and developed. M. McGovern stated that the City is currently in the process of updating the City's webpage. There will be a button

Office of the City Manager
City Hall ● 375 Merrimack Street ● Lowell, MA 01852

Assistant City Manager

designated for the school project on the City's site that will directly link users to the school project website. The website is an opportunity to post documents, studies and information. It can be used as a public flier from the beginning to the end of the process. The site will visually allow users to get an overview of the project dashboard.

G. Frisch noted that there is 80,000 square feet of space at the existing location. J. Drown replied that this information will be included in the existing analysis report. S. Gendron inquired about the acreage at Cawley, which will also be included in the report from the design team.

3 - Community Outreach

The community outreach has started with preliminary discussions during neighborhood meetings. M. Williams noted that they would try to put together information to help reach into communities and groups close by. McGovern stated that M. Demaras has recommended a few dates to combine neighborhood meetings over the next few weeks. M. Williams stated that the outreach will begin with the neighborhood meetings and will then extend to public venues, perhaps at the high school. S. Gendron stated that it would be important for the public to meet and inquired to the time frame of this and other joint meetings. M. McGovern added it would be a good idea to get as much input as possible from the outreach program. M. Williams stated it may be beneficial to record presentations as it can be considered far reaching.

4. - Review and Approval of Invoices

J. Dowd discussed the invoices for Skanska ($9,000) and Perkins Eastman ($60,000). The invoices include an inline cash flow with progress of project presented to the City Manager's Office for review. C. Baldwin noted that the invoices were sent to the SBC for review, he and R. Conley met with Skanska prior to this meeting. He suggested that the SBC approve the invoices as it will be recorded in the meeting minutes. The coversheet of the invoices includes a running tally of all invoices for every contractor. R. Healy asked if it is a requirement by the MSBA that the SBC approve invoices or if it would be sufficient that the OPM and City Manager sign off on the invoices. Based on the approval structure of the city, the City Manager has authorization to approve invoices. R. Healy expressed that reviewing each invoice may not be the best use of the SBC time once there are more contractors added to the inline cash flow. G. Frisch noted that the overview and summary report would help keep members informed.

B. Martin motioned to approve R. Healy's recommendation that the SBC need not review each individual invoice, that the proper checks and balances are in place with the Plan E form of Government. Seconded by C. Baldwin. The SBC also added that the summary sheet be included in the monthly meeting to keep members informed. All in favor, so voted.

M. Williams stated that she would provide the information. J. Dowd raised the topic of Perkins Eastman amendment to include Hazmat and Site review options. A formal vote by the SBC is needed to exercise option for the architect's contract. Motion to approve amendment to architect's contract by R. Healy. Seconded by B. Martin . All in favor, so voted.

5. - Next Steps

The next meeting is November 3rd; the first Thursday in November. If additional meetings are needed, they will be made in advance. Next steps include conclusion on available sites as the visioning process and community meetings continue. The project is moving along schedule at the moment, which will help limit cost of prolonging it.

R. Healy motioned to adjourn, seconded by M. Vaughn.

2. - Vote to Approve October Meeting Minutes

R. Healy motioned to approve the meeting minutes from the October meeting, seconded by J. Cook. All in favor, so voted.

3. - Preliminary Design Program Update

3.1 Visioning

R. Bell mentioned that the Visioning process is going well, that two of the three sessions have been completed with great success. The design team is hearing a consensus of goals and objectives as well as hearing many solutions. R. Bell commented on the welcoming environment with the businesses, partnerships and relationships with students. He discussed goals such as flexible and adaptive teaching as well as the importance of safety and security. The census is looking for a high performance environment including thermal, lighting and acoustics. R. Bell stated that the design team will share a packet regarding goals and objectives with the SBC on November 23, 2016.

Regarding the educational programming, they have been able to find every student during every period, which does not always happen. The current enrollment at the school is 3,128, while the MSBA estimated 3,520 students. R. Bell mentioned that they can prorate where students may be to increase culinary or technical classes. The class size is currently in the thirties, while the average for MSBA requirements is around 28 students per class. R. Bell mentioned discussing the target class size with the Head of Schools, B. Martin.

R. Bell continued, that the team will meet with all user groups including teachers and staff on November 15 and 16th. The third visioning session will be held on November 17th, in which the goals and objectives will be shared with the community. November 18th, there will be a tour of Essex Tech in Danvers and Winchester High School for SBC members who are interested. M. William will provide a list to the schools, so if anyone is interested please let her know.

B. Martin shared that there is an early release in December, he was hoping that the design team would present their findings to the teachers at 12:00 PM.

M. Williams noted that once the visioning is concluded, the educational plan and goals will be incorporated to create the guiding design principles.

3.2 Evaluation of Existing Conditions

A. Caritano stated that the designer has been working since August on accumulating an existing conditions report. She expressed the team's gratitude to everyone including B. Martin, R. Underwood and their staff for all of their cooperation. The team was able to find some existing plans that need to be updated but additional research on structural information. This information is needed to calculate the base repair costs to ensure that the structure would last for the next fifty years. A. Caritano informed the SBC that a draft number for existing structure will be provided to the committee around November 21, 2016. This number will not entail the visioning or educational plan, it would only include bringing the buildings up to code.

R. Bell noted that the assessment and cost requirement by the MSBA will be met with the existing evaluation document. The document will not meet the educational plan or building and handicap codes.

M. Williams inquired about a date for the presentation of existing conditions to the committee. A. Caritano stated that they will review with J. Drown and give at least an update if not a presentation for the next meeting. The presentation will take at least two hours. M. McGovern stated that to stay on tract, the presentation will need to be in December since the PDP must be submitted to the MSBA by the end of January. R. Bell responded that there are a lot of items on the agenda already for the December meeting. The December 1, 2016 meeting would include site analysis including a list of the range of options with diagrams. M. Williams added that there me be a challenge in figuring out the swing space needed for a phased renovation. She continued that they may take one location off line and utilize temporary sites, modular class rooms, or shift the 9th graders to the middle schools. M. Williams informed the committee that if anyone has ideas to please provide feedback to either M. McGovern or R. Conley. R. Bell noted that an executive summary will be provided prior to Thanksgiving.

Office of the City Manager
City Hall ● 375 Merrimack Street ● Lowell, MA 01852

www.LowellMA.gov

Kevin J. Murphy
City Manager
Michael McGovern
Assistant City Manager

3.3 Analysis of Sites

M. Williams commented on the cooperation from DPD in the meeting to discuss selection criteria. Selection criteria include size, public transportation, parking, utilities as well as the particular location's limited use. The design team has analyzed land use restrictions such as areas located in the wetlands. The team is working on finalizing a formal report to the committee that will include pros and cons in a matrix format to compare possible locations. K. Murphy inquired when the preferred location needs to be selected by. M. William responded that Module 3 is a two step process; first three locations will be selected in December and one final location will be chosen in March. The SBC will vote on the top three locations at the December 1, 2016 meeting. G. Frisch asked when the committee will need to select one location from the three. The PDP will be submitted January 20th, which will include 3-5 options. April 1st, the one location will need to be submitted and presented to the MSBA in May. J. Cook asked if the committee should rank the top three locations, to which M. Williams responded that the MSBA does not want them to do so. The PDP will look into the three locations in more depth. G. Frisch inquired about vetting the Freshman Academy. R. Bell stated that from November 23 to January, the team will go through the packet and consider alternatives for swing space. M. Williams stated that the educational program will be finalized after the visioning, there will need to be a formal approval from the School Committee. B. Martin stated that this will be the first or second week in December, after the education program is revised.

4. - Community Outreach

M. William announced that the first community outreach meeting occurred a few weeks ago in which the OPM and designer presented a PowerPoint presentation of the overall process. She stressed the point that the City is in a partnership with the MSBA. Topics of discussion included the role of the feasibility study in the project, high level project time lines, decisions and mile stones. The presentation addressed the visioning process that includes engaging participants as well as existing conditions of the building and community.

5. - Website

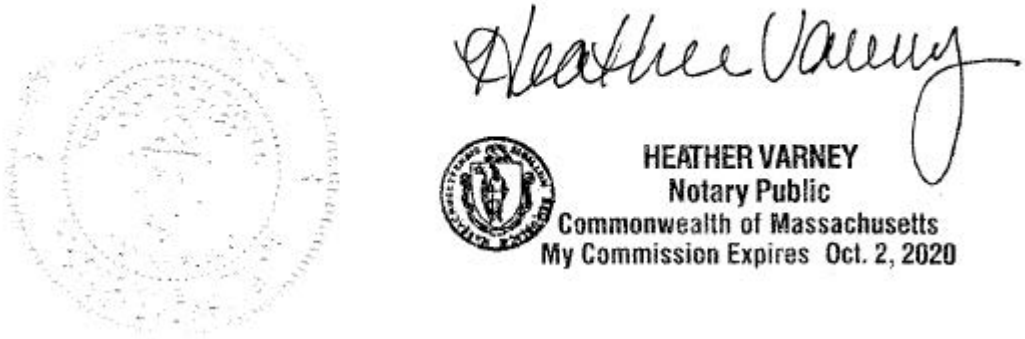
As a part of community outreach, the City is working on creating a new website for the project. This will entail posting presentations, recorded meetings, meeting minutes as well as other documents for public view. The website will also allow community members to offer feedback on the project.

6. - Next Steps

The next community outreach meeting will be December 8th at 6:30 PM. M. Williams mentioned that the presence of the Head of Schools B. Martin and School Committee Member R. Gignac have been present at the community meetings has been a great help.

December 1st meeting will be lengthy, approximately 3 hours. An update will be provided for the district education plan and approval. G. Frisch stated he would work with B. Martin and Superintendent of Schools to make sure that the revised educational plan is approved by the School Committee in the beginning of December. Preliminary site analysis will be provided to the SBC members prior to the December 1st meeting. December 7th there will be a presentation to the teachers, and the 8th there will be a presentation to the public. This ensures that the requirement by the MSBA is satisfied that the community is engaged in presentations.

R. Healy motioned to adjourn, seconded by J.Cook. All in favor.



SKANSKA

Lowell High School Project

School Building Committee

Agenda Items – December 1, 2016

Issued: 11/23/16

Preliminary Design Program Update:

- Visioning/Goals Overview
- Educational Program Update
  - Programming / Space Summary
  - User Group Meetings
  - Discussion of Future Design Program Approval
- Design Options:
  - Design Options- Reno, Reno/Add, New (November 23 – January)
  - Base Repair Option 1
  - Budget Implications of Options
  - Analysis of Sites/Selection
- Community Outreach
  - Update on Neighborhood Meetings
  - 12/8 Community Meeting Presentation Review
  - Website Development Update
- Next Steps
  - Next SBC Meeting January 5, 2017

Lowell High School Visioning Summary

December 1, 2016

During October and November of 2016, the Lowell High School Educational Working Group (EWG), a group of approximately 50 Lowell Area Schools (LAS) administrative leaders, and Lowell High School (LHS) teachers, administrators, students, parents, and community partners, participated in three Educational Visioning Workshops run by New Vista Design and Perkins Eastman. Each workshop was a collaborative session designed to inform the LHS design process. Participants were led through a step-by-step visioning process aimed at capturing their best thinking about LAS's/LHS's current and future educational goals and priorities, and connecting them to best practices and possibilities in innovative school facility design.

On **October 14, 2016**, the Lowell High School EWG participated in the first Educational Visioning Workshop. The four- hour workshop explored the following topics:

- Priority Goals for the renovated/new facility
- 21st century teaching and learning practices that are being influenced by digital technology and our changing economy
- Strengths, Challenges, Opportunities, and Goals (SCOG Analysis) associated with Lowell High School's current academic program as well as the vision for its new facility
- 21st Century Learning Goals that distill the group's best thinking with regard to Lowell High School's current and future educational programming and priorities

On **November 1, 2016**, the Lowell High School EWG participated in the second Educational Visioning Workshop. The four-hour workshop explored the following topics:

- 21st Century Design Patterns 1.0 that innovative schools throughout the country have put into practice in order to make their forward-thinking learning goals come alive on the level of facility design
- Guiding Principles 1.0 for design of the renovated/new facility

On **November 17, 2016**, the Lowell High School EWG participated in the third Educational Visioning Workshop. The four-hour workshop explored the following topics:

- Blue Sky Ideas for the renovated/new facility
- Key Spaces and Adjacencies for the renovated/new facility
- Bubble and Adjacency Diagramming for the renovated/new facility

The following pages offer a summary of notes taken and information gathered during each workshop. If you would like to add comments or ideas to this evolving narrative please contact Dr. Roxanne Howe at rhowe@lowell.k12.ma.us .

Agendas for each of the three workshops can be found at the end of this document.

Facility Design Visioning Workshop One Notes

Friday, October 14, 2016

Essential and Cutting Edge LHS Programs

The following list of essential and cutting edge programs at Lowell High School was brainstormed by the Educational Working Group's (EWG).

.

An increasing number of co-taught classrooms:

- General Ed and Special Education Teachers in 7 classrooms
- Share responsibilities
- Gives both sets of students collaborative
- Teamwork experiences

Activities outside the classroom include:

- Internships
- Field studies
- Authentic contexts

Community involvement – both ways

- I.e. Jeanne D'Arc Credit Union

New Programs Include:

- Generation citizen – action citizenship
  - Students interact with local businesses to solve community problems
- Tsongas Industrial History Center talks
  - Living history
- Engineering
  - Project Lead the Way
  - PBL – 21st century learning and collaboration

Cultural Diversity

- ELL and Refugees
  - From competency to absorption to diffusion
  - Insight health clinic +/- 1/3 students
  - Food programs
  - International Institute

Lowell Latin Lyceum

- A gifted and talented program with fewer than 200 students
- Test-in / application
- Cohort model – for 4 years
- All core subjects for first two years
- In Senior year just English

Freshman Academy

- Important transition
- 8 core teachers > 200 students
- 3 teams of 8 core teachers

Enrichment Programming

- Fine and performing arts
- Student activities (clubs and student government)
- Athletic programs

STEM Program

- Engineering
- Maker Space – opened last year
- 9th grade revamp
- NGSS – science
- Clean Energy Pathway
- Offer science in pathways
- 120+ students
- Integral course offerings

Essential and Cutting Edge LHS Programs (continued)

Downtown Lowell Activities

- The Merrimack River
- Boarding House Park
- City Hall
- Monuments
- Volunteer work at Lowell National Historical Park
- School store (expanded location in downtown)
- Sports activities and clubs
  - Crew
- Important transportation links

University Partnerships

- Dual enrollment partnerships (Junior and Senior year)
  - Middlesex Community College (MCC) partnership
  - University of Mass Lowell (UML) partnership

Junior Reserve Officer Training Corp (JROTC)

- Grades 9-12
- Sense of belonging
- Ell / SPED / LYCEUM students
- Leadership, integrity, competitiveness

Diversity of Curriculum

- Variety of programs meet student needs and inspire student interest and engagement
- Advanced Placement courses
- Cultural diversity and awareness – flags / programs
- Need to add more languages
- Assist student in priority setting and time management

Vocational Offerings

- Culinary
- Bank
- TV Communications
- Job prep for special needs students
- Local business
- Aiming to meet the needs of the 10-15% of students who will not go on to college

Explore notion of "pathways"

- Course selection
- Capstone projects
- Intern / extern program

College and Career Center

- Naviance (college & careers)
- Part-time work resource
- Resume building

Facility Design Visioning Workshop One Notes

Friday, October 14, 2016

SCOG Analysis

The Educational Working Group (EWG) conducted a "SCOG Analysis" of what it sees as the current strengths, challenges, opportunities and goals with regard to Easthampton Public School's elementary and middle school academic programs and facilities. The EWG is a group of approximately 35 participants that includes Easthampton Public School's leadership, as well as school administrators, teachers, students, parents and community partners.
The following is a compilation of participants' responses and ideas.

STRENGTHS

- Students
- Staff
- Workforce (administration, custodial, health, faculty)
- Community partnerships
- Location (access, connections, academic/business/comm./transportation)
- Academic arc – physical links
- TLT (that Lowell thing)
  "the school is the city / city is the school"
  - Gateway city
  - Belief in public education
  - Vibrant middle class
- School history
- One school community / 2 day schools connected
- Services
- Multi-cultural (diversity)
- Academic choice
- Student support services
- College and Career Center
- Dual enrollment
- Partnerships
- Sense of belonging
- Curricular evolving
- Working with what we have
- Tutoring (can do work before and after school)
- House model
- Extended day hours
- Extra-curricular hours
- Extra-curricular activities
- Scheduling (student-driven)
- Outside agencies
- Co-taught classes
- Breakfast and lunch (free) mobility
- Parking garage
- ASPEN portal + Naviance
- Student involvement
- Advisory time

Facility Design Visioning Workshop One Notes

Friday, October 14, 2016

SCOG Analysis (continued)

CHALLENGES

- Rapidity of technology & cultural change
- Multiple buildings & divides
- Physical conditions … including technology
- Universal design
- Paring (note pay at garage / backups & limited availability)
- Scale of student / teacher
- Diversity / equity
- Schedule (lunch driven) doesn't max student time or account for passing time
- Scheduling
- Number of students vs. space
- Diversity within staff
- Transitional planning for students
- Equity in technology in school
- Lack of technology at home
- Adapting curriculum as technology changes
- Maintaining healthy lifestyle and balance with academics / activities / work
- Parental pressures
- Parental involvement
- Lack of opportunities for movement
- Cultural competence
- Lack of green space
- Students drug and alcohol involvement
- Getting outside agencies into building
- Parking
- More space for tutoring/time to use classrooms
- Use of advisory
- Communication with students
- Size staffing and maintaining communication
- Alternate scheduling
- Website not as user friendly as could be
- Limited time to address multiple needs
- Lunch time schedule
- Lack of time to collaborate
- Current traditional schedule
- Workable classroom spaces / storage space
- Lack of places to display work
- Consistency in houses (house model)
- Extended day coverage/ supervision/ safety
- Lack of marketing/ telling our story
- Antiquated phone system / interior rooms
- Building navigating
- Relationships with students + teacher
- Differentiation – more student voice & choice

Facility Design Visioning Workshop One Notes

Friday, October 14, 2016

SCOG Analysis (continued)

OPPORTUNITIES

- Blank slate (starting project)
- Students
- Constant renewal (people) & continuity of community
- Constant expansion of partnerships
- Create national model (civic, cultural, engagement, global classroom)
- Head & hand / service learning
- More community partnerships into school
- Ability to gather broad and diverse input on school design
- Community involvement / partnerships
- Cultural competency
- Green space
- New layout could provide increased space for
  - Health and wellness center
  - Parent space
  - 3 lunch model
- Time and space for collaboration
- Create more workable classroom space
- An opportunity to think outside the box
- Increase the reputation of LHS and LHS students
- Marketing
- How we can better expand opportunities with the city businesses
- Differentiation for all students and learning styles
- Self examination
- Go green
- Increase collaborative student working spaces – peer work/tutoring
- Classroom set up (a shared space) will encourage collaboration
- Communication with students
- Alternate scheduling
- Website can be used to communicate out
- Increase opportunities for student engagement in activities (Pep Rally's events)

SCOG Analysis (continued)

GOALS

- Equity in supporting whole students
- Minimize educational disruptions
- Flexible / adaptable space
- Transformative renovation (capture great existing space)
- Aesthetic belonging / purpose and functional belonging
- Holistic design
- Visible learning (showcase success and hard work of students)
- Supports experiential learning
- Self directed learning
- Student voice and choice
- Partnerships with community
- Diversity in staff
- Technology equity school / home
- Adapting the curriculum
- Community partnerships/ Family Involvement Center
- Cultural competency
- Green space
- Wellness Center
- Collaboration time
- Workable classroom spaces/storage
- Exhibition spaces
- Extended communal spaces / day
- Positive marketing and visibility
- Way-finding system
- Lunch modification
- Expand co-taught classrooms
- "Go Green"
- Relevance
- Student involvement in policy/planning
- Homework and tutoring during class time
- Common space for students
- Use of advisory
- Communication with advisory/students
- More school spirit/ build morale / positive culture

Facility Design Visioning Workshop Two Notes

November 1, 2016

21st Century Learning Goals 2.0

The following set of priority "21st Century Learning Goals 2.0" for Lowell High School students was developed based on feedback from the Educational Working Group (EWG). Seven teams of six participants worked to review and edit the Learning Goals 1.0 document that was created during Workshop One, with the resulting reprioritization and grouping of desired Learning Goals.

- **Empathy, Global Perspective and Civic Engagement**
  - Cultural Awareness
  - Personal, Social and Civic Responsibility
  - Awareness of Community and Global Society
  - Multi-Cultural Literacy
- **Critical and Inventive Thinking**
  - Critical Reasoning and Problem Solving
  - Agility, Adaptability and Risk-Taking
  - Joy, Curiosity and Imagination
  - Motivation and Creativity

- **Communication and Collaboration**
  - Oral and Written Communication
  - Teamwork and Interpersonal Skills
  - Media Literacy and Digital Competence
  - Accuracy of Information
- **Real World Interconnectivity**
  - Executive and Organizational Skills
  - Competency in Core Skills and Content
  - Career Preparation and Life Skills
  - Vocational Opportunities and Certifications
- **Holistic Awareness**
  - Self-Advocacy
  - Wellness
  - The Natural World

Facility Design Visioning Workshop Three Notes

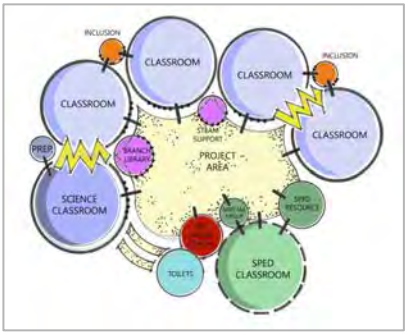
November 17, 2016

21st Century Design Patterns 2.0

The following set of priority "21st Century Design Patterns 2.0" for the design of the new and/or renovated Lowell High School has been modified from the original list that was developed by the Educational Working Group in Workshop One, based on participants' comments and suggested changes during Workshop Two.

- **Flexible Everything**
  - **Agile and High Performance Classrooms**
  - **Flexible Furniture**
  - **Flexible Science Labs and Maker Space**
  - **Flexible Multi-Purpose Spaces**
  - **Flexible Performance Spaces**
- **Secure and Welcoming Arrival**
- **Community Access**
- **Distributed Dining**
  - **Explore as a Possibility**
  - **Cyber Dining**
- **Between Spaces/Commons/Breakout**
- **Civic Presence**
- **Display and Exhibition of Student Work (Locker Alternatives)**
- **Clusters of Learning**

- Special Ed Training Facilities
- Athletics
  - Space for Band and Marching Band
  - Space for ROTC
- Distributed Resources
- Adequate and Flexible Space
- Outdoor Space
- Teacher Space/Work Stations
- Confidential Spaces
- Building as Teacher/Sustainability
- Enrichment Spaces
- Hallway Trafficking
- Teacher Teaming
- Breaks of Institutional Norms
  - Soft Seating, Locker Alternatives, Commons Spaces
- Flexible Storage
- Wayfinding
- Heart of School



Facility Design Visioning Workshop Three Notes

November 17, 2016

DRAFT Guiding Design Principles 2.0

The following set of priority "Guiding Design Principles 2.0" for the design of the new and/or renovated Lowell High School has been modified from the original list that was developed by the Educational Working Group in Workshop One, based on participants' comments and suggested changes during Workshop Two.

A School for Everyone

- A Program and Place for Every Student
- Small School Identity, Big School Pride
- Neighborhoods and Personalization
- Belonging, Identity and Ownership
- Safety and Security
- Ownership and Connection
- Sustainability and Inclusivity
- Centralized Support Services with Personalized House Offices
- Opportunity for ALL Students (Including SPED, ELL)

Learning by Thinking and Doing

- Real Connections to 21st Century Skills
- High Expectations and Personal Responsibility
- Mastery-Based Learning
- Explore, Create, Learn
- Inquiry and Problem-Based
- Real World Connections
- Building as Teacher
- Pathways
- Collaboration
- Clean Energy

Adaptability and Evolution

- Teaching and Learning
- Curriculum and Scheduling
- Tradition to 21st Century and Beyond
- Support of High Quality Programming and Innovation

Joy, Curiosity and Imagination

- Joyful Environment
- Visible Learning
- Varied Spaces, Including Reflection Spaces
- Empathic Engagement
- Indoor/Outdoor Connections

Community and Civic Connections

- School as Community Resource
- Community and Civic Connections
- LHS as Part of Fabric of Community
- Incubation Spaces for Local Businesses and Partners
- Community Outreach

Perkins Eastman | DPC

Lowell High School Programming Summary

December 1, 2016

- Educational Programming is the method by which the existing course offerings, scheduling and room uses are assessed, adjusted for future needs and recalculated to determine the types and number of spaces that are needed. The process occurs in three steps;

    1. **Program Analysis** – we look at the full Master Schedule, uncovering every pupil for every period of a cycle. At the start of the 2016-17 academic year, Lowell had 3125 students scheduled in a 35 period cycle (7 periods/day x 5 days per week), which totals 109,375 pupil-periods. The count of pupil-periods we find must equal the total available to ensure all programs are found and understood. In this case all but .3% of the pupil-periods were identified and well within an acceptable margin of error.

    2. **Program Adjustments** – the adjustments begin with a simple prorated formula to increase all course participation for the design enrollment, in this case 3520 students. During this step we are able to modify (increase or decrease) courses to reflect future changes and can adjust class sizes to match the District's objectives or policies; the number of students programmed into each class determines the number of rooms required for each. No significant changes to courses and class sizes were made.

    3. **Program Requirements** – the final step involves

- Program requirements are then reconciled into the MSBA Space Summary Template, which is effectively the default size and count of spaces that the State expects to fund. The spaces do not need to align completely and many districts have particular circumstances and needs that do not align. These differences must be justified through programming calculations and/or the Educational Program Narrative (written by the District), not to be confused with programming.

- After both the Visioning and Programming (and existing conditions assessments) are complete, design studies begin. This is also the point in time when the District will need to refine the MSBA Educational Program Narrative, taking into account the programming calculations, vision/goals and policies/practices of the School.

- Attached are summary sheet excerpts that provide an overview of Analysis, Adjustments and Requirements. The programming seems to be reasonably in-line with the MSBA guidelines. A few points of interest will be justifying the Pool, Athletic Spaces, Auditorium size, Little Theater & Specialty Programs (Clinic, Bank, Store, Catie's Closet, TRIO, etc).

Lowell High School User Group Summary

December 1, 2016

- Full Day Sessions on 11/15 & 11/16 with 17 Groups to discuss big picture overview of each program, space requirements, adjacencies, educational aspirations and trends.

- Focus Groups included:

    1. Safety & Security
    2. Health & Bioscience Pathway
    3. Freshman Academy
    4. ELL/Foreign Language
    5. Wellness/Physical Education
    6. ROTC
    7. Student Support Services
    8. Athletics
    9. Custodial
    10. Business/Culinary Pathways
    11. Special Education
    12. Fine Arts
    13. Humanities
    14. STEM
    15. Food Service
    16. Communications Pathway & Library media Center
    17. Outside Programs (Gear-Up, Health Clinic, Catie's Closet, Jeanne D'Arc Credit Union)

- Ongoing interactive process with 3-4 future meetings as design develops.

Perkins Eastman | DPC

Lowell High School Design Options

December 1, 2016

1. Base Repair - See Attached Scope Summary

2. Full Renovation w/ Small Addition (requires creation of Academic swing space)*

    2A. Renovate available space in nearby building(s) for ¼ population?

    2B. Relocate ¼ population into other schools?

    2C. Create Temporary/Modular CRs using portion of F. Morissette Blvd?)

    2D. Create Temporary/Modular CRs via use of upper Garage Level

    2E. Other

3. Renovation w/ Rebuild of FA, Gym and Portion of Lord Building (requires temp PE/Athletics)

    3A. Temporary Gymnasium(s) via use of upper Garage Level

    3B. PE/Athletic programs off-site for 1yr (use nearby Arena, Gyms, Pools?)

    3C. Other?

4. Renovation w/ Rebuild of FA, Gym Building and ½ Lord Building (requires temp PE/Athletics)
    (See Swing Space Options Above)

5. All New Construction (existing site)
    (See Swing Space Options Above)

6. All New Construction (new site)

Perkins Eastman | DPC

Lowell High School Base Repair Project Scope

November 21, 2016

1. HC Accessible Ramps
2. Masonry veneer replacement at Field House
3. Replacement of all exterior sealants
4. Replacement of all windows
5. Replacement of all exterior doors
6. Replacements of all roofs (except Coburn Hall)
7. Modification of existing interior walls for accessibility
8. Modifications to existing science rooms for accessibility
9. Replacement of selective doors for accessibility
10. Replacement of all hardware locksets
11. Replacement of selective toilet rooms for accessibility
12. Replacement of shower rooms for accessibility
13. Paint all interior walls
14. Replace all floor finishes
15. Replace all ceilings
16. Renovate all stairs for accessibility
17. Replace and add elevators for accessibility
18. Add HC lifts for accessibility
19. Replace Plumbing system
20. Replace HVAC Systems
21. Replace electrical systems
22. Replace fire protection system
23. Replace casework
24. Hazmat abatement
25. Replace concrete sidewalks and entry
26. Replace granite curbing
27. Replace bituminous paving
28. Replace catch basins
29. Separate sanitary and storm water system for future connection by city
30. Provide some level of storm water infiltration
31. Replace all utilities
32. Provide site lighting

Lowell High School

Neighborhood /Community Meeting Summary

December 1, 2016

- **The focus of each meeting:**

    1. Identify Project team: City Manager's Office, School Building Committee, Lowell High School, Skanska, PE + Consultants
    2. Overview of MSBA & Process/Reimbursement
    3. Feasibility Study: Schedule/Decisions/Deliverables
    4. What we have learned so far: uniqueness of Lowell and history, LHS diverse over 40 countries represented, 1st coed high school in the country. ELL Influx, Career Pathways, City / History Ties
    5. Existing Conditions: school has exceeded useful life, systems are not energy efficient and cost money, some code/accessibility non-compliance, do not support 21st century education to provide competitive education for students
    6. Looking for community involvement & input
    7. Community Involvement via: additional meetings, website, questions to City Manager

- **Meetings:**

    1. 10/17: Centralville Neighborhood Action Group w/ Centralville Community Coalition
    2. 11/7: Pawtucketville Citizens Council w/ East Pawtucketville Citizens Group
    3. 11/9: Belvidere Residents Council w/ Sacred Heart Neighborhood Improvement Group, Riverside Community Council & Back Central Neighborhood Association
    4. 11/14: Highlands Neighborhood Association w/ Lower Highlands Neighborhood Group, Cupples Square Business & Residents Association, Friends of Taylor Park
    5. 11/28: Lowell Downtown Neighborhood Association w/ Jackson Appleton Business Resident Association & Acre Coalition to Improve our Neighborhoods
    6. 12/8: Community Meeting @ LHS Auditiorium 6:30.

- **The primary questions/discussion(s) focused on:**

    1. Where school will be located?
    2. Is the building going to be flexible/adaptable for the future (50+ years)?
    3. Traffic implications?

Office of the City Manager

Kevin J. Murphy
City Manager
Michael McGovern
Assistant City Manager

School Building Committee MSBA Meeting

Meeting Minutes

Date: Dec 1, 2016
Time: 10:00AM
Location: Mayors Reception Room, City Hall

1. - Attendance

Attendees: Kevin Murphy, Conor Baldwin, Robert Healy, Mike Vaughn, Brian Martin, Gary Frisch, Richard Underwood, Lisa DeMeo, Steve Gendron.

Also in attendance: Mike McGovern, Rodney Conley
From Skanska: Mary Ann Williams, Jim Dowd
From Perkins Eastman: Alicia Caritano, Robert Bell

2. - Preliminary Design Program Update

K. Murphy commenced the meeting with a general discussion of the City Council presentation that introduced the education plan, visioning and goals overview. The Educational Leadership Team met Nov. 30, 2016. The PDP will be submitted in February so that the educational plan is fully incorporated for the School Committee to approve in January. J. Dowd commented on the SCOG Analysis to incorporate 21 century learning goals into the educational plan.

3 - Visioning/ Goals Overview

K. Murphy commented on the students being the number one strength and a credit to the City. A FFE consultant commented on being impressed with the wonderful feeling on the campus. Lowell High School was the first coeducational high school in Massachusetts. The SCOG Analysis posed an opportunity for a decision to be made. The building can be brought up to code, accessibility standards and the systems can be replaced, but this would not support the educational and visioning goals. K. Murphy stated that the City Council may ask questions related to the line item costs.

4 - Education Program Update

4.1 Programming/ Space Summary

During the 2016-2017 academic year, Lowell had 3,125 students. The design enrolment number is 3,520 students. No significant changes to courses and class sizes were made.

4.2 User Group Meetings

Full day sessions were held on November 15 & 16, 2016. 17 groups discussed the big picture of each program, space requirements, adjacencies, educational aspirations and trends.

4.3 Discussion of Future Design Program Approval

The School Committee will vote on the Educational Plan prior to the PDP submission to the MSBA in February.

5 - Design Options

5.1 Base Repair

The base repair scope summary projections exclude Coburn Hall. The base repair for electrical system is $26 M that would include new power and security systems throughout the buildings. The 620 sq. ft. requirement is for the projected enrollment of 35,000 students. The four comparisons are based on the square footage and design enrollment numbers. The cost per dollar of square footage is greater than $1,000. S. Gendron asked if the options don't match the OMR, can the City used eminent domain and take a building to utilize space on the other side of the canal. The projected repair is based on the assumption of $250M, which seems high but is due to the location. Tight urban spaces with little room to expand make it harder to keep the temporary class rooms on site.

A. Base Repair w/ Small Addition

The base option would not meet educational goals, only repair and maintenance goals. Based on the evaluation of existing conditions, the cost is estimated to be $231.8M to repair the buildings. S. Gendron asked if the feasibility study is looking into accessing properties. M. Williams stated that it was being looked into but there is no final decision, it would only be used as a last resort. K. Murphy noted that it would not always be beneficial, for example, the assessed damages from Kerouac Park estimated at $600,000 cost the City $3.5 M. The MSBA does not cover un-eligible costs such as acquiring property. M. Williams also noted that the option of eminent domain may stall the project and that a City owned property would allow the project to move forward faster.

B. **Relocate ¼ of the population into other schools**

Office of the City Manager
City Hall ● 375 Merrimack Street ● Lowell, MA 01852
P: 978.674.4000 ● F: 978.970.4007
www.LowellMA.gov

Kevin J. Murphy
City Manager
Michael McGovern
Assistant City Manager

This option would not work. G. Frisch commented that there is limited space for the current enrollment, especially at the middle schools.

C. Create temporary modular class rooms using a portion of F. Morrissett Blvd.

This is an option, but it may not be the most feasible. S. Gendron asked if it would be less disruption to the downtown area is a part of Paige St. and Kirk St. were used instead. R. Healy noted that the construction materials and staging would also need to be placed somewhere nearby. K. Murphy stated that the surface of the Tsongas arena parking garage is a possibility. M. Williams noted double sessions may also be an option to have workers working a second shift to not interrupt educational environment. K. Murphy brought up potential issues with union considerations and disasters. M. McGovern noted that the second shift has been used before at other sites from 3:00 PM-11:00PM. L. DeMeo added that this was true in Haverhill, MA. R. Bell noted that this would enable a blocks of space available for surgical construction. This could be difficult for electrical and heating renovations and construction. Off hour construction could increase the cost of the project. Students would also be deeply located in the construction site. S. Gendron asked if there was anywhere the city could rent or build a location for displaced students. He continued that perhaps some classes may be moved to the Freshman Academy building.

D. Create Temporary Modular Classrooms via use of upper Garage level

K. Murphy proposed using the Tsongas Arena or the parking garage by the arena. He continued that he can speak to the University. He also noted that the top floor of the garage is normally full and may cause some disruption. S. Gendron suggested looking into alternative locations, not just in the down town area. L. DeMeo noted that the West Campus at UML may have room. K. Murphy asked if any schools were available. Perhaps the St. Louis School. It was noted by M. Williams that a high level of consideration is being placed into what locations may be available for a phased renovation. The Educational Plan will need to be built to configure any swing space utilized. B. Martin stated that each option will cost money, and asked if there was a general idea of what the cost may be for a swing space. He continued that it may help give a better decision considering financials. M. Williams noted that the costs would depend on the amount of time and the percent of the class that will be displaced. A three year phasing would require approximately 25% of unencumbered space. An existing space that is owned by the City or Schools would help cut costs. Investing in a space would have long term benefits to the City, but costs more upfront. M. Williams stated that the OPM and design team will make the number work for the City.

If the design team builds on site, more students can move into the newly constructed area. This space can be used instead of modular class rooms as swing space. The financial analysis will include accusation cost v. modular swing space cost.

M. Vaughn suggested using the field house to house students, and use the existing space in the building as swing space. The Phasing costs may off set the additional construction costs. Decreasing the construction time would be beneficial to the City's debt service. S. Gendron suggested building a new field house a Cawley Stadium and tear down the existing field house. This raised the PE v. athletics issue. B. Martin stated that the focus should be more on programming not over the building. Coburn Hall can be changed into dance classes. If more swing space is needed, B. Martin stated that the School Department would make it work; they are committed to this project. Sharing classes or shrinking square footage in current classrooms are options.

M. Williams noted that the OPM and design team engaged others through the educational group to review options. She continued that providing information and input helps the OPM and design team generate more engaged and efficient options. J. Drown noted that the physical options for the design will be vetted in advance. Members of different organizations, groups and schools will be considered. The collective input gathered through community outreach will help vet options. S. Gendron, representing the School Committee is on the ELT team with R. Howe and B. Martin. M. Williams suggested a collective date that works for everyone involved, perhaps Wednesday at 1:00 PM. M. Williams continued, reactions from the design options will be used to utilize resources available.

6 - Renovation with Rebuild of FA. Gym and Portion of Lord Building (requires temporary PE/ Athletics)

PE would need to be held off site for one year or more. During the short duration of construction, PE would still be required. In Winchester, the OPM noted that the school switched their PE to focus on yoga and Pilates. The gymnasium was off line for one year, but it helped decrease construction time.

7 - Renovation of Freshman Academy, Gymnasium and Lord Building.

A large portion of the Lord building would have classes without exterior daylight. The design team noted that they would save as much natural light as they could.

8 - New Construction Existing Site

Office of the City Manager
City Hall ● 375 Merrimack Street ● Lowell, MA 01852
P: 978.674.4000 ● F: 978.970.4007
www.LowellMA.gov

Kevin J. Murphy
City Manager
Michael McGovern
Assistant City Manager

The existing location size is 3.2 acres; the gross square footage is 575,000. The design team is exploring this as a scenario.

9 - New Construction Site

The difference between all new construction and a full renovation with a small addition is that the renovation would leave the shell of the building. Renovating the 1920 building is an option that may pose challenges to phasing. The new school would be a great option, but the question is what to do with the displaced students. The phasing and square feet are variables that will be provided in terms of financial cost to the SBC. B. Martin noted it is hard to justify spending $230M on a building and not know from the outside that the money was invested in the building. B. Martin inquired about the number of stories that are being considered for the 1980 building. R. Bell stated that there is no limit as it is unrestricted. In order to help minimize safety costs, the design team will try to limit the number of floors so that the building is not considered a high rise. It may be more expensive for over two stores. A possibility is to access the site next to the School, which is currently a dentist office. It would be more cost effective to have 2-3 floors with less roof space.

B. Budget Implications of Options

M. McGovern started the discussion of progress so far. Soon, the OPM and design team will be able to give the SBC options with financial scenarios. M. Williams noted that the key to each scenario is the cost. R. Underwood asked what the value is of the dentist office. It is possible for the City to begin talks with the owner, to see if they would want to move. S. Gendron asked what the cost would be if the City used eminent domain. This could impact the time factor. A POS could result in an outrageous number resulting from a bargaining ploy. The option of a land swap opportunity will be discussed. S. Gendron asked if the City made a generous offer before the information is released to the public. The amount to acquire property is not reimbursable by the MSBA. Modular class rooms are also not reimbursable. There may be a tradeoff that is ultimately paid by taxpayers.

R. Bell wanted to clarify that the meeting will discuss visible options without cost and that some may be better than others. Without definite scope, costs will be estimated. A detailed cost analysis will be given in the spring.

C. Analysis of Sites/ Selection

J. Dowd discussed the 15 criteria that the selected sites were analyzed on. A key factor is the number of acres.

Existing HS Location

The existing site is in close proximity to services, transportation and parking. The site is also already owned by the City. There are potential environmental issues with construction on the existing site. The site is also limited in space.

Cawley Stadium

The site has 31 usable acres, which is large enough for the project and is city owned. The location does not have close proximity to services and transportation. J. Drown noted that the maximum site cost that the MSBA reimburses is up to 8%. This would include bringing in utilities, parking and lighting. 6 acres are required for parking alone for seniors and staff. The design team noted that they could build around the football field. M. McGovern discussed the criteria. There may be a large debate with the general public regarding moving the high school out of the down town area. He noted that a public discussion should be set up. The December 8 meeting can be used to provide the public with the top three sites selected by the SBC.

Wang MS/ LeBlanc Park

The site has 31 usable acres and is city owned. The site is not in close proximity to services or transportation.

South Common Park

The site is in close proximity to services and transportation. There are land use restrictions and the usable acreage is 2.3 acres. Approximately $1M in grant funding has been invested into this park to improve the space. Appealing to the legislature may be easier said than done. The OPM has had an experience with this in Westfield where the project was held for 5 years. R. Underwood stated that the project may shrink and that the reimbursement may as well. B. Martin asked what the next step would be. R. Underwood asked if the change in perception is what we would want to do. B. Martin noted that the neighborhoods want the High School to be downtown. It was also noted by the design team that the land is dedicated in deed as park land.

Kevin J. Murphy
City Manager
Michael McGovern
Assistant City Manager

The usable acreage on the site is 19 acres. There area is a Flood Plain and is owned by MA DOT. There are also wetlands that divide the site. The site offers limited proximity to services.

Rollie's Farm

The site is zoned correctly for the building. Usable acres, however, only total 11.18 acres. The land is privately owned and has limited access to services and transportation.

Carlisle St

Property is City owned and has the usable acreage. The lot is in Chelmsford with limited access to services and transportation.

Discussion

The SBC has determined that the existing location, Cawley stadium and the Wang MS. LeBlanc Park. South Common, Regatta Field, Rollie's Farm and Carlisle St fall short in acreage and ownership. R. Healy noted that the top three options would demonstrate to the MSBA that alternative site locations have been considered. It will be worth looking into both Cawley Stadium and Wang MS/ LeBlanc Park be vetted further. It would be beneficial to look into the transportation of students across the city bridges commuting to both alternative locations.

Vote

M. Vaughn noted that the PDP due diligence requires the SBC to select the top three sites. He suggested that the SBC vote on the possible locations.

R. Healy motioned that the SBC endorse the three most favorable sites: Existing HS location, Cawley Stadium, and Wang MS/ LeBlanc Park for more information. Seconded by G. Frisch. All in favor, so voted.

6 - Community Outreach

6.1 Update on Neighborhood Meetings

K. Murphy noted that the City Council was under the impression that the repair would only cost $231M and was surprised. The City Council will vote for a loan order in the

amount necessary once a final location is chosen. G. Frisch inquired about the local share of $100M. C. Baldwin noted that the tax rate will increase $174/average single family home. M. McGovern stated that the reality of the project is that it will be the only major project in the city for the next decade. This is due to the limited capacity to issue debt while keeping taxes level. C. Baldwin discussed the capital plans for the city including street and sidewalk improvements as well as additional ongoing projects such as the canal bridges. R. Healy noted that any major improvements to the Police Department would be off the table. B. Martin stated that real estate value may improve with the new school, which may help to balance costs. The goal at the moment is to achieve the educational process designed. If only improvements are done which could cost $230M, the City may then be required to invest in a new high school in the next decade. S. Gendron asked about the 80% reimbursement from the MSBA for the new high school. M. McGovern noted that it is 70% now, and may drop in the future. B. Martin stated it will be easier to look at the dollar figures once the analysis is concluded. R. Healy noted that the ineligible costs will also need to be stated. R. Conley stated that the reimbursement rate is currently 65-70%.

6.2 12/8 Community Meeting Presentation Review

The range of cost for the feasibility allows the SBC to weigh options until there is a strong reason to remove options. S. Gendron asked if the MSBA would be satisfied with this. M. McGovern noted that the top three sites should be shared with the City Council, School Committee and the public. B. Martin suggested that it may be best to consider investing in each of the three top sites. R. Healy stated that direction and fine tuning is needed. S. Gendron thought it would be important to inform the public of the 8% reimbursement for the site. M. Williams spoke about the December 8, 2016 meeting being an opportunity to inform the community. M. McGovern noted that adding 8% as a con to the sites that includes bringing more services into the sites. M. Williams said that Perkins Eastman will add the information collected from the meeting in the next presentation.

6.3 Website Development Update

The City is working with a vendor that is creating a new city website. For the moment, a landing page will be created for the High School Project. Once the city site is live, the vendor will begin working on a separate site for the High School Project. The website will have the meeting minutes, presentations and a list of the SBC members.

Existing Site - Full Renovation

PARKING SPACES
- GEORGE AYOTTE GARAGE (1200 SPACE CAPACITY)
- 5 + HC PARKING SPACES

BUS DROP OFF: CLOSEST STOPS NOTED ON PLANS

SITE ACREAGE=6.6
USED ACREAGE=6.6+

BUILDABLE AREA = 6.94 ACRES

Note: Test fit in progress to determine if program fits on site

Pros:

- Proximity to Services
- Walking/Bus Proximity
- Existing Parking
- City Owner

Cons:

- Potential Environmental Issues
- Limited Site Size
- Phasing Costs
- No campus PE fields
- Internal academic spaces w/ no natural light

BUS DROP OFF: CLOSEST STOPS NOTED ON PLANS

SITE ACREAGE=6.6
USED ACREAGE=6.6+

BUILDABLE AREA = 6 ACRES
(Excludes .94 acres for Steam Plant & Freshmen Academy) Returns Freshman Academy & Steam Plant to City

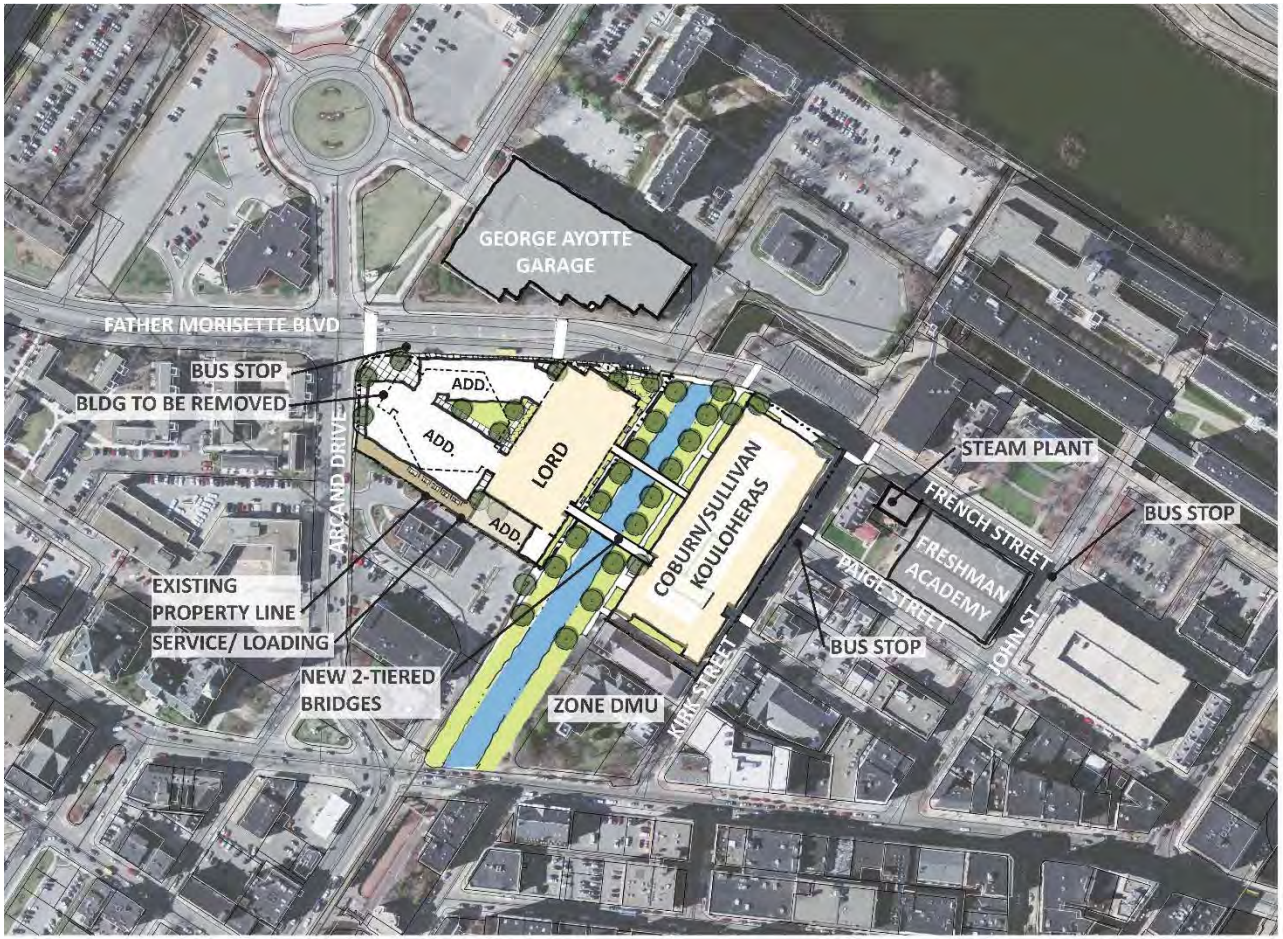
Pros:

- Proximity to Services
- Walking/Bus Proximity
- Existing Parking
- City Owner

Cons:

- Potential Environmental Issues
- Limited Site Size
- Phasing Costs
- No campus PE fields
- Program doesn't fit on site
- Internal academic spaces w/ no natural light
- Less efficient building

Existing Site – Addition/Renovation Option 2



PARKING SPACES
- GEORGE AYOTTE GARAGE (1200 SPACE CAPACITY)
- 5 + HC PARKING SPACES

BUS DROP OFF: CLOSEST STOPS NOTED ON PLANS

SITE ACREAGE=6.6
USED ACREAGE=6.6

BUILDABLE AREA = 6 ACRES
(Excludes .94 acres for Steam Plant & Freshmen Academy)
Returns Freshman Academy & Steam Plant to the City

Pros:

- Proximity to Services
- Walking/Bus Proximity
- Existing Parking
- City Owner
- Meets the Program

Cons:

- Potential Environmental Issues
- Limited Site Size
- Phasing Costs
- No campus PE fields
- Internal academic spaces w/ no natural light

SITE ACREAGE=6.6
USED ACREAGE=6.6

BUILDABLE AREA = 2.7 ACRES
(Excludes .94 acres for Steam Plant & Freshmen Academy & 3.3 acres for Coburn/Sullivan/Kouloheras)
Returns C/S/K, Freshman Academy, Steam Plant to City

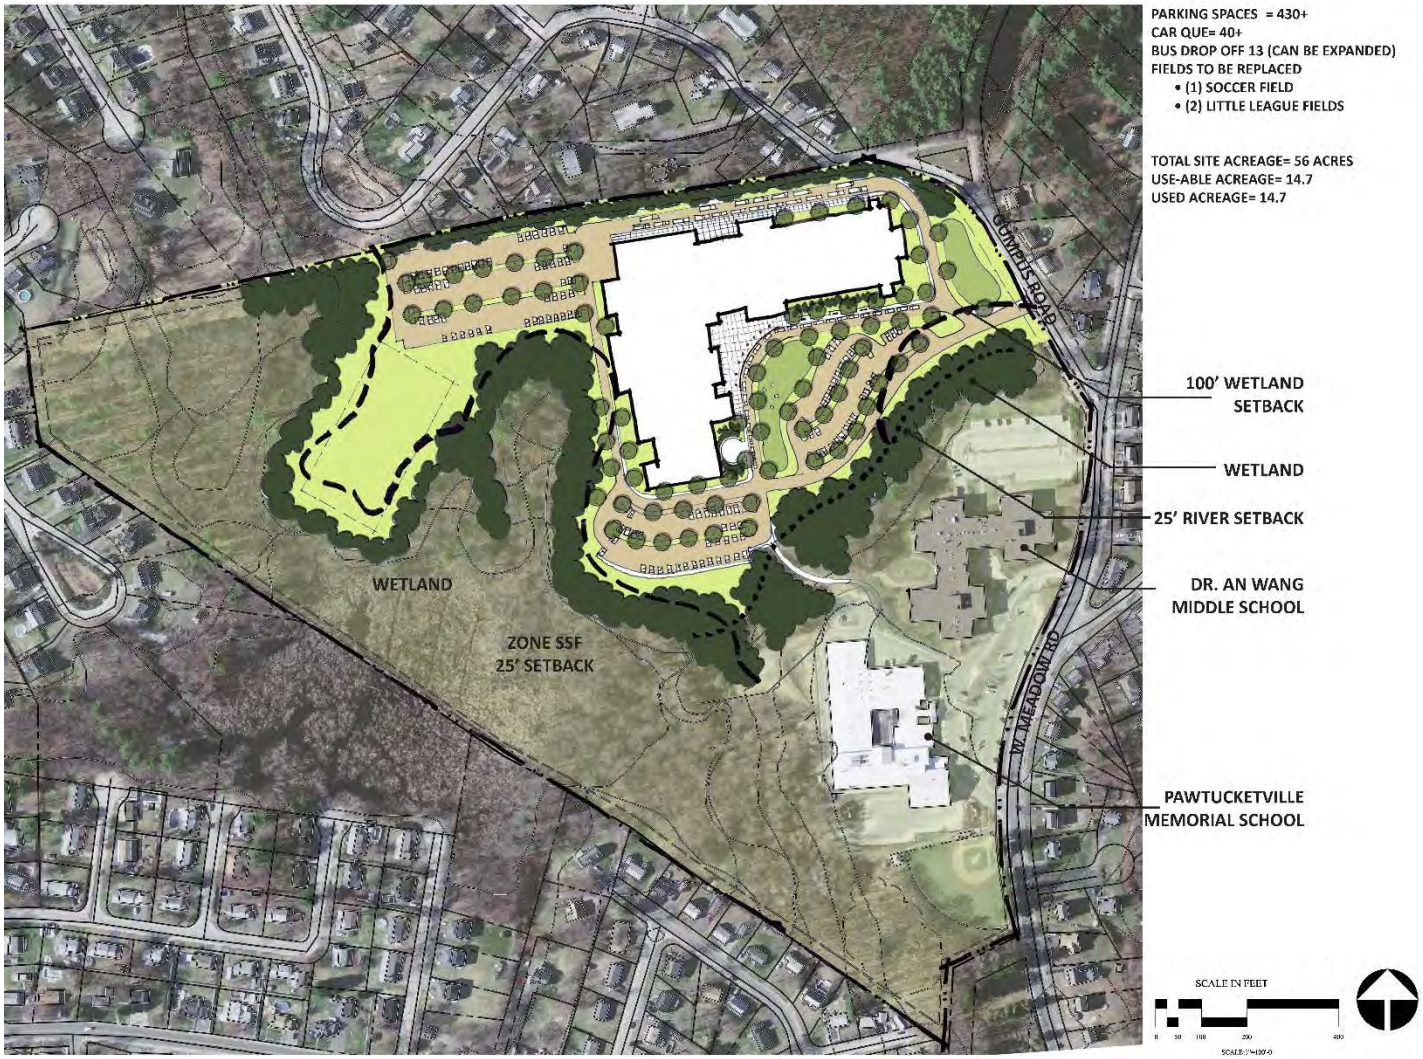
Pros:

- Proximity to Services
- Walking/Bus Proximity
- Existing Parking
- City Owner
- Meets program
- New construction
- More Efficient Building
- Fits all program

Cons:

- Potential Environmental Issues
- Limited Site Size
- Phasing Costs
- No campus PE fields
- High rise w/ additional mechanical costs
- Some internal academic spaces w/ no natural light

Wang Site



BUILDABLE AREA = 14.7 ACRES

Pros:

- Useable/Buildable Area
- City Owned
- New Construction vs. Reno/Add
- More efficient building
- No phasing
- On-site parking/bus queueing/drop off & pick-up
- On-site PE field

Cons:

- Proximity to Services
- Walking/Bus Route Proximity
- Elementary/MS Students on Same Campus as High School
- Loss of Some Ball Fields
- Heavy traffic in residential area
- Non-reimbursable site development costs

Cawley Site

BUILDABLE AREA = 30 ACRES
(includes Memorial Stadium)

Pros:

- Useable/Buildable Area
- City Owned
- New Construction vs. Reno/Add
- More efficient building
- No phasing
- On-site parking/bus queueing/drop off & pick-up
- On site PE fields

Cons:

- Proximity to Services
- Walking/Bus Route Proximity
- Loss of some existing fields
- Non-Reimbursable Site Development Costs

Next Steps

- January 6 Send Design Options to Estimators
- February 1 School Committee Vote on Ed. Plan

City Manager
Michael McGovern
Assistant City Manager

School Building Committee MSBA Meeting

Meeting Minutes

Date: Jan 5, 2017
Time: 10:00AM
Location: Mayors Reception Room, City Hall

1. - Attendance

Attendees: Kevin Murphy, Conor Baldwin, Robert Healy, Mike Vaughn, William Samaras, Brian Martin, Lisa DeMeo, Gary Frisch, Rick Underwood, Steve Gendron, David Beati and Jay Mason.

Also in attendance: Mike McGovern, Rodney Conley

From Skanska: Mary Ann Williams, Jim Dowd

From Perkins Eastman: Alicia Caritano, Robert Bell, Joe Drown and Dawn Guarriello

2. - Review of Educational Plan

K. Murphy began the discussion talking about the preliminary concepts. He noted that the key factor that is missing is the financial aspect, which Perkins Eastman is currently working on. K. Murphy also stressed the importance of the financial costs in making a final decision. He continued that he has been impressed with the work thus far.

The program will be completed January 15, 2017. The plan will then be sent to the School Committee for two week review in February, the target meeting dates are February 1 and February 15, 2017. S. Gendron asked if the target date could be the later date to give the committee members time to review. M. Williams pointed out that the OPM is submitting the document to the MSBA February 24, 2017. B. Martin stated that the School Committee will target February 1, 2017. Once the Educational Plan is completed, the SBC would like the City Manager and School Committee to receive it so that a final vote may be taken on February 15, 2017.

It was addressed that the Educational Plan is a narrative on objectives and policies with no final preliminary designs. Mid-January the School Committee will receive the Educational Plan. S. Gendron suggested that the School Facilities Subcommittee may meet by the end of January to begin discussion as soon as possible.

M. Williams noted that the Educational Plan will incorporate the vision of several sessions and that not much of the information should be new. It is a formal report that integrates the community discussions.

K. Murphy stated that other School Committee members may be less involved in the process and would like more time to review. The OPM is trying to keep the SBC on track and move the process along the design time line. M. Williams asked if the SBC would like to issue the document now as a draft to the School Committee, and fine tune it over the next two weeks. S. Gendron asked if the document is completely focused on educational goals. K. Murphy stated that the School Committee plays a key part in the process of approving the Educational Plan. He continued that the School Committee can extend the two week meeting if they feel they need to do so.

3 - Preliminary Design Program Update

K. Murphy commented on the students being the number one strength and a credit to the City. A FFE consultant commented on being impressed with the wonderful feeling on the campus. Lowell High School was the first coeducational high school in Massachusetts. The SCOG Analysis posed an opportunity for a decision to be made. The building can be brought up to code, accessibility standards and the systems can be replaced, but this would not support the educational and visioning goals. K. Murphy stated that the City Council may ask questions related to the line item costs.

R. Bell stated that the design team is looking for feedback from the SBC, they want to make sure that every rock is turned over.

3.1 Base Repair Option 1

R. Bell discussed the base repair option and how the design team is performing a fit test to see if the program fits on site. He noted that if the goal is to have a standard room size of 900 square feet; a wall would be knocked down to enlarge a 750 square foot room but not a 800 square foot room. He mentioned design problems with this, such as having to leave extra space for an existing window. Restructuring the walls inside the building will help meet educational objectives. This option leaves the freshman off site and limits the green space available. Phased construction is complex with multiple costs associated with it including portable class rooms. Inefficiencies in size of the building as well as inefficient use of space. There are also potential environmental issues, risks and costs associated with base repair.
M. Williams asked what the duration of the renovation is projected. J. Drown stated that all the options include 36-42 month duration. This can be adjusted with the creation of swing space for temporary classrooms off site until the project is complete. M. Williams asked if the students would remain on site if they cannot shift schools, and if this would increase the projected timeline. J. Drown stated that there needs to be temporary space for students to learn. M. Williams noted that this cost close to $7M in Winchester, which was note reimbursable by the MSBA. The Education Delivery Plan may help decrease costs of classrooms. G. Frisch asked

Office of the City Manager
City Hall ● 375 Merrimack Street ● Lowell, MA 01852
P: 978.674.4000 ● F: 978.970.4007
www.LowellMA.gov

Kevin J. Murphy
City Manager
Michael McGovern
Assistant City Manager

what number of students would be displaced by the renovation. M. Williams replied that at least one grade at a time, approximately 900 students.

3.2 Addition/ Reno Option 1

The white image on the slide that sticks out into the street would be a three story building. This option does not work as the buildings do not fit onto the site. The freshman would be moved from the Freshman Academy to the new building in the street. The added extensions to the library and loading dock.

3.2 Addition/ Reno Option 2

The fieldhouse is demolished; three additional building structures are built. One is a two story pool/gymnasium which could possibly house the freshman until their rooms are constructed. S. Gendron inquired if the field house includes a track. R. Bell replied that it does, an oblong 136 meter track. J. Mason asked if this includes a pool. R. Bell noted that it does include a 8,000 square foot pool; which is larger than the current 7,000 square foot pool. It was also noted that pools are not reimbursable by the MSBA. L. DeMeo asked if the bus drop would be relocated. It has not been relocated in the depiction, but can be looked into. G. Frisch asked if the students would need to be relocated. The gymnasium would take about a year to a year and a half, PE would be the only necessary courses moved. K. Murphy stated that an alternative space for PE and sports would be needed. M. Williams proposed temporary modular classrooms; perhaps on top of the Tsongas Arena parking garage. R. Bell stated that this option removed the need for modular classrooms, as the freshman can be moved once their class rooms are built; creating free swing space. The design team stressed that they would like the process to be quick and limit disruptions. They can construct the shell of a building and customize the inside. This option includes pre-engineered structures and can greatly excel construction time. A new face of the building will be visible to the public. A main entry would be created that is secure and safe. The green space can be utilized by ROTC students. Possible modifications to PE would include Ti Chi, yoga and Pilates.

K. Murphy stated it may be better to disrupt PE classes than the core educational courses. B. Martin agreed. He continued that although Lowell has the largest athletic program in MA, the students will be up to the challenge; they are adaptive. B. Martin stated that he would be less inclined to disrupt limited mobility or special education students.

R. Underwood asked if they could construct a building over the canal. K. Murphy noted the city owns rights to the air above the canal only, allowing the foot bridges to be built. L. DeMeo stated the City would need to work with Enel on the issue if this were pursued. M. Williams thought

this may be a consideration, but it is important to take into account the trolley and natural lighting that would be lost. R. Bell said that the design team is willing to explore all options. The suggestion by R. Underwood may displace more students when the buildings are tied in structurally. S. Gendron commented on the cost that may be associated with this concept.

R. Bell stated that the designs all have a two story bridge so that construction never takes away from mobility. An extra bridge will be constructed, so that one may be renovated while minimizing impact on students. M. Vaughn asked if a temporary bubble has been considered, like in Boston. The major vendor for bubbles has been contacted, and Skanska will look into the projected costs. M. Vaughn asked what would happen to the Freshman Academy. R. Bell noted the empty building would be turned over to the City.

3.3 Addition/ Renovation Option 3

This plan returns the Freshman Academy and STEAM plan to the high school. The space below the Lord building is where a fieldhouse would be created. The current field house would be demolished, which allows the designers to build with limited displacement of students. Logistically this option adds more green space and visual appeal.

The site would include an extended property line, increasing the total square acres to approximately 7.4. This option may be less efficient than Option 2 but feasible compared to Option 1. The design team listed the positive and negative aspects of this design.

The Coburn building would also be fully renovated with this option too. S. Gendron asked if the class rooms would be reconfigured. R. Bell replied yes, they would try to incorporate light wells to let more natural light in as well. He continued that the science labs would be 1,440 square feet where as they are currently 700 square feet. S. Gendron asked if the hallways would change during the renovation. R. Bell mentioned that the lockers may be removed from the corridors. The need for physical text books is diminishing as technological environment advances to e-books. J. Mason asked what the cost would be. R. Bell stated that the revnovation would be easier in the older building, as the structure is key. The Lord building would not be as easy since the rooms are not as large. It is highly likely that walls would be moved blocking windows. K. Murphy pointed out that this option afforded little to no disruption to PE and Educational classes, no modular classrooms or alternative sites would be required. G. Frisch asked about the possibility of taking over the business location (dentist office). R. Bell replied that there is a community, political and financial aspect to this option. He stressed the notion that the options are concepts, not definite. K. Murphy stated that the City is duty bound to minimize distruptions and to come up with concepts. J. Drown made a note that modular classrooms are not reimbursed by the MSBA, and that this option would make the City’s funding most effective.

Michael McGovern
Assistant City Manager

3.4 New School at Existing Site

The option of building a new school on the existing site creates a 6 story building. In a compromise with limited footprint and vertical circulation, the gymnasium and the media center would be located on the top floor. This option would be very disruptive for students. The science labs would also be on the inside with little to no natural light. S. Gendron asked if the additional / renovation option that includes the dentist office, would help extend the foot print. He also asked if there would be access to bus routes on site to limit traffic.

3.5 Wang Site for New High School

The building is projected to be 4 stories, which is more efficient. The site is an ideal property for lighting and energy efficiency according to the design team. There would be no phasing or educational disruption for students. The proximity to the downtown and transportation is limited. The state would only reimburse 8% of the site cost. S. Gendron asked for a rough cost estimate. M. Williams noted it would be irresponsible for the OPM or design team to provide a rough estimate at this time, there are many moving variables.

3.6 Cawley Stadium Site for New High School

The building is projected to be 4 stories, as well. There is also no educational disruption due to phasing. Some fields would be lost in the construction including Martin Softball field and Desmond Freshman Football field. The site cost is projected to exceed the 8% reimbursement. The parking lot behind the school would be over the City line, extending into Tewksbury. S. Gendron expressed his concern with considering traffic in the neighborhood and residential areas. W. Samaras noted that this should also be considered for the Wang site. L. DeMeo noted that Tewksbury has similar paving and parking ordinances to Lowell. She asked the design team to look into the parcel to see if the area is zoned correctly for the parking lot. L. DeMeo also noted that there is a long standing issue with the brook on Clark Road, the project would need to consider the environmental impact of adding water to the brook.

3.7 Discussion

The SBC confirmed one of the options, Add/Reno Option 3, leaves the Freshman Academy free. M. Vaughn suggested that the Freshman Academy, if vacant, was used for a field house during the renovations. R. Underwood stated that the School Department has ideas for the building as well if the City allows. R. Bell stated that the PE Program may not be accommodated in the existing space.

G. Frisch asked if R. Bell would review the suggestions that the design team will look into.

1) Building air rights over the canal.

2) All new buildings expanded site

3) Traffic/ Permitting/ Zoning at Cawley

4) Repurposing the Freshman Academy

5) Roadway connection from Father Morrissett Blvd. to Merrimack Street.

6) New building on the existing location with a renovated 1922 building.

S. Gendron asked if the design team would consider changing the exterior color of the bricks when renovating the buildings. M. McGovern stated it would be more expensive to match the bricks than contrast them. M. Vaughn suggested using the 1922 building for PE and building a new Lord building.

S. Gendron stated that he regrets having eliminated South Common from the list of possible sites. He stated that it is centrally located near transportation and closer to the downtown. M. Williams noted that the OPM has had experience with other communities that involved dealing with Article 97 that delayed the project time line 5 years. L. DeMeo mentioned one dealing with Article 97 that lasted 14 months, and that was unheard of. It is possible if the SBC follows this route that the feasibility study would be extended. S. Gendron asked if the City could speak to State Delegators. M. Williams noted that the MSBA will not let the City proceed without ownership of the preferred site.

S. Gendron motioned that a study for the South Common site be performed, and to inquire with State Delegation of the likelihood of this passing. Seconded by G. Frisch.

J. Mason motioned to amend S. Gendron's motion for South Common, to include the City performing a study on accessing the Dentist site.

Discussion followed including the current grants being used for South Common. The City would need to give back funding for: $400,000 grant for the Parks Department, $400,000 grant and $400,000 that is bonded for Waste Water Utility. This motion would impact the timeline for the PDP submission, which would be into March rather than February. W. Samaras suggested contacting advocates for the park. W. Samaras noted that there are other State Delegates (not just the four from Lowell) and many are strong advocates that helped obtain funding for South Common.

Office of the City Manager
City Hall ● 375 Merrimack Street ● Lowell, MA 01852
P: 978.674.4000 ● F: 978.970.4007
www.LowellMA.gov

Kevin J. Murphy
City Manager
Michael McGovern
Assistant City Manager

R. Healy respectfully requested to amend the motions, making S. Gendron's and J. Mason's separate motions. He stated that the city is paying for the architect and OPM to complete the feasibility study; based on the last meeting the SBC voted on the top three sites. Going back to include an additional site will cost additional fees. M. Williams noted that February 24, 2017 is the targeted submission date for the MSBA; the City will need to show ownership of the properties at that time.

3.8 Votes

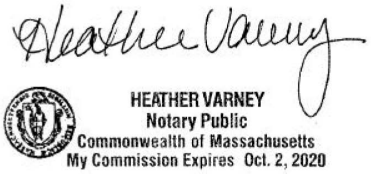
S. Gendron motioned that a study for the South Common site be performed, and to inquire with State Delegation of the likelihood of this passing. Seconded by G. Frisch. 5 Yes, 6 Opposed; so voted.

J. Mason	Yes
C. Baldwin	No
R. Healy	No
L. DeMeo	No
G. Frisch	Yes
M. Vaughn	No
S. Gendron	Yes
R. Underwood	Yes
D. Beati	Yes
B. Martin	No
W. Samaras	No

B. Martin motioned to refer the motion by J. Mason to the City Manager to inquire into the acquisition of the dentist office and refer back to the SBC. All in favor, so voted.

4 - Next Steps

M. Williams noted that the expanded site, Wang and Cawley have not been eliminated. The three sites will be submitted to the MSBA. The design team and the OPM will continue to investigate and explore each option in depth. M. Williams also noted that the investigation will include residential impact in a report for the next meeting in February. C. Baldwin motioned to adjourn, seconded by W. Samaras.



SKANSKA

Lowell High School Project

School Building Committee

Agenda Items – February 7, 2017

- Educational Plan status update

- Preliminary Design Program Update
  - Review of Estimates, Phasing Implications and Design Status
    - Base Repair
    - Full Renovation
    - Add/Reno Opt. 1A “air rights”
    - Add/Reno Opt. 2 Existing Site (demo FH)
    - Add/Reno Opt. 3 Existing Expanded Site (demo FH)
    - Add/Reno Opt. 4 Existing Site (demo FH & Lord)
    - Add/Reno Opt. 5 Existing Expanded Site (demo FH & Lord)
    - New School Existing Site
    - New School Existing Expanded Site
    - New School Wang Site
    - New School Cawley Site
  - Selection/Approval of Options for City Council Review/Approval
  - Authorization for OPM to Submit PDP to MSBA no later than Feb. 24

- Community Outreach
  - 2/8 Belvidere Neighborhood Assn. Meeting Review
  - Additional Community Meetings

- Website Development Update

- Next Steps

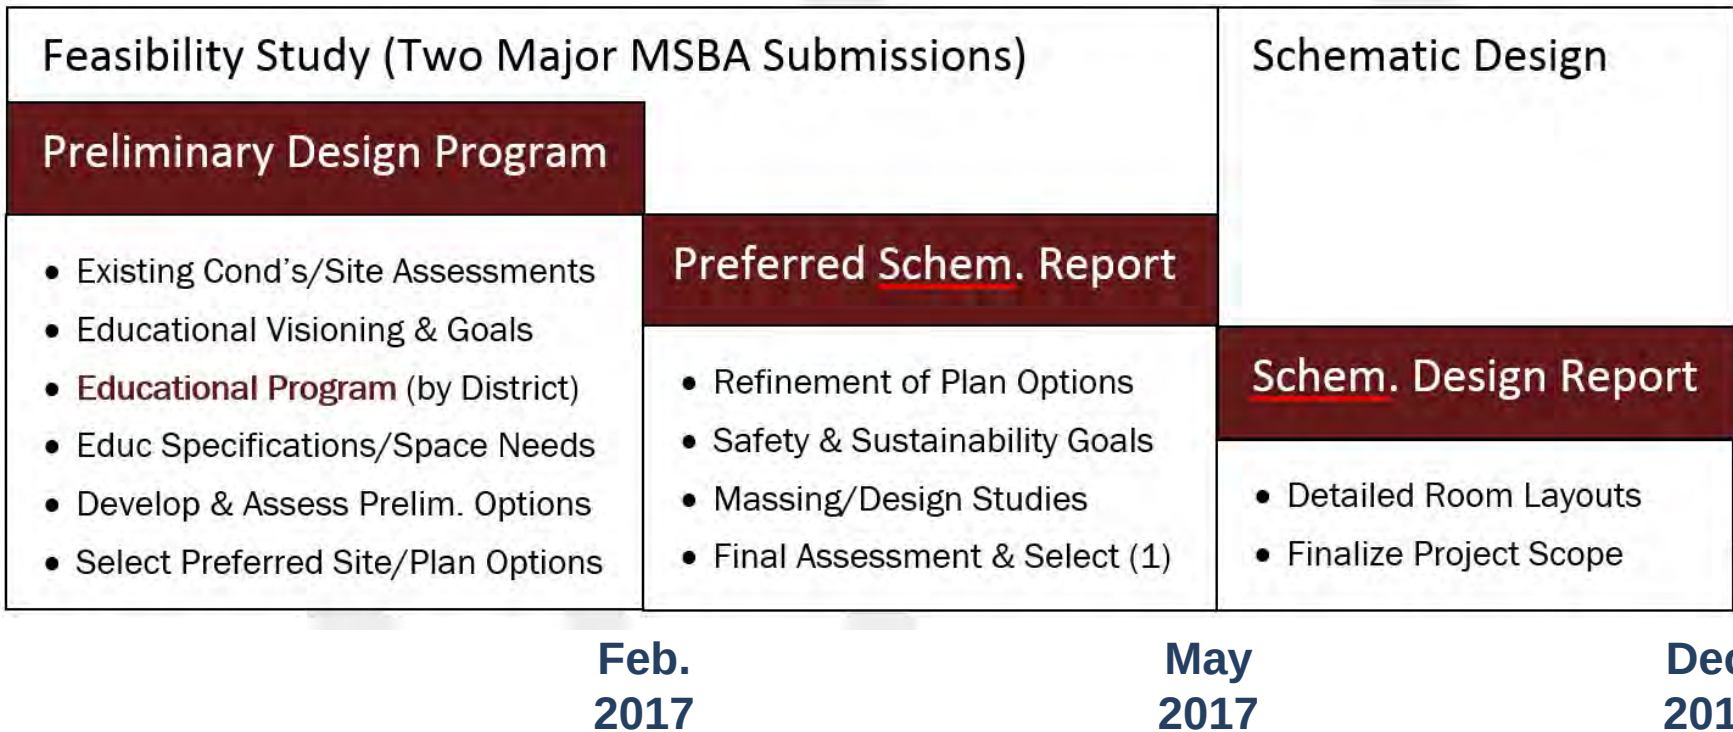
100% CD Apr. 15, 2019
Early Bid
Main Bid
Early Bids Mar. 12, 2019
Main Bids Sept 25, 2019
Construction 3-4 years

The current phase of work within the MSBA program occurs in 3 major submission over a 16 month period



EXISTING ACREAGE = 6.6

BUILDING (GSF) = 628,000

EXISTING 2, 3 & 5 STORY

PARKING (GARAGE) = 1200 CAR CAPACITY

PROS/CONS

+ PROXIMITY TO TRANSPORTATION
+ PROXIMITY TO CITY/SOCIAL SERVICES
+ ADJACENT PKG GARAGE (COVERED
+ BUILDING SYSTEMS REPAIRED / REPLACED AND CODE ISSUES RECTIFIED
- DOES NOT MEET EDUC. PLAN OBJECTIVES
- DOES NOT MEET SPACE NEEDS/STANDARDS
- NOT FUNDED UNDER CURRENT MSBA PRGM
- FRESHMAN ACADEMY IS REMOTE (INEFFICIENT SPACE USE/SAFETY ISSUE)
- SOLAR ORIENTATION IS PROBLEMATIC
- WINDOWLESS CLASSROOMS REMAIN
- LIMITED ACCESS TO GREEN SPACE
- HIGH OPERATING COSTS (SIZE+ENV.)

CONSTRUCTION

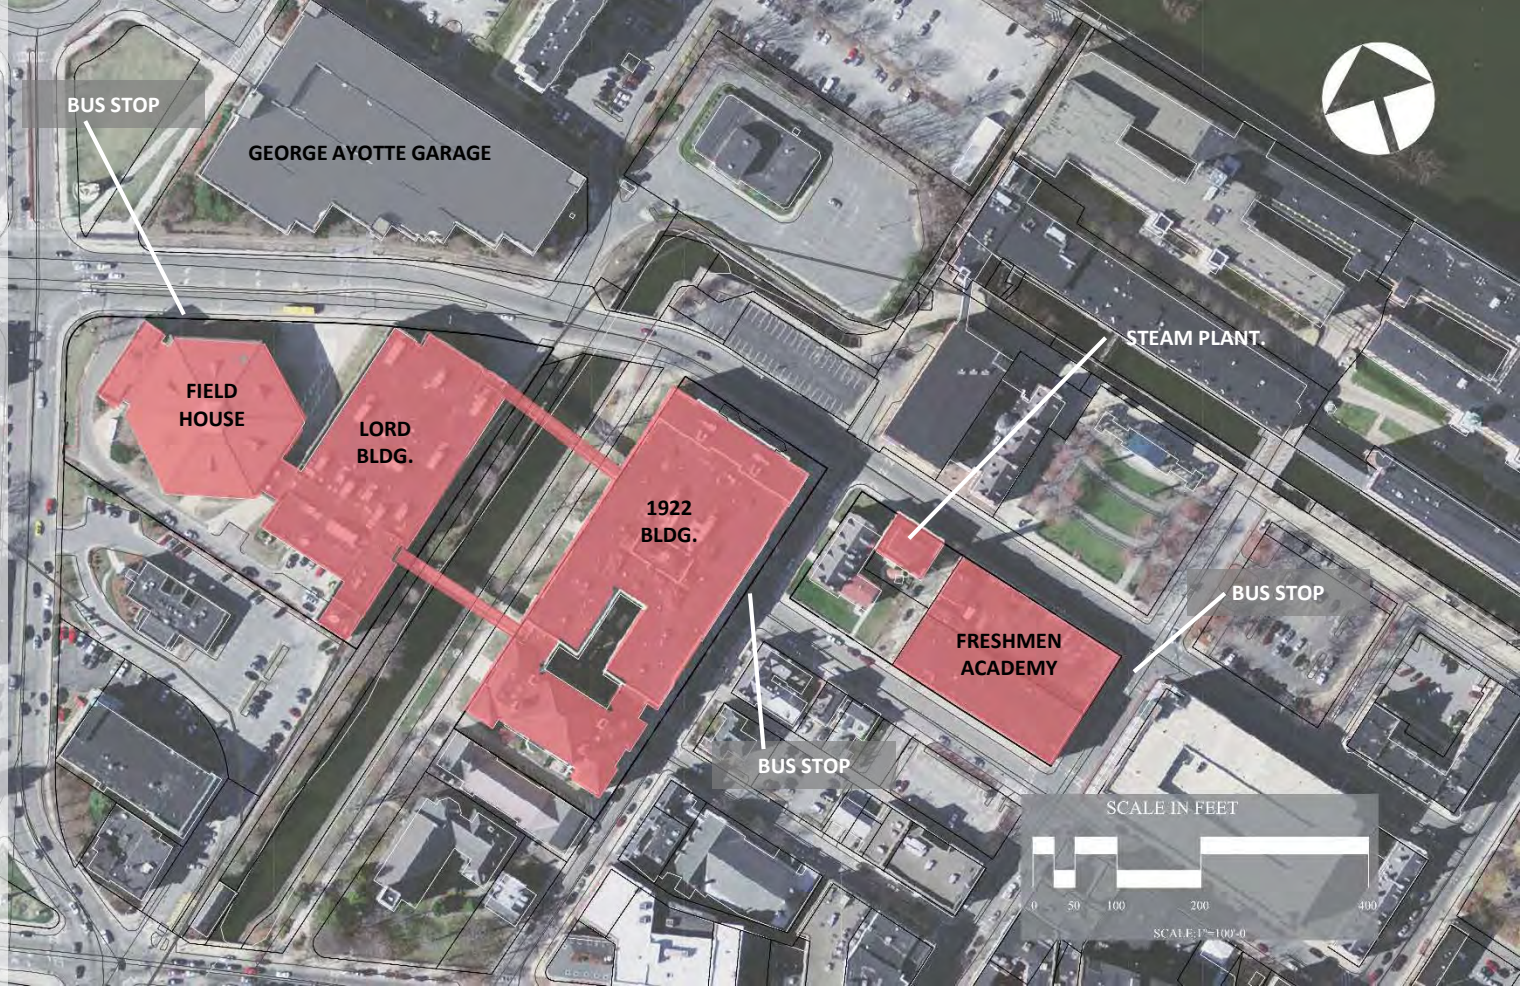
5 YEAR PHASED PROJECT

- EXTENSIVE MODULAR CLASSROOMS
- TEMPORARY GYM FACILITIES REQUIRED

RELATIVE COSTS

TOTAL PROJECT COST = $270,770,322

ESTIMATED CITY'S SHARE = $73,242,815



Lowell High School

BASE REPAIR OF EXISTING

Perkins Eastman SKANSKA

BUILDABLE ACREAGE = 6.4

BUILDING (GSF) = 641,600

RENOVATION AREA (GSF) = 623,700

ADDITION/ NEW AREA (GSF) = 17,900

EXISTING 2, 3 & 5 STORY + 2 STORY ADDTN

PARKING (GARAGE) = 1200 CAR CAPACITY

PROS/CONS

+ PROXIMITY TO TRANSPORTATION
+ PROXIMITY TO CITY/SOCIAL SERVICES
+ ADJACENT PKG GARAGE (COVERED)
+ MEETS ALL SPACE NEEDS (COUNT/SIZE)
+/- MEETS SOME EDUC. OBJECTIVES
- COMM./ACTIVITY AREAS SPREAD/SPLIT
- FRESHMAN ACADEMY IS REMOTE (INEFFICIENT SPACE USE/SAFETY ISSUE)
- SOLAR ORIENTATION IS PROBLEMATIC
- WINDOWLESS CLASSROOMS REMAIN
- LIMITED ACCESS TO GREEN SPACE
- HIGHER OPERATING COSTS (SIZE+ENV.)

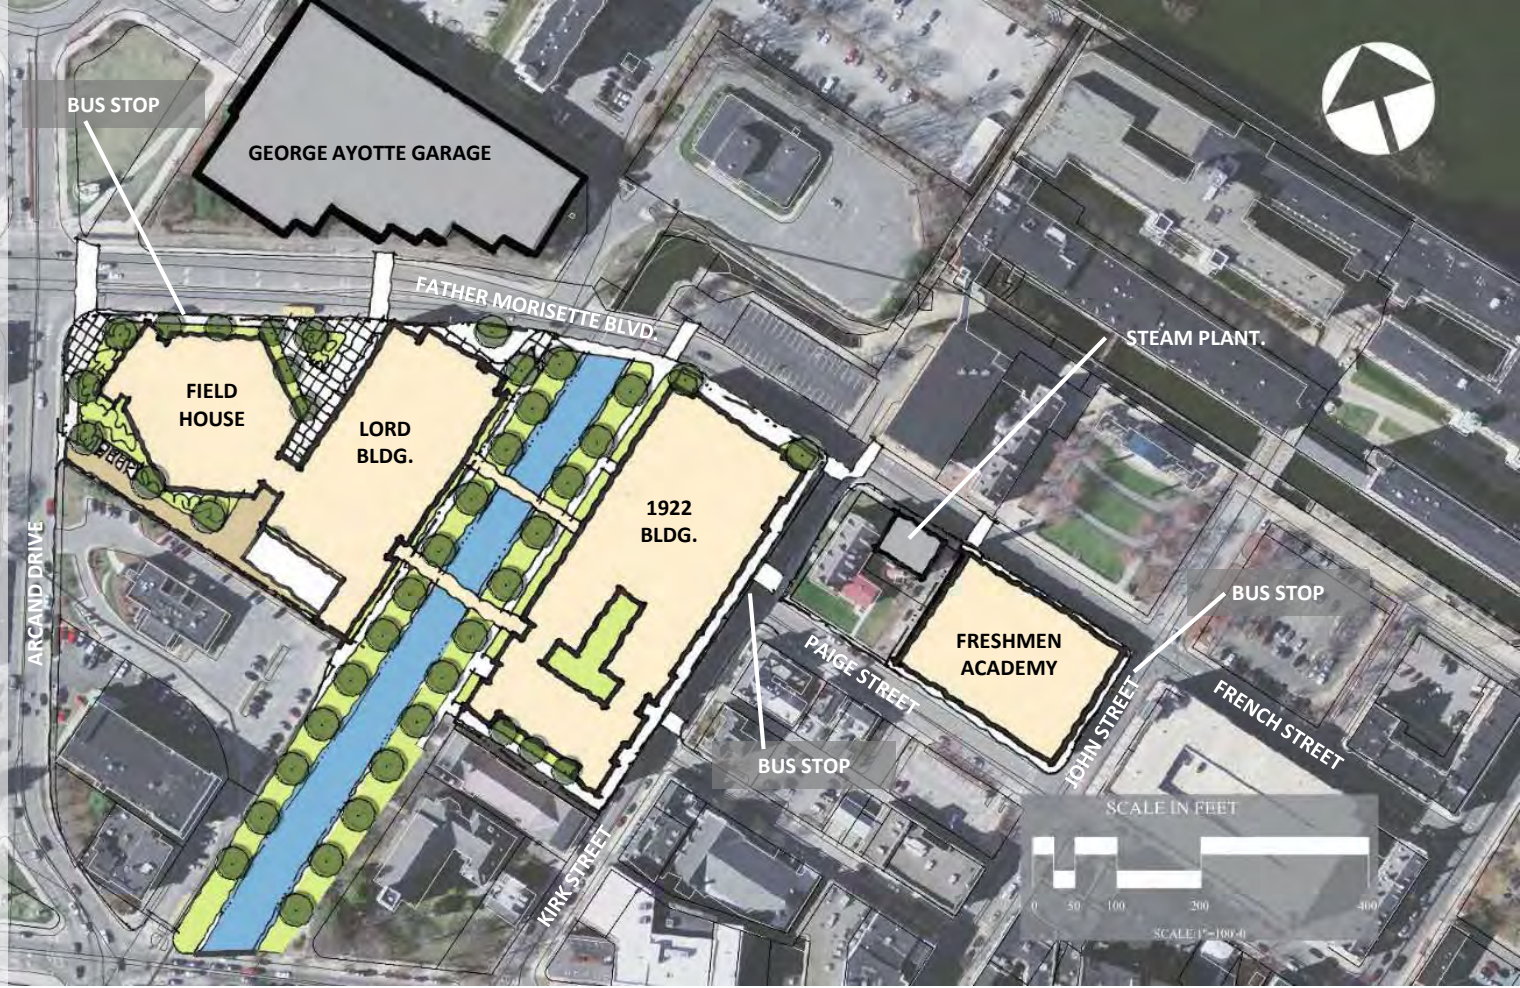
CONSTRUCTION

5 YEAR PHASED PROJECT
- EXTENSIVE MODULAR CLASSROOMS
- TEMPORARY GYM FACILITIES REQUIRED

RELATIVE COSTS

TOTAL PROJECT COST = $331,360,298

ESTIMATED CITY'S SHARE = $116,472,533



Lowell High School | FULL RENOVATION (EXISTING)

Perkins Eastman SKANSKA

BUILDABLE ACREAGE = 6.0

BUILDING (GSF) = 617,400

RENOVATION AREA (GSF) = 529,100

ADDITION/ NEW AREA (GSF) = 88,300

NEW 2 & 3 STORY ADDITIONS, INCLUDING 2 STORY BRIDGES

PARKING (GARAGE) = 1200 CAR CAPACITY

PROS/CONS

SAME AS FULL-RENO, EXCEPT;

+ FRESHMAN RELOCATED ON CAMPUS
+ FORMER BLDG AVAILABLE FOR REUSE
+ NEW ENTRY/FACE TO THE SCHOOL
+ NEW 2-TIER BRIDGES (CIRC./SAFETY)

CONSTRUCTION

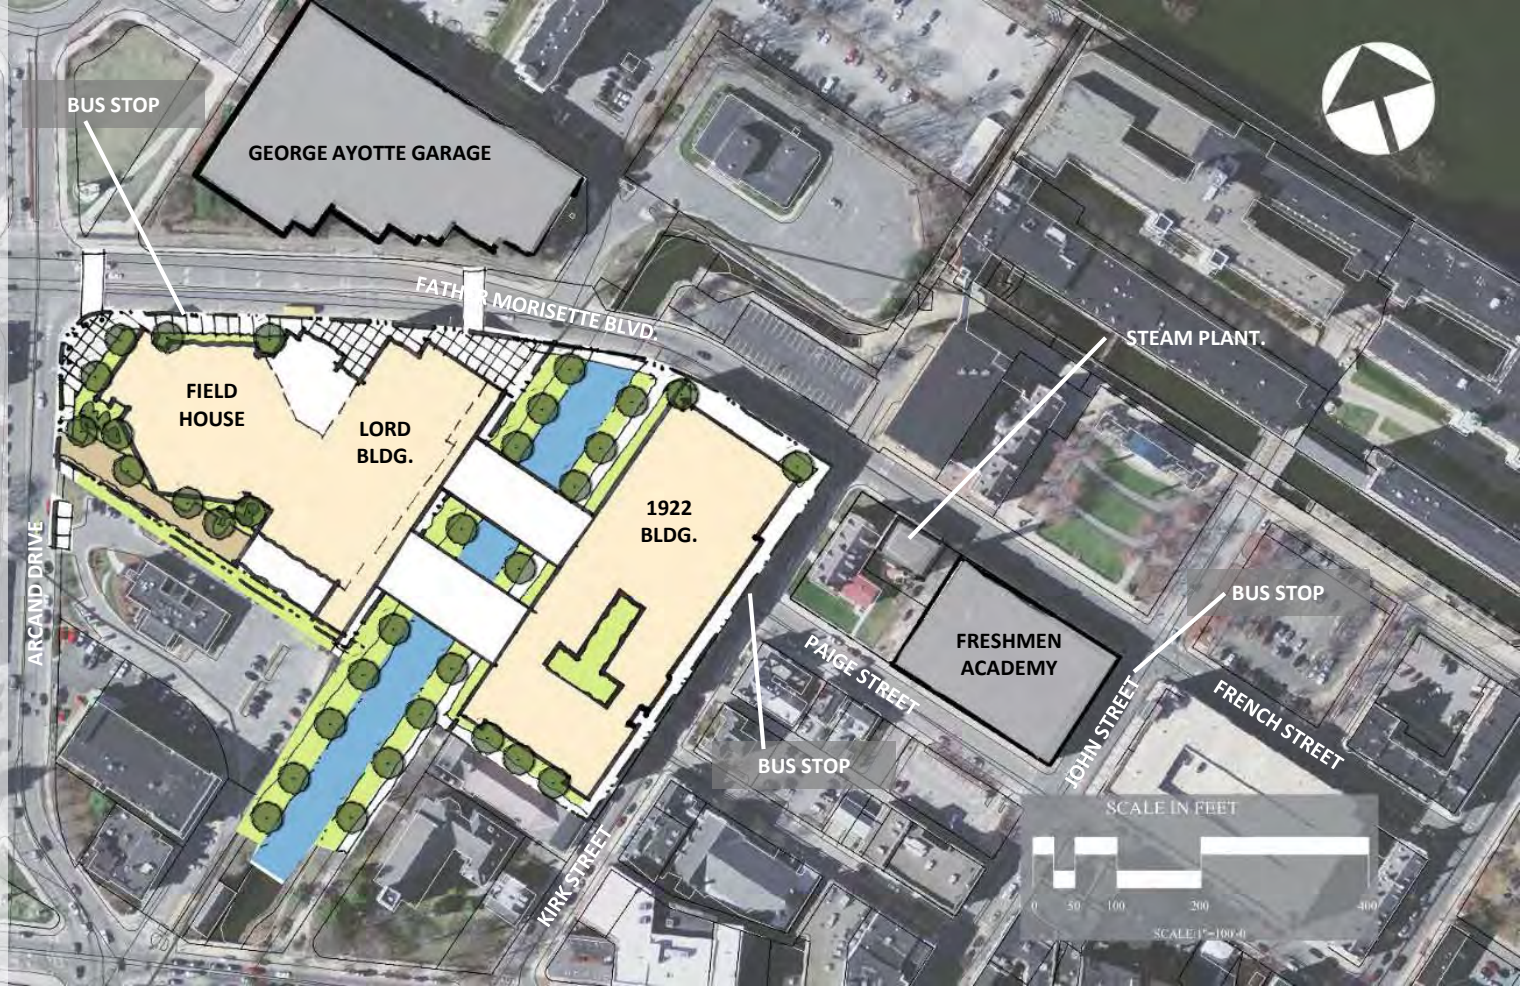
4½ YEAR PHASED PROJECT

+ FEW MODULAR CLASSROOMS REQ'D
- TEMPORARY GYM FACILITIES REQUIRED

RELATIVE COSTS

TOTAL PROJECT COST = $340,980,538

ESTIMATED CITY'S SHARE = $132,448,689



BUILDABLE ACREAGE = 6.0

BUILDING (GSF) = 624,100

RENOVATION AREA (GSF) = 454,100

ADDITION/ NEW AREA (GSF) = 170,000

NEW 2 STORY FIELD HS, 5 STORY FA WING + 2 STORY BRIDGES

PARKING (GARAGE) = 1200 CAR CAPACITY

PROS/CONS

SAME AS OPTION 1A, EXCEPT;

+ NEW FRESHMAN WING (IDEAL ORG/SUN)
+ NEW FIELD HS (MORE EFFIC./FLEXIBLE)
+ MODEST GREEN SPACE CREATED

CONSTRUCTION

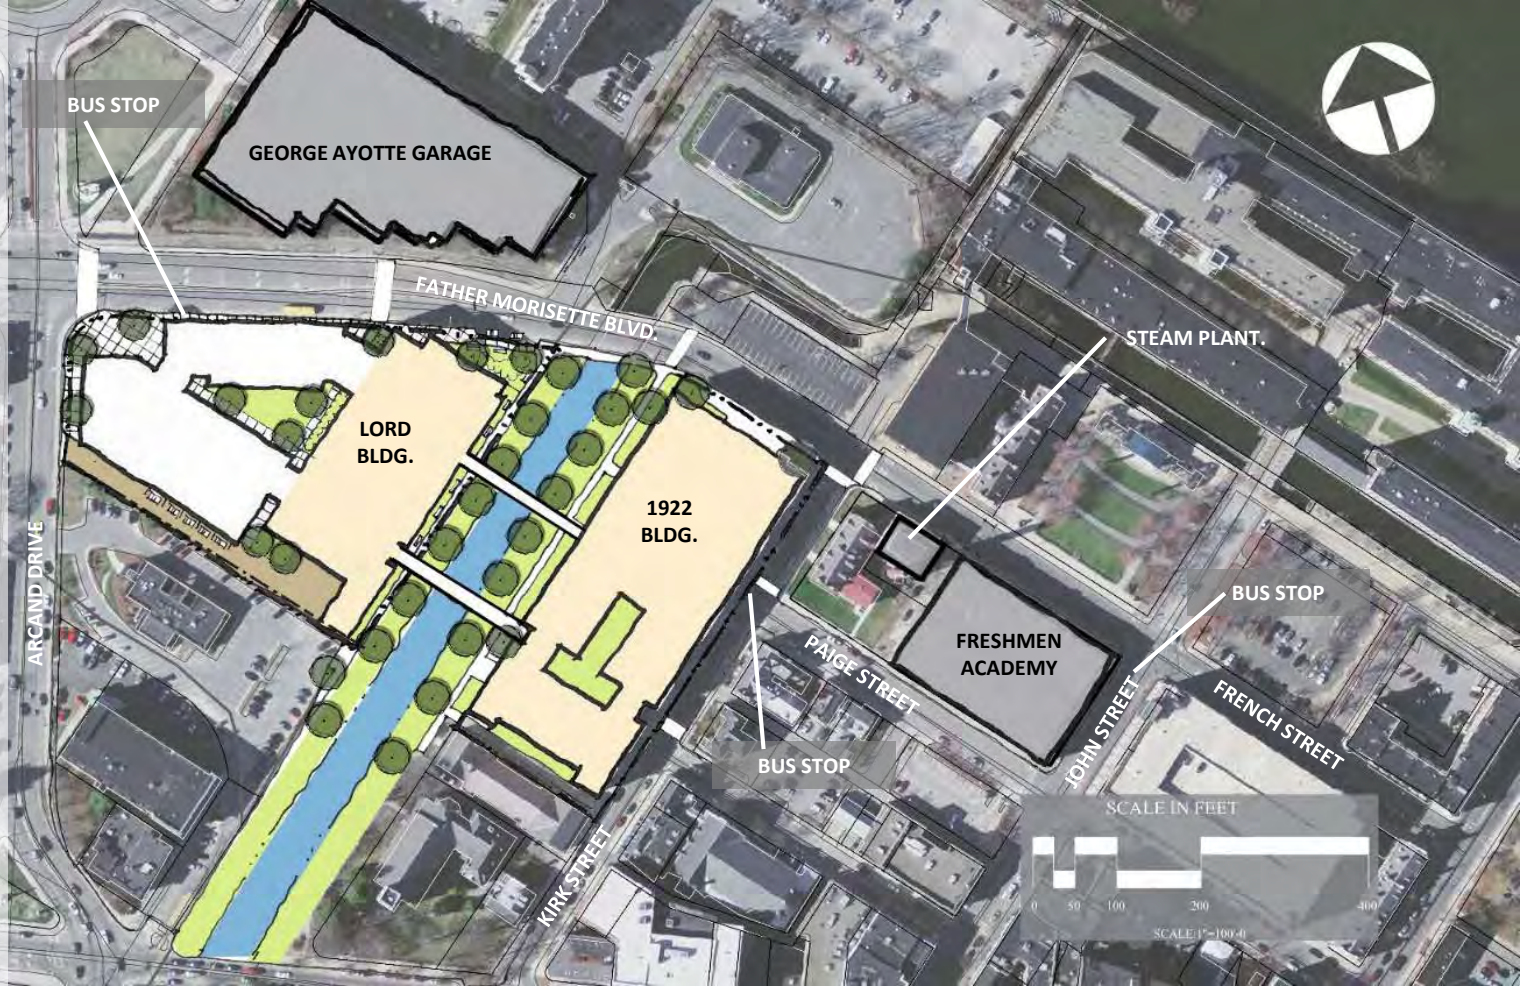
4 YEAR PHASED PROJECT

+ FEW MODULAR CLASSROOMS REQ'D
- TEMPORARY GYM FACILITIES REQUIRED

RELATIVE COSTS

TOTAL PROJECT COST = $344,087,262

ESTIMATED CITY'S SHARE = $135,614,525



BUILDABLE ACREAGE = 7.4

BUILDING (GSF) = 638,700

RENOVATION AREA (GSF) = 447,500

ADDITION/ NEW AREA (GSF) = 191,200

NEW 2 STORY FIELD HS, 5 STORY FA WING + 2 STORY BRIDGES

PARKING (GARAGE) = 1200 CAR CAPACITY

PROS/CONS

SAME AS OPTION 2, EXCEPT;

+ NEW KITCH./LOADING (BUILT PHASE-1)
+ LIGHT WELLS = NO WINDOWLESS CR'S
+ LARGE GREEN SPACE CREATED

CONSTRUCTION

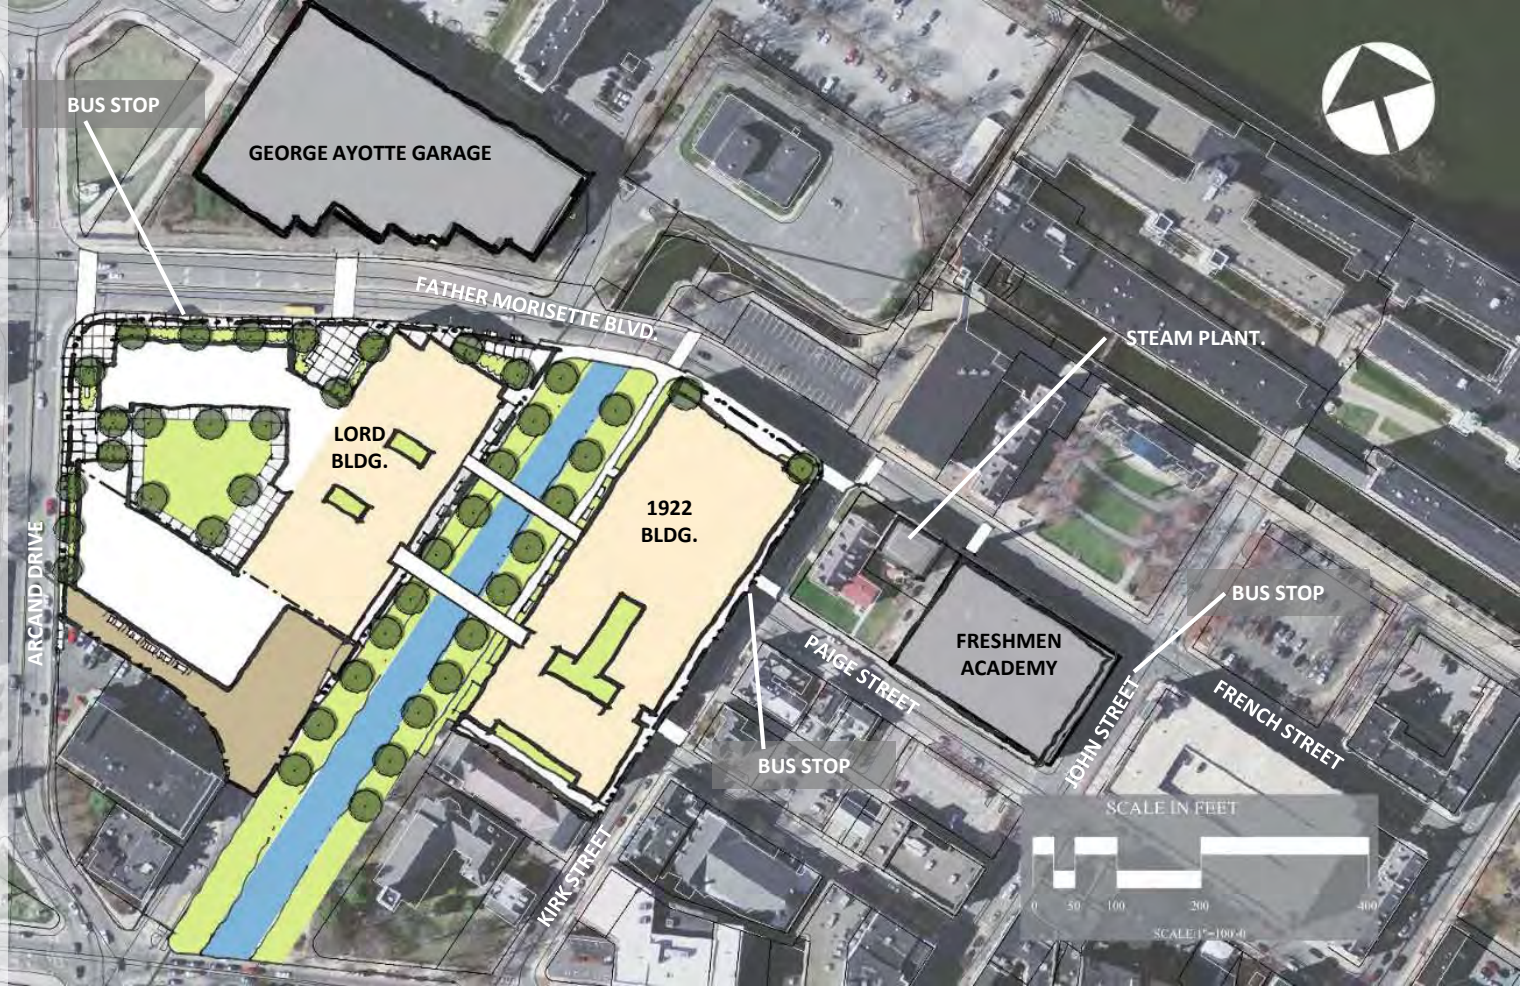
4½ YEAR PHASED PROJECT

+ FEW MODULAR CLASSROOMS REQ'D
+ NO TEMPORARY GYM FACILITIES REQ'D

RELATIVE COSTS

TOTAL PROJECT COST = $334,335,971

ESTIMATED CITY'S SHARE = $126,417,978



BUILDABLE ACREAGE = 6.0

BUILDING (GSF) = 619,000

RENOVATION AREA (GSF) = 312,800

ADDITION/ NEW AREA (GSF) = 306,200

NEW 2 STORY FIELD HS, 5 STORY OTHERS + 2 STORY BRIDGES

PARKING (GARAGE) = 1200 CAR CAPACITY

PROS/CONS

SAME AS OPTION 2, EXCEPT;

+ NEW LORD BLDG ALLOWS THRU-ROAD
+ NO WINDOWLESS CLASSROOMS
+/- CAFETERIA SPLIT ON 2 FLOORS, CREATING SEPARATE FRESHMAN AREA
- MANY PUBLIC USE PROGRAMS FORCED ONTO UPPER FLOORS

CONSTRUCTION

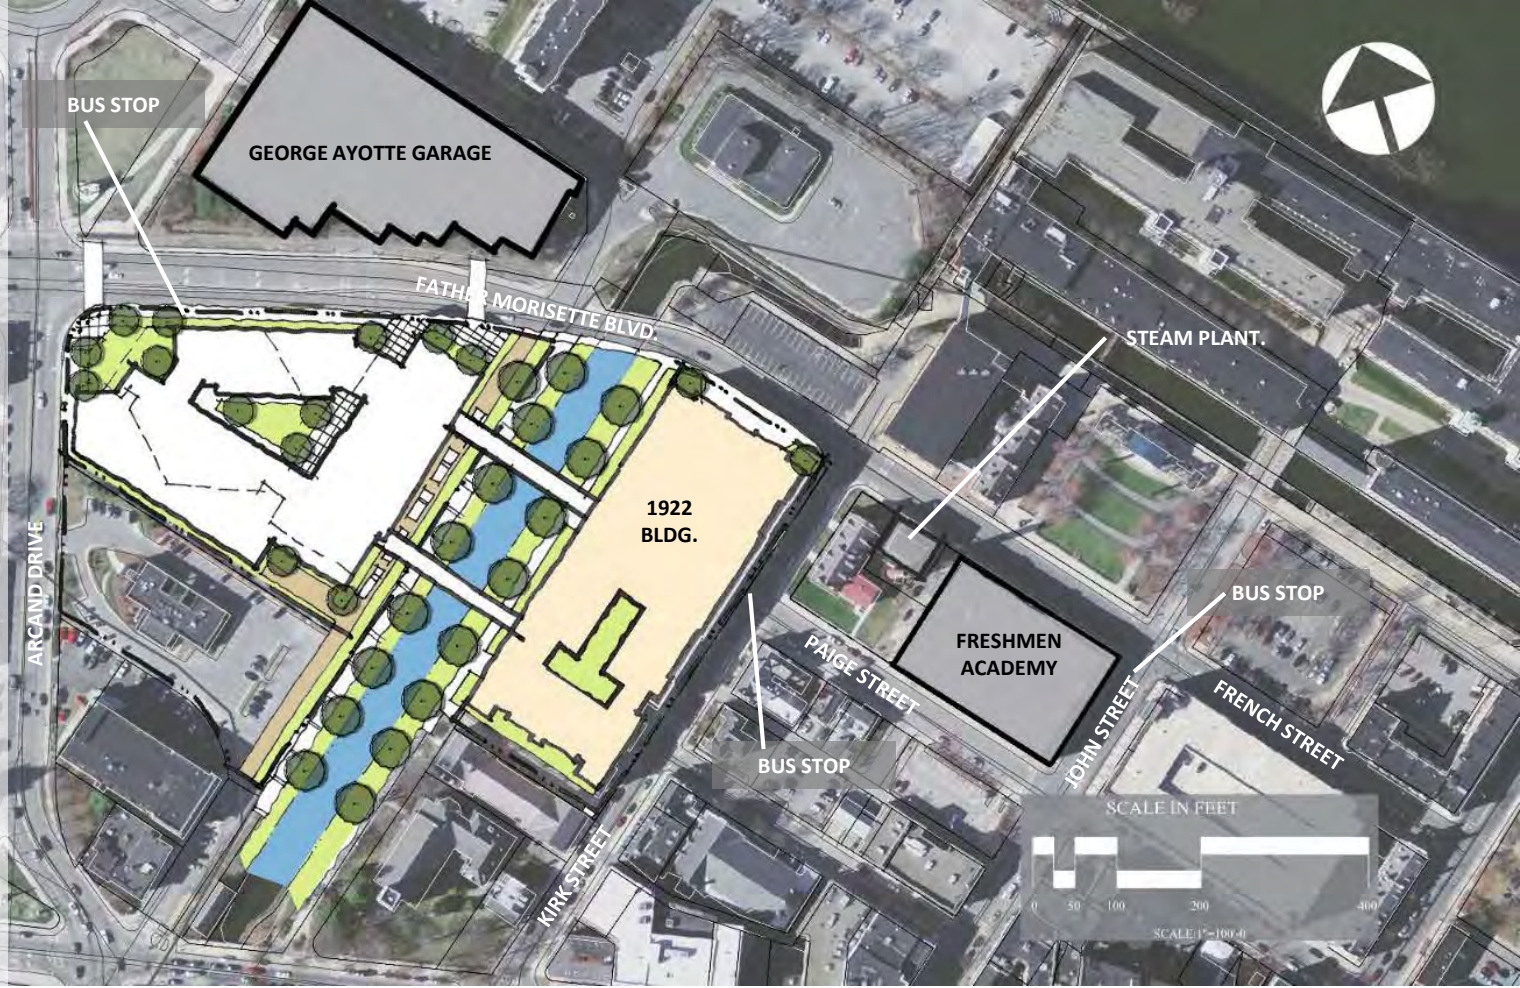
3 YEAR PHASED PROJECT

- EXTENSIVE MODULAR CR'S REQ'D
- TEMPORARY GYM FACILITIES REQUIRED
- TEMPORARY CAF./KITCHEN REQUIRED

RELATIVE COSTS

TOTAL PROJECT COST = $376,371,511

ESTIMATED CITY'S SHARE = $165,786,170



BUILDABLE ACREAGE = 7.4

BUILDING (GSF) = 620,900

RENOVATION AREA (GSF) = 312,800

ADDITION/ NEW AREA (GSF) = 308,100

NEW 2 STORY FIELD HS, 5 STORY OTHERS + 2 STORY BRIDGES

PARKING (GARAGE) = 1200 CAR CAPACITY

PROS/CONS

SAME AS OPTION 3, EXCEPT;

+ NEW LORD BLDG ALLOWS THRU-ROAD
+ NO WINDOWLESS CLASSROOMS
+/- CAFETERIA SPLIT ON 2 FLOORS, CREATING SEPARATE FRESHMAN AREA
- MANY PUBLIC USE PROGRAMS FORCED ONTO UPPER FLOORS

CONSTRUCTION

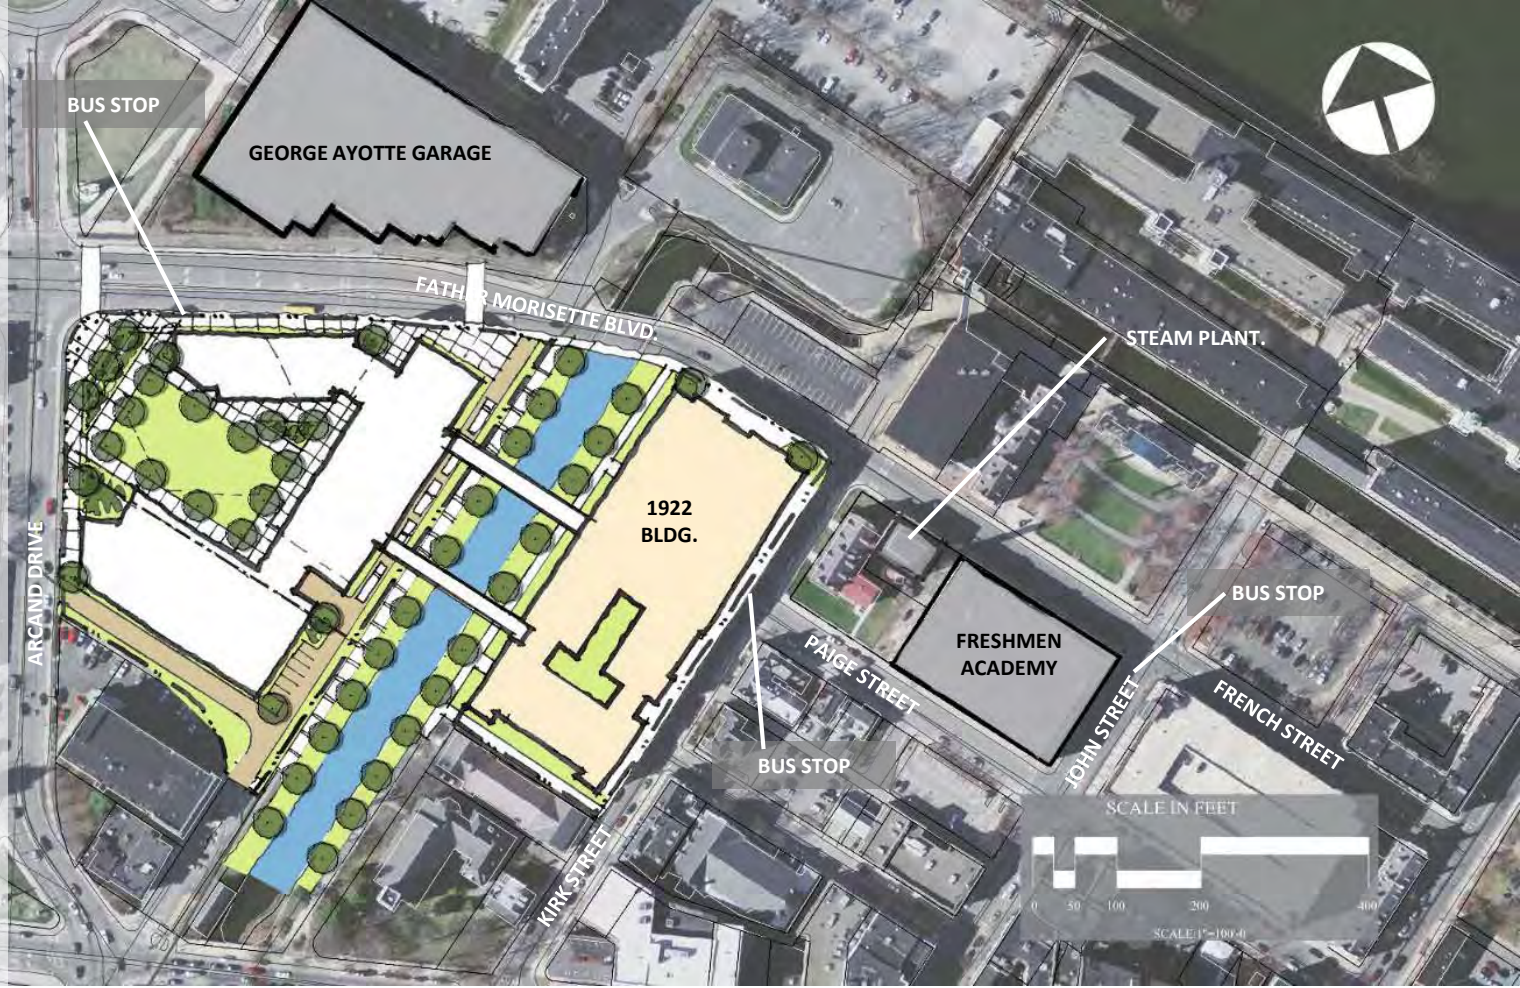
3½ YEAR PHASED PROJECT

- EXTENSIVE MODULAR CR'S REQ'D
+ NO TEMPORARY GYM FACILITIES REQ'D
- TEMPORARY CAF./KITCHEN REQUIRED

RELATIVE COSTS

TOTAL PROJECT COST = $386,376,693

ESTIMATED CITY'S SHARE = $173,976,178



BUILDABLE ACREAGE = 3.3

NEW BUILDING (GSF) = 594,000

NEW 6 STORY BLDG + 2 STORY BRIDGES
PARKING (GARAGE) = 1200 CAR CAPACITY

PROS/CONS

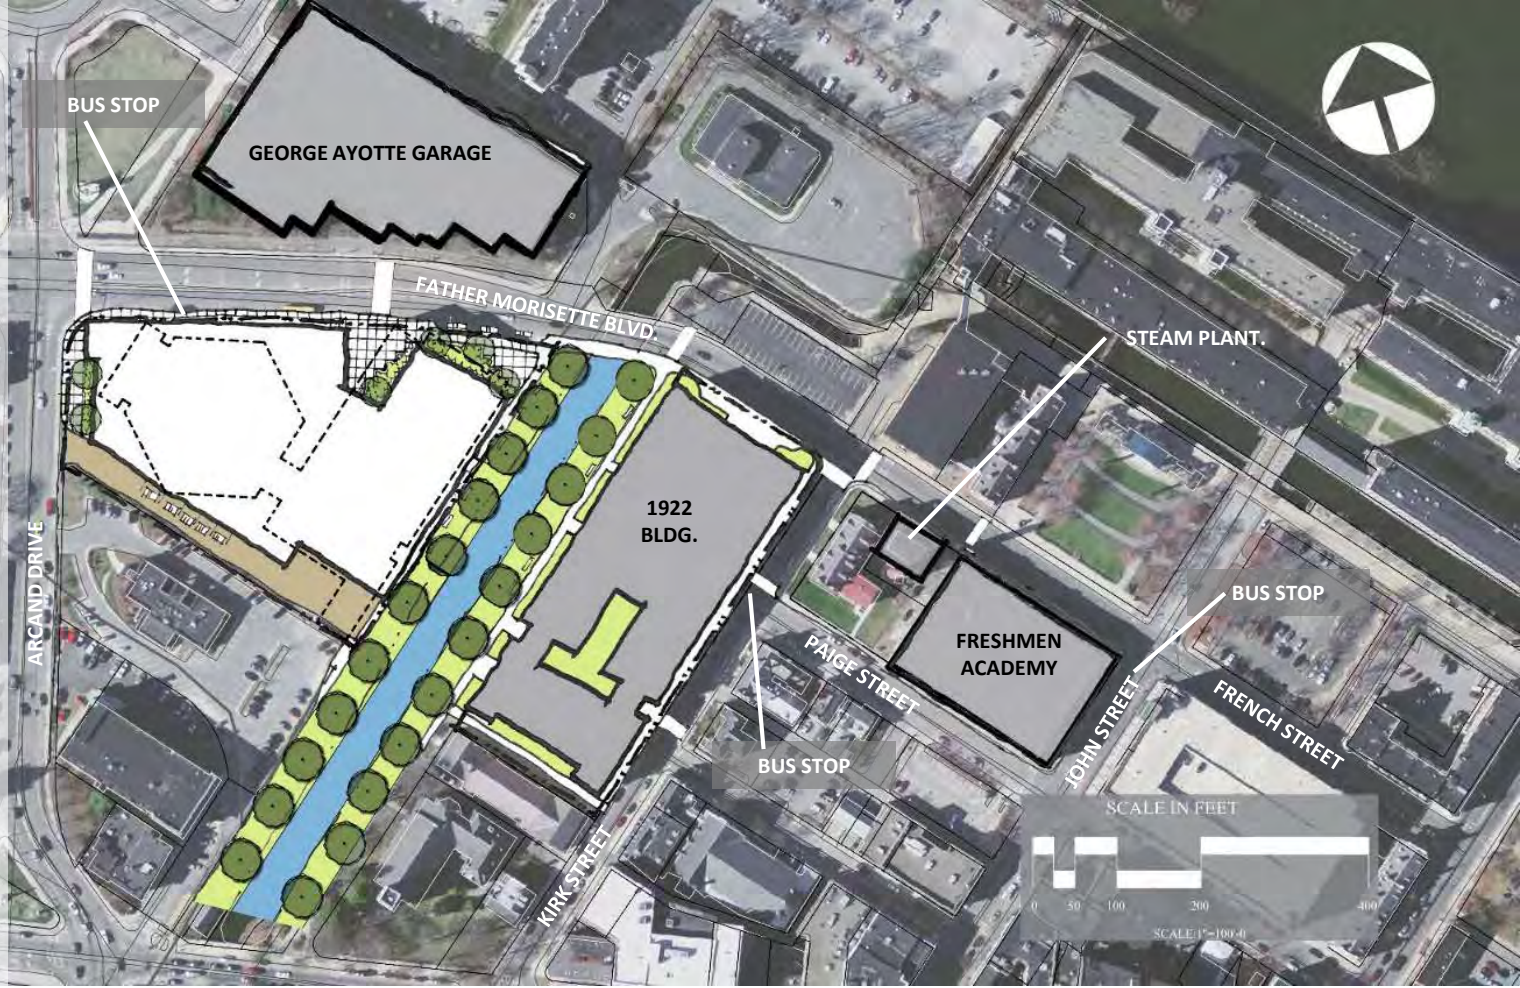
+ PROXIMITY TO TRANSPORTATION
+ PROXIMITY TO CITY/SOCIAL SERVICES
+ ADJACENT PKG GARAGE (COVERED)
+ BENEFITS OF ALL NEW CONSTRUCTION:
  - ✓ ZONED FOR COMMUNITY/ACTIVITY
  - ✓ MEETS ALL SPACE NEEDS
  - ✓ MEETS MOST ALL EDUC OBJECTIVES
  - ✓ IDEAL FRESHMAN ORG./CLUSTERS
  - ✓ FIELD HS (MORE EFFIC./FLEXIBLE)
  - ✓ MORE EFFICIENT USE/OPERATIONS
+ FORMER FA & 1922 BLDG'S AVAILABLE
- TRIGGERS HIGH RISE CONSTRUCTION
- PUBLIC PROGRAMS ON UPPER FLOORS
- NOT IDEAL NEW ORIENTATION
- WINDOWLESS SCIENCE LABS IN NEW
- LIMITED ACCESS TO GREEN SPACE

CONSTRUCTION

3 YEAR PHASED PROJECT
- EXTENSIVE MODULAR CR'S REQ'D
- TEMPORARY GYM FACILITIES REQ'D
- TEMPORARY CAF./KITCHEN REQUIRED

RELATIVE COSTS

TOTAL PROJECT COST = $350,611,505
ESTIMATED CITY'S SHARE = $156,843,060



Lowell High School

NEW SCHOOL - **EXISTING** SITE

Perkins Eastman SKANSKA

BUILDABLE ACREAGE = 4.7

NEW BUILDING (GSF) = 576,500

NEW 5 STORY BLDG + 2 STORY BRIDGES
PARKING (GARAGE) = 1200 CAR CAPACITY

PROS/CONS

SAME AS NEW ON EXIST, EXCEPT;

+ DOES NOT TRIGGER HIGH RISE CONSTR.
+ GOOD COMMUNITY/ACTIVITY ZONE
+ GOOD SOLAR ORIENTATION AT ALL CRS
+ NO WINDOWLESS CLASSROOMS
- NO THRU-ROAD

CONSTRUCTION

3½ YEAR PHASED PROJECT

- EXTENSIVE MODULAR CR'S REQ'D
- TEMPORARY GYM FACILITIES REQ'D
- TEMPORARY CAF./KITCHEN REQUIRED

RELATIVE COSTS

TOTAL PROJECT COST = $355,436,809

School Building Committee MSBA Meeting

Meeting Minutes

Date: February 7, 2016
Time: 10:00AM
Location: Mayor's Conference Room

1. - Attendance

Attendees: Kevin Murphy, Edward Kennedy, Rodney Elliott, Mike Vaughn, Steve Gendron, Salah Khelfaoui, Richard Underwood, Brian Martin, Gary Frisch, Conor Baldwin, David Beati, Lisa DeMeo, James Cook, William Samaras, Robert Healy, Rady Mom, Maryann Ballotta and Jay Mason.

Also in attendance: Mike McGovern and Rodney Conley.
From Skanska: Jim Dowd and Mary Ann Williams.
From Perkins Eastman: Robert Bell and Jim Drown.

2. - Educational Plan Status Update

City Manager K. Murphy began by discussing the instructions that were emailed to School Building Committee members that detailed what would be required of them during this meeting. The agenda and presentation were added to the City website as well for public viewers. K. Murphy continued that the design team will go through each option individually and the SBC can ask questions as the meeting proceeds. He asked that each Committee member vote for their top 4 options, in no particular order. He thanked the public for attending and mentioned that although this is not a public forum, there will be other opportunities for citizens for voice their concerns and comments. K. Murphy made note of officials in attendance including Mayor Kennedy, Councilors Samaras, Elliott, Leahy, and Rourke as well as School Committee Members Hoey and Doherty, and State Representative Mom.

3. - Preliminary Design Program Update

R. Bell mentioned that the SBC will need to narrow the selection down to 4 options. This does not include the base repair option, as this will automatically be included and advanced to the MSBA.

R. Bell gave the audience a background on the process before he continued on to the options. He stated that the most important decisions will be made in the first 16 months. The PDP is due by the end of February to stay on track for Phase 1. He continued that the after the SBC decides on

the top four options, the most viable option will be selected by May. From May to December, the scope and funding will be assessed.

3.1 Review of Estimates, Phasing Implications and Design Status

Base Repair

This option was created in effort to make a meaningful comparative analysis. The base repair would only include bringing the building up to code, not the educational plan that has been created. The base repair is not within the MSBA's program.

Full Renovation

This option does meet the educational program with regards to classroom size and lab sizes. The design team would also be able to cluster the classrooms by subject. R. Bell addressed the pros and cons for the option including its proximity to transportation and businesses. The project would last for 5 years, the longest duration for the proposed options. There would also be the requirement for modular classrooms off site on the surrounding streets. M. Williams noted that the modular classrooms are not reimbursable by the MSBA; but would fall on the City. The cost would not be part of a permanent investment as the modular classrooms are normally rented. R. Bell stated that this option is disruptive but it is the least expensive option. He continued that it does not meet all of the educational objectives, but meets the majority of them. M. Williams stated that the modular classrooms would need to be in close proximity to the school, perhaps on Father Morrissett Blvd. The modular classrooms for this option would be two classes wide. Rep. Mom asked if the modular classrooms would be required for the entire duration. M. Williams replied that it would and that all options are relative. R. Bell stated that the design team would look for ways to decrease cost and duration. The existing building currently surpasses the required square footage, which could mean less modular classrooms with better utilization of current space.

Add/ Reno Opt 1A "Air Rights"

This option includes adding the Freshman Academy. The bridges would add swing space that can help decrease the modular classrooms required. R. Bell noted the pros and cons for the option. The concept of building over the canal is still being studied. The bridges would be built on the second and third floors. This option does not meet all of the educational objectives as some classes and labs would still be windowless. S. Gendron inquired about program space in the bridges, and asked if the freshman would be included. R. Bell noted that the option would include a three story addition with a cafeteria and media center. W. Samaras inquired about the temporary classrooms. R. Bell noted that the change in courses for the gym would require less

Kevin J. Murphy
City Manager
Michael McGovern
Assistant City Manager

space. M. Williams noted that a combination of created space and temporary classrooms would be addressed. She continued it may be in the best interest of the project to rethink courses temporarily, such as physical education. K. Murphy noted that the Tsongas center is in close proximity and the City can discuss with UML if the students may use the space. R. Elliott inquired about the statement that this option will require less modular classrooms than the prior option. J. Dowd stated that instead of over 30 modular classrooms that the full renovation would require, option 1A would only require around 20. M. Williams noted that the full renovation is expected to have a cost of over $7 Million in modular classrooms while Option 1A is expected to cost only $5Million. R. Bell stated that the media center and library may be used as options for temporary classrooms. S. Gendron asked if the cost of modular will be included in the estimates; which R. Bell replied that the estimates do include the cost. J. Mason asked if the bridges will be double loaded. R. Bell stated that the bridges will be fully programmed as educational spaces during and after construction. W. Samaras asked if the team only investigated modular classrooms or if they included extended days. M. Williams noted that the extended days may impact union contracts and that the City would need to investigate the possibility. She continued that swing space is necessary when space is off line; the team uses the assumption that temporary classrooms will need to be provided. W. Samaras countered that extended hours may help save money and that the City has done it before. M. Williams stated that it may be a scheduling issue and that the reconfiguration of schedule can be studied. E. Kennedy asked what is done with modular classrooms when schools are done with them. M. Williams stated that depending on the need, it is a possibility to get used classrooms. Once the city is further along in the project and there are RFPs submitted, some companies may offer lower rates for refurbished modular classrooms. The challenge is competing with other school projects in the state. M. Williams noted it is better to assume that the project will require new classrooms, inventory will not be known until an RFP is out. E. Kennedy inquired the number of school projects that are currently ongoing in Massachusetts communities. M. Williams noted that the number of school projects has increased form around 13 per year to close to double. She reiterated it is beneficial to assume the worst case scenario regarding rental cost.

Add Reno Opt 2 Existing Site (Demo FH)

The freshmen are moved to the new building in this option. The fieldhouse will be demolished and a 2 story fieldhouse will be erected in its place. The building will make an efficient use of the current footprint. R. Bell noted the pros and cons for the option. The temporary space would only be required for physical education; the construction of the Freshman Academy would create four stories for educational purposes. The new building for the Freshman Academy will be efficient in that it would not require any compromises. The pathways and classrooms will be constructed in direction of North and South to control consistent natural light. M. Williams noted

that the cost is $4Million more than Option 1A and $12Million more than the full renovation. R. Bell stated that this option would take 4 years to complete construction. R. Underwood asked about the calculation of gross square footage, pointing out a typo. The gross square footage of the new area should be 170,000. R. Bell confirmed that the total amount were correct. S. Gendron asked if there were windowless classrooms in this option. R. Bell replied that there are windowless classrooms in the center of the Lord building in the design plan. S. Khelfaoui asked if the modular class rooms were based on the number of students. R. Bell noted that it is based on the number of students, approximately a quarter of the student population that would be displaced at any time during the project. M. Williams stated that the number of students displaced would be split between any additional existing space and modular classrooms. This is approximately 28 modular classrooms with the utilization rate of 80% at maximum efficiency. The rationale is to have any available space in the building used to accommodate students. R. Elliott asked if there was an approximate amount of space available. M. Williams responded that this would be a scheduling exercise and that the project team will work to use the building efficiently. R. Elliott inquired about the square footage that is underutilized currently. M. Williams mentioned that the space summary would include the efficient use and inefficient use of certain spaces. R. Bell said that it is more the case of elbow room rather than space that is not used currently. Rep. Mom asked about the temporary facility at the gymnasium. R. Bell mentioned that the large structure will allow open space to reprogram the current learning environment. He continued that it is possible to use other facilities as well. B. Martin discussed the issues with physical education would not include students who were enrolled in ROTC (400 students), Dance and Band. The number of students impacted by the displacement of physical education will be limited and not as significant. He stated that they are not looking for space for 35,000 students, but rather space for winter sports such as basketball.

Add/ Reno Opt 3 Existing Expanded Site (Demo FH)

This option entails an expanded site. There is an additional parcel in this option that would house the new field house. The parcel enables the construction to take place without disrupting most of the programs. The reconfiguration of the T in the 1922 building will increase natural light and expand greenspace. R. Bell discussed the pros and cons for the option. The duration of construction would be 4 ½ years due to the demolition. M. Williams noted that this option is unusual as the City does not own the property of the expanded site and there is an undetermined cost associated with it. J. Cook asked why the option is $10Million less than the prior option if it includes the land taking and no windowless classrooms. M. Williams stated that part of the reason is that there could be a land taking or purchase of the property for an undetermined amount. J. Mason inquired if the narrow bridge may help decrease cost. R. Bell noted that the options all include adding a 2 story bridge except for the full renovation. M. Williams noted that

Office of the City Manager

Kevin J. Murphy
City Manager
Michael McGovern
Assistant City Manager

the bridge is not the same in the options J. Mason was comparing. In this option, there would not be classrooms housed on the bridge as was in Option 1A. R. Underwood inquired about Option 3 not including taking the land. R. Bell noted that the land was not included in the cost estimate. W. Samaras inquired about the renovation of the Lord building; he asked what if the building is demolished rather than renovated. He continued, stating that it may be beneficial to look into replacing the old building around the corner. S. Gendron inquired if the light wells in the prior options could be incorporated into other options. R. Bell noted that over 6,000 square feet would need to be taken from available space to incorporate the light wells. E. Kennedy if the $2 Million that was put aside for extra land included demolition costs. R. Bell noted that the $2Million was only for extra land, the demolition costs are included in each option. R. Elliott asked if the cost of land acquisition and financing was reimbursable. R. Bell replied that the MSBA does not reimburse the cost of acquiring land. K. Murphy stated that the CMR report would be posted to the School Building Project website and distributed to the SBC members.

Add/Reno Option 4 Existing Site (Demo FH & Lord)

This option would include the construction of a new facility on the west side of the canal. B. Bell discussed pros and cons for this option. The Lord building would be narrower than the current building allowing for a single road corridor to be constructed along the canal. The building would be five stories, under the high rise classification. This option requires more temporary modular classrooms. The process would be disruptive throughout the 3 year duration. Constructing a new building allows the design of a comparable sized greenspace. L. DeMeo asked if the $2M set aside for the land acquisition included the funds for the rights to build the road. S. Gendron asked if the road acquisition would include a road. K. Murphy stated that there is currently a public way right now from the Masonic Center to the Cobblestones restaurant. L. DeMeo asked if the acquisition of rights for an easement on the property next to the high school. M. Williams noted that this is an issue that the City would need to vet whether the street is public or private. J. Mason inquired about the 2-level cafeteria. B. Bell discussed the idea of splitting the upper and lower cafeteria between the freshman and upperclassmen. S. Gendron asked if the new construction could house students while the Lord building is under construction. B. Bell noted that the only way to create enough swing space would be to use modular classrooms or to build the field house first and then use it to house students. There may be inefficiencies in phasing if housing students in other locations that may increase the cost elsewhere. M. Williams noted that this is the second most expensive option.

Add/ Reno Option 5 Existing Expanded Site (Demo FH & Lord)

This option is the most expensive with extensive modular classrooms required. The new Lord building would be 5 stories and some of the classrooms would be windowless.

New School Existing Site

This option would include a new construction of the Lord building totaling six stories. The plan would have windowless classrooms. The new vertical layout would fit the school's and the community's needs. Classrooms would be clustered in an efficient use of space. There would be an extensive use of temporary classrooms necessary since the entire Lord building would be off line at one time.

New School Expanded Site

This option includes a new 5 story construction on the west side of the canal. The duration of the project under this option would take 3 ½ years. Since the Lord building will be demolished and the new building constructed on the same site, there will be a need for many modular classrooms. J. Mason asked about the daylight in the new building since there would be no sky lights. The positioning of the building facing North and South would allow natural light into many parts of the building. R. Mom inquired as to what the 1922 Building would be used for if the high school is on the west side of the canal. M. Williams stated that what happens to the building and land would be determined by the city. M. Williams also mentioned that this option requires the most modular classrooms, $18 million.

New Site Wang

This option includes a four story building constructed on the Wang site. B. Bell noted that early studies considered adding a garage by the greenspace on the lot. This option is a compromise, as there are approximately 300 parking spots in the feasibility study rather than the projected 500 spaces. B. Bell highlighted the pros and cons for this location. One of the most important aspects for this site is that there would not be any phasing required and no disruption to the current curriculum. M. Williams noted that all though two little league and one soccer field would need to be relocated, this cost is not included in the budget. E. Kennedy inquired about the infrastructure for this option such as the sidewalks and if they were included in the budget. B. Bell replied that although the sidewalks and other infrastructural suggestions and recommendations may be made for offsite, this would not be part of the project scope. S. Gendron asked if the 300 parking spaces would be inefficient and if the state would need to approve this exception. M. Williams replied that it would need to be approved by the MSBA, and that it may impact parking in the surrounding area. S. Gendron continued discussing the parking situation such as number of teachers, students who drive and how the design team arrived at the estimates. R. Underwood inquired about any wetlands on the property. D. Beati noted that in the down town garage, there are not a thousand spots allocate for high school parking. B. Martin stated that his staff has been working on a survey to help get a better

understanding of how many students commute to work and their method of travel. He continued that currently there are 8 to 10% of students that drive to school. W. Samaras highlighted the issue of transportation to school, asking if there has been communication between the LRTA, the city and the school department. R. Elliott stated that the increased traffic and new infrastructure would impact the neighborhood. He asked if it was possible to acquire additional land such as the field site or next to the Wang site; which B. Bell noted the cost of that is not included in the budget.

Cawley

This option is similar to the Wang site in that both buildings will have adequate natural light throughout the classrooms. B. Bell stated that with the design, the city would only need to get a permit from Tewksbury for parking as the building is within the city limits. The building is currently designed as a 4 story construction. The option would require replacing some of the fields at a different location, but the stadium would remain intact. E. Kennedy noted that the building design is tight, and inquired about the environmental impact study would consider the water level. B. Bell stated that the environmental impact of all sites will be determined once the SBC votes on their top locations. S. Gendron asked if the timeline is assuming everything goes according to plan and if additional time was built into the schedule. B. Bell noted that phase one would last a couple of months. S. Gendron continued that if the mediation for the environmental study comes back negative would it impact the schedule? M. Williams noted that until the study is performed, it is impossible to know what kind of impacts it may have. She continued that it would be costly to perform the environmental study at all of the sites now. B. Bell discussed the infrastructure such as the parking and sidewalks. He stated that if these are taken into consideration for this new site, it would need to be applied to all of the other sites as well to be included in the scope of the project. When comparing locations it is easier to compare the same aspects and their respective costs, comparing apples to apples. D. Beati asked about the use of the fields that would need to be replaced. B. Martin noted that they would be the soccer, football and lacrosse fields. W. Samaras inquired about the original bus plan included looping traffic on Douglas and Clark Road, and whether it was considered looking traffic over on Rt. 38 up Village Street. M. Williams replied that it can be looked into, but the plan is highly conceptual at the moment. K. Murphy stated that the team will look into utilizing Rt. 38 to ease traffic congestion. W. Samaras inquired about bussing, noting that either the City or students would need to cover the costs. K. Murphy replied that this is an important issue that is currently being looked into and that the city will look into the ability of the LRTA to transport students. J. Mason asked if any money is set aside for the land in Tewksbury, which B. Bell addressed that the city currently owns the land in Tewksbury. The city would only need to obtain parking permits from the town. J. Cook inquired about the designation of Cawley as park land. K. Murphy noted that this would

not hold up the project, that the issue is resolved. R. Underwood asked if the team has begun conversations with Tewksbury. K. Murphy stated that as of yet the team has not. It would be easier to obtain a parking permit rather than a building permit. R. Healy noted that the zoning has been taken into consideration and that it can be permitted for parking.

B. Martin discussed his reasons for voting for certain options prior to the official vote. He stated it is important to keep the low-income population in mind while making any decisions, as he believes fairness is imperative. He continued that the SBC needs to make difficult choices. He expressed his thoughts on why he believes the high school should stay downtown as a central part of the city. The decision impacts students, families as well as parents.

S. Gendron noted that he agrees with B. Martin. He stated that it is important to consider the educational options for the students. Lowell High School is not a small school, it is substantial in size and would significantly impact neighborhoods. He expressed his belief that moving the school to a different neighborhood would impact each neighborhood in terms of sports, evening events and summer festivities.

S. Khelfaoui stated that the city currently has a lack of space for middle school students. He expressed his wish that the freshman be incorporated into the new high school and recover the Freshman Academy to accommodate middle school students.

W. Samaras noted that there are many conflictions, and as a former Headmaster, he understands the issues that B. Martin raised. He stressed his interest in the cost of bussing students to alternative locations. He continued that the city needs a new high school, and the SBC has one chance to do it right.

R. Elliott commented on the long process that will continue to narrow down the locations. He also stated that there are still unanswered variables, even if the MSBA needs the SBC to narrow the choices down.

D. Beati noted that this is a chance to have a world class campus, downtown or in the suburban neighborhoods. He also stated that the downtown is a viable neighborhood.

J. Mason commented on the disruption issue, as well as what a great long term opportunity this is for the city. He requested that the option be a sustainable model of the school, and that it be taken seriously. He noted that it is important to understand the costs, and how it can impact individual taxes. He stated that $80 more per person is not too much more to ask.

3.3 Authorization for OPM to Submit PDP to MSBA no later than Feb 24.

The SBC agreed to hold this item.

4. Community Outreach

4.1 2/8 Belvidere Neighborhood Association Meeting Review

The Belvidere Neighborhood Association will meet on February 8, 2017 at the Sullivan School at 6:30PM. The consultants from Skanska and Perkins Eastman will be present. This meeting will be a public forum as will additional community meetings as requested.

5. Website Development Update

The website is in the process of being developed. Currently there is a link on the city's home page to a page created for the Lowell High School project. This webpage has all the links and necessary documents such as meeting minutes, documents and the CMR report. The new site will be launched in April.

6. Next Steps

The next meeting will take place Thursday March 2, 2017 at 10:00 AM in the Mayors Reception Room at City Hall.

R. Healy motioned to adjourn the meeting, seconded by R. Elliott.

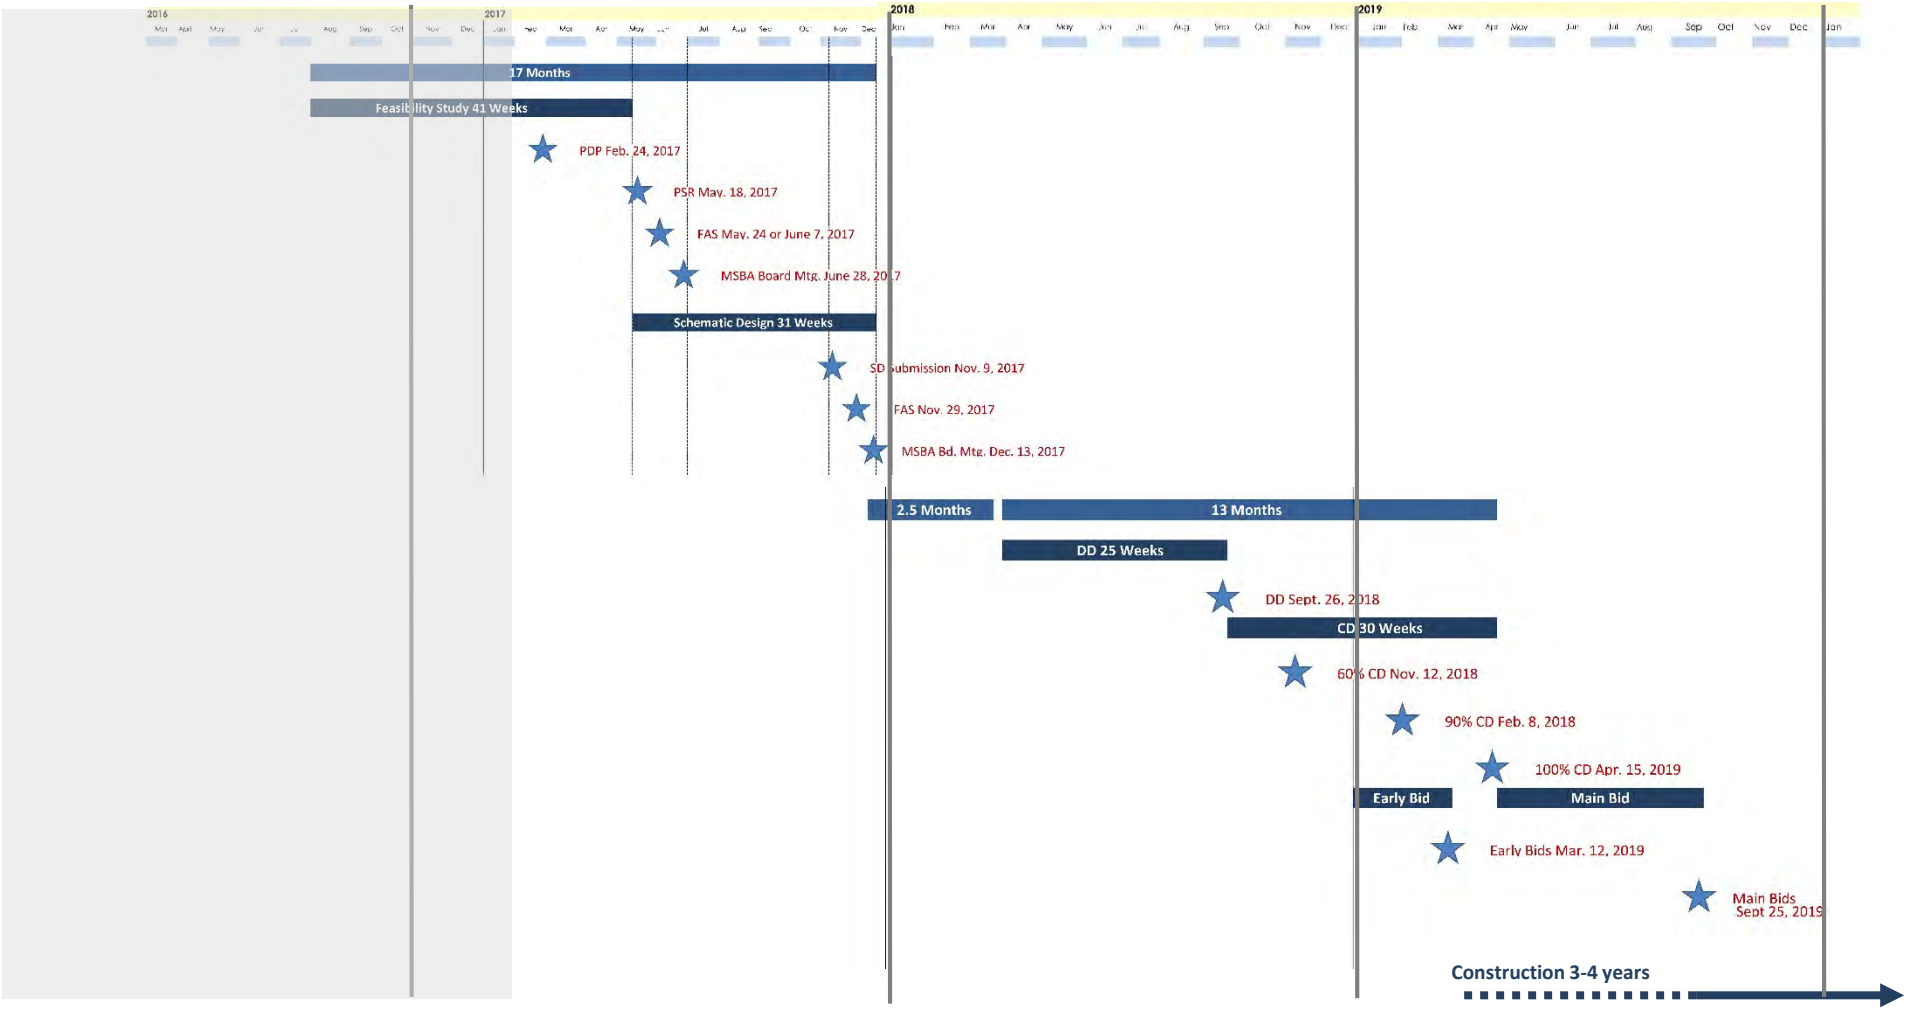
Project Timeline & Decisions

Overall Design Process (takes approximately 3 yrs, + bid/construction)



LOWELL

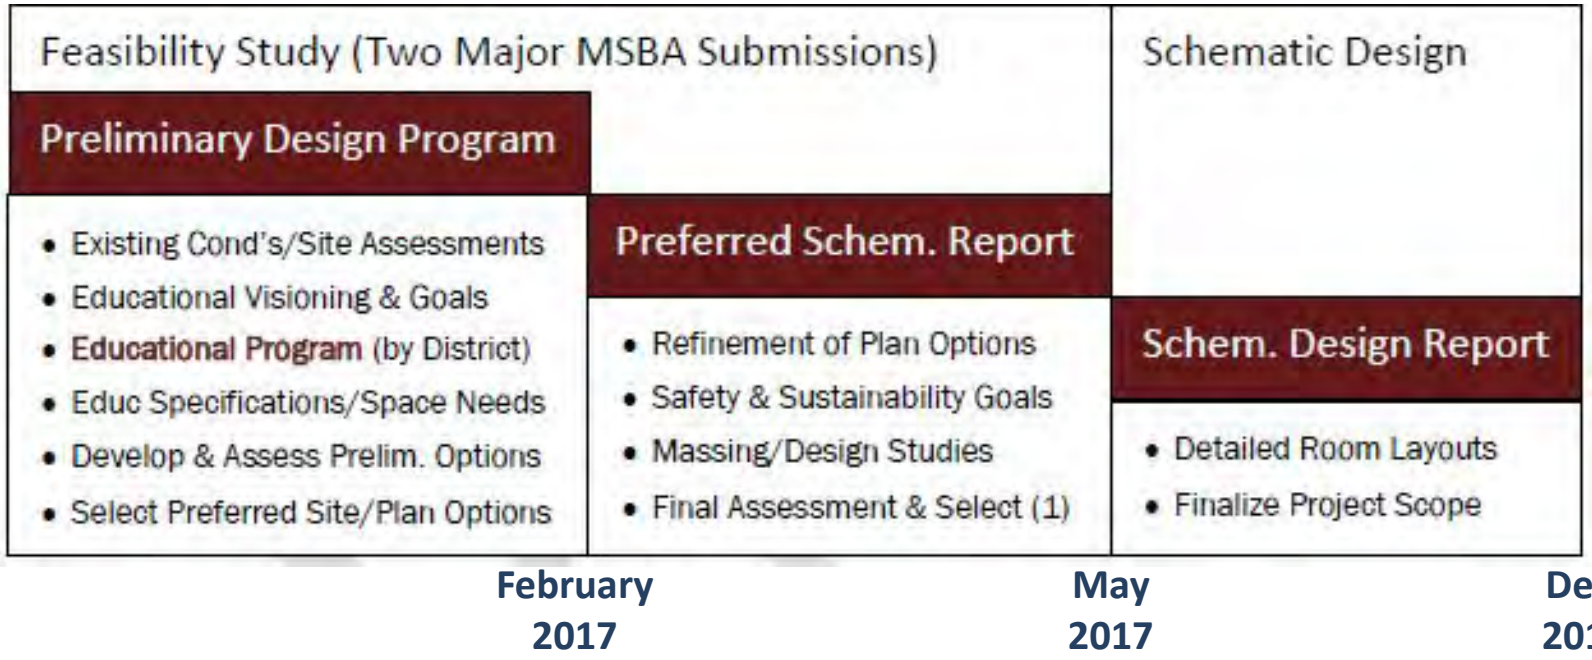
LOWELL HIGH SCHOOL PROJECT

SKANSKA

Perkins Eastman | DPC

Project Timeline & Decisions

The MSBA's study is defined in three major efforts that will occur over 17 months



Educational Vision and Goals

Priorities and Guiding Principals

- Joyful Environment
- Safe and Comfortable
- Flexible & Adaptable
- Meets Needs of Whole Child
- 21st Century Learning Spaces
- Fosters Collaboration and Community
- Real-World, Project Based, Integrated Instruction
- Robust, Integrated and Evolving Technology
- Community Access and Integration
- Historical Context

Educational Vision and Goals

Planning and Design Objectives (not prioritized)

- **Secure and Welcoming**
- **Community Use Zone** (incl. restaurant, bank, store & admin)
- **Social Hub/Heart** (cafeteria and media center)
- **Freshman Academy Wing** (with team clusters)
- **STEM / Humanities Clusters**
- **Flexible Everything**
- **Breakout and Meeting Space**
- **Dispersed Teacher Planning**
- **Display and Exhibition**
- **Outdoor Space**
- **Connect to City/History and Community**

Educational Program vs Programming

Educational Program (often called 'Educational Plan')

Outlines Current Practices/Policies

Defines Changes and Objectives for the Future

…informed by the District's Vision

Culminates in a Narrative Document by the District

Programming

Analysis (assess existing master schedule & all pupil periods)

Adjustments (prorates enrollment, participation & class sizes)

Requirements (tabulates types, counts & utilization of spaces)

…informed by the Educ-Program and Faculty Input

Culminates in a Space Summary by the Architect

Educational Program

Grade and School Configuration

Class Size Policies

School Scheduling Method

Teaching Methodology and Structure

- English Language Arts
- Mathematics
- Science
- Social Studies
- World Language/ELL
- Academic Support
- Student Guidance

Teacher Planning

Lunch (and Breakfast) Program

Technology Instruction (incl. Library/Media Center)

Visual Arts (incl. 2D/3D, Graphics, Photog/Anim. & TV Prod.)

Educational Program

Performing Arts (incl. Band, Piano/Guitar, Chorus & Dance)

Physical Education (incl. Swimming Pool)

Special Education

Vocations and Tech Programs

- Air Force ROTC
- Business Finance
- Communications (TV Studio)
- Culinary
- Engineering
- Environmental Sustainability

Chapter 74 Programs

- Business Marketing

Transportation Policies

Functional and Spatial Relationships

Security and Visual Access Requirements

Educational Program

Other Programs

- In-House Suspension
- Student Activities
- Score Mediation
- MCC/UMASS Programs (Trio)
- Catie's Closet
- Health Center
- Counseling Services
- Safe Harbors

Space Summary

	Existing 3125 students/25 class size avg @ .71% utilization = **177** rooms	Proposed 3520/24/.85% = **172** rooms	MSBA 3520/23/.85% = **181** rooms
Classrooms	**122** (avg. 830sf)	**112** (avg. 900sf)	**120** (850sf)

Other	**19,764sf** (incl. comp labs)	**7,700sf** (computer carts)	**0sf**

Common Questions

Who Approves the Program & What is the Schedule?

The MSBA requires certified approval of the PDP by the School Building Committee, although most District's seek approval of the Educational Program by the School Committee.

Are We Locked Into the Program/Space Summary?

The PDP submission is Preliminary in nature, but expected to represent the needs of the school that the District will support. The program may adjust during the next phase, but changes must be explained. The program and project scope becomes 'locked' at the end of Schematic Design.

Does the Program Differ between Plan Options?

All plan options are based on the same preliminary program and although not finalized, allows relative comparisons for the sake of early decisions.

Lowell Public School Committee
Regular Meeting Minutes

Date: January 18, 2017
Time: 6:30PM
Location: City Council Chamber, 375 Merrimack Street, 2nd Floor, Lowell, MA 01852

1. SALUTE TO FLAG

2. ROLL CALL:

On a roll call at 6:34 p.m., members present were, namely: Mr. Hoey, Mayor Kennedy, Ms. Martin, Mr. Descoteaux, Ms. Doherty and Mr. Gignac. Mr. Gendron was absent.

Madeline Leahy, LHS Student Representative was also present.

3. SPECIAL ORDER OF BUSINESS

3.I. Spotlight On Excellence: STEM Academy @ Rogers

1 - 18 - 17 SPOTLIGHT ON EXCELLENCE - STEM ACADEMY.PDF

The Spotlight on Excellence featured the STEM Academy @ the Rogers School. Jason McCrevan and his team of students and staff presented the latest STEM initiatives to the Committee. The following initiatives were shared:

The iCoding Program
Turtle Rehabilitation Program
Spheros
Gardening
Flying a Drone

4. MINUTES

4.I. Approval Of The Minutes Of The Regularly Scheduled School Committee

Meeting Of Wednesday, January 4, 2017

Ms. Martin made a motion to accept the January 4, 2017 Lowell School Committee minutes and to place them on file; seconded by Mr. Hoey. 6 yeas, 1 absent APPROVED

5. PERMISSION TO ENTER

5.I. Permission To Enter: January 18, 2017

Ms. Doherty made a motion to approve the Permission to Enter; seconded by Mr. Descoteaux. 6 yeas, 1 absent APPROVED

6. MEMORIALS

6.I. Memorial - Peter F. Gill

Peter F. Gill, father of Mary Geoffroy, Lowell High School Clerk, and

grandfather of LHS Freshman Academy Social Worker Gina Martel.

6.II. Memorial- Jeffrey Lembo

Jeffrey Lembo, son of Kevin Parrington, Sr., retired Lowell Public School custodian, brother of Colleen Parrington, Sullivan School teacher.

7. MOTIONS

7.I. [By Connie Martin]:

Requesting that the Administration, including all members who are cited as School Committee Representatives, provide the Lowell School Committee with a complete report on the history and current status of the charge filed by the LSAA regarding parking for Central Administration LSAA union members. This report should include:

- the legal language differentiating a "charge" vs a "grievance" and notification protocols required by each,
- a timeline of past meetings with Union leadership and
- all associated documents and minutes from those meetings

Ms. Martin made a motion to approve; seconded by Mr. Hoey. 6 yeas, 1 absent APPROVED

7.II. [By Robert Hoey]:

Request the Superintendent refer the Homework Policy to the Policy Subcommittee to review and revise if necessary.

Mr. Hoey made a motion to approve; seconded by Mr. Martin. 6 yeas, 1 absent APPROVED

7.III. [By Robert Gignac]:

Request the Superintendent provide a report on all extracurricular activities at each school throughout the district.

A request was made to also have stipends that are given for extracurricular activities included in the report.

Mr. Gignac made a motion to approve; seconded Ms. Doherty. 6 yeas, 1 absent APPROVED

7.IV. [By Jacqueline Doherty]:

Request the Superintendent provide the committee with a report on the time allocated for students to have recess, lunch, physical education, and health at each of our elementary and middle schools. Please include in the report any government mandates or recommendations regarding time allotted for these activities as well as if students are allowed to talk during lunch.

Ms. Doherty made a motion to approve; seconded by Mr. Descoteaux. 6 yeas, 1 absent APPROVED

7.V. [By Jacqueline Doherty]:

In view of the upcoming implementation of the Every Student Succeeds Act (ESSA) this fall, request the Superintendent develop local measures of assessment focused on the whole child such as school culture, social and emotional learning, and the arts.

Ms. Doherty made a motion to approve; seconded by Ms. Martin. 6 yeas, 1 absent APPROVED

8 REPORTS OF THE SUPERINTENDENT

8.I. Participation Opportunities In Food & Nutrition Program

The Participation Opportunities in Food & Nutrition Program report shared with the Committee informed the Committee that many children who receive breakfast and lunch during the school year are not receiving the same benefit over the summer break. The food service program is looking to increase participation in the breakfast and lunch program by purchasing a new specialized vehicle. A new truck

would allow the Lowell Public Schools to deliver more prepared food to students in the city. A fifteen inch (15') foot truck would need to be purchased and outfitted with heating and cooling elements, shelving and lettering. The preliminary cost of a new vehicle is $125,000.

Ms. Doherty made a motion to support exploring purchasing a new vehicle to feed children off site during the summer; seconded by Mr. Descoteaux. 6 yeas, 1 absent APPROVED

Mr. Gignac made a motion to accept the following Reports of the Superintendent as reports of progress: 8.I., 8.II. and 8.VI.; seconded by Mr. Hoey. 6 yeas, 1 absent APPROVED

8.II. Science And Engineering Fair Update

The Science and Engineering Fair Update informed the Committee that the Gelfand Family Trust Foundation Grant was awarded to the Lowell Public Schools during the 2013-2014 school year. This four year grant was specifically focused on implementing a sustainable Science and Engineering Fair in a district that did not have a pre-existing program. The Lowell Public Schools also has established IDEA Camp as a summer program. The camp provides a venue for teachers to participate in high quality learning opportunities to strengthen their confidence in project based learning. In addition, a STEM club has been established at all middle schools, which continues to be facilitated by at least one STEM advisor.

Mr. Gignac made a motion to accept the following Reports of the Superintendent as reports of progress: 8.I., 8.II. and 8.VI.; seconded by Mr. Hoey. 6 yeas, 1 absent APPROVED

8.III. Sick Time Report

Ms. Doherty made a motion to refer the Sick Time Report to a Policy Subcommittee for further discussion; seconded by Mr. Hoey. 6 yeas, 1 absent APPROVED

8.IV. December Financial Report

Mr. Gignac made a motion to refer the December Financial Report to a Finance Subcommittee for further discussion; seconded by Mr. Hoey. 6 yeas, 1 absent APPROVED

8.V. Lowell High School Education Program And Space Use Plan

Mr. Gignac made a motion to refer the Lowell High School Education Program and Space Use Plan to a Joint Facilities and Lowell High School Subcommittee for further discussion; seconded by Mr. Hoey. 6 yeas, 1 absent APPROVED

8.VI. Facilities Maintenance Report

The Facilities Maintenance Report gave the Committee an update on the status of the following:

HVAC – The department is working closely with the Department of Public Works (DPW) on HVAC repairs.
Exhaust Venting – Custodial staff has inspected all exhaust venting in bathrooms and classrooms and requests have been entered in the work order system.
Roof Leaks – The department is evaluating roofs and creating replacement plans.
Grounds – The Department is beginning solicitation for the replacement of sprinkler systems in the schools for next year's budget.
Walkways/Stairs/Railings – The department is reviewing pending work orders related to paving, resurfacing or replacement of handicap railings.
Windows – The Lowell Police Department continues to be diligent on patrols in school premises to prevent any vandalism and broken windows.

Mr. Gignac made a motion to accept the following Reports of the Superintendent as reports of progress: 8.I., 8.II. and 8.VI.; seconded by Mr. Hoey. 6 yeas, 1 absent APPROVED

8.VII. Home Education

Superintendent Khelfaoui recommended that the following parents/guardians be allowed to home educate their child:

Nicole & David Nickerson
91 Lupine Road

Ms. Doherty made a motion to approve; seconded Mr. Descoteaux. 6 yeas, 1 absent APPROVED

9 CONVENTION/CONFERENCE REQUESTS

9.I. LHS Drill Team Competition Field Trip- Dayton, Ohio

Headmaster Brian Martin, request permission for AFJROTC staff members Lt col Eileen Ironfield, MSgt Kevin Casilli and TSgt David Smith to travel to Dayton, Ohio with approximately 45 students for the Air Force Drill Competition. The team will depart Lowell High School on Friday, March 17, 2017 and will return on Monday, March 20, 2017. The students will miss two days of school. The estimated cost of the competition will not exceed a total of $23,000 including transportation, lodging and food. The only cost will be for two substitute teachers for two days at the cost of $400 to be charged against LHS Professional Development. This trip will be funded using a combination of AFJROTC funds, student fundraising, and student contribution.

Ms. Doherty made a motion to take and approve both field trip requests together for approval; seconded by Mr. Hoey. 6 yeas, 1 absent APPROVED

9.II. LHS Trip To Colts Neck, New Jersey For The Air Force Drill Competition Headmaster Brian Martin, request permission for AFJROTC staff members Lt col Eileen Ironfield, MSgt Kevin Casilli and TSgt David Smith to travel to Colts Neck, New Jersey with approximately 45 students for the Air Force Drill Competition. The team will depart Lowell High School on Friday, February 17, 2017 and will return on Sunday, February 19, 2017. The students will miss two days of school.

The estimated cost of the competition will not exceed a total of $10,000 including transportation, lodging and food. The only cost will be for two substitute teachers for one day at the cost of $200 to be charged against LHS Professional Development. This trip will be funded using a combination of AFJROTC funds, student fundraising, and student contribution.

Ms. Doherty made a motion to take and approve both field trip requests together for approval; seconded by Mr. Hoey. 6 yeas, 1 absent APPROVED

Ms. Martin made a motion to accept the January 18, 2017 Lowell School Committee minutes and to place them on file; seconded by Mr. Hoey. 6 yeas, 1 absent APPROVED

4. PERMISSION TO ENTER

4.I. Permission To Enter: February 1, 2017

Mr. Hoey made a motion to approve the Permission to Enter; seconded by Ms. Martin. 6 yeas, 1 absent APPROVED

5. MEMORIALS

5.I. Memorial- McOsker

Mary E. (Murray) McOsker, step mother of Fred McOsker, Assistant Principal at the Morey School.

6. MOTIONS

6.I. [By Mayor Edward Kennedy]:

Request that the Superintendent and Administration at Lowell High School provide information regarding how many students walk to Lowell High School and how many students participate in athletic events.

Mayor Kennedy made a motion to approve; seconded by Ms. Martin. 6 yeas, 1 absent APPROVED

6.II. [By Mayor Edward Kennedy]:

Request that the Superintendent and Administration at Lowell High School provide an update on the proposal to institute a STEM curriculum or STEM Academy at Lowell High School.

Mayor Kennedy made a motion to approve; seconded by Mr. Hoey. 6 yeas, 1 absent APPROVED

6.III. [By Mayor Edward Kennedy]:

Request to either postpone or cancel the School Committee meeting scheduled for April 19th, which falls during April school vacation.

Mayor Kennedy made a motion to cancel the regularly scheduled Lowell School Committee meeting on April 19, 2017; seconded by Mr. Gignac. 6 yeas, 1 absent APPROVED

6.IV. [By Mayor Edward Kennedy]:

Request the Superintendent provide a report and update on the school department's efforts towards recruitment designed to bring diversity to the Lowell High School faculty.

Mayor Kennedy made a motion to approve; seconded by Mr. Hoey. 6 yeas, 1 absent APPROVED

A request was made to also include efforts districtwide in the report.

6.V. [By Mayor Edward Kennedy]:

Request that the Superintendent direct the Lowell High School Administration to take advantage of the free tutoring services offered at the Dharma Center on Merrimack

Street.

Mayor Kennedy made a motion to approve; seconded by Ms. Doherty. 6 yeas, 1 absent APPROVED

6.VI. [By Robert Gignac]:

Request the Superintendent develop and distribute an Organizational Health Survey to all staff and parents throughout the district.

Mr. Gignac made a motion to approve; seconded by Ms. Martin. 6 yeas, 1 absent APPROVED

Tim Blake was registered to speak on this motion and shared a sample of a School Site Council Survey with the Committee.

6.VII. [By Robert Hoey]:

Request that the Superintendent send a letter of appreciation to Coach George Bossi, on behalf of the Lowell Public Schools and the Lowell School Committee, in recognition of Coach Bossi's holiday wrestling tournament, held at the Paul Tsongas Arena annually, and known to bring large crowds into the city.

Mr. Hoey made a motion to approve; seconded by Mr. Gignac. 6 yeas, 1 absent APPROVED

6.VIII. [By Robert Hoey]:

Request that the Superintendent send a letter of congratulations to Coach Tom Cassidy, on behalf of the Lowell Public Schools and the Lowell School Committee, on Greater Lowell Technical High School Gryphons wrestling team's recent win over Lowell High School.

Mr. Hoey made a motion to approve; seconded by Ms. Martin. 6 yeas, 1 absent APPROVED

6.IX. [By Andy Descoteaux]:

Have the Superintendent work with the Lowell High School administration to look into adding the IB (International Baccalaureate) program to offer our advanced HS students another opportunity in addition to AP course work.

Mr. Descoteaux made a motion to approve; seconded by Ms. Doherty. 6 yeas, 1 absent APPROVED

7. SUBCOMMITTEES

7.I. Finance Subcommittee:

Report and Approval of the Minutes of the Meeting of Tuesday, January 24, 2017 [Robert Gignac, Chair]

Mr. Gignac, Chairperson of the Finance Subcommittee spoke to the the Committee about establishing a SPED reserve fund. This would be an additional fund that can accumulate monies from one year to the next year so the district has money for unbudgeted Special Education or transportation expenses. The SPED reserve fund was signed into law in 2016 and it allows school districts by a majority vote of the School Committee and City Council to establish and appropriate or transfer money to a reserve fund to be used in the upcoming fiscal years to pay without further appropriation for unexpected or unbudgeted Special Education costs, out of district tuition or transportation. The balance in the SPED reserve fund can't exceed 2 % of the annual net school spending of the school district. In order for the district to have the SPED reserve fund the School Committee would have to approve establishing it by a majority vote and City Council would also have to approve it by a majority vote. Currently, our Circuit Breaker account has a cap of 1 years' worth of revenues.

Mr. Gignac made a motion to establish the SPED Reserve Fund; seconded by Ms. Doherty. 6 yeas, 1 absent APPROVED

Mr. Gignac then spoke to the Committee about the year to date expenditures report as of December 31, 2016 that was discussed at the Subcommittee meeting. The report highlighted ten (10) accounts with budgetary actions needed. The Subcommittee addressed how often transfers will be made and if the Committee can receive an update on the transfers more regularly and if the monthly report can include showing the balances from the beginning of the year as well as year to date. The Assistant Superintendent of Finance will be adding another column to the monthly report to show the balance from the beginning of the year.

Mr. Gignac made a motion to accept the report as a report of progress; seconded by Mr. Descoteaux. 6 yeas, 1 absent APPROVED

7.II. Joint Facilities And Lowell High School Subcommittee Meeting

A request was made to take the agenda out of order to discuss the Joint Facilities and Lowell High School Subcommittee Meeting by general consent.

Report and Approval of the Minutes of the Joint Facilities and Lowell High School Subcommittee Meeting of Tuesday, January 24, 2017 [Steve Gendron, Chairperson and Robert Gignac, Chairperson]

Mr. Gignac, Chairperson of the Lowell High Subcommittee asked Mr. Martin, Head of School to address the Committee. Mr. Martin thanked the School Committee, the City Manager and his staff and the City Council for choosing Lowell High School and for supporting the high school during this process. Mr. Martin and other staff members from Lowell High School presented an overview of the PowerPoint presentation that was provided at the Subcommittee meeting of the overall design process. Designing a school this size takes about 3 years and currently Lowell High is in the feasibility study. The MSBA's study is defined in three major efforts that will occur over 17 months.

Mr. Gignac made a motion accept the Education Plan for the New LHS Project as presented; seconded by Ms. Doherty; 6 yeas, 1 absent APPROVED

Mr. Gignac made a motion accept the report as a report of progress; seconded by Mr. Hoey; 6 yeas, 1 absent APPROVED

8. REPORTS OF THE SUPERINTENDENT

8.I. Online Community Resource Guide

Deputy Superintendent Jeannine Durkin announced the launching of the Lowell Public Schools Online Community Resource Guide. The Resource Guide is designed to assist students, parents and school personnel in easily locating and accessing resources that are available in and around Lowell. Deputy Superintendent Durkin briefly showed the Committee how to access this site via the web.

Mr. Hoey made a motion to accept the following Reports of the Superintendent as reports of progress: 8.I., 8.II. and 8.III.; seconded by Mr. Descoteaux. 6 yeas, 1 absent APPROVED

8.II. Chapter 70 State Aid

Assistant Superintendent Frisch/CFO informed the Committee that according to the DESE the Lowell Public Schools net school spending requirement calculation increased by $6,107,324 from $183,238,362 to $189,345,686 or a 3.3 % increase. The $6,107,324 increase is made up of a state share component of $4,932,022 (80.75%) and a local share component of $1,175,302 (19.25%). The required local contribution is paid in two parts: 1) cash and 2) in-kind costs paid by the City on behalf of the Lowell Public Schools.

Mr. Hoey made a motion to accept the following Reports of the Superintendent as reports of progress: 8.I., 8.II. and 8.III.; seconded by Mr. Descoteaux. 6 yeas, 1 absent APPROVED

8.III. Proposed 2018 Budget Calendar

Mr. Gignac made a motion to make the following changes to the proposed 2018 Budget Calendar; seconded by Ms. Doherty. 6 yeas, 1 absent APPROVED

- Wednesday, April 12, 2017 - Public Session - The Superintendent to present the FY18 recommended budget. - City Hall Council Chambers
- Wednesday, April 26, 2017 - changed to a Finance Subcommittee - Rogers School - TV Studio
- Wednesday, May 3, 2017 -- Budget Hearing - asked to be changed to the City Hall Council Chambers
- Wednesday, May 10, 2017 - Budget Hearing & Adoption - asked to be changed to the City Hall Council Chambers

Mr. Hoey made a motion to accept the following Reports of the Superintendent as reports of progress: 8.I., 8.II. and 8.III.; seconded by Mr. Descoteaux. 6 yeas, 1 absent APPROVED

9. NEW BUSINESS

9.I. Budget Transfer

Mr. Gignac made a motion to approve the following budget transfer; seconded by Mr. Descoteaux. 6 yeas, 1 absent APPROVED

From: 1400 531800 Printing & Binding $500

To: 2400 541500 Choral Supplies $500

The purpose of this transfer is to add a choral supply account at the Moody School.

9.II. Disposal Of Surplus Supplies

On December 7, 2016 the Business Office presented a list of textbooks deemed to be surplus by the Currriculum Office to the School Committee. At this time, there is no vendor who is willing to take the textbooks on assignment or willing to take the textbooks for "trade-in" for future purchases. With the support of the School Committee the Business Office is requesting disposing and removing all textbooks listed in said list from school premises. The textbooks will be offerred "free" to staff and students and then the remaining books would be recycled throught the school's recycling program over a period of time.

Ms. Doherty made a motion to approve the Disposal of Surplus Supplies; seconded by Mr. Descoteaux. 6 yeas, 1 absent APPROVED

9.III. SPED Reserve Fund - New Legislation

The SPED Reserve Fund - New Legislation was discussed and voted on during the Finance Subcommittee portion of the agenda.

10. CONVENTION/CONFERENCE REQUESTS

10.I. LHS - Business Professionals Of America Framingham, MA

Head of School Brian Martin, request permission for Lowell High School Business Professional Advisor, Jill McNamara along with 15 members of the Lowell Chapter of the Business Professionals of America to attend the National Leadership Conference in Framingham, MA from Saturday, March 4, 2017 through Monday, March 6, 2017 at the Sheraton Tara Hotel & Conference Center. Students will be absent from school on Monday, March 6, 2017. The only cost will be $100 for a substitute teacher for 1 day and will be paid by Lowell High School Individual School account. The cost of the conference will be paid for through The 1826 School Store for students and staff. Students have been raising funds to defray the cost of the trip and each student will pay $200 of the $250 per student. This will include all meals and 2 nights at the

Sheraton Tara. There will be no additional cost to the Lowell School Department budget.

Ms. Doherty made a motion to take and approve all six (6) field trip requests together for approval; seconded by Mr. Descoteaux. 6 yeas, 1 absent APPROVED

10.II. LHS - New England Wrestling Championship

Head of School Brian Martin, request permission for a one night over night stay on March 3 and 4, 2017 for LHS Wrestlers to attend the New England Wrestling Championship to be held at the Providence Career and Technical Academy in Providnece, RI. The Students will be under the supervision of Head Coach George Bossi, and assistant coaches James Dillon, Michael Dillon, and George Gilbride. Transportation will be via private vehicle provided by the Lowell High School Wrestling Coaches with written parental permission. The cost of the trip will not exceed $2000.00 paid by the Lowell High Athletic Department.

Ms. Doherty made a motion to take and approve all six (6) field trip requests together for approval; seconded by Mr. Descoteaux. 6 yeas, 1 absent APPROVED

10.III. LHS- Outdoor Adventures Russell, MA

Head of School Brian Martin, request permission for Outdoor Adventures Advisor, Kendra Bauer and Donna Newcomb, both employees of Lowell School Department, to participate in an overnight winter adventure excursion supported by the Appalachian Mountain Club's Youth Opportunity Program with 10 – 14 club members. They will be traveling to Noble View Outdoor Center in Russell, Massachusetts from Monday, February 20 – Wednesday, February 22, 2017 (school vacation week). No substitutes are required. The club will travel via school bus, which will be paid for by the students and subsidized by the club's funds.

Ms. Doherty made a motion to take and approve all six (6) field trip requests together for approval; seconded by Mr. Descoteaux. 6 yeas, 1 absent APPROVED

10.IV. LHS Trip To Greece April 2018

Lowell High School staff Jill McNamara, Wayne Taylor and Danielle Lessard, along with chaperone Jo Ann LaBranche who is CORI and 24 students, to travel to Greece, Athens, and Islands during April 2018 school vacation. The total cost of $3,335 will be paid by each student traveling. The cost of $200 for two substitute teacher will be paid by the LHS Individual School Budget.

Ms. Doherty made a motion to take and approve all six (6) field trip requests together for approval; seconded by Mr. Descoteaux. 6 yeas, 1 absent APPROVED

10.V. Thomas Thornton Student Council Workshop Hyannis, MA.

Permission for eleven (11) Student Council Representatives as well as Student Council Advisor, Thomas Thornton to attend the 2017 Massachusetts Association of Student Council Workshop on Wednesday, March 8 through Friday, March 10, 2017 held at the Resort & Conference Center at Hyannis, in Hyannis, MA. Students will miss three (3) days of school. No substitutes will be needed and all expenses will be paid through the Office of Student Activities at LHS funds not to exceed $2,100. There is no cost to the Lowell School Department.

Ms. Doherty made a motion to take and approve all six (6) field trip requests together for approval; seconded by Mr. Descoteaux. 6 yeas, 1 absent APPROVED

10.VI. Bartlett School Music Teacher - Albany, NY

Bartlett School Music teacher, Rachel Crawford to attend an out of state conference as part of an National Science Foundation. The conference will be held in Albany, NY on April 7th and 8th 2017. The total cost of $726.00, including the daily substitute will be paid by UML the National Science Foundation Grant. There is no cost to the Lowell Public Schools.

Ms. Doherty made a motion to take and approve all six (6) field trip requests together for approval; seconded by Mr. Descoteaux. 6 yeas, 1 absent APPROVED

11. COMMUNICATIONS

11.I. Letter Of Appreciation To William Haddad, Executive Director Of On The Move

Mr. Hoey made a motion to accept the communication and place it on file; seconded by Mr. Gignac. 6 yeas, 1 absent APPROVED

12. ADJOURNMENT

Ms. Martin made a motion to adjourn at 8:20 p.m.; seconded by Mr. Gignac 6 yeas, 1 absent APPROVED

Respectfully submitted,

Dr. Salah E. Khelfaoui, Superintendent and
Secretary to the Lowell School Committee

SEK/mes

SUBCOMMITTEES:

8.1. *2016 / 315* - Facilities: Report of the Meeting of Thursday, August 11, 2016 [Steve Gendron, Chairperson]

Mr. Gendron, Chairperson of the Facilities Subcommittee spoke to the Committee about renaming the Butler School Auditorium. Mr. Gendron asked Eilish Connaughton, retired Butler School Principal to address the Committee about her request to rename the auditorium after Mary Alice Foley, long time educator and former Assistant Principal at the Butler. Ms. Connaughton said that Ms. Foley inspired the children and was a tireless worker. A motion was then made to rename the Butler School Auditorium the Mary Alice Foley Auditorium. The motion passed. Mr. Gendron then gave a Status Update on Skanska, OPM on the High School Project. A PowerPoint presentation was given at the subcommittee meeting explaining that the feasibility study has started and that the process will take four to five months. The PowerPoint presentation went thru step by step what will take place during the feasibility study. Mary Ann Williams was present from Skanska and she addressed the Committee informing them about the School Building Committee Schedule and the Project Schedule. She also gave an explanation of the overall feasibility and schematic design process.

The report was accepted as a report of progress.

REPORTS OF THE SUPERINTENDENT:

10.1.1 *2016 / 307* - Doors Open Lowell Public Schools

.

Dr. Khelfaoui spoke briefly to the Committee about the Doors Open Lowell Public Schools report that he received from Anne K. Sheehy, Assistant Director of Human Resources. Dr. Khelfaoui then asked Ms. Sheehy to address the Committee about the report. The report includes a community school visitation schedule for the 2016-2017 school year. This is a planned public forum for participation in Lowell Public Schools in the form of a "doors open", monthly visiting session at each and every elementary, middle and alternative school in the district. Bus transportation will also be provided.

The report was accepted as a report of progress.

14.1.1 ***2016 / 320*** **- Budget Summary**

.

Mr. Frisch, School Business Administrator spoke to the Committee about the Year End Budget report that he had provided to the Committee. The report informed the Committee that the revised budget amounts to $158,010,396, from the total budget of $155,991,000 that has been expended through August 11, 2016. The remaining budget includes $1,967,724 encumbered for purchases. The available budget after deducting encumbrance amounts to $51,671.01.

At this time, all budget adjustment has been made to all the accounts bringing them to positive balances. The food service transfers to reimburse the local budget for administrative indirect costs have been adjusted and reflect the appropriate amounts per the detailed supporting documentation.

Mr. Frisch also addressed the circuit breaker account. As of June 30, 2016 the circuit breaker account had $2.8 million dollars of which $548,000 exceeds the allowable carry over limit. The district is only allowed to carry over $2.3 million which will result in money reverting back to the City. The district will be asking for the School Committee to request the $527,642 from the City Council to pay for the Kindergarten Paraprofessionals due to the fact that the Kindergarten grant was recently cut.

The report was accepted as a report of progress.

15. ***2016 / 328*** **- DESE Notification of LHS Disproportionate Suspension Data**

Superintendent Khelfaoui asked Jeannine Durkin, Assistant Superintendent for Student Support Services to give the Committee an update on the Massachusetts Department of Elementary and Secondary Education Notification of LHS Disproportionate Suspension Data. Ms. Durkin informed the Committee that the data showed disparities in rates of suspension at LHS for one cohort of students. Mr. Martin and Ms. Durkin participated in a phone conference with Rachelle Engler Bennett, Director of the Office of Learning Supports and Early Learning at the Massachusetts Department of Elementary and Secondary Education on June 29, 2016 related to the student discipline data and the professional learning network the Department is launching.

The report was accepted as a report of progress.

17.1. ***2016 / 326*** **- Facilities Updates**

Superintendent Khelfaoui asked Rick Underwood, Interim Facilities Director to give the Committee an update on the summer projects taking place at our schools as well as getting the buildings ready for the start of school. Mr. Underwood informed the Committee that a lot of work is being done throughout the district and that the schools will be ready on the first day of school. Many Committee members discussed the school grounds and making sure that the lawns are always cut and that the school yards are kept clean. A motion was then made to ask the Superintendent to make a plan to take care of the school grounds at our schools whether exploring it through donations or help from the community. The motion passed.

The report was accepted as a report of progress.

18. ***2016 / 331*** **- Proposed Hiring Policies**

Dr. Khelfaoui spoke briefly to the Committee about the Draft Proposed Hiring Policies that he received from Anne K. Sheehy, Assistant Director of Human Resources. Dr. Khelfaoui then asked Ms. Sheehy to address the Committee regarding the policies. The policy includes the practices relative to the hiring process. The three main points of the policy is as follows:

1. The Lowell Public Schools will establish school-based interview teams, train teams in issues of diversity, equity and inclusion, and prepare teams to hold school based interviews.
2. The Lowell Public Schools will institute an early hiring candidate pool, enabling us to hire as early as possible to obtain the highest quality candidates for teaching and administrative positions.
3. Lowell residents holding Massachusetts Department of Elementary and Secondary Education certifications and the necessary qualifications, receive interviews when they apply for positions of any kind in the Lowell Public Schools.

NEW BUSINESS:

22.1. ***2016 / 310*** **- Update on Business Office Reorganization and District Hiring**

Superintendent Khelfaoui asked Mr. Frisch, School Business Administrator to give the Committee an update on the Business Office Reorganization and District Hiring. Mr. Frisch went over the proposed changes in the business office. The changes will improve internal controls, provide more efficiency in operations and provide improved service to internal departments and public requests. The following changes will be made:

- The payroll supervisor duties will be absorbed by the three (3) payroll clerks and the Assistant Business Manager.
- Rick Underwood moves from Interim Facility Director to Facility Director.
- Mike Cassidy, Human Resources Director will become the Assistant Business Manager at his current salary.
- Robert McCleod, Payroll Supervisor will become the Internal Auditor at his current salary.
- Paul Wedel who is a contracted employee will become a Network Engineer at $85,000.
- A LHS clerk will be added to the budget and the Energy Management position will be cut.
- Nan Murphy and Jason DiCarlo will both receive a $15,000 stipend to assist with Leadership Academy. Pina Maggio will receive a stipend of $7,500 to assist with the Lowell Academy.
- Assistant Superintendent of Curriculum, Director of Human Resources, Director of Information Services and Instruction Technology Support are vacant positions to be hired.

A motion was then made to have one clerical position at Lowell High School put back into the budget and to restrict the savings from the elimination of the Energy Management position to the Facilities Department until a recommendation is brought forward to the School Committee. The motion passed.

The report was accepted as a report of progress.

24. ***2016 / 322 -*** **Expenditure Transfer Request**

A motion was made to make the following Expenditure Transfers.

Expenditure Transfer #1

To:	Food Service Reimbursement Reclassify (see Expenditure Transfer Form #1)	151,429
From:	Employee Salary Accounts	151,429

The purpose of this transfer is to adjust the indirect administrative costs to the documentation (see the attached Food Service Reimbursement Documentation).

To:	Employee Salary Account	39,398.83
From:	Retirement sick leave payout	39,398.83

Expenditure Transfer #2

To:	Kindergarten Grant (see Expenditure Transfer Form #2)	$45,632.73
From:	Employee Salary Accounts	$45,632.73

The purpose of this transfer is to charge the local funds for their portion of the Kindergarten grant from 2015-16.

25. ***2016 / 325*** **- Budget Transfer**

The following budget transfers were requested:

Budget Transfer #1

To:	Deficit Accounts (see Budget Transfer Form #1)	$839,081.64
From:	Surplus Accounts	$839,081.64

The purpose of this transfer is to zero out the deficits in account from accounts having surpluses.

Budget Transfer Request #2

To:	Employee Salary Accounts (see Budget Transfer Form #2)	
		$4,831,607.58
From:	Employee Salary Accounts	$4,752,914.85
	Other Surplus Accounts	$ 78,692.73
	Total	$4,831,607.58

The purpose of this transfer is to zero out the deficits in employee salary accounts. The deficits were realized when the employee union and non-union groups were settled. The original budget did not account for the increases from the settlement.

Budget Transfer Request #3

To:	Deficit Accounts (see Budget Transfer Form #3)	$45,632.73
From:	Surplus Accounts	$45,632.73

The purpose of this transfer is to zero out the deficits in the paraprofessional account with a surplus account.

COMMUNICATIONS FROM THE CITY MANAGER

5. - COMMUNICATIONS FROM THE CITY MANAGER

5.1. ***2016 / 612*** **- Motion Responses:**
(A) CopSync Security Communication Alert System
(B) Firearm License
(C) Lowell High School Building Project
(D) 110-119 Chelmsford St.
(E) Lowell Public Schools Outstanding Work Orders
(F) Winn Development Presentation

In Council, **Motion** "To accept and place on file" by C. Elliott, seconded by C. Leahy. So voted.

C. Elliott commented on Motion Response A regarding CopSync Security noting the State law requirement. Manager Murphy noted the process and the requirement for the system if it is budgeted for in the school department. C. Elliott questioned the technology. C. Belanger questioned compliance with State law. Manager Murphy noted if not budgeted for then not mandated. C. Leary noted the safety of the schools.

C. Leary commented on Motion Response B regarding firearm licenses noting the report outlining the past year and questioning training element in the system.

Manager Murphy commented on Motion Response C regarding Lowell High School project noting the feasibility study and introducing Skanska (Owner Rep.) and Perkins Eastman (Architects). Mary Ann William (Skanska) outlined assessment of current site and other

potential sites. Robert Bell (Perkins Eastman) provided history of the company and initial assessment. Manager Murphy commented on the process moving forward and the community involvement in that process. C. Elliott noted that all members of the community should be contacted. Mary Ann William noted that there are several methods of outreach that will be used to connect to the community. C. Elliott questioned the effect of increased enrollment on the process. Mary Ann William noted any large spikes in enrollment should be monitored. M. Kennedy noted that the public input window would be going for about eight weeks. C. Belanger questioned locations of the buildings and noted the process was moving forward in a positive manner. C. Samaras noted that the development team is high level and that information moving forward should be put out to the neighborhood groups. C. Leary noted it was a long road ahead but there has been a good start. C. Leahy questioned rehab process. Mary Ann William noted that they assess what would have value to project. C. Mercier noted that she would not support any public taking of land to expand the location. C. Milinazzo commented on demographics in the City should be analyzed to ensure any site is large enough. Manager Murphy commented on size and time line. C. Elliott commented on the involvement of State agencies in the decision process.

C. Leahy commented on Motion Response E regarding outstanding school work orders noting the report. Rodney Conley outlined the report. **Motion** to refer matter to Municipal Facilities SC by C. Leahy, seconded by C. Leary. So voted.

Manager Murphy commented Motion Response F regarding Winn Development presentation noting the status report on the Hamilton Canal District (HCD) project. Larry Curtis and Michael O'Brien presented for Winn Development. Mr. Curtis provided history of the company and the approach to the development for both residential and commercial. Mr. O'Brien noted the process, the approach and the challenges with the project as well as time lines established. Mr. O'Brien noted that there is a Master Plan developed by the City and that there will be phases to the project. Mr. O'Brien outlined the phases and the time frames for each indicating the challenge of a funding gap which would need to be addressed collectively. Mr. O'Brien noted that ground up construction in gateway cities involve funding gaps and that Winn would be keeping partners informed of same. C. Belanger commented on research and development firms and the recruiting of companies to the HCD. C. Belanger noted that marketing study was not current and it should be revised. Mr. O'Brien noted the need for fresh information. C. Belanger commented on sales as opposed to rentals. C. Belanger noted the need for partnerships. C. Samaras noted need for strong communications between the parties. Mr. O'Brien noted the business friendly attitude of the City and was reason Winn brought part of its work force to Lowell. C. Samaras noted the need for creative approaches to projects. C. Leary questioned the time frame. Manager Murphy outlined time frame for the project. C. Leary questioned Lord Overpass reconstruction and new garage construction as well as updating

marketing study. C. Leary noted the challenge during all of the construction. C. Elliott noted it is a major move forward on the project with a plan in place. C. Leahy noted the residential portion of project and the need to increase average income of citizens of Lowell. C. Mercier noted area was barren and now all new development and was concerned with manner to cover any funding gaps with below market housing. Mr. Curtis commented on funding of these projects require mix use and below market housing. C. Milinazzo noted the reality check of twenty percent below market housing to fund project and the housing is work force housing. Steve Pangiatakos noted work force housing is people this body represents with incomes that are disposable. Manager Murphy noted working relationship is strong with Winn.

C. Rourke requested that Item #9.3 be taken out of order. Approved by general consent with no objection.

5.2. *2016 / 603* **- Communication-Accept Resignation of Angela Vincent from Lowell Sustainability Council**

In Council, **Motion** "To accept and place on file" by C. Rourke, seconded by C. Leary. So voted.

5.3. *2016 / 598* **- Communication - City Mgr. request Out of State Travel (1) DPD.**

In Council, read and adopted. C. Samaras did not participate in discussion or vote on the matter.

PETITIONS

9. - PETITIONS

9.1. ***2016 / 590*** **- Misc. - Hellenic American Academy (David Conway) request permission to install small banners on lamp posts along Broadway, Dummer and Worthen Streets to identify the Academy.**

In Council, read and **Motion** to refer to Law Department for report and recommendation by C. Mercier, seconded by C. Leary. So voted. C. Mercier requested quick response on the matter.

Manager Murphy noted there was much information needed to move forward. **Motion** by C. Mercier, seconded by C. Leary to approve subject to Manager review and approval. So voted.

9.2. *2016 / 594* **- Misc. - Adriana Tharpe (Drica Fashion) request permission for overhanging sign located at 96 Merrimack Street.**

In Council, read and **Motion** to refer to Law Department for report and recommendation by C. Mercier, seconded by C. Leary. So voted.

9.3. *2016 / 597* **- Misc. - IARR, LLC (Atty. Philip Nyman) request City Council amend Zoning Code by extending current GI zoning district to include parcel of land located between 6 and 2 Industrial Avenue.**

In Council, read and **Motion** to refer to Law Department to draft ordinance by C. Rourke, seconded by C. Milinazzo. So voted.

9.4. *2016 / 596* **- National Grid - Request installation of (1) SO pole located at corner of Gorham and Livingston Streets.**

In City Council, Given 1st reading, waived full reading, **Motion** to refer to Public Hearing on October 11, 2016 at 7 PM by C. Leahy, seconded by C. Leary. So voted.

9.5. *2016 / 610* **- National Grid - Request permission to relay/replace cast iron gas main with plastic gas main in sidewalks on Sixth Street.**

In City Council, Given 1st reading, waived full reading, **Motion** to refer to Public Hearing on October 11, 2016 at 7 PM by C. Leahy, seconded by C. Leary. So voted. C. Leahy questioned location at sidewalk. National Grip representative noted that there was a water main they needed to avoid.

9.6. *2016 / 611* **- National Grid - Request permission to relay/replace cast iron gas main with plastic gas main on Glenwood Street and install plastic gas main on East View Street.**

In City Council, Given 1st reading, waived full reading, **Motion** to refer to Public Hearing on October 11, 2016 at 7 PM by C. Elliott, seconded by C. Leary. So voted. C. Leahy did not participate on vote or discussion on this matter.

CITY COUNCIL – MOTIONS

10. - CITY COUNCIL - MOTIONS

10.1. *2016 / 592* **- C. Mercier - Req. City Mgr. provide a report regarding the structural integrity of the balcony at the Lowell Memorial Auditorium as well as a report regarding the access available into the building from the loading docks for equipment used by the performers.**

In Council, seconded by C. Milinazzo, read and referred to City Manager. So voted. C. Mercier requested update on the matter. Manager Murphy noted a structural analysis was done and the balcony was acceptable and that money would be going to widening entrances to allow larger array of acts to the venue.

10.2. *2016 / 599* **- C. Samaras - Req. City Mgr. have proper department repair sidewalks by St. George's Church at corner of Bower and Fletcher Streets in anticipation of the 100 year anniversary of the church.**

In Council, seconded by C. Mercier, read and referred to City Manager. So voted. C. Samaras noted several events will be planned and needed area to be updated.

10.3. *2016 / 600* **- C. Leary/C. Samaras - Req. City Mgr. work with the police department to monitor and to change the pattern of speeding and aggressive driving on Princeton Boulevard.**

In Council, no second needed, read and referred to City Manager. So voted. C. Leary noted area has become a racetrack and is in need of enforcement. C. Samaras noted there should be some analysis done on speeding in the City on main roads.

10.4. *2016 / 601* **- C. Belanger - Req. City Mgr. issue a report relative to the City's ability to naming rights of City owned parcels; for example LeLacheur Park, Cawley Stadium, etc.**

In Council, seconded by C. Elliott, read and referred to City Manager. So voted. C. Belanger noted idea has been discussed in the past but it should be further examined to allow naming rights while maintaining important community connections as it is a source of income for the City.

10.5. *2016 / 607* **- C. Belanger - Req. City Mgr. work with DPD on a new marketing strategy for**

the Hamilton Canal District now that the Judicial Center construction has begun.

In Council, seconded by C. Elliott, read and referred to City Manager. So voted. C. Belanger noted new Judicial Center should be marketed and new rules should be used as landscape is changing.

10.6. *2016 / 608* **- C. Belanger - Req. City Mgr. work with Traffic Engineer on reducing or eliminating on street parking at night on lower Bridge Street to improve inbound morning traffic flow.**

In Council, seconded by C. Elliott, read and referred to City Manager. So voted. C. Belanger noted the need to ease the traffic flow in the area in the morning.

10.7. *2016 / 588* **- M. Kennedy/C. Leahy/C. Leary/C. Samaras - Req. City Mgr. take proper steps to install a traffic crossing light along Andover Street in the vicinity of Douglas and Arbor Roads.**

In Council, no second needed, read and referred to City Manager. So voted. C. Samaras noted it was a busy street with many cars travelling on it. C. Leahy commented on the other end of Andover Street regarding work that may be done by State. M. Kennedy noted that the area warrants a look at a possible light. C. Milinazzo noted that there are a variety of lights to choose from.

10.8. *2016 / 589* **- M. Kennedy - Req. City Auditor provide City Council with an analysis of the financial impact the Charter Schools have on the City.**

In Council, seconded by C. Milinazzo, read and referred to City Auditor. So voted. M. Kennedy noted that issues may arise if new schools are brought on line.

ANNOUNCEMENTS

11. - ANNOUNCEMENTS

In City Council, C. Mercier commented on recent Kinetic Sculpture Race.

ADJOURNMENT

12. - Time for meeting to stand adjourned.

Motion to Adjourn by C. Milinazzo, seconded by C. Samaras. So voted.

Meeting adjourned at 9:25 PM.

In City Council, Given 2nd Reading and **Motion** to refer to Wire Inspector for report and recommendation by C. Leary, seconded by C. Leahy. So voted. Public hearing held. Speaking in favor was Ken Dobe (National Grid). No Remonstrants.

COMMUNICATIONS FROM THE CITY MANAGER

4. - COMMUNICATIONS FROM THE CITY MANAGER

4.1. ***2016 / 743*** **- Motion Responses:**
(A) Swamp Locks Lighting
(B) Increase Illegal Dumping Fines
(C) Western Avenue
Informational:
(D) LowellSTAT Public Report for Economic Development
(E) 2016 MassWorks Grant
Petition Response:
(F) Hampshire Street

In Council, **Motion** "To accept and place on file" by C. Milinazzo, seconded by C. Samaras. So voted.

C. Rourke commented on Motion Response B regarding illegal dumping fines requesting overview procedure. Manager Murphy commented on the new fines and how they will help prevent future dumping. C. Rourke noted the use of portable camera to monitor sites.

C. Leahy commented on Motion Response C regarding Western Avenue noting they should still look for ways to connect this area with the downtown. Manager Murphy noted the reluctance on the part of the railroad company to install crossing in that area. C. Samaras noted the need to connect this parcel and that the administration should still continue to seek out funding to install a crossing.

C. Milinazzo commented on Informational Response D regarding LowellSTAT report on economic development requesting it be put on website and further commented on the rate of unemployment contained in the report. Rodney Conley (STAT) commented on the unemployment rate. C. Belanger commented on Class C office space downtown and noted that the second and third floors in buildings are not being used and there should be more attention to filling those spaces. Manager Murphy commented on the outreach being used to fill the vacancies.

Registered speaker, Armand Hebert, commented on Informational Response E MassWorks Grant.

C. Mercier commented on Petition Response regarding Hampshire Street noting information should be made available to abutters.

4.2. ***2016 / 740*** **- Communication - City Mgr. request Out of State Travel (1) LFD.**

In Council, read and adopted. C. Milinazzo questioned if vendor was paying for travel should City accept that as a gift. Manager Murphy noted that travel was part of the bid. C. Mercier commented that cost of truck should include the inspection of same.

REPORTS (SUB / COMMITTEE, IF ANY)

6. - REPORTS (SUB / COMMITTEE, IF ANY)

6.1. *2016 / 733* **- Finance SC November 22, 2016.**

In Council, C. Elliott provided report regarding the new high school building project noting updating estimates and having early discussions of how the project should develop. C. Leary noted it was a good meeting and the body needs to be proactive with the time frames as well as seeking other options. **Motion** by C. Elliott, seconded by C. Leary to accept the report as a report of progress. So voted.

C. Milinazzo requested suspension of the rules to discuss zoning matter. No objection. So voted. **Motion** by C. Milinazzo, seconded by C. Mercier forward section 5 of proposed zoning changes which improve permit efficiency to law department to draft as ordinance. So voted.

6.2. *2016 / 679* **- Wire Insp. - National Grid - Request permission to install (1) SO Pole on east side of intersection of Lawrence and Andrews Streets near 706 Lawrence St.**

In Council, **Motion** to accept and adopt accompanying order by C. Samaras, seconded by C. Rourke. So voted.

PETITIONS

7. - PETITIONS

7.1. ***2016 / 734*** **- Claim - (1) property.**

In Council, read and **Motion** to refer to Law Department for report and recommendation by C. Rourke, seconded by C. Samaras. So voted.

7.2. ***2016 / 742*** **- Misc. - Generation Citizen Program (LHS students) request permission to speak to City Council regarding lighting in the downtown area.**

In Council, read and **Motion** to refer to Youth Service SC for report and recommendation by C. Belanger, seconded by C. Elliott. So voted. The following members of the Generation Citizens Program addressed the Council; Pichanny Som, Ian Kiuna and Nicole Chennett. C. Belanger was impressed with the energy of the group. C. Elliott commented on the work being done by group. C. Leahy noted the group made excellent points. C. Samaras commented that these are the students who deserve a quality place to learn.

CITY COUNCIL - MOTIONS

8. - CITY COUNCIL - MOTIONS

8.1. ***2016 / 735*** **- C. Mercier - Req. City Mgr. find ways and means to illuminate the cross walk on Broadway Street in front of Senior Center with possibly reflectors or a solar light for vehicular and pedestrian safety.**

In Council, seconded by C. Leahy, read and referred to City Manager. So voted. C. Mercier noted it was a safety issue that needed to be addressed.

8.2. ***2016 / 736*** **- C. Rourke - Req. City Mgr. establish an E-Commerce position at the LPD to provide a safe location for legal E-Commerce transactions.**

In Council, seconded by C. Leary, read and referred to City Manager. So voted. C. Rourke noted increase in online trading and that it should be monitored for fraud.

8.3. ***2016 / 741*** **- C. Samaras - Req. City Mgr. invite members of the Lowell Parks & Conservation Trust to update City Council regarding the Concord River Greenway and its connections to other trails.**

In Council, seconded by C. Rourke, read and referred to City Manager. So voted. C. Samaras noted there should be a review of existing and completed trails and Economic Development SC

should be a forum to research same. C. Leary noted the need to see what can be taken and the funds that would be needed for such a venture.

8.4. *2016 / 744* **- C. Leary - Req. City Mgr. invite Lowell Telecommunication Corporation's (LTC) new Director; Wendy Blom, to present before the City Council regarding LTC's current objectives and new initiatives for 2017.**

In Council, seconded by C. Leahy, read and referred to City Manager. So voted. C. Leary noted the need to discuss direction and goals of the LTC as the City is the main source of funding for that entity. C. Elliott recognized that local programming is critical for the area.

8.5. *2016 / 745* **- C. Leahy - Req. City Mgr. have DPD provide a report regarding Franklin Park development with Habitat for Humanity.**

In Council, seconded by C. Leary, read and referred to City Manager. So voted. C. Leahy noted it would be area around Rock Street. C. Rourke requested update in Chelmsford Street area.

8.6. *2016 / 746* **- C. Leahy - Req. City Mgr. have Parks Dept. repair fence on Moody Street near St. Josephs.**

In Council, seconded by C. Leary, read and referred to City Manager. So voted. C. Leahy noted it was a neighborhood concern.

8.7. *2016 / 747* **- C. Leahy/C. Rourke - Req. City Mgr. explore possibility of reducing speed limits throughout the City, especially in densely populated areas, in accordance with the Innovative Cities Grant.**

In Council, no second needed, read and referred to City Manager. So voted. C. Leahy noted it may be needed to satisfy certain grants given to City.

C. Elliott requested suspension of the rules to discuss recent crime in City. No objection. So voted. C. Elliott commented on crime at Westminster complex and outlined the various problems in that area. C. Belanger noted it was ongoing problem and the police are called there often. Manager Murphy noted there is a meeting scheduled with management company of the complex. C. Rourke note a small police precinct at site may resolve some issues. C. Leahy commented that there were several code violations at the site. C. Milinazzo noted some cities have a police officer living on the premises. **Motion** by C. Elliott, seconded by C. Leary to refer to City Manager for report. So voted.

ANNOUNCEMENTS

9. - ANNOUNCEMENTS

In Council, C. Mercier mentioned City of Lights Parade. Manager Murphy noted City Hall hours for holiday.

ADJOURNMENT

10. - Time for meeting to stand adjourned.

Motion to Adjourn by C. Rourke, seconded by C. Samaras. So voted.

Meeting adjourned at 7:42 PM.

Michael Q. Geary, City Clerk

Lowell City Council
Regular Meeting Minutes

Date: **January 10, 2017**
Time: **6:30 PM**
Location: **City Council Chamber, 375 Merrimack Street, 2nd Floor, Lowell, MA**

1/10/2017 - Minutes

1. ROLL CALL

   Roll Call showed 9 present.

   Mayor Kennedy presiding.

2. CITY CLERK

2.1. Minutes Of City Council Meeting January 3rd; Technology & Utilities SC, For Acceptance.
In City Council, minutes read, **Motion** to accept and place on file by C. Rourke, seconded by C. Samaras. So voted.

3. UNFINISHED BUSINESS

3.1. C. Elliott - Req. City Mgr. Contact State Regarding Installation Of "Roller Barrier System" For The Intersection Of Gorham Street And The Lowell Connector.
In City Council, seconded by C. Belanger, referred to City Manager. So voted. C. Elliott noted it necessary to explore further safety precautions at the end of the Lowell Connector.

3.2. C. Elliott/C. Leahy - Req. City Council Vote To Implement Legal Measures Against National Grid For Delays Associated With Bridge Projects In The City.
In City Council, no second needed, referred to City Manager. So voted. C. Elliott noted frustration with National Grid regarding causing of delays on projects in the City. C. Leahy noted delays cause problems for the City and the residents. Request to refer to City Manager without objection.

4. COMMUNICATIONS FROM CITY MANAGER

4.1. Motion Responses

In City Council, read, **Motion** to accept and place on file by C. Rourke, seconded by C. Samaras. So voted.

C. Leary commented on motion response A regarding Crowley Park noting the timely response to repairing stone wall.

C. Elliott commented on motion response B regarding residential tax exemption noting the expense of the program and that it should be done when City can afford same. C. Mercier noted that the program was not in place at this time.

5. VOTES FROM THE CITY MANAGER

5.1. Votes

(A) Vote - License Agreement 16 Merrimack Street. In City Council, waived full reading without objection, read twice, **Motion** to adopt by C. Mercier, seconded by C. Rourke. Adopted per Roll Call Vote, 9 yeas. So voted.

(B) Vote - Apply/Accept/Expend $152,000 grant Council of Aging. In City Council, waived full reading without objection, read twice, **Motion** to adopt by C. Elliott, seconded by C. Belanger. Adopted per Roll Call Vote, 9 yeas. So voted.

(C) Vote - License Agreement 147 E. Merrrimack Street. In City Council, waived full reading without objection, read twice, **Motion** to adopt by C. Rourke, seconded by C. Milinazzo. Adopted per Roll Call Vote, 9 yeas. So voted.

6. REPORTS (SUB/COMMITTEE, IF ANY)

6.1. Economic Development SC January 10, 2017.
In City Council, C. Samaras presented the report outlining the attendance the discussion of the progress of construciton in the Hamilton Canal District noting the amount of public money involved and the time frames for completion. C. Samaras noted further discussion of aggressive marketing and completing infrastucture. C. Leahy commented on Mill #5 noting the effective use of the building and how it enhances the area. C. Mercier noted the the subcommittee outlined one of the biggest projects taken on by the City. Manager Murphy recognized the DPD effort on this

taken on by the City. Manager Murphy recognized the DPW effort on this project. **Motion** by C. Samaras, seconded by C. Rourke to accept the report as a report of progress. So voted.

7. CITY COUNCIL - MOTIONS

7.1. C. Milinazzo - Req. City Mgr. Have Traffic Engineer Review And Comment On The New Striping Along The Hunts Fall Bridge.
In City Council, seconded by C. Rourke, referred to City Manager. So voted. C. Milinazzo noted problem with marked lanes on the bridge. C. Leahy noted that neighborhoods are concerned over markings on the road.

7.2. C. Belanger - Req. City Mgr. Update City Council Regarding UTEC Mattress Recycling Facility Relocating To Lowell.
In City Council, seconded by C. Leary, referred to City Manager. So voted. C. Belanger commented on UTEC and its programs including the mattress recycling efforts. C. Belanger noted the group was in need for a new faciltiy and that they should be assisted to get it into the City.

7.3. C. Belanger - Req. City Mgr. Provide City Council With Outline Establishing A City-Wide Youth Council.
In City Council, seconded by C. Leary, referred to City Manager. So voted. C. Belanger noted the Youth Council should have a more permanent presence in the City.

7.4. C. Belanger/C. Leahy - Req. City Mgr. Have SKANSKA Provide Report Outlining The Rejection Of The South Common As A Viable Location For New High School.
In City Council, no second needed. Defeated on Roll Call Vote, 4 yeas, 5 nays (C. Elliott, C. Mercier, C. Milinazzo, C. Rourke, C. Samaras). So voted. C. Belanger commented on locations noted for new high school and further commented on the benefits of the South Common. Registered speaker, Steve Gendron addressed the Council and provided chart to the body for review. C. Leahy noted that the vote will be important for the City and more information is best. C. Mercier noted neighborhoods are concerned with big projects in their area but pros and cons must be raised. C. Milinazzo requested Roll Call Vote on matter and noted he could not support motion or South Common location indicating that it was infringing on MSBA authority. C. Rourke noted South Common location would cause significant delays on project. C. Samaras could not support motion or location as it is protected green space and State owned. C. Leary noted the motion simply asks for reason of denial so it should be supported. C. Leary further noted that alot of money is being spent on South Common in near future. Michael McGovern (Asst.

City Manager) outlined those future costs. C. Belanger noted it is merely a request for information as the upcomng vote is important and further stated that the State Delegation could speed process along. C. Elliott noted ongoing discussion and answers have already been provided and that the focus should be on getting costs established for the entire project. Manager Murphy noted that the educational plan must be approved by School Committee to move forward and that price tag is forthcoming on project. M. Kennedy supports motion noting a better explanation could be provided. M. Kennedy suggested that subcommittee should visit high school to see the need for new faciltiy. C. Rourke noted answer to motion has been provided. C. Leary noted there is no time involved in answering motion.

7.5. C. Leahy - Req. City Council Refer Snow Emergency Ordinance To Neighborhoods SC For Review.
In City Council, seconded by C. Rourke, referred to City Manager. So voted. C. Leahy noted subcommittee should discuss issues and updates may be needed for ordinance. C. Elliott noted the need to notify people with timely warning. C. Mercier noted that some people have difficulty adhering to ordinance. C. Milinazzo noted need to clear sidewalks during snow storm. Manager Murphy noted methods used to inform public.

8. ANNOUNCEMENTS
C. Milinazzo noted zoning changes will be discussed by neighborhood councils this Thursday the 12th.

9. ADJOURNMENT

Motion to adjourn by C. Rourk, seconded by C. Milinazzo. So voted.

Meeting adjourned at 7:55 PM.

_____

Michael Geary,

Lowell City Council
Regular Meeting Minutes

Date: **February 7, 2017**
Time: **6:30 PM**
Location: **City Council Chamber, 375 Merrimack Street, 2nd Floor, Lowell, MA**

2/7/2017 - Minutes

1. **ROLL CALL**

Roll Call recorded 9 present.

M. Kennedy presiding.

C. Leahy requested a moment of silence in darkened chamber for Mary Noon.

M. Kennedy requested, without objection, that Council discuss Manager's responses first.

2. **CITY CLERK**

2.1. Minutes Of Zoning SC January 31st; City Council January 31st, For Acceptance.
In City Council, minutes read, **Motion** to accept and place on file by C. Rourke, seconded by C. Milinazzo. So voted.

3. **UTILITY PUBLIC HEARING**

3.1. National Grid - Req. Permission To Install Underground Concrete PVC Conduit At 11 - 15 Carter Street.
In City Council, Given 2nd reading, hearing held, no remonstrants. Speaking in favor of petition was Ken Dobe (National Grid) and Lisa Demeo (City Engineer). **Motion** to refer to Wire Inspector for report and recommendation by C. Rourke, seconded by C. Milinazzo. So voted.

3.2. National Grid/Verizon NE - Req. Permission To Install New Riser Pole At 15 Carter Street.
In City Council, Given 2nd reading, hearing held, no remonstrants. Speaking in favor of petition was Ken Dobe (National Grid) and Lisa Demeo (City Engineer). **Motion** to refer to Wire Inspector for report and recommendation by C. Rourke, seconded by C. Milinazzo. So voted.

4. **COMMUNICATIONS FROM CITY MANAGER**

4.1. INFORMATIONAL - Lowell High School Site Selection
In City Council, Manager Murphy commented on process noting that the School Building

Committee forwarded four options for the Council who can accept, reject or add others. Manager Murphy noted one option must be a rehabilitation of the existing school. Robert Bell (Perkins Eastman) commented on time line established by Massachusetts School Building Authority (MSBA) for the project. Mr. Bell noted that there were 10 options that were looked at to get down to the 4 and that he would review each of the 10 tonight. Mr. Bell outlined all design options including the pros and cons as well as the costs of each option. C. Milinazzo commented on the options presented to the body. C. Elliott questioned next step in the process. Manager Murphy outlined the process. C. Elliott noted the project was ahead of schedule and made **Motion** to refer the matter to a Committee As A Whole for further review, seconded by C. Mercier. So voted. C. Mercier commented on taking of property. C. Samaras questioned other sites. Manager Murphy noted it was early in the process and more data needs to be analyzed. C. Leary noted the Committee as a Whole must act quickly on options before them. C. Rourke commented on educational objectives for the long, short and unknown terms. C. Leahy commented on Cawley sited and questioned Tewksbury/Lowell line. C. Leahy questioned downtown site and eminent domain proceedings. Manager Murphy spoke to eminent domain. C. Elliott noted need for more data especially traffic studies. Manager Murphy noted that the MSBA requires all of that data. Mary Ann Williams (SKANSKA) commented on modular classrooms has not being reimburseable. M. Kennedy noted costs are higher than anticipated and efforts should be made to cut them. C. Leary noted that body must be aware of non-reimbursable costs and that the longer project goes the more expensive it will be. C. Belanger was in agreement with four options and noted his concern with non-reimbursable costs and eminent domain. C. Milinazzo noted the criteria should be what is in the best interests of the students and that all costs must be understood. C. Samaras commented on square foot costs. C. Rourke noted all plans for existing school includes modular classrooms. Ms. Willams discussed modular classrooms. C. Mercier questioned costs of these classrooms. C. Leahy questioned crossing of Father Morrisette Drive at existing site.

5. **VOTES FROM THE CITY MANAGER**

5.1. VOTE- Auth.Mgr.Ex. License Agreement-122 Merrimack St. (Overhanging Sign)

In City Council, Read twice, full reading waived without objection. Adopted per Roll Call Vote, 9 yeas. So voted.

C. Leary requested, without objection to take item #7.4 out of order. So voted.

6. **REPORTS (SUB/COMMITTEE, IF ANY)**
None.

7. **PETITIONS**

7.1. Claim - (1) Personal Injury; (1) Property.
In City Council, **Motion** to refer to Law Department for report and recommendation by C. Rourke, seconded by C. Milinazzo. So voted.

7.2. Misc. - Karen McShea (VP Real Estate Development, Lupoli Companies) Request City Council Approval For Installation Of Overhanging Sign At 17 Shattuck Street For Thorndike Exchange Experience Center.
In City Council, **Motion** to refer to Law Department for report and recommendation by C. Rourke, seconded by C. Samaras. So voted.

7.3. Misc. - Vladimir Saldana Request Permission To Address Council On Behalf Of Petition To Reverse Personnel Decision On Patrolman Pender By The City Manager.
In City Council, matter discussed on Council floor. The following registered speakers addressed the body: Vladimar Saldana; Lisa Arnold; Harrison Ingraham; Danny Bravo; Aurora Enkson.

7.4. Misc. - Sue Kim Request Permission To Address The City Council Regarding Petition To Consider Adopting A Trust Ordinance In The City.
In City Council, **Motion** to refer to City Manager for report and recommendation by C. Elliott, seconded by C. Belanger. So voted. The following speakers addressed the Council: Sue Kim; Carlos Gavriel; Judith Duran; Camaran Kay (oppose); Joseph Boyle; George Koumantzelis (oppose). C. Milinazzo supported the motion and noted that the practice of the LPD is in compliance with the Trust Ordinance so he commented he would not support the ordinance as it would lead to division. C. Mercier noted non support of the Trust Ordinance. C. Samaras noted support of motion by would not support underlying issue. C. Leary requested turn around time of the report and any change should be in best interest of City. M. Kennedy noted the Council usually does not take position on a national issue.

7.5. Misc. - Maria Matos, On Behalf Of Lorda E. Vallanilla, Request (1) Handicap Parking Sign At 1374 Gorham Street.
In City Council, **Motion** to refer to Traffic Engineer for report and recommendation by C. Mercier, seconded by C. Rourke. So voted.

8. **CITY COUNCIL - MOTIONS**

8.1. C. Mercier - Req. City Mgr. Convene A Public Forum, When All The Facts Are In Concerning Lowell High School, So That The Public Can Express Their Thoughts And Concerns Before A Vote Is Taken.
In City Council, seconded by C. Leary, referred to City Manager. So voted. C. Mercier noted it was important to hear all thoughts and concerns from citizens and requested special meeting be set up as a committee of the whole.

8.2. C. Leahy/C. Milinazzo - Req. City Mgr. Have Traffic Engineer Explore Feasibility Of Placing A 4-Way Stop Sign At The Intersection Of Trull Lane And Trull Lane East And West.
In City Council, no second needed, referred to Traffic Engineer. So voted. C. Milinazzo noted the neighbors concerns.

8.3. C. Elliott - Req. City Mgr. / City Auditor Provide A Report On The Status Of “Free Cash” For FY 2017.
In City Council, seconded by C. Belanger, referred to City Manager/City Auditor. So voted. C. Elliott noted it would be a positive report showing prudent spending and savings. Manager Murphy noted the report will include uses of the money.

8.4. C. Elliott - Req. City Council Discuss Process For Permit Approvals For Road Races, Festivals, Block Parties, Etc., When Using City Streets And/Or Facilities.
In City Council, seconded by C. Belanger, referred to City Manager. So voted. C. Elliott noted information to citizens are important as there are a lot of events.

9. **ANNOUNCEMENTS**
None.

10. **ADJOURNMENT**

Motion to adjourn by C. Rourke, seconded by C. Samaras. So voted.

Meeting adjourned at 8:35 PM.

Michael Q. Geary, City Clerk

Massachusetts School Building Authority

City of Lowell
Lowell High School Kick-Off Meeting
September 15, 2016

Objective:

- Meeting to introduce the project team, discuss the project goals and schedule.

Meeting Agenda:

- Introductions and Communications
  - Please include full district name & school name in email subject line

- Project Data:
  - The existing site is 5.58 acres.
  - Existing 628,558 sf for grades 9-12. The original building opened in 1892, with an addition in 1922 and renovations in 1971 and 1997. The second building opened in 1980, and was renovated in 1997. The Freshman Academy opened in 1900, with an addition in 1938, and a renovation in 1986. There is also a steam plant whose original construction date is unknown but was renovated in 1996.
  - Includes 8 Non-Chapter voc "Pathway" programs and 1 CH74 Business Marketing
  - The 2015-2016 enrollment is 3,134.
    - Agreed upon study enrollment is 3,520 students for a 9-12 high school.
    - The RFS proposed a $114m – $152m construction budget.
  - MSBA standard for 3,520 student HS = 365,707 nsf / 548,561 gsf (@1.5) exclusive of CH74 programs
  - The RFS states that Lowell High School is listed on the National and State Registers of Historic Places through its inclusion within both the Lowell National Historical Park & Preservation District and the City Hall Historic District. The 1981 section of Lowell High School is not within either district and is not historically significant.

- Project Schedule: (per OPM schedule dated September 8, 2016 and revised MSBA board schedule)
  - Module 3 - Preferred Schematic Board Meeting *(anticipated May 10, 2017)*
    - Feasibility Study Submittals
      - Preliminary Design Program *(due January 20, 2017, 8-10 wks prior to PSR)*
      - Preferred Schematic Report *(due March 23, 2017, 8 weeks prior PSR BM)*
    - Facilities Assessment Subcommittee Presentation *(March 29, 2017 / April 12, 2017 TBD - keep both dates open)*
  - Module 4 - Project Scope & Budget Board Meeting *(anticipated December 13, 2017)*
    - Schematic Design Submittal *(due November 9, 2017, 8 weeks prior BM)*

        - Schematic Design Submittal Notification Appendix 4C *(October 26, 2017 due 2 weeks prior SD submittal)*
- MSBA Policy:
    - MSBA cost caps:
        - $312/gsf construction cost
        - 8% site costs
        - 20% soft costs
        - 10% arch / 3.5% OPM basic service fees
    - MA 963 CMR 2.10: School Building Grant Program
        - 2.16(5) lists ineligible costs
        - 2.18(2) lists additional incentive points
    - Previous MSBA funding –
        - CA19943367 – A repair project that was removed from the reimbursement stream in FY2009 for failure to provide complete documentation for final audit – appears that it might have been included in C19963459. Total payments made by MSBA were $48,375 (last payment in FY2009). 1994 repair is over 20 years old; no recovery anticipated.
        - CA19963459 – Renovation of existing building and addition. Construction began 1996 and was completed in 1998. Total grant, net of refunding savings, was $54,115,680 according to the audit. MSBA paid $28,407,855 of the grant, with final payment in FY2016. 1998 repair is 18 years old as of 2016. Presumably will be over 20 years old by occupancy; no recovery anticipated.
        - 201101600505G –Roof green repair. Total grant $733,509. Completed October 1, 2012 (Coburn Hall) and is 4 years old as of 2016. If the roof is removed, recovery will be pro-rated based on anticipated 20 year life expectancy and occupancy date.
    - Base reimbursement changes every January, fixed at SD. *2015 base rate is 78.95 %, 2017 base rate is TBD*

- Updates:
    - Module 3 & 4 – on the MSBA website
    - DESE Chapter 74 program submission. Note: The only DESE Chapter 74 approved vocational technical educational program at Lowell High School is Marketing. District to confirm this isn't changing.
    - Building code & energy code – currently 8th ed / 2012 IECC (2015 IECC takes effect Jan 2, 2017), proposed 9th ed, 2015 IECC
    - Green policy – update in March 2015; LEED-S or NE-CHPS, currently under consideration for update

- Next Steps: Prepare/Submit a Preliminary Design Program

- OPM Reports

Re: Title Search for Current Lowell High School – Summary and Assessment

Dear City Manager Murphy:

Enclosed are the results of a title search conducted by the Law Department for all properties that constitute the Lowell High School ("LHS"). LHS consists of three buildings, located at Kirk Street, Father Morrissette Boulevard, and French Street/John Street (the "Freshman Academy"). Corresponding deeds are enclosed with this memorandum along with the research methodology employed.

A. Kirk Street

The Kirk Street building of LHS is derived from a series of parcels. The earliest conveyance to the City, for "Coburn Hall," dates from 1893 and has a deed restriction requiring the property be used for the "public education for youth." **See Exhibit A1**.

Historical records show that by 1922, the City expanded Coburn Hall into the LHS structure present today. The 1906 Lowell Atlas shows several lots in the area upon which this expansion was constructed on in 1922. These lots were bordered by Anne Street, French Street, and Kirk Street. **See Exhibit A2**. Based on these records, it is reasonable to infer that the land upon which the expansion was constructed had to be acquired by the City between 1906 and 1922. A search by the Engineering Department produced property cards for any property acquired by the City along Kirk and Anne Streets in that time frame. Based on this research, the following documents were produced:

- Book 545, Page 185 – Taking for LHS 1922 expansion: "...the City of Lowell takes the following described land for the purpose of erecting thereon a building to be used as a public school..." **See Exhibit A3**.
- City Engineer Land Cards and Related Deeds – Kirk Street Takings. **See Exhibit A4**.
- City Engineer Land Cards and Related Deeds – Anne Street Takings. **See Exhibit A5.**

B. Morrissette Blvd.

The Morrissette Blvd. property was acquired by the City through a deed between the City Development Authority and the City of Lowell, dated June 29, 1978, Book 2313, Page 190. **See Exhibit B1**. This in turn had been derived from property taken by the City Development Authority through eminent domain in two orders of taking: Order of Taking No. 10, dated September 26, 1966, Bk. 1770, Pg. 158 (**See Exhibit B2**); and Order of Taking No. 12, dated May 31, 1968, Bk. 1845, Pg. 189 (**See Exhibit B3**).

The June 29, 1978 deed was subject to a right of way granted to the Boston and Maine Corporation dated May 14, 1968, Bk. 1895, Pg. 607 (**See Exhibit B4**) and a 33 foot utility easement granted to the City of Lowell, dated August 29, 1969, Bk. 1898, Pg. 84. **See Exhibit B5**.

C. Freshman Academy – John Street/French Street

The LHS Freshman Academy consists of one building bordered by French, John, and Paige Streets. A search on the City's Geographic Information Systems (GIS) and Maps lists two parcels in this location: 55 French Street and 68 John Street. Both parcels are listed as owned by the City of Lowell:

The 68 John Street parcel was purchased by the City of Lowell from Boott Cotton Mills through quitclaim deed on December 17, 1895, Bk. 271, Pg. 578. **See Exhibit C1**. According to the 1896 Lowell Atlas, the property was used as a Manual Training School. In the 1906, 1924, and 1936 Lowell Atlases, the property was used as the LHS Annex. **See Exhibit C2**. The annex was built in 1902. **See Exhibit C3**. This conveyance was subject to an easement that a 19 foot wide passageway/backstreet be maintained between the two buildings.

The 55 French Street parcel was purchased by the City of Lowell from Merrimack River Savings Bank on December 12, 1938, Bk. 924, Pg. 374 (referenced site plan included: Plan Bk 17, Pg. 19 **See Exhibit C4**. On this property was constructed the Lowell Trade School in 1938-1940 **See Exhibit C3**.

In purchasing both parcels, the easement between the two buildings was extinguished. At least by 1977, the passage between the two buildings was no longer contiguous, as stairs had been constructed at each end of the 19 foot wide passageway. **See Exhibit C3**. The passage no longer exists with the construction of a single building on the site.

I hope assessment is of help and assistance to you. Please contact the Law Department should you have any additional questions.

Sincerely,

Elliott J. Veloso
Assistant City Solicitor

Middlesex ss. N Dist. Reg. of Deeds. Recorded Oct. 30, 1915, 12:45 P.M.

1 word, 1 letter over erasures & erasure

e.m. In Municipal Council, October 19, 1915. Voted, that pursuant to section 48 of chapter 25 of the Revised Laws and all acts in amendment and in addition thereto and in accordance with the provisions of section 21 of chapter 645 of the Acts of 1911, as well as section 30 of said chapter 645, the municipal council hereby authorizes the Mayor to sign and cause to be recorded in the Registry of Deeds for the County of Middlesex a statement that the City of Lowell takes the following described land for the purpose of erecting thereon a building to be used as a public school, the said land so taken in fee is described substantially as follows:- The following is a description of said parcel so taken in fee: On the westerly side of Kirk street, Joseph D. Jewett, trustee, and Grace J. Jewett of Arlington Mass., two thousand five hundred forty-eight and eight-tenths (2548.8) square feet of land with buildings.

Estate of Melinda W. Costello of Lowell three thousand one hundred eighty-six (3186) square feet of land with buildings.

Ida C. Braum of Lowell, two thousand eight hundred sixty-seven and four tenths (2867.4) square feet of land with buildings.

John Kearney of Lowell, five thousand two hundred three and eight tenths (5203.8) square feet of land with buildings.

Elizabeth J. Shumny of Lowell, two thousand eight hundred fourteen and three tenths (2814.3) square feet of land with buildings. James Crompton of

Lowell, City of
Taking.

Chelmsford, Mass. two thousand five hundred forty-eight and eight tenths (2548.8) square feet of land with buildings.
Mary A. Pillsbury of Lowell, two thousand five hundred forty eight and eight tenths (2548.8) square feet of land with buildings.
Children's Home of Lowell, two thousand eight hundred fourteen and three tenths (2814.3) square feet of land with buildings.
Lowell Day Nursery Association, five thousand forty four and five tenths (5044.5) square feet of land with buildings.
On the easterly side of Anne street, Merrimack Mfg. Co. of Lowell, five thousand eight hundred thirty-one and three tenths (5831.3) square feet of land with buildings.
Anna F. and Elizabeth W. Anderson of Lowell, five thousand two hundred thirty-five and two tenths (5235.2) square feet of land with buildings.
Joseph and Eugenie Gagnon of Lowell, five thousand two hundred thirty-four and six tenths (5234.6) square feet of land with buildings.
Almina Chapman of Lowell, five thousand seven hundred nine and nine tenths (5709.9) square feet of land with buildings.
Genoa Club of Lowell, seven thousand one hundred thirty-seven (7137) square feet of land with buildings.
All of the above parcels enumerated, being bounded and described as follows: Beginning at a point in the easterly line of said Anne street at the intersection of the division line between land of the Genoa Club and land of the City of Lowell with the said easterly line of Anne street; thence running northeasterly by said easterly line of Anne street at an angle of ninety degrees, ten seconds (90° - 10") with said division line between land of the Genoa Club and land of the City of Lowell, now or formerly, three hundred six and twenty six hundredths (306.26) feet to a point at land, now or formerly of Inez Herman Smithson; thence running southeasterly by land of said Inez Herman Smithson at an angle of of ninety degrees, ten sec-

seconds (9.0°-10") ninety-five and nineteen hundredths (95.19) feet to a nail in the fence at land of the Proprietors of Kirk Street Church, now or formerly, thence running southwesterly by land of said Proprietors of Kirk Street Church, now or formerly at an angle of eighty-nine degrees, fifty-nine minutes, forty seconds (89°-59'-40"), twenty-seven and seventy-six hundredths (27.76) feet to a nail in the fence at land of Sowell Day Nursery Association; thence running southeasterly by land of said Proprietors of Kirk Street Church, now or formerly, at an angle of two hundred seventy degrees (270°) one hundred six and two tenths (106.2) feet to a cross cut in walk in the westerly line of said Kirk street; thence running southwesterly by the said westerly line of Kirk street, at an angle of ninety degrees (90°) two hundred seventy-eight and five-tenths (278.5) feet to a nail in the fence at land of the City of Sowell, now or formerly; thence running northwesterly by land of the said City of Sowell at an angle of ninety degrees (90°) two hundred one and thirty-six hundredths (201.36) feet to the point of beginning as shown on plan on file in the office of the City Engineer, entitled, "Plan of land to be taken by the City of Sowell for New High School, August, 1915." The said land above described having been taken in fee by right of eminent domain pursuant to an order of the Municipal Council passed and adopted October 9, 1915. Passed, every member voting "yea". Stephen Flynn, Clerk.

City of Sowell City Clerk's Office, October 19, 1915.

Spaulding to Lowell Inst for Savings

See Discharge B. 826 P. 148.

Wm. Mills S. Spaulding, being unmarried, and Arianna T. Spaulding, wife of Bert G. Spaulding, both of Dunstable, Middlesex County, Massachusetts for consideration paid, grant to the Lowell Institution for Savings a body corporate located at Lowell Middlesex County, Massachusetts, with mortgage covenants to secure the payment of Four Thousand Dollars in one year with six per cent interest per annum payable semi-annually, and lawful interest upon any and all unpaid semi-annual instalments of interest in the nature of damages for detention from the time the same become payable, as provided in our note of even date, the land in said Dunstable with the buildings thereon containing about one hundred and ten acres and bounded and described as follows: Beginning at a stone wall on the easterly side of Forest Street, so called, leading past the house formerly occupied by Jonas Kendall, deceased, and at land formerly of Asa D. Butterfield, deceased, thence easterly and southerly by said Butterfield land to the Burying Ground thence easterly by said Burying Ground and the road leading from Dunstable to Tyngsborough known as Main Street to land now or formerly of Laurence Brooks, thence northerly by said Brooks land to land formerly of said

foregoing power, the grantor or her heirs or assigns will upon request execute, acknowledge, and deliver to the purchaser or purchasers a deed or deeds of release confirming such sale; and that, until default in the performance or observance of any of the conditions of this deed, the grantor and her heirs and assigns may hold and enjoy the granted premises and receive the rents and profits thereof. And I do hereby for myself and my heirs, executors, administrators and assigns constitute and appoint the grantee, its successors and assigns the attorney or attorneys irrevocable of the said grantor and her successors in title to the granted premises to execute and deliver to such purchaser a full transfer of all policies of insurance on the buildings upon the land covered by this mortgage at the time of such sale or to cancel the same for such price and upon such terms as it or they may deem best, and to apply any proceeds therefrom to the payment of the indebtedness secured by this mortgage. In Witness Whereof I the said Sophia A. Pierce, widow, have hereunto set my hand and seal this fifth day of August in the year one thousand nine hundred and eight. Sophia A. Pierce (seal)

Kearney to Kearney

Five Dollars ($5.00)
U.S.R. Stamps Cancelled
J.K. May 21 1915

Know all Men by these Presents, that I, John Kearney, of Lowell, in the County of Middlesex and Commonwealth of Massachusetts, in consideration of One Dollar and other good and valuable considerations to me paid by Joseph P. Kearney, of said Lowell, the receipt whereof is hereby acknowledged, do hereby remise, release, and forever quitclaim unto the said Joseph P. Kearney two certain adjoining tracts of land situated in said Lowell and thus bounded and described: First: A certain tract of land with the buildings thereon situated on the westerly side of Kirk street in said Lowell, containing two thousand one hundred sixty and 19/100 square feet and bounded and described as follows: Beginning on the westerly side of said Kirk street at a point which is northerly of and twenty-seven feet distant from the northeasterly corner of land conveyed by the Proprietors of the Locks and Canals on Merrimack River to Harlin Pillsbury by deed dated April

29, 1848, thence running westerly at a right angle to Kirk street ninety-eight and 9/100 feet; thence northerly at a right angle twenty-two feet; thence easterly at a right angle ninety-eight and 9/100 feet to Kirk street; thence southerly at a right angle twenty-two feet on Kirk street to the point of beginning; together with the right as appurtenant to the premises, but in common with the owners of the adjoining and neighboring estates to use the pipe or pipes now laid down across Kirk street and to draw water by means of said pipes from the well connected therewith, and together with all the rights of drainage and all other rights, easements and privileges to said premises belonging. Said premises are conveyed subject to all building and sidewalk conditions and restrictions which may exist thereon by force of a deed of said premises from said Proprietors, dated Jan. 10, 1844, recorded with Middlesex South District Deeds, book 498, page 348, and by force of all lawful subsequent deeds of said premises from those claiming under said Proprietors.

Second: A certain piece of land in said Lowell with the buildings thereon containing two thousand six hundred fifty-one and 3/100 square feet and thus bounded:- Beginning on the westerly side of Kirk street at a point which is northerly of and forty-nine feet distant from the northeasterly corner of land conveyed by said Proprietors to Harlin Pillsbury by deed dated April 29, 1848, thence running westerly at a right angle to said Kirk street ninety-eight and 9/100 feet; thence northerly at a right angle twenty-seven feet; thence easterly at a right angle ninety-eight and 9/100 feet to said Kirk street; thence southerly at a right angle twenty-seven feet to the point of beginning; together with all rights, easements and privileges to said premises belonging and subject to all building and sidewalk conditions and restrictions which may exist thereon by force of a deed from said Proprietors dated July 12, 1844, recorded in Middlesex South District Registry, book 446, page 329. Being the same premises conveyed to me by Helen A. Whittier by deed dated October 28, 1913, and recorded with Middlesex North District Deeds, book 518, page 61. This con-

veyance is made subject to the several mortgages mentioned in said deed to me and also the taxes for the current year, all of which the grantee assumes and agrees to pay. To have and to hold the granted premises, with all the privileges and appurtenances thereto belonging, to the said Joseph P. Kearney and his heirs and assigns, to their own use and behoof forever. And I do hereby for myself and my heirs, executors, and administrators, covenant with the said grantee and his heirs and assigns, that the granted premises are free from all incumbrances made or suffered by me, except as aforesaid, and that I will, and my heirs, executors, and administrators shall warrant and defend the same to the said grantee and his heirs and assigns forever against the lawful claims and demands of all persons claiming by, through, or under me, except as aforesaid, but against none other. In witness whereof I the said John Kearney being unmarried, first having affixed and cancelled the United States Internal Revenue stamps required by law, hereunto set my hand and seal this tenth day of May in the year one thousand nine hundred fifteen.

Middlesex Co-op. Bank - Lowell to Wood et al. Discharge.

Know all Men by these Presents that the Middlesex Co-operative Bank, of Lowell, in the County of Middlesex and Commonwealth of Massachusetts, the mortgagee named in a certain mortgage given by Jonathan Wood and George E. Schermerhorn dated January 26, A. D. 1912, and recorded with Middlesex North District Deeds, Lib. 482, Fol. 132, hereby acknowledges that it has received full payment and satisfaction of the debt secured thereby, and of the conditions therein contained, and in consideration thereof it hereby cancels and discharges said mortgage. In witness

n for the non-payment of a tax assessed thereon to Martha A. Balch in the year 1911, which real estate is described as follows, viz., Martha A. Balch, 510 square feet of land, more or less, on the south side of Westford street, with land now or formerly of Minnie F. Bradt on the east, Amelia F. Downing on the west, Albert A. Davis on the south and Westford street on the north. And whereas Grace W. Balch of Lowell in the County of Middlesex and State of Massachusetts alleges that she is now the owner of said property and as owner thereof desires to redeem the same from the sale in pursuance of Chapter 490, Sections 59-61, Part II of the Acts of 1909. And Whereas the said Grace W. Balch has this day paid to me the following sums to redeem said property from said sale to wit:

Amount for which it was sold,	7.66
Interest at 8% from date of sale,	.03
Examination of Title,	
Deed of Release,	3.00
Recording,	.95
Additional sum as per statute,	1.00
	12.64

Therefore, I, the said Collector of Taxes, for the said City of Lowell hereby certify that I have received from the said Grace W. Balch the said sum of Twelve Dollars and sixty four cents ($12.64) for the purpose aforesaid Dated this 14th day of October A.D. 1913.

Smith to Storey

Know all Men by these Presents tha
I, Lewis Smith of New York in the State of New York
in consideration of One Dollar to me paid by Augus
M. Storey, of Lowell, in the County of Middlesex and Co
monwealth of Massachusetts the receipt whereof is here
by acknowledged, do hereby remise, release, and foreve
quitclaim unto the said Augusta M. Storey her heir
and assigns all my right title and interest in and
to the following described property a certain lot of
land with the buildings thereon, situated in said
Lowell, on the southerly side of Westford street co
taining twenty-six thousand five hundred eighty-on
and 93/100 square feet and being lots numbered twenty
seven (27) and twenty-nine (29) on "Plan of Tyler Park

Lands, Lowell, belonging to Wm. H. Bent Feb, 1893 Osgood & Snell" recorded with Middlesex North District Registry of Deeds and being the same premises conveyed to the late John A. Storey by deed of Wm. H. Bent dated April 28, 1897 and recorded in said Registry Book 285, Page 180 and these premises are conveyed subject to the agreements therein mentioned or referred to.

Also a certain piece or parcel of land with the buildings thereon, situated in said Lowell, on the westerly side of Kirk street, containing about twenty six hundred two and 3/10 square feet and being the same premises conveyed to said John A. Storey by deed of Mary W. Nickerson, dated March 5, 1891 and recorded in said Registry Book 222, Page 118.

Also a certain lot of land with the buildings thereon situated on the northerly side of Westford street in said Lowell containing seventeen hundred and sixty square feet more or less and being the same premises conveyed to said John A. Storey by deed of Samuel Dana Kittredge, dated July 12, 1893 and recorded in said Registry, Book 246, Page 506 and these premises are conveyed subject to the rights and reservations mentioned or referred to in said deed.

Also a certain lot of land, situated in said Lowell, on the easterly side of Boylston street, containing ten thousand one hundred and sixteen square feet, more or less, and being lot numbered ninety five (95) as shown on a plan entitled "Plan of Land in Lowell Mass. belonging to Shepard Russell and Fuller, March 1891; Melvin B. Smith, C. E., and being the same premises conveyed to said John A. Storey, by deed of John A. Storey, Mortgagee dated Jan. 1, 1902 and recorded in said Registry Book 338 Page 553

Also two certain lots of land situated in said Lowell on the northerly side of Calvin street containing ten thousand seven hundred and four square feet of land, and being lots numbered ninety (90) and ninety one (91) as shown on a plan entitled "Plan of Land in Lowell and Tewksbury belonging to Shepard Russell and Fuller March 1891" and being the same premises conveyed to said John A. Storey by deed of Nettie E. Smith dated, and recorded in said Registry, Book 337, Page 471 and these premises are conveyed subject to the conditions restrictions or reservations mentioned or referred to in said deed.

Also a certain lot of land with the buildings thereon sit-

uated in said Lowell on the southerly side of Appleton street and being lot numbered thirty (30) on N. R. Harbours plan of land and Buildings in Lowell, belonging to the Hamilton Manufacturing Company dated May 14, 1863, and recorded in said Registry. A strip of land twelve feet in depth across the whole width of this lot and at the southerly end thereof is to remain open forever as a passageway as laid down on said plan to be used as heretofore. Being the same premises conveyed to said John A. Storey by deed of Alice E. Nesmith et al, by their deed dated October 15, 1896 and recorded in said Registry Book 280 Page 555 and these presents are conveied subject to the rights mentioned or referred to in said deed. To have and to hold the granted premises, with all the privileges and appurtenances thereto belonging, to the said Augusta M. Storey and her heirs and assigns, to their own use and behoof forever. And I do hereby, for myself and my heirs, executors and administrators, covenant with the said grantee and her heirs and assigns that the granted premises are free from all incumbrances made or suffered by me and that I will and my heirs, executors and administrators shall warrant and defend the same to the said grantee and her heirs and assigns forever against the lawful claims and demands of all persons claiming by, through, or under me but against none other. And for the consideration aforesaid I, S. Smith, wife of the grantor do hereby release unto the grantee and her heirs and assigns all right of or to both dower and homestead in the granted premises, and all other rights and interests therein. Storey to Thompson

Know all Men by these Presents that I Augusta M. Storey of Lowell in the County of Middlesex and Commonwealth of Massachusetts in consideration of One Dollar and other good and valuable considerations to me paid by Harry A. Thompson of said Lowell the receipt whereof is hereby acknowledged, do hereby remise, release and forever quitclaim unto the said Harry A. Thompson one undivided third of a certain lot of land with the buildings thereon situated on the southerly side of Westford street in said Lowell containing twenty six thousand five hundred eighty one and 93/100 square feet, and being lots numbered twenty seven (27) and twenty nine (29) on a plan entitled "Plan of Tyler Park Lands Lowell belonging to William H. Bent, February 1893, Osgood & Snell" and recorded with Middlesex North District Registry Deeds bounded as follows: Easterly by land now or formerly of Bennett and Gibson one hundred ninety six and 42/100 feet, southerly by lots numbered twenty eight (28) and thirty (30) on said plan one hundred forty eight and 75/100 feet, westerly by lot numbered thirty one (31) on said plan one hundred sixty two and 59/100 feet, and northerly by said Westford street one hundred fifty one and 15/100 feet; being all the same premises conveyed to my husband John A. Storey (late of said Lowell deceased intestate) by William H. Bent by deed dated April 28, 1897, and recorded with said Registry Deeds Book 285, Page 180, and being the first lot described in a deed to me from Lewis Smith dated October 1907, to be recorded herewith. To have and to hold the granted premises, with all the privileges and appurtenances thereto belonging, to the said Harry A. Thompson and his heirs and assigns, to their own use and behoof forever. And I do hereby, for myself and my heirs, executors, and administrators, covenant with the said grantee and his heirs and assigns that the granted premises are free from all incumbrances made or suffered by me, except certain building restrictions created in said deed to John A. Storey, and taxes for the current year 1910 which the grantee hereby assumes and agrees to pay; and that I will and my heirs execu-

mortgage, full payment and satisfaction of the same, and in consideration thereof, I do hereby cancel and discharge said mortgage, and release and quitclaim unto the said James S. Somersett and his heirs and assigns forever the premises thereby conveyed In witness whereof I have unto set my hand and seal this twenty-fifth day of March A.D. 1909.

Adams' Exor. to Crompton

Know all Men by these Presents that whereas I, John J. Harvey, of Lowell in the County of Middlesex and Commonwealth of Massachusetts, as Executor of the will of Charles E. Adams, late of Lowell in said County deceased, by virtue of a license granted to me on the thirteenth day of September, 1910, by the Probate Court for the County of Middlesex in said Commonwealth, sold the real estate of the said deceased, hereinafter described, at public auction, on the fifteenth day of October 1910, to James Crompton of said Lowell for the sum of Forty One Hundred Fifty Dollars, which amount was bid by the said James Crompton, and was the highest bid made therefor at said auction. **Now therefore** in consideration of the said sum of Forty One Hundred Fifty Dollars to me paid by the said James Crompton the receipt whereof is hereby acknowledged, I do, as Executor as aforesaid, and by virtue of the aforesaid license, hereby grant, bargain, sell, and convey unto the said James Crompton a certain parcel of land with the buildings thereon, situated on the westerly side of Kirk street in said Lowell, and bounded and describ-

ed as follows: Beginning on the westerly side of said Kirk street at a point distant one hundred two and one-half feet northerly from the northeasterly corner of land conveyed by the Proprietors of the Locks and Canals on Merrimack River to Harlin Pillsbury by deed dated April 29, 1843; thence running westerly at a right angle to said Kirk street ninety-eight and 19/100 feet; thence northerly at a right angle twenty-four feet; thence easterly at a right angle ninety eight and 19/100 feet to said Kirk street; thence southerly at a right angle along said Kirk street twenty four feet to the point of beginning. Containing two thousand three hundred fifty-six and 56/100 square feet more or less and being the same premises conveyed to Mary B. Barrett by Caroline R. D. Blanchard and others by deed dated November 1, 1878 and recorded in the Registry of Deeds for the Northern District of said County of Middlesex, Book 131, Page 357. The deceased, said Charles E. Adams, derived title to said premises as devisee under the will of his deceased wife, Idam M. Adams, late of said Lowell, said Idam M. Adams having acquired title to the premises as sole heir-at-law of her mother, said Mary Barrett, late of said Lowell, deceased, intestate. This conveyance is made subject to the taxes for the year 1910 which the grantee hereby assumes and agrees to pay. **To have and to hold** the granted premises, with all the privileges and appurtenances thereto belonging, to the said James Crompton and his heirs and assigns to their own use and behoof forever. And I hereby covenant with the grantee and his heirs and assigns that notice of the time and place of said sale was given according to the order of the said Probate Court, and that said premises were sold accordingly at public auction as above set forth. **In witness whereof** I hereunto set my hand and seal this twenty ninth day of October in the year one thousand nine hundred and ten.

to both Dower and Homestead in the granted premises In witness whereof we the said Edward W. Trull and Ellen D. Trull have hereunto set our hands and seals this ninth day of October in the year nineteen hundred and five. Edward W. Trull (seal) Ellen D. Trull (seal) Commonwealth of Massachusetts. Middlesex ss. October 9th, 1905. Then personally appeared the within-named Edward W. Trull and acknowledged the foregoing instrument to be his free act and deed, before me. Wm. Trull Sheppard Justice of the Peace. Middlesex ss. No. Dist. Reg. of Deeds. Rec'd Oct. 10, 1905. 8:45 a. m.

Trull to Children's Home

Know all Men by these Presents that I Edward W. Trull of Tewksbury in the County of Middlesex and Commonwealth of Massachusetts in consideration of One Dollar and other good and valuable considerations to me paid by the Children's Home of Lowell, a Corporation duly established under the laws of said Commonwealth and located in said Lowell in said County, the receipt whereof is hereby acknowledged, do hereby remise, release, and forever quitclaim unto the said Children's Home its successors and assigns a certain house and land in said Lowell, said land containing two thousand six hundred two and 3/100 square feet, more or less, and bounded as follows: viz Beginning on the westerly side of Kirk Street at a point which is northerly of and 150 50/100 feet distant from the north east corner of land conveyed by the Proprietors of the Locks and Canals on the Merrimac River to Harlan Pillsbury by deed dated April twenty nine, 1843, thence running at a right angle to said Kirk Street, westerly 98 19/100 feet: thence at a right angle northerly 26 50/100 feet: thence at a right angle easterly 98 19/100 ft. to said Kirk Street: thence southerly at a right angle 26 50/100 feet, on said Kirk Street to the point of beginning. Being the same premises conveyed to me by Hattie M. Campbell by her deed dated October ninth, 1905 and recorded with Middlesex North District Registry of Deeds, Book 381 Page 182. To Have and To Hold the granted premises, with all the privileges and appurtenances thereto belonging to the said Childrens Home and its successors and assigns to their own use and behoof forever. And I do hereby for myself and my heirs, executors and administrators, covenant with the said grantee and its successors and assigns that the granted premises are free from all incumbrances made or suffered by me, except the municipal taxes for the current year which the grantee assumes and agrees to pay, al-

so a mortgage of twenty-five hundred dollars due the Central Savings Bank on note dated Oct. 9, 1905, which the grantee also assumes and agrees to pay, and that I will and my heirs, executors, and administrators shall warrant and defend the same to the said grantee and its successors and assigns forever against the lawful claims and demands of all persons claiming by, through, or under me, except as aforesaid but against none other. And for the consideration aforesaid I, Ellen D. Trull, wife of said Edward W. Trull do hereby release unto the said grantee and its successors and assigns all right of or to both Dower and Homestead in the granted premises, and all other rights and interests therein. In witness whereof we the said Edward W. Trull and Ellen D. Trull hereunto set our hands and seals this ninth day of October in the year one thousand nine hundred and five. Edward W. Trull (seal) Ellen D. Trull (seal) Signed, sealed and delivered in presence of, Commonwealth of Massachusetts. Middlesex ss. Lowell, October 11th, 1905. Then personally appeared the above-named Edward W. Trull and acknowledged the foregoing instrument to be his free act and deed, before me. James F. Savage Justice of the Peace.

Attest Joseph P. Thompson Register

Collector's Office, August 8th, 1905. I, Andrew G. Stiles, Collector of Taxes for the City of Lowell, hereby certify that the Assessors of Taxes of said City of Lowell, in the list of assessments for taxes which they committed to me to collect for the year one thousand nine hundred and three, duly assessed Edward H. Morse the sum of ninety dollars and fifty seven cents (including two dollars and eighty five cents for street watering) as owner of the real estate situated and described as follows, viz: Ward 7. Pct. 2. Edward H. Morse, 5279 square feet of land, more or less, with buildings thereon, situate # 785 Broadway Street. And I further certify that proceedings have been commenced by me for the sale of said real estate for said tax, and that Warren P. Smith who claimed to be the holder of a mortgage thereon, has paid to me the sum of one hundred two dollars and fifty cents, being the amount of said tax, with interest, costs and charges, the receipt of which I hereby acknowledge, said receipt having been demanded by said mortgagee. Andrew G. Stiles Collector of Taxes for the City of Lowell. S. Middlesex, ss. Lowell, Mass. August 8th 1905.

Wood a certain lot of land, with the buildings thereon, containing about seven thousand one hundred forty-four square feet, situated on the easterly side of Anne street in said Lowell, the buildings on said premises being numbered 25 on said Anne street, and thus bounded: Beginning at a point in the easterly line of said Anne street and at the southwesterly corner of the granted premises and at the northwesterly corner of land of the City of Lowell, whereon stands the High School, so called; thence easterly at about a right angle on said City of Lowell land ninety-five and 25/100 feet, more or less, to land supposed to belong to the Harriet B. Jewett heirs; thence northerly at about a right angle on said last mentioned land, on land supposed to belong to Melinda W. Costello and on land supposed to belong to Ida C. Braun, seventy-five feet, more or less, to land supposed to belong to Joseph F. Robarge; thence westerly at about a right angle on said Robarge land ninety-five and 25/100 feet, more or less, to said Anne street; thence southerly at about a right angle along said Anne street seventy-five feet, more or less, to the point of beginning. Together with any and all rights that said grantors may have in said Anne street, and in and to the land included within the limits of said Anne street. Being the same premises, so far as we have title thereto, conveyed to George H. Carleton by the Proprietors of the Locks and Canals on Merrimack River by deed dated June 15, 1844, and recorded with Middlesex South District Deeds, book 444, page 444. Subject to the conditions set forth in said deed so far as the same are now in force and applicable to the granted premises. Our title to said premises is derived as heirs at law of Mary H. Tweed, who was the heir at law

of George W. Carleton, said Mary H. Tweed and said George W. Carleton being the heirs at law of George H. Carleton; see Middlesex Probate Records. Subject to taxes and assessments for the year 1912. To have and to hold the granted premises, with all the privileges and appurtenances thereto belonging to the said Elliot F. Wood and his heirs and assigns, to their own use and behoof forever. And we do hereby, for ourselves and our heirs, executors and administrators, covenant with the said grantee and his heirs and assigns, that the granted premises are free from all incumbrances made or suffered by us, except as aforesaid, and that we will and our heirs, executors and administrators shall warrant and defend the same to the said grantee and his heirs and assigns forever against the lawful claims and demands of all persons claiming by, through or under us, except as aforesaid, but against, none other. And for the consideration aforesaid, we, Percy de F. Warner, husband of the said Brenda T. Warner, and Bertha H. Tweed, wife of the said Gordon Tweed, do hereby respectively release unto the said grantee and his heirs and assigns, all estate by the curtesy or otherwise, and all right of or to both dower and homestead in the granted premises, and all rights by statutes and all other rights and interests therein. In witness whereof, we, the said Brenda T. Warner, Percy de F. Warner, Gordon Tweed and Bertha H. Tweed have hereunto set our hands and seals this thirty first day of July 1912.

Wood to Genoa Club. Lowell.

Know all Men by these Presents that I, Elliot F. Wood, of Lowell, in the County of Middlesex and Commonwealth of Massachusetts, in consideration of One Dollar and other valuable considerations to me paid by the Genoa Club, a corporation organized under the laws of said Commonwealth and located at said Lowell, the receipt whereof is hereby acknowledged, do hereby remise, release, and forever quitclaim, unto the said Genoa Club, that parcel of land with the buildings thereon containing about seven thousand one hundred and forty-four (7144) square feet, situated on the southeasterly side of Anne street in said Lowell, the buildings on said premises being numbered 25 on said Anne street, and thus bounded: Beginning at a point in the southeasterly line of said Anne street and at the westerly corner of the granted premises, and at the northerly corner of land of the City of Lowell whereon stands the High school so called; thence southeasterly at about a right angle on said City of Lowell land ninety-five and 25/100 (95.25) feet, more or less, to land supposed to belong go the heirs of Harriet B. Jewett; thence northeasterly at about a right angle on said last mentioned land; on land supposed to belong to Melinda W. Costello and on land supposed to belong to Ida C. Braun seventy-five (75) feet, more or less, to land supposed to belong to Joseph T. Robarge; thence northwesterly at about a right angle on said Robarge land ninety-five

and 2‰ (95.26) feet, more or less, to said Anne street; thence southwesterly at about a right angle along said Anne street seventy-five (75) feet, more or less, to the point of beginning. Together with any and all rights which the grantor may have in said Anne street and in and to the land included within the limits of said Anne street. Being the same premises to me conveyed by Gordon Tweed et al by deed of even date and to be recorded in the Registry of Deeds for the Northern District of said County herewith. Subject to the restrictions referred to in said deed so far as the same are now in force and applicable to the granted premises. The above described premises are conveyed subject to a mortgage given by me to The Central Savings Bank of even date and to be recorded in said Registry herewith for the sum of $15000. To have and to hold the granted premises, with all the privileges and appurtenances thereto belonging, to the said Genoa Club and its successors and assigns, to its and their own use and behoof forever. And I do hereby for myself and my heirs, executors, and administrators, covenant with the said grantee and its successors and assigns, that the granted premises are free from all incumbrances made or suffered by me, except as aforesaid, and except all taxes and other municipal assessments for the current year 1912 which the grantee assumes and agrees to pay; and that I will and my heirs, executors, and administrators shall, warrant and defend the same to the said grantee and its successors and assigns forever against the lawful claims and demands of all persons claiming by, through, or under, except as aforesaid, but against none other. In witness whereof I the said Elliot F. Wood, being unmarried, hereunto set my hand and seal this thirty-first day of July in the year one thousand nine hundred twelve.

Signed and sealed
in the presence of
James C. Warner.

Robarge to Chapman.

Know all Men by these Presents, that I, Joseph F. Robarge, of Lowell, in the County of Middlesex and Commonwealth of Massachusetts, in consideration of One Dollar and other valuable considerations to me paid by Almira Chapman, wife of For-

rust H. Chapman, of Manchester in the County of Hillsborough and State of New Hampshire, the receipt whereof is hereby acknowledged, do hereby give, grant, bargain, sell and convey unto the said Almira Chapman, a certain parcel of land with the buildings thereon situated on the southeasterly side of Anne street in said Lowell, containing six thousand one hundred ninety-one and 40/100 (6191.40) square feet, more or less, and thus bounded and described: Beginning on the southeasterly side of said Anne street at the northerly corner of land conveyed by the Proprietors of the Locks and Canals on Merrimack River to George H. Carleton by deed dated January 13, 1844, and recorded in the Registry of Deeds, for said County of Middlesex (now Southern District) book 438, page 284; thence southeasterly at a right angle to said Anne street one hundred three and 19/100 (103.19) feet on said Carleton land; thence northeasterly at a right angle sixty (60) feet; thence northwesterly at a right angle one hundred three and 19/100 (103.19) feet to said Annestreet; thence southwesterly at a right angle sixty (60) feet on said Anne street at the point of beginning. Being the same premises conveyed by the Lowell Machine shop to Henrietta Robarge by deed dated January 8, 1906, and recorded in the Registry of Deeds for the Northern District of said County of Middlesex, book 386, page 534. This conveyance is made with the benefit of and subject to all rights, restrictions, conditions, provisions, stipulations, covenants and agreements relating to the above described premises as set forth, contained or referred to in said last mentioned deed. The title of said Joseph F. Robarge to said premises is derived under a deed given by Warren F. Robarge dated September 24, 1910, and recorded in said last mentioned Registry, book 456, page 543, and also as one of the heirs-at-law of his late wife, Henrietta Robarge, who deceased, intestate, April 24, 1908, and whose estate has been duly probated in the Probate Court for said County of Middlesex. The above described premises are conveyed subject to the taxes and other municipal assessments for the years 1911 and 1912. To have and to hold the granted premises, with all the privileges and appurtenances

thereto belonging, to the said Almira Chapman and her heirs and assigns, to their own use and behoof forever. And I hereby for myself and my heirs, executors, and administrators, covenant with the grantee and her heirs and assigns that I am lawfully seized in fee-simple of the granted premises; that they are free from all encumbrances; except as aforesaid; that I have good right to sell and convey the same as aforesaid; and that I will and my heirs, executors, and administrators shall warrant and defend the same to the grantee and her heirs and assigns forever against the lawful claims and demands of all persons, except as aforesaid. In witness whereof I the said Joseph F. Robarge, being unmarried, hereunto set my hand and seal this twenty-fifth day of November in the year one thousand nine hundred and twelve.

DEED

City Development Authority, a public body, politic and corporate, duly organized and existing pursuant to Massachusetts General Laws, Chapter 610 of the Acts of 1967, having an usual place of business in Lowell, Middlesex County, Massachusetts (the Grantor) in consideration of One Dollar ($1.00) paid grant unto the CITY OF LOWELL, a municipal corporation duly established by law and having its usual place of business at City Hall in Lowell, Middlesex County, Massachusetts (the Grantee) with QUITCLAIM COVENANTS, the following parcel of land:

A certain parcel of land situated in Lowell, Easterly side of Arcand Drive and the Southerly side of a new street containing 143,129 square feet, more or less, and being shown as Lot 7C on a plan entitled "Compiled Disposition Map of Lot 7C in Lowell, Massachusetts, Northern Canal Renewal Area, Project No. Mass. R-16, Scale 1"=100', dated November 29, 1968, Dana F. Perkins & Sons, Inc. Civil Engineers & Surveyors Lowell and Reading, Massachusetts", which plan is to be recorded herewith and thus bounded and described:

Beginning at a point at Arcand Drive and Lot 7A as shown on said plan

Thence N 17° 07' 25" E 129.03 to a point

Thence along a curved line at a radius of 44.00 feet and a length of 69.12 feet to a point on French Street Extension

Thence S 72° 52' 35" E 313.32 feet to a point

Thence along a curved line with a radius of 1260.00 feet and a length of 194.85 to land of the City of Lowell as shown on said plan

Thence S 64° 00' 58" E 27.47 feet to a point

Thence S 48° 24' 12" W 431.20 feet to a point

Thence N 41° 40' 42" W 414.61 feet to Arcand Drive the point of beginning

Subject to a right of way granted to the Boston and Maine Corporation dated May 14, 1968, recorded in Middlesex North District Registry of Deeds, Book 1895, Page 607.

Subject also to a 33.00 foot Utility Easement granted by the City Development Authority to the City of Lowell, dated August 29, 1969, recorded in said Registry of Deeds, Book 1898, Page 84.

Being a portion of the premises taken by eminent domain by the City Development Authority, by Order of Taking, No. 12, dated May 31, 1968 and recorded with said Registry of Deeds Book 1845, Page 189 and Order of Taking No. 10, dated September 26, 1966 recorded in said Registry of Deeds, Book 1770, Page 158.

See Pl. Bk 126-142

The above described parcel is conveyed subject to the following:

A. Easements specified and shown as continuing or to be created or reserved in the Urban Renewal Plan for the Northern Canal Renewal Area, Project No. Mass. R-16 (hereinafter called the "Redevelopment Plan"), a copy of which is on file in the office of the City Clerk of the City of Lowell.

B. All restrictions, rights, easements and reservations which are excluded and excepted and specifically set forth in said abovementioned Order of Taking.

The grantee covenants and agrees for himself, his heirs and assigns, that the grantee and his heirs and assigns shall

(i) devote the granted premises to, and only to and in accordance with the uses specified in the Redevelopment Plan, as hereafter amended and extended from time to time; and

(ii) not discriminate upon the basis of race, color, religion, sex and national origin in the sale, lease, or rental or in the use or occupancy of the granted premises or any improvements erected or to be created thereon, or any part thereof.

The agreements and covenants provided in the preceding paragraph shall be covenants running with the land and they shall, in any event, and without regard to technical classification or designation, legal or otherwise, and except only as otherwise specifically provided herein, be, to the fullest extent permitted by law and equity, binding for the benefit and in favor of, and enforceable by, the grantor, its successors and assigns, the City of Lowell, and any successor in interest to the grantee of the granted premises or any part thereof, and the United States of America (in the case of the agreement and covenant provided in clause (ii) of the preceding paragraph) against the grantee, his heirs and assigns, to or of the granted premises or any part thereof or any interest therein, and any party in possession or occupancy of the granted premises or any part thereof, provided however, that the agreement and covenant provided in clause (i) of said preceding paragraph shall remain in effect until August 28, 1992 (at which time such agreement and covenant shall terminate) and those provided in clause (ii) shall remain in effect without limitations as to time; and provided, further, however, that such agreements and covenants shall be binding on the grantee, his heirs and assigns, and each party in possession or occupancy, respectively only for such period as they shall have title to or an interest in or possession or occupancy of the granted premises or part thereof. In amplification and not in restriction, of

the foregoing provisions, it is intended and agreed that the grantor, its successors and assigns, and the City of Lowell, shall each be deemed a beneficiary of the agreement and covenant provided in the preceeding paragraph, and the United States of America shall be deemed a beneficiary of the agreement and covenant provided in clause (ii), both for and in their or its own right and also for the purposes of protecting the interests of the community and other parties, public or private, in whose favor or for whose benefit such agreements and covenants have been provided. Such agreements and covenants shall run in favor of the grantor, its successors and assigns, the City of Lowell, and the United States of America, for the entire period during which such agreements and covenants shall be in force and effect without regard to whether the grantor, its successors and assigns, or the City of Lowell or the United States of America has at any time been, remains, or is an owner of any land or interest therein, to, or in favor of, which such agreements and covenants relate. The grantor, its successors and assigns (or, in the case of its failure, refusal or dissolution, then the City of Lowell), shall have the right, in the event of any breach of any such agreement or convenant, and the United States of America shall have the right in the event of any breach of the agreement or covenant provided in clause (ii) of the preceeding paragraph, to exercise all the rights and remedies, and to maintain any actions at law or suits in equity or other proper proceedings to enforce the curing of such breach of agreement or covenant, to which it or any other beneficiaries of such agreement or convenant may be entitled.

This conveyance is to effect the purposes and intents of Chapter 353 of Act of 1976, of the General Laws of the Commonwealth of Massachusetts.

IN WITNESS WHEREOF, on the 29th day of JUNE, 1978 at Lowell, Massachusetts, the parties hereto have cuased this instrument to be signed, sealed, and delivered by its duly authorized officers or representatives respectively.

LOWELL REDEVELOPMENT AUTHORITY

Northern Canal Renewal Area, Project No. Mass. R - 16

ORDER OF TAKING # 10

WHEREAS, Lowell Redevelopment Authority (hereinafter called the Authority), is a public body, politic and corporate, duly organized and existing pursuant to the Housing Authority Law of the Commonwealth of Massachusetts (appearing in Massachusetts General Laws (Ter. Ed.) Chapter 121, as amended) and has its principal place of business in the City of Lowell, County of Middlesex; and

WHEREAS, Lowell Housing Authority, also a public body, politic and corporate, and duly organized and existing pursuant to the Housing Authority Law of the Commonwealth of Massachusetts (appearing in Massachusetts General Laws (Ter. Ed.) Chapter 121, as amended) and having its principal place of business in the City of Lowell, County of Middlesex, has previously exercised jurisdiction over urban renewal projects in the City of Lowell and in pursuance of its powers as set out in said Housing Authority Law, and every other power thereunder enabling, did determine that an area in said City and within its jurisdiction known as Northern Canal Renewal Area, which includes the area hereinafter described, did constitute a sub-standard and decadent area as defined in Section 26 J of said Law; and further determined in accordance with said Law that an urban renewal project for said Urban Renewal Area ought to be undertaken in said City; and

WHEREAS, on July 9, 1962, the Planning Board of the City of Lowell found the Urban Renewal Plan for the Northern Canal Project Area, dated July, 1962, to be based upon a local survey and to conform to a comprehensive plan of the locality as a whole and the Division of Urban and Industrial Renewal of the State Housing Board of the Commonwealth of Massachusetts has concurred in such findings; and

WHEREAS, following due notice, the City Council of the City of Lowell held a public hearing on August 7, 1962, the plan entitled, "Urban Renewal Plan, Northern Canal Renewal Area" dated July, 1962, was approved by the City Manager of the City of Lowell on August 29, 1962, with the approval of the City Council of said City, which approval was given and certain findings of fact in connection therewith were made, on August 28, 1962; and

WHEREAS, on August 13, 1962, Lowell Housing Authority approved an Urban Renewal Plan, as defined in Section 26 ZZ of said Law for said area, including the area hereinafter described, said plan being entitled, "Urban Renewal Plan, Northern Canal Renewal Area" dated July, 1962; and

WHEREAS, the Division of Urban and Industrial Renewal of the State Housing Board of the Commonwealth of Massachusetts, after making certain findings as required under Section 26 ZZ of said Law, approved said Urban Renewal Plan and on November 8, 1962 gave written notice to the Lowell Housing Authority of said approval; and

WHEREAS, on July 5, 1963, the Lowell Housing Authority entered into a Loan and Grant Contract with the United States of America under Title I of the Housing Act of 1949, as amended, in connection with the carrying out of the urban renewal project in accordance with the said Urban Renewal Plan; and

WHEREAS, there was executed an agreement entitled, "Agreement Effecting Transfer Of Urban Renewal Project From Lowell Housing Authority To Lowell Redevelopment Authority," dated July 26, 1963, under the terms of which all undertakings, obligations, duties, rights, powers, plans and activities respecting the Project described in said Urban Renewal Plan were transferred from the Lowell Housing Authority to the Lowell Redevelopment Authority; and

WHEREAS, on November 21, 1963, Lowell Redevelopment Authority approved a certain amendment to said Urban Renewal Plan, confirmed and applied all findings, determinations and statements of Lowell Housing Authority made under date of August 13, 1962 to said Urban Renewal Plan as so amended; and

WHEREAS, on December 6, 1963, the Planning Board of the City of Lowell, found said Urban Renewal Plan, as amended, to be based upon a local survey and to conform to a comprehensive plan for the locality as a whole and the Division of Urban and Industrial Renewal of the State Housing Board of the Commonwealth of Massachusetts concurred in such findings; and

WHEREAS, following due notice, the City Council of the City of Lowell held a public hearing on December 17, 1963, said Urban Renewal Plan, as amended, was approved by the City Manager of the City of Lowell on December 18, 1963, with the approval of the City Council of said City, which approval was given on December 17, 1963; and

WHEREAS, the Division of Urban and Industrial Renewal of the State Housing Board of the Commonwealth of Massachusetts, after making certain findings as required under Section 26 ZZ of said Law, approved said Urban Renewal Plan, as amended, and on January 6, 1964 gave written notice to the Lowell Redevelopment Authority of such approval; and

WHEREAS, the Lowell Redevelopment Authority has determined that the taking in fee simple by eminent domain of the hereinafter described area is necessary and reasonably required to carry out the purposes of the Housing Authority Law and said Urban Renewal Plan, as amended; and

WHEREAS, the Lowell Redevelopment Authority, in accordance with the provisions of Section 26 P, sub-paragraph (b) of said Housing Authority Law, has deposited with the City Manager of the City of Lowell security to his satisfaction for the payment of such damages as may be awarded in accordance with law to the owner or owners of the hereinafter described area as required by General Laws (Ter. Ed.) Chapter 79, Section 40;

NOW, THEREFORE, ORDERED: That Lowell Redevelopment Authority, acting under the provisions of said Housing Authority Law and, without limiting the generality of the foregoing, of Sections 26 AAA and 26 P, sub-paragraph (b), of Massachusetts General Laws (Ter. Ed.) Chapter 121, and all other authority thereunto enabling, and pursuant to the applicable provisions of General Laws, Chapter 79, and of any and every other power to it granted or implied, hereby takes for itself in fee simple, by eminent domain for the purposes hereinbefore set forth, the area located in the City of Lowell as hereinafter described, together with any and all easements and rights appurtenant thereto, including the trees, buildings and other structures standing upon or affixed thereto, and including the fee to the center of any and all streets, highways and public ways, contiguous or adjacent to said area, but excluding any and all easements of public highways and public easements of travel in and to any and all said streets, highways and public ways and excepting such easements and other rights as are expressly excluded, which said area and the exceptions therefrom being bounded and described in Annex "A"

BOOK 1770 PAGE 160

attached hereto and made a part hereof as though incorporated herein in full, and being shown on plan entitled, "Property Line Map of a Portion of Northern Canal Renewal Area, Project No. Mass. R - 16, Lowell, Mass., Scale 1" = 100' January 4, 1966, Dana F. Perkins & Sons, Inc., Civil Engineers & Surveyors, Lowell, Mass.," deposited in and on file at the office of the Lowell Redevelopment Authority in the City of Lowell, a copy of which plan is recorded in Middlesex North District Registry of Deeds as Plan M-646.

AND FURTHER ORDERED, that in accordance with the provisions of General Laws, Chapter 79, Section 6, as amended, award is made by the Lowell Redevelopment Authority for damages sustained by the owner or owners and all other persons, including all mortgagees of record having any and all interest in the area described in Annex "A" and entitled to any damages by reason of the taking hereby made. The Lowell Redevelopment Authority reserves the right to amend the award at any time prior to the payment thereof by reason of a change in ownership or value of said property before the right to damages therefor has become vested or for other good cause shown. The award hereby made is set forth in Annex "B" which Annex "B" is not to be recorded in the Registry of Deeds with this Order of Taking.

3

AND FURTHER ORDERED, that the Executive Director and Secretary of the Lowell Redevelopment Authority cause to be recorded this instrument of Taking in the office of the Registry of Deeds for the Northern District of Middlesex County.

IN WITNESS WHEREOF, we, the following members of the Lowell Redevelopment Authority hereby have causedthe corporate seal of the Authority to be hereto affixed and these presents to be signed in the name and behalf of the Lowell Redevelopment Authority this twenty-sixth day of September , 1966.

CITY DEVELOPMENT AUTHORITY

Northern Canal Renewal Area, Project No. Mass. R - 16

ORDER OF TAKING # 12

WHEREAS, City Development Authority (hereinafter called the Authority) is a body politic and corporate duly organized and existing pursuant to Chapter 610 of the Acts of 1967 of The Commonwealth of Massachusetts and has its principal place of business in the City of Lowell, County of Middlesex; and

WHEREAS, Lowell Housing Authority, a public body, politic and corporate, duly organized and existing pursuant to the Housing Authority Law of The Commonwealth of Massachusetts (appearing in Massachusetts General Laws (Ter. Ed.) Chapter 121, as amended) and havings its principal place of business in the City of Lowell, County of Middlesex, has previously exercised jurisdiction over urban renewal projects in the City of Lowell and in pursuance of its powers as set out in said Housing Authority Law, and every other power thereunder enabling, did determine that an area in said City and within its jurisdiction known as Northern Canal Renewal Area, which includes the area or areas hereinafter described, did constitute a sub-standard and decadent area as defined in Section 26 J of said Law; and further determined in accordance with said Law that an urban renewal project for said Urban Renewal Area ought to be undertaken in said City; and

WHEREAS, on July 9, 1962, the Planning Board of the City of Lowell found the Urban Renewal Plan for the Northern Canal Project Area, dated July, 1962, to be based upon a local survey and to conform to a comprehensive plan of the locality as a whole and the Division of Urban and Industrial Renewal of the State Housing Board of The Commonwealth of Massachusetts concurred in such findings; and

WHEREAS, following due notice, the City Council of the City of Lowell held a public hearing on August 7, 1962, the plan entitled, "Urban Renewal Plan, Northern Canal Renewal Area" dated July, 1962, was approved by the City Manager of the City of Lowell on August 29, 1962, with the approval of the City Council of said City, which approval was given and certain findings of fact in connection therewith were made, on August 28, 1962; and

WHEREAS, on August 13, 1962, Lowell Housing Authority approved an Urban Renewal Plan, as defined in Section 26 ZZ of said Law for said area, including the areas hereinafter described, said plan being entitled, "Urban Renewal Plan, Northern Canal Renewal Area" dated July, 1962; and

WHEREAS, the Division of Urban and Industrial Renewal of the State Housing Board of The Commonwealth of Massachusetts, after making certain findings as required under Section 26 ZZ of said Law, approved said Urban Renewal Plan and on November 8, 1962 gave written notice to the Lowell Housing Authority of said approval; and

WHEREAS, on July 5, 1963, the Lowell Housing Authority entered into a Loan and Grant Contract with the United States of America under Title I of the Housing Act of 1949, as amended, in connection with the carrying out of the urban renewal project in accordance with the said Urban Renewal Plan; and

WHEREAS, there was executed an agreement entitled, "Agreement Effecting Transfer Of Urban Renewal Project From Lowell Housing Authority To Lowell Redevelopment Authority," dated July 26, 1963, under the terms of which all undertakings, obligations, duties, rights, powers, plans and activities respecting the Project described in said Urban Renewal Plan were transferred from the Lowell Housing Authority to the Lowell Redevelopment Authority, a public body, politic and corporate, duly organized pursuant to the Housing Authority Law of The Commonwealth of Massachusetts (appearing in Massachusetts General Laws (Ter. Ed.) Chapter 121, as amended) which had its principal place of business in the City of Lowell, prior to its dissolution on March 11, 1968, pursuant to the provisions of Section 26 K of Chapter 121;

WHEREAS, on November 21, 1963, Lowell Redevelopment Authority approved a certain amendment to said Urban Renewal Plan, and confirmed and applied all findings, determinations and statements of Lowell Housing Authority made under date of August 13, 1962 to said Urban Renewal Plan as so amended; and

WHEREAS, on December 6, 1963, the Planning Board of the City of Lowell found said Urban Renewal Plan, as amended, to be based upon a local survey and to conform to a comprehensive plan for the locality as a whole and the Division of Urban and Industrial Renewal of the State Housing Board of The Commonwealth of Massachusetts concurred in such findings; and

WHEREAS, following due notice, the City Council of the City of Lowell held a public hearing on December 17, 1963, said Urban Renewal Plan, as amended, was approved by the City Manager of the City of Lowell on December 18, 1963, with the approval of the City Council of said City, which approval was given on December 17, 1963; and

WHEREAS, the Division of Urban and Industrial Renewal of the State Housing Board of The Commonwealth of Massachusetts, after making certain findings as required under Section 26 ZZ of said Law, approved said Urban Renewal Plan, as amended, and on January 6, 1964 gave written notice to the Lowell Redevelopment Authority of such approval; and

WHEREAS, there was executed an agreement entitled, "Agreement Effecting Transfer of Urban Renewal Projects From Lowell Redevelopment Authority to City Development Authority," dated March 11, 1968, under the terms of which all undertakings, obligations, duties, rights, powers, plans and activities respecting among other things, the project described in said Urban Renewal Plan were transferred from the Lowell Redevelopment Authority to the City Development Authority; and

WHEREAS, the City Development Authority has determined that the taking in fee simple by eminent domain of the hereinafter described area or areas is necessary and reasonably required to carry out the purposes of the Housing Authority Law, the said Chapter 610 of the Acts of 1967, and said Urban Renewal Plan, as amended;

WHEREAS, the City Development Authority, in accordance with the provisions of Section 26 P, sub-paragraph (b) of said Housing Authority Law, has deposited with the City Manager of the City of Lowell security to his satisfaction for the payment of such damages as may be awarded in accordance with law to the owner or owners of the hereinafter described areas as required by General Laws (Ter. Ed.) Chapter 79, Section 40;

NOW, THEREFORE, ORDERED: That City Development Authority, acting under the provisions of said Chapter 610 of the Acts of 1967 and the said Housing Authority Law, and without limiting the generality of the foregoing, of Section 3 sub-paragraph (b) of Chapter 610 of the Acts of 1967 of The Commonwealth of Massachusetts, Section 26 AAA and 26 P, sub-paragraph (b) of Massachusetts General Laws (Ter. Ed.) Chapter 121, and all other authority thereunto enabling, and pursuant to the applicable provisions of General Laws, Chapter 79, and of any and every other power granted or implied, hereby takes for itself in fee simple, by eminent domain for the purposes hereinbefore set forth, the area or areas located in the City of Lowell as hereinafter described, including all parcels of land therein, together with any and all easements and rights appurtenant thereto, including the trees, buildings and other structures standing upon or affixed thereto, and including the fee to the center of any and all streets, highways and public ways, contiguous or adjacent to said area or areas, but excluding any and all easements of public highways and public easements of travel in and to any and all said streets, highways and public ways, included within and/or contiguous or adjacent to said area or areas and excepting such easements, other rights and exclusions as are expressly excluded, which said area or areas and the exceptions therefrom are bounded and described in Annex "A" attached hereto and made a part hereof as though incorporated herein in full, and being shown on a plan (on one sheet) entitled, "Property Line Map of a Portion of Northern Canal Renewal Area, Project No. Mass. R - 16, Lowell, Mass. Scale 1" = 100' Jan. 4, 1966, Revised May 23, 1968, Dana F. Perkins & Sons Inc., Civil Engineers & Surveyors, Lowell, Mass." deposited in and on file at the office of the City Development Authority in the City of Lowell, a copy of which plan is to be recorded with this Order of Taking in the Registry of Deeds for the Northern District of Middlesex County at Lowell.

AND FURTHER ORDERED, that in accordance with the provisions of General Laws, Chapter 79, Section 6, as amended, awards are made by the City Development Authority for damages sustained by the owner or owners and all other persons, including all mortgagees of record having any and all interest in the areas described in Annex "A" and entitled to any damages by reason of the taking hereby made. The City Development Authority reserves the right to amend the awards at any time prior to the payment thereof by reason of a change in ownership or value of said property before the right to damages therefor has become vested or for other good cause shown. The awards hereby made are set forth in Annex "B" which Annex "B" is not to be recorded in the Registry of Deeds with this Order of Taking.

AND FURTHER ORDERED, that the Executive Administrator and Secretary of the City Development Authority cause to be recorded this instrument of Taking in the office of the Registry of Deeds for the Northern District of Middlesex County.

IN WITNESS WHEREOF, we, the following members of the City Development Authority hereby have caused the corporate seal of the Authority to be hereto affixed and these presents to be signed in the name and behalf of the City Development Authority this 31st day of May, 1968.

ANNEX "A"

CITY DEVELOPMENT AUTHORITY

Northern Canal Renewal Area, Project No. Mass. R - 16

ORDER OF TAKING # 12

Dated May 31, 1968

The boundary lines of the following areas are substantially as follows:

First: The parcel of land situated in Lowell, Massachusetts, containing 12, 790 square feet, more or less, and being shown as Street Parcel, Suffolk St. (Moody St. to Northern Canal) on a plan entitled, "Property Line Map of a Portion of Northern Canal Renewal Area, Project No. Mass. R - 16, Lowell, Mass. Scale 1" = 100' Jan. 4, 1966, Revised May 23, 1968, Dana F. Perkins & Sons, Inc., Civil Engineers & Surveyors, Lowell, Mass." which plan is to be recorded in Middlesex North District Registry of Deeds and bounded and described as follows:

Beginning at a point on the Northeasterly side of Moody Street, the Southeasterly side of Suffolk Street, and the Southwesterly corner of the Western Canal as shown on said plan;

thence N 41° 42' 23" W, 40.00 feet by said Moody Street to a point on the Northwesterly side of Suffolk Street;
thence N 48° 19' 07" E, 319.59 feet to a point at the Northeasterly corner of Ford Street;
thence S 42° 12' 09" E, 40.00 feet to a point on the Southeasterly side of Suffolk Street and the Northwesterly side of the Western Canal, as shown on said plan;
thence S 48° 19' 07" W, 319.94 feet along said Western Canal to the point of beginning.

Excluding therefrom any walls of said Western Canal and subject to easements, covenants, rights and limitations granted by City Development Authority to Proprietors of Locks and Canals on the Merrimack River by deed dated May 27, 1968, recorded with said Registry of Deeds as document numbered 7602 along the northwesterly side of said Western Canal in the area taken hereby.

Second: The parcel of land situated in Lowell, Massachusetts, containing 9, 380 square feet, more or less, and being shown as Street Parcel, Ford St. (Suffolk St. to Cabot St.) on a plan entitled,

"Property Line Map of a Portion of Northern Canal Renewal Area, Project No. Mass. R - 16, Lowell, Mass. Scale 1" = 100' Jan. 4, 1966, Revised May 23, 1968, Dana F. Perkins & Sons Inc., Civil Engineers & Surveyors, Lowell, Mass." which plan is to be recorded in Middlesex North District Registry of Deeds and bounded and described as follows:

Beginning at a point on the Southeasterly side of Cabot Street, the Northeasterly side of Ford Street and the southerly face of the southerly wall of the Northern Canal as shown on said plan;

thence S 41° 46' 47" E, 469.00 feet along the southerly face of the southerly wall of the Northern Canal to a point at the Northwesterly corner of Suffolk Street;

thence S 48° 19' 07" W, 19.98 feet along said Suffolk Street to a point on the Southwesterly side of Ford Street;

thence N 41° 42' 23" W, 469.00 feet to a point on the Southeasterly side of Cabot Street;

thence N 48° 19' 07" E, 19.38 feet along said Cabot Street to the point of beginning.

Excluding therefrom any walls of said Northern Canal and subject to easements, covenants and rights granted by the City Development Authority to Proprietors of Locks and Canals on the Merrimack River by deed dated May 27, 1968, recorded with said Registry of Deeds as document numbered 7602 along the southerly side of Northern Canal in the area taken hereby.

Third: A certain parcel of land situated in Lowell, Massachusetts, and shown on a plan entitled, "Property Line Map of a Portion of Northern Canal Renewal Area, Project No. Mass. R -16, Lowell, Mass. Scale 1" = 100' Jan. 4, 1966, Revised May 23, 1968, Dana F. Perkins & Sons Inc., Civil Engineers & Surveyors, Lowell, Mass." which plan is to be recorded in Middlesex North District Registry of Deeds and bounded and described as follows:

Beginning at a point at the intersection of the Southeasterly side of Dutton Street and the Northeasterly side of Moody Street;

thence N 41° 40' 42" W along said Moody Street, 43 feet to a point at the southerly corner of Parcel 6, Block 24, on said plan;

thence N 48° 24' 12" E along Dutton Street, 189.50 feet to a point at the southerly corner of Parcel 1 and the easterly corner of Parcel 2, Block 24, on said plan;

thence Northerly along said Parcel 2 in a curved line the radius of which is 156.00 feet, 99.85 feet to a point;

thence N 41° 40' 42" W still along said Parcel 2, 97.07 feet to Worthen Street;

thence S 48° 24' 12" W along said Worthen Street, 149.24 feet to a point at the northerly corner of Parcel 3 and the westerly corner of Parcel 2, Block 24;

thence S 41° 40' 42" E along said Parcel 2, 87.76 feet to a point at the northerly corner of Parcel 6, Block 24;

thence S 48° 24' 12" W along said Parcel 6, 90 feet to Moody Street;

thence N 41° 40' 42" W along said Moody Street, 702.06 feet to a point at the northwesterly side of Tilden Street;

thence N 48° 19' 12" E along said Tilden Street, 7.35 feet to a point at the southerly corner of Parcel 8, Block 27 and on the northeasterly side of Moody Street;

thence N 41° 42' 23" W along said Moody Street, 456.00 feet to a point at the intersection of the northwesterly side of Hanover Street and northeasterly side of Moody Street and at the Western Canal, as shown on said plan;

thence N 48° 19' 12" E along said Western Canal, as shown on said plan, 320.50 feet to a point at the westerly corner of Parcel 1B, Block 20;

thence S 41° 42' 23" E along said Parcel 1B, Block 20, 228.46 feet to a point;

thence Easterly and Northeasterly along said Parcel 1B, Block 20 and Parcel 1B, Block 19, by a curved line at a radius of 720.00 feet, 185.80 feet to a point;

thence S 72° 52' 35" E along said Parcel 1B, Block 19, 83.19 feet to a point at Parcel 2, Block 18;

thence N 48° 19' 12" E along said Parcel 1B, Block 19, 87.73 feet to a point at the southwesterly corner of Parcel 1B, Block 15;

thence S 41° 35' 48" E along said Parcel 1B, Block 15, 36.95 feet to a point on the northwesterly side of Bradford Street, as shown on said plan;

thence N 48° 20' 05" E along said Bradford Street and said Parcel 1B, Block 15, 21.75 feet to a point;

thence S 41° 35' 48" E along said Bradford Street and said Parcel 1B, Block 15, 100.07 feet to a point;

thence Easterly and Southeasterly along said Parcel 1B, Block 15, by a curved line at a radius of 177.78 feet, 89.61 feet to a point;

thence S 72° 52' 35" E along said Parcel 1B, Block 15, 391.92 feet to a point on the northwesterly side of Worthen Street, as shown on said plan;

thence N 48° 24' 12" E along said Parcel 1B, Block 15, and said Worthen Street, 77.07 feet to a point at the easterly corner of said Parcel 1B, Block 15;

thence S 41° 35' 48" E along Worthen Street, 17.33 feet to a point;

thence S 48° 24' 12" W still along said Worthen Street, 2.00 feet to a point;

thence S 41° 35' 48" E still along said Worthen Street, 27.64 feet to a point;

thence S 48° 24' 12" W still along said Worthen Street, 43.00 feet to a point at the northerly corner of Parcel 2, Block 16;

thence S 41° 35' 48" E along said Parcel 2 and Parcel 19, Block 16, 98.26 feet to a point;

thence N 48° 24' 12" E along said Parcel 19, Parcel 20, and Parcel 21, Block 16, 135.00 feet to a point;

thence S 41° 35' 48" E along said Parcel 21 and Dutton Street, as shown on said plan, 126.50 feet to a point on the southeasterly side of said Dutton Street;

thence S 48° 24' 12" W along said Dutton Street, 949.77 feet to Moody Street and the point of beginning.

SUBJECT TO AND EXCLUDING THEREFROM the following:

1. Any and all property, real and personal, of the Proprietors of the Locks and Canals on Merrimack River, including but not limited to walls of the Western Canal, underground canals, flumes, the so-called Moody Street Feeder Canal, water systems, and any appurtenances thereto whether located in public ways or other areas, and the easements, covenants and rights granted by City Development Authority to the said Proprietors of the Locks and Canals on Merrimack River by deed dated May 27, 1968 recorded with said Registry of Deeds as document numbered 7602.

2. The right-of-way to construct, maintain, and operate a railroad granted by City Development Authority to the Boston and Maine Corporation by instrument dated May 14, 1968, to be recorded.

3. The utility easements granted by City Development Authority to the City of Lowell by deed of easement dated May 23, 1968, recorded in said Registry of Deeds, Book 1844, Page 458.

4. Any and all property, real or personal, of the Lowell Gas Company, including but not limited to pipes, valves, vents, and any appurtenance thereto, whether located in public ways or other areas.

5. Any and all privately owned underground storm and/or sanitary sewer systems and any appurtenance thereto, and including any easements or reservations for such, whether located in public ways or other areas.

ALSO EXCLUDED from this Order of Taking is any right reserved to or saved by the Proprietors of the Locks and Canals on Merrimack River in its deed to City Development Authority, dated May 27, 1968, and recorded in said Registry of Deeds as document numbered 7601.

SUPPOSED OWNERS

The supposed owners of the areas hereby taken are unknown.

Rec May 31 1968 2:25PM #7781

The Grantor, its successors and assigns, reserves the right to pass and repass over said Right-of-Way at points agreeable to the Railroad, such crossings to be described in separate agreements between the Railroad and the Grantor, its successors or assigns.

The Railroad agrees not to unreasonably impede or obstruct any private way unless such impeding or obstructing is of a temporary nature while conducting the business of the Railroad.

The Railroad shall be responsible for the maintenance of the trackage and other appurtenances, including the cost thereof, within the

Right-of-Way granted hereunder. All costs of construction and maintenance of the crossings over said Right-of-Way shall be borne by the Grantor, its successors or assigns.

This conveyance is made subject to all instruments of record.

CERTIFICATE OF VOTE

At a regular meeting of the City Development Authority, which meeting was held in the offices of said Authority, City Hall, Lowell, at 8:00 P.M. on August 7, 1969, a quorum being present and voting, it was unanimously

VOTED: That Edward J. Keon, Chairman, be and hereby is, authorized to execute, acknowledge, affix the corporate seal of the City Development Authority to, and deliver, for and on behalf of the City Development Authority a Deed of Easement to Lowell Masonic Association, Inc., authorizing said Lowell Masonic Association, Inc. to lay, construct, maintain, operate, alter, repair, remove, change the size of and replace underground pipe lines for the transmission of sewage, drainage, water, and gas on a parcel of the said City Development Authority shown as a 10-foot sewer easement within LOT 7 A on a plan entitled, "Disposition Map of LOTS 7 A & 7 B, Northern Canal Renewal Area, Project No. Mass. R - 16, Mar. 31, 1967, Dana F. Perkins & Sons Inc., Civil Engineers & Surveyors, Lowell, Mass."

I, James F. Silk, Acting Executive Administrator and Secretary of the City Development Authority, certify that the above vote is a true extract from the minutes of the City Development Authority, and that said vote has not been rescinded or modified, and is in full force and effect as of the date of this instrument.

DEED OF EASEMENT

KNOW ALL MEN BY THESE PRESENTS: That the CITY DEVELOPMENT AUTHORITY, a body corporate and politic, having an usual place of business in Lowell, County of Middlesex, Commonwealth of Massachusetts, for consideration paid, does hereby give, grant, bargain and sell unto LOWELL MASONIC ASSOCIATION, INC. the right, privilege and authority to lay, construct, maintain, operate, alter, repair, remove, change the size of and replace underground pipe lines for the transmission of sewage, drainage, or water, on a parcel of land of the said CITY DEVELOPMENT AUTHORITY shown as a 10 foot sewer easement within LOT 7 A on a plan entitled, "Disposition Map of LOTS 7 A & 7 B, Northern Canal Renewal Area, Project No. Mass. R - 16, Mar. 31, 1967, Dana F. Perkins & Sons Inc., Civil Engineers & Surveyors, Lowell, Mass." which plan is to be recorded, and bounded and described as follows:

Beginning at a point on the southeasterly side of "New Street" and the southwesterly corner of LOT 7 A on said plan:

Thence N 17° 07' 25" E along said New Street, 11.69 feet to a point.

Thence S 41° 40' 42" E, 195.86 feet to a point.

Thence S 48° 19' 18" W, 10.00 feet to a point at land of Lowell Masonic Assoc.

Thence N 41° 40' 42" W, 189.80 feet along said land of Lowell Masonic Assoc. and land of Lowell Redevelopment Authority to the point of beginning.

This conveyance is subject to a Right-of-Way granted by City Development Authority to the Boston and Maine Corporation dated May 14, 1968, recorded on August 12, 1969, in Middlesex North District Registry of Deeds, Book 1895, Page 607.

This conveyance is also subject to all rights, easements and reservations which were excluded and excepted from the premises taken by eminent domain by the City Development Authority by Order of Taking #12 dated May 31, 1968, and recorded May 31, 1968, with said Registry of Deeds in Book 1845, Page 189.

The consideration for this conveyance is less than $100.

IN WITNESS WHEREOF, the CITY DEVELOPMENT AUTHORITY has caused its corporate seal to be hereto affixed and these presents to be signed, acknowledged and delivered in its name and behalf by Edward J. Keon, its Chairman, hereunto duly authorized this twenty-ninth day of August, 1969.

See B. 2560 P. 620

with the right of constructing and maintaining penstocks for conveying water through any of said surrounding strips of land and the further right of constructing a railroad or other bridge across the Hamilton Canal and across the Pawtucket Canal and across the strip of land ten (10) feet wide on the north side of the Hamilton Canal and on the east side of Pawtucket Canal, provided that such bridge be so constructed that it offers no obstruction to the flow of water in said Canal nor interferes with the free passage of the said Proprietors and their servants along the said strips ten (10) feet wide. Saving, excepting and reserving to the said Proprietors, their successors and assigns the right to maintain said Pawtucket Canal and said Hamilton Canal and to deepen, widen or otherwise improve or alter the same and to raise deepen, lower or draw off the waters of said canals to any extent and at any and all times, at their will and pleasure, without any right, claim or demand by said grantee its successors or assigns for damages occasioned thereby to the above released and described premises or to any improvements or property that may be thereon. To Have and To Hold the above released premises with all the privileges and appurtenances thereunto belonging to the said Lowell Machine Shop its successors and assigns forever. In Witness Whereof the said Proprietors of the Locks and Canals on Merrimack River have caused their corporate sale to be hereto affixed and these presents to be signed in their name and behalf by George Atkinson its Treasurer, this twenty fifth day of October in the year one thousand eight hundred and ninety five Proprietors of the Locks and Canals on Merrimack River by Geo. Atkinson, Treasurer (corp. seal) Signed and sealed in presence of John T. Morse. This conveyance is made by order of the directors of said Proprietors of the Locks and Canals on Merrimack River as attested by the signatures of a majority of their board Arthur T. Lyman, Charles L. Lovering, Eliot C. Clarke, Chas. B. Amory, Alphonso S. Covel, C. P. Baker. Commonwealth of Massachusetts Suffolk ss. Nov 18th 1895. Then personally appeared the above named George Atkinson and acknowledged the foregoing instrument to be the free act and deed of the said Proprietors of the Locks and Canals on Merrimack River before me, Charles L. Lovering Justice of the Peace, Middlesex ss. North Dist. Rec. January 10. 1896. 4 P.M. Attest Joseph S. Thompson Reg.

Boot Cotton Mills to City of Lowell.

Quitclaim. Know all men by these presents, that the Boott Cotton Mills, a body corporate under the laws of the Commonwealth of Massachusetts, doing business at Lowell in the County of Middlesex and Commonwealth aforesaid, in consideration of the sum of eighteen thous-

and dollars to it paid by the city of Lowell a municipal corporation in said county, the receipt whereof is hereby acknowledged, do hereby remise, release and forever quitclaim unto the said City of Lowell a certain piece or parcel of land situated at the Northwesterly corner of John and Paige streets in said Lowell, and thus bounded and described. Beginning at the southeasterly corner of the premises at the intersection of the northerly line of Paige street with the westerly line of John street thence northerly on said John street seventy four and sixty five hundredths (74.65) feet to the middle line of a passageway hereinafter reserved, between the granted premises and other land of this grantor, thence at an angle of ninety degrees and two minutes (90° 2') westerly on said middle line of the passage way about two hundred and twenty four (224) feet to land of the Massachusetts Cotton Mills, thence at an angle of eighty nine degrees and fifty eight minutes (89° 58') southerly on said Massachusetts Cotton Mills land about seventy four and seventy nine hundredths (74.79) feet to said Paige street, thence at a right angle easterly on said Paige street about two hundred and twenty four (224) feet to the point of beginning, containing about sixteen thousand seven hundred and thirty seven (16,737) square feet. Being a portion of the same premises conveyed to the said Boott Cotton Mills by the Proprietors of the Locks and Canals on the Merrimack River by their two deeds each dated the fifteenth day of April in the year eighteen hundred and forty five and recorded in the Registry of Deeds for the Southern District of Middlesex, one in book 462 page 153 and the other in book 462 page 155. This conveyance is made subject to the express reservation, covenant and agreement that there shall be a passage way nineteen (19) feet wide, the middle line thereof to be as aforesaid, the boundary line between the granted premises and the premises of this grantor, one half in width of the passage way to be on the granted premises and one half on the premises of this grantor, said passageway to be forever kept open for the use of this grantor and this grantee and their respective successors and assigns. TO HAVE AND TO HOLD the granted premises, with all the privileges and appurtenances thereto belonging to the said City of Lowell and its heirs, successors and assigns to their own use and behoof forever. And the said Boott Cotton Mills doth hereby, for itself and its successors, covenant with the said grantee and its heirs, successors and assigns that the granted premises are free from all incumbrances made or suffered by it, except as aforesaid, and that it will and its successors shall WARRANT and

Defend the same to the said grantee and its heirs, successors and assigns forever against the lawful claims and demands of all persons claiming by, through or under it but against none other. In Witness Whereof the Boott Cotton Mills has caused corporative seal to be hereunto affixed and these presents to be signed in its name and behalf by Augustus Lowell, its President, and by Eliot C. Clarke its Treasurer hereunto duly authorized, and by a majority of its directors on this 17th day of December in the year eighteen hundred and ninety five. Boott Cotton Mills by Augustus Lowell, President, Eliot C. Clarke (corp seal) Approved. Francis W. Lea, City Solicitor Augustus Lowell, Eliot C. Clarke, Edward J. Browne, Edward W. Hooper Augustus Flagg, Arthur T. Lyman, Directors Commonwealth of Massachusetts Suffolk ss. Boston December 17th 1895. Then personally appeared the above named Eliot C. Clarke, Treasurer and acknowledged the foregoing instrument to be the free act and deed of the Boott Cotton Mills before me Horatio R. Fletcher Justice of the Peace.

Vote. At a special meeting of the stockholders of the Boott Cotton Mills held at Boston July 2, 1895, duly notified by printed notices mailed June 22nd 1895 a quorum was present and it was Voted, That the directors be and are hereby authorized to sell at private sale at a price to be fixed by them, a certain parcel of the real estate belonging to the corporation, situated at the corner of John and Paige streets in Lowell Massachusetts and that the President and Treasurer be authorized to sign, seal, acknowledge, and deliver in the name and behalf of this corporation any deed or deeds necessary to a conveyance thereof. See Mtge's Sale B. 7746 P. 417

Also another parcel of land situated in said Lowell and Tewksbury bounded and described as follows: Beginning at a stone bound at the southeasterly corner of the premises about one hundred and thirty-five (135) feet from the westerly side of Clark Road, thence north 74 3/4 degrees west by land now or formerly of Charles I. Hood seven hundred and ninety-six(796) feet to an oak tree at land now or formerly of Ladd; thence north 7 1/4 degrees west by land of said Ladd two hundred and thirty-seven and 50/100 (237.50) feet to a stake; thence north 6 degrees west by land of said Ladd one hundred twelve (112) feet to a stake; thence north 15 3/4 degrees west by land of said Ladd one hundred and twenty-two and 50/100 (122.50) feet to a stone bound at land now or formerly of Joshua Clark; thence north 68 1/4 degrees east by land of said Clark four hundred twenty-eight and 40/100 (428.40) feet to a stone bound at land now or former-

outhwesterly side of Pine Street, containing ten thousand ninety two (10,092) square feet, more or less, and being Lot forty (40) on a plan of land entitled, "Sunset Addition", Lowell, Mass., owned by Inter City Trust, surveyed by Ernest W. Branch, Civil Engineer, and recorded with Middlesex North District Registry of Deeds, Plan Book 40, plan 7. Being the same premises conveyed to Annabelle J. Cox by Josephine D. Smith, by her deed of even date to be recorded simultaneously herewith in said Registry of Deeds and this conveyance is made subject to a prior mortgage running to the Merrimack River Savings Bank, dated December 16, 1925, which mortgage is noted in the Land Registration Office of the Middlesex North District Registry of Deeds, Book 19, Page 189, and also subject to the restrictions therein referred to, insofar as the same may be now in force and applicable to the premises. This mortgage is upon the statutory condition, for any breach of which the mortgagee shall have the statutory power of sale. We, Annabelle J. Cox and Patrick W. Cox, release to the mortgagee all rights of DOWER AND HOMESTEAD and other interests in the mortgaged premises. WITNESS our hands and seals this eleventh day of February 1927.

Affidavit

AFFIDAVIT I, Charles Dancause named in the foregoing deed, make oath and say that the principal and interest mentioned in the mortgage above referred to was not paid or tendered or performed when due or prior to the sale, and that I published on the fifteenth twenty-first and twenty-eighth days of January 1927 in the Lowell Courier Citizen a newspaper published, or by its title page purporting to be published in Lowell, Mass., aforesaid, and having a circulation therein, a notice of which the following is a true

418

copy: MORTGAGEE'S SALE OF REAL ESTATE. By virtue and in execution of a power of sale contained in a certain mortgage deed given by Gertrude M. Boyle, of Providence, in the State of Rhode Island to Charles Dancause, of Lowell, in the County of Middlesex and Commonwealth of Massachusetts, dated Oct. 28, 1925 and recorded in the Registry of Deeds for the County of Middlesex (North District) book 730, page 37, for breach of th conditions of said mortgage and for the purpose of foreclosing the same will be sold at public auction on the premises, on Friday the eleventh day of February 1927, at two o'clock in the afternoon, all and singular the premises conveyed by said mortgage dee namely; the land in said Lowell, and in Tewksbury, in said Middlesex County, bounded and described as follows: Beginning at a point on the westerly side of Clark Road at land now or formerly of Gookin, thence northerly by Clark Road two hundred and ninety-one and 90/100 (291.90) feet to a stake at land formerly of F. C. Holmes; thence north erly by land of said Holmes and land of Hood Farm Incorporated two hundred eight and 50/100 (208.50) feet to a stone bound at other land of Charles I. Hood; thence north-westerly by other land of said Hood seven hundred and ninety-six (796) feet to an oak tree at land now or formerly of Field Heirs; thence southerly by land of said Field Heirs seven hundred and sixty-eight and 30/100 (768.30) feet to a stake; thence still along said Field Heirs land 1574 degrees east, 34.9 feet to a stone bound at land of Gookin; thence easterly by land of Gookin seven hundred and forty-seven (747) feet to the point of beginning, or however otherwise bounded and described. Containing eleven and 7/100 (11.07) acres more or less.

Also another parcel of land situated in said Lowell and Tewksbury, bounded and describ ed as follows: Beginning at a stone bound at the southeasterly corner of the premises about one hundred and thirty-five (135) feet from the westerly side of Clark Road, thence north 73 3/4 degrees west by land now or formerly of Charles I. Hood seven hun-dred and ninety-six (796) feet to an oak tree at land now or formerly of Ladd; thence north 7 1/4 degrees west by land of said Ladd two hundred and thirty-seven and 50/100 (237.50) feet to a stake; thence north 6 degrees west by land of said Ladd one hundred twelve (112) feet to a stake; thence north 15 3/4 degrees west by land of said Ladd one hundred and twenty-two and 50/100 (122.50) feet to a stone bound at land now or former ly of Joshua Clark; thence north 68 1/4 degrees east by land of said Clark four hundred twenty-eight and 40/100 (428.40) feet to a stone bound at land now or formerly of Bart-lett; thence south 14 degrees east by land of said Bartlett and land of said Charles I. Hood, now or formerly, four hundred fifty-one (451) feet to a stone bound; thence south 49 1/4 degrees east by land of said Hood one hundred eighty-three (183) feet to a point; thence south 53 1/2 degrees east by land of said Hood one hundred fourteen and 50/100 (114.50) feet to a stake; thence south 54 degrees east by land of said Hood ninety-eight and 13/100 (98.13) feet to a stone bound; thence south 8 3/4 degrees east by land of said Hood one hundred sixty-one (161) feet to a stone bound at the point of

eginning, or however otherwise bounded or described. Containing seven and 846/1000 7.846) acres more or less.

lso another parcel of land situated in said Lowell and Tewksbury bounded and described s follows: Beginning at a drill hole in the wall on the westerly side of Clark Road at and now or formerly of Bartlett at the northeast corner of the premises; thence westrly by land of said Bartlett seven hundred one and 39/100 (701.39) feet to land of said ood; thence southerly by land of said Hood four hundred nine and 90/100 (409.90) feet o a stone bound; thence southeasterly by land of said Hood one hundred eighty-three 183) feet; thence southeasterly by land of said Hood one hundred fourteen and fifty no-hundredths (114.50) feet and one hundred and 50/100 (100.50) respectively to a stone ound; thence southerly by land of said Hood one hundred sixty one (161) feet to a stone ound; thence easterly by land of said Hood about one hundred and thirty-five (135) feet o a point on the westerly side of Clark Road; thence northerly by the westerly side f Clark Road about nine hundred thirty-five (935) feet to the point of beginning; or owever otherwise bounded or described. Containing 10 and 75/100 (10.75) acres more or ess.

lso another parcel of land situated in said Tewksbury bounded and described as follows: eginning at a stone bound at the northwest corner of the premises, thence easterly y land of said Hood about one hundred thirty-five (135) feet to a point on the westerly ide of Clark Road; thence southerly by the westerly side of Clark Road as established y the County Commissioners in 1913 about two hundred twenty-five (225) feet to other land of said Hood; thence westerly by land of said Hood about twenty feet to a point; thence northerly by land of said Hood two hundred eight and 50/100 feet to the point of beginning; or however otherwise bounded or described. Containing thirty-six one hundredths (.36) of an acre more or less. The foregoing parcels are shown on a plan entitled "Plan of Land in Lowell and Tewksbury belonging to Charles I. Hood et al, April 1922, by F.W. Huntington & Co. C.E.'s" recorded with Middlesex North District Plans Book 41, Plan 37. All of the said parcels are subject to restriction that no part thereof shall be used for a cemetery or for cemetery purposes. The first parcel containing 11.07 acres, more or less, is subject to a dedication of a twenty foot strip on the southerly side thereof running parallel to land of Gookin, as and for a public street as shown on a plan entitled Plan of Village Street situated in Lowell and Tewksbury by Henry O. Brooks C.E., dated Nov. 9, 1923, duly recorded and also subject to the deed of dedication of which said plan forms a part dated June 30, 1924, signed by Sarah A. Hood, Bridget Gookin, Margaret W. Merrill and Herbert C. Merrill, duly recorded. The parcels having a frontage on Clark Road are subject to the restriction that no building shall be erected thereon within thirty-five feet from said Road, and that no house erected shall cost less than four thousand dollars or contain more than two tenements or apartments. Being the same premises conveyed by Charles Daneause to the said Gertrude M. Boyle by deed dated

October 28, 1925, and recorded in said Middlesex North District Registry of Deeds. $500 will be required to be paid in cash by the purchaser at the time and place of sal Other terms will be announced at the sale. Charles Dancause, Present holder of said mortgage. Jan. 12, 1927. j15-21-28 Pursuant to said notice at the time and place ther in appointed, I sold the mortgaged premises at public auction by E. Gaston Campbell ar auctioneer, to Charles Dancause above named, for one thousand dollars, bid by Charles Dancause, being the highest bid made therefor at said auction.

Lowell High School Alumni Association, a Massachusetts corporation having a usual place of business at Lowell, Massachusetts, without consideration, grants to City of Lowell, a municipal corporation duly organized by law and located in Middlesex County, Massachusetts, with QUITCLAIM COVENANTS, a certain parcel of land in Lowell, situated on the northerly side of Village Street, formerly known as Dead Horse Lane, and described as follows:

See Vol B 1661 P 343

Beginning at a point two hundred fifty-three and 9/10 (253.9) feet distant easterly from the intersection of the westerly line of Village Street with the northerly line of said Village Street, now or formerly Dead Horse Lane;

Thence, running northerly by land of the City of Lowell four hundred fifty-five (455) feet to a point;

Thence, easterly at an angle of 90°, four hundred twenty (420) feet to a point at other land of grantor;

Thence, southerly at an angle of 90°, four hundred fifty-five (455) feet to a point on the northerly line of said Village Street, now or formerly Dead Horse Lane;

Thence, westerly along said Village Street, now or formerly Dead Horse Lane, at an angle of 90°, four hundred twenty (420) feet to the point of beginning.

Being a portion of the premises conveyed to the grantor by deed of Charles Dancause, dated May 10, 1929 and recorded in Middlesex North District Registry of Deeds, Book 776, Page 282.

Said premises are conveyed subject to the following conditions and restrictions:

1. The City of Lowell shall use said land as a suitable practice field and play space for football and other athletic sports for Lowell High School students, and shall suitably maintain it for such purposes.

2. In the event that the said City of Lowell fails to so use said land for two consecutive years, said parcel shall revert to the said Lowell High School Alumni Association or its successors.

3. Nothing herein contained shall be construed to prevent the said City of Lowell, or the Department thereof in charge of said parcel of land, from making a charge for admission to said premises or for the rental of the same.

IN WITNESS WHEREOF, Lowell High School Alumni Association has caused its corporate seal to be hereto affixed and these presents to be signed in its name and behalf by _____ John Janas, its President, and by Paul N. Demogenes, its Treasurer, this 28th day of July, 1964.

QUITCLAIM DEED

LOWELL HIGH SCHOOL ALUMNI ASSOCIATION, a Massachusetts non-profit corporation having an a usual place of business in Lowell, MA, in consideration of One Dollar ($1.00) paid, grants with **QUITCLAIM COVENANTS,** to

THE CITY OF LOWELL, a municipal corporation having a principal address at City Hall, 375 Merrimack Street, Lowell, MA 01852, the following described premises:

A certain parcel of land situated in Lowell, Massachusetts and Tewksbury, Massachusetts, located near or partially bordered by Village Street, Rogers Street, Clark Road and Douglas Road, constituting the portion of the premises conveyed to the Lowell High School Alumni Association by deed of Charles Dancause, dated May 10, 1929, and recorded in the Middlesex North Registry of Deeds, Book 776, Page 282 that remained after the conveyance of a prior portion of these premises to the City of Lowell by the Lowell High School Alumni Association by deed dated July 28, 1964 and recorded in the Middlesex North Registry of Deeds Book 1661 Page 343.

By acceptance hereof, the grantee agrees to pay all tax liens presently existing against the above described property by the grantee, including the tax lien recorded by the Town of Tewksbury in said Middlesex North Registry of Deeds Book 28408, and Page 278.

For authority to gift these premises, see Letter from the Lowell High School Alumni Association, dated September 8 2014, to be recorded herewith.

For authority to accept gift of these premises and agreement to pay taxes and utility fees, including liens, see Vote of the City Council of the City of Lowell dated September 23, 2014, to be recorded herewith.

The grantor acknowledges receipt of the disclosure statement required by Massachusetts General Laws c. 7C, § 38 and agrees to comply therewith.

As the City of Lowell is a party to this deed, no documentation stamps are required per Massachusetts General Laws c. 64D, § 1.

Executed under seal as of this 29th day of September 2014.

Engineering a Sustainable Future

October 20, 2016
File No. 91830.00

Ms. Alicia Caritano
Senior Associate
Perkins Eastman
50 Franklin Street, Suite 203
Boston, Massachusetts 02110

Re: Transmittal of Phase I Environmental Site Assessment
Lowell High School Existing Conditions Evaluation/Geoenvironmental
Perkins Eastman Project #67150.00
Lowell, Massachusetts

Dear Ms. Caritano:

Nobis Engineering, Inc. (Nobis) completed a Phase I Environmental Site Assessment (ESA) of six parcels of land located in the downtown area of Lowell, Massachusetts (the Site). Five of these parcels are owned by the City of Lowell and are used as facilities and infrastructure for Lowell High School. The sixth parcel is currently privately owned and occupied by a pediatric dentistry office.

The Phase I ESA Report is included as an attachment to this letter. This report has been edited to address your comments provided via email on October 14, 2016. The objectives and conclusions of this report are summarized in this cover letter, along with some discussion about potential impacts during construction from subsurface environmental conditions and the management of contaminated soils encountered during construction activities.

OBJECTIVE OF THE PHASE I

This Phase I ESA was conducted to support a Feasibility Study being performed by Perkins Eastman on behalf of the City of Lowell under a grant provided by the Massachusetts School Building Authority (MSBA). The Phase I ESA is intended to fulfill, in part, the requirements of MSBA Module 3, Section 3.1.4 (Evaluation of Existing Conditions), specifically to document the existing subsurface environmental conditions within the footprint of the current Lowell High School and an adjacent parcel being considered for expansion.

The Phase I ESA identifies several Recognized Environmental Conditions (RECs) associated with the historical use of the subject properties. RECs are defined by the American Society for Testing and Materials (ASTM) as:

Nobis Engineering, Inc.
585 Middlesex Street
Lowell, MA 01851

> *"The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment."*

It is important to note that RECs do not necessarily indicate oil or hazardous materials (OHM) have been released to the environment at the Site, but only that there is a potential that OHM has been released to the environment. Determination of the presence or absence of a release can only be made after the collection of field data, which is beyond the scope of a Phase I ESA.

RECOGNIZED ENVIRONMENTAL CONDITIONS

The RECs identified in the Phase I ESA can be used to evaluate potential subsurface environmental issues that might be encountered should a construction or renovation project be undertaken on one or more of the six parcels included in the assessment. Nobis offers the following conclusions with respect to the potential impacts of subsurface environmental conditions on future redevelopment efforts for Lowell High School:

- The Site has been developed since the early 1800s, when the Merrimack Canal and associated textile mills were constructed. The Merrimack Manufacturing Company and Boott Cotton Mills were both located to the north of the Site, and a rail line was constructed to the west of the canal to serve these mills. Today this rail line still exists and is used for streetcar traffic associated with the Lowell National Historical Park.

  Former railroad activities likely transported and handled raw materials, chemicals, and hazardous materials associated with the operation of the mills. Also, railroad operations and maintenance activities themselves typically utilize OHM such as creosote or arsenic-laced railroad ties, herbicides, lubricating oils, diesel fuel, and diesel exhaust, which commonly result in releases of heavy metals, pesticides/herbicides, and petroleum-related contamination along railroad corridors. Any disturbance of soil within the former railroad corridor should consider the possibility that residual contamination is present due to historical use.

- The mills operated until the mid-1900s before closing down and falling victim to urban renewal efforts in the 1960s, which completely changed the configuration of streets in the portion of the Site that is currently occupied by the Lord Building and the Field House. For over 100 years, the portion of the Site located to the west of the Merrimack Canal was occupied by tenement homes associated with the mill, but also a small portion of the mill complex itself. The extreme northwest corner of the Site, the current location of the Field House, was formerly occupied by a "Finishing Mill" that was part of the Merrimack mill complex. The finishing process in a textile mill could have included application of dyes, bleaches, or other chemicals to prepare the textile for its end use. Any disturbance of soil

in this portion of the Site should consider the possibility that residual contamination is present due to historical use.

- In 1920, the Steam Plant was constructed at the corner of Kirk and French Streets. Based on the review of historical maps, it appears that the Steam Plant was initially fired by coal, and a “coal bin” was present between the Steam Plant and the Freshman Academy. Residual coal and/or coal ash contains high levels of semi-volatile organic compounds (SVOCs) and polycyclic aromatic hydrocarbons (PAHs). Any disturbance of soil in this portion of the Site should consider the possibility that residual contamination is present due to historical use.

- Review of Lowell Fire Department records revealed that the High School facility has/had a 12,600-gallon “below grade” “Faber Burner” tank located on French Street. The tank’s contents were not listed, nor was the installation date, removal date, or any sort of inspection date. Fire Department records do not provide any additional details regarding the tank. This tank may have been a storage vessel for oil that was used to fuel the boilers in the Steam Plant before it was converted to natural gas, or used to heat one of the school buildings. The exact location of this tank is unknown, but is likely to be near the Steam Plant along French Street. According to City representatives, this tank is no longer in service. However, any subsurface exploration performed in the vicinity of the Steam Plant should consider the possibility that this tank is still in place, and that petroleum products may have been released to the environment.

In summary, if construction or renovation activities (or pre-design activities) are expected to disturb soils, or if excess soils are expected to be generated during construction, considerations should be made for the management of environmental media. For example, if soils are expected to be displaced in order to construct a foundation for a new building, these soils should first be evaluated to determine if they have been impacted by OHM. Typically, pre-characterization of soils consists of the collection of soil samples from the area to be disturbed, and analysis of soil samples for a wide range of potential contaminants to determine the presence or absence of contamination, and to meet the requirements of an off-site reuse/disposal location, should these soils be surplus material unable to be reused within the project site.

The typical suite of laboratory analyses for pre-characterization soil samples includes volatile organic compounds (VOCs) by EPA Method 8260, semi-volatile organic compounds (SVOCs) by EPA Method 8270, polychlorinated biphenyls (PCBs) by EPA Method 8082, total petroleum hydrocarbons (TPH) by EPA Method 8100, and heavy metals by EPA Methods 6010/6020. Other analyses may be added based on site-specific knowledge of former operations.

SOIL CLASSIFICATION AND MANAGEMENT

The results of these laboratory analyses assist the Environmental Professional with recommendations for soil handling and off-site reuse/disposal, as well as identify any health and

safety protocols that should be incorporated into earthwork operations. In a very general sense, the types of soils that might be encountered at a site like Lowell High School fall into the following classifications:

- Class A-1: Soils meet the definition of background and are suitable for reuse without restrictions. Typically this means that there are no detectable concentrations of VOCs, PCBs, or TPH; and that SVOCs and metals are present at concentrations lower than the values published in Table 1 of the MassDEP Technical Guidance Document *Background Levels of Polycyclic Aromatic Hydrocarbons and Metals in Soil* (May 2002).

- Class A-2: Soils contain detectable concentrations of some contaminants above background, but all contaminants are present below the Massachusetts Contingency Plan (MCP) Reportable Concentrations for Category S-1 Soil (RCS-1). This soil is not regulated for disposal under the MCP, and is therefore eligible for off-site reuse provided that the material meets the MassDEP's anti-degradation or "similar soils" provision (310 CMR 40.0032[3][b]). This section of the MCP states that soils must not be reused at a location where "existing concentrations of oil and/or hazardous material…are significantly lower than the levels of those oil and/or hazardous materials present in the soil being disposed or reused." In other words, the soils cannot be reused at a location where they would increase the level of contamination already present at the receiving site.

- Class B-1: Soils contain concentrations of at least one contaminant above RCS-1. These soils are regulated under the MCP and, in many cases, require reporting to MassDEP. These soils may be disposed in a lined or unlined landfill within Massachusetts provided that they meet the criteria established in MassDEP Policy #COMM-97-001, *Reuse and Disposal of Contaminated Soil in Massachusetts Landfills* (August 1997).

- Class B-2: Soils contain concentrations of at least one contaminant above RCS-1 and the COMM-97 reuse criteria. These soils must be transported to an out-of-state landfill for disposal.

The general information included in the section above is provided as guidance for planning purposes during the feasibility stage of this project. There are several nuances, including exemptions and variances that can be applied if specific observations of urban fill materials are made, that might be applicable to the Site as subsurface information is collected and evaluated. A Licensed Site Professional (LSP) should be involved with any soil management evaluations that are made during pre-design or construction, to ensure compliance with all applicable environmental laws and regulations.

SUBSURFACE INVESTIGATION

Given the identification of RECs on the Site, a Phase II investigation may be warranted during the pre-design phase of the project to determine the presence or absence of OHM in soils at the Site. At a minimum, Phase II investigations should include the following:

- Surface geophysical survey (electromagnetic and ground penetrating radar) in the vicinity of the Steam Plant to identify subsurface anomalies that might indicate the presence of an abandoned underground storage tank. This survey might be followed up with test pitting to identify the source of any anomalies.

- Collection of soil samples from Site areas where disturbance of soils is anticipated. The objective of this investigation would be to determine whether OHM is present in soils. This information would be used to determine the appropriate health and safety precautions that should be taken by construction workers, as well as to identify potential reuse or disposal options for excess soils generated during the project. Shallow soil samples (0 to 2 feet below ground surface) can be collected using hand augers. A small drilling rig (Geoprobe® or equivalent) would be required to obtain deeper soil samples.

If you have any questions on the content of this letter or the attached Phase I ESA report, please do not hesitate to contact me at (978) 703-6029 or by email at *svetere@nobiseng.com*.

Very truly yours,

ES EXECUTIVE SUMMARY

Nobis Engineering, Inc. (Nobis) completed a Phase I Environmental Site Assessment (ESA) of six parcels of land located in the downtown area of Lowell, Massachusetts (the Site). Five of these parcels are owned by the City of Lowell and are used as facilities and infrastructure for Lowell High School. The sixth parcel is currently privately owned and occupied by a pediatric dentistry office. The sixth parcel was included in the ESA because it is being considered for potential acquisition by the City for expansion of the current high school. Nobis performed the Phase I ESA in general conformance with the scope and limitations of the American Society for Testing and Materials (ASTM) Practice E1527-13.

This Phase I ESA was conducted to support a Feasibility Study being performed by Perkins Eastman on behalf of the City of Lowell under a grant provided by the Massachusetts School Building Authority (MSBA). This document is intended to fulfill, in part, the requirements of MSBA Module 3, Section 3.1.4 (Evaluation of Existing Conditions), specifically to document the existing environmental conditions within the footprint of the current Lowell High School and an adjacent parcel being considered for expansion.

The six parcels are hereafter collectively referred to as “the Site”. The Site is the current location of Lowell High School, as well as a dentistry practice located to the south of the High School property. The High School complex consists of five separate buildings occupying land on either side of the Merrimack Canal, which bisects the campus, running north/south through the center of the Site. To the west of the canal is the Lord Building and the Field House; to the east of the canal is the 1922 Building, Freshman Academy, and Steam Plant. The dentistry office is located to the west of the Merrimack Canal.

The portion of the Site located to the west of the canal was first developed in the 1820s concurrent with the development of the Merrimack Canal and the Merrimack Manufacturing Company, a former textile mill. A portion of the Merrimack Manufacturing Company mill complex occupied the northwest corner of the Site, and the remaining Site area west of the canal was occupied by tenement homes associated with the mill. A rail line entered the Site from the south, running parallel to the canal, and a spur was built running perpendicular to the canal along the southern boundary of the Site (currently the dentistry office). In the 1960s, an urban renewal program resulted in the demolition of the mill and associated housing, and the streets to the west of the

canal were completely reconfigured to resemble the present day layout. In 1980, the Lord Building and Field House were constructed on vacant land as improvements to the existing high school, which before this time was entirely located on the east side of the canal.

The portion of the Site located east of the canal was first developed in the early- to mid-1800s. During the 1820s, the land upon which the Freshman Academy is situated was developed as row houses for workers in the Boott Cotton Mills, another former mill that operated in the Site vicinity. The remainder of the Site area east of the canal was developed in the 1840s when the original Lowell High School was constructed on the current footprint of the “old building” of the High School. By 1894, the current “old building” replaced this original school building and the area around the High School was used for residential and storage. In 1902, the “High School Annex” was constructed on Paige Street to the south of the row houses. In 1920, the Steam Plan was constructed. In 1922, the High School expanded to the north toward French Street, replacing residences that occupied this land. In 1939-1940, the Lowell Trade School was built on the current footprint of the Freshman Academy, replacing the row houses and operating alongside the existing High School Annex. In 1997, the most recent addition to the High School was completed, extending the 1922 Building to the north closer to French Street.

Due to its location within a historically urban area, there are several properties within a 1/8-mile radius of the Site that were identified in environmental databases; however, a review of their location relative to the Site, as well as available environmental records, suggests these properties are unlikely to adversely impact environmental conditions at the Site.

Nobis performed a site reconnaissance on August 30, 2016 and conducted a review of City records pertaining to the Site in order to identify historical use, storage, or release of oil or hazardous materials at the Site. Nobis conducted interviews with persons familiar with the current and historical site operations.

Based on the review of historical records, observations made during the site reconnaissance, and information provided in interviews with City personnel, Nobis identified the following Recognized Environmental Conditions (“RECs”), as defined in Section 3.2.78 of the Practice:

- City of Lowell Fire Department records contained one index card file for Lowell High School, which indicated that the facility had a 12,600-gallon “below grade” “Faber Burner”

tank located on French Street. The tank's contents were not listed, nor was the installation date, removal date, or any sort of inspection date. The record does not provide any additional details regarding the tank. This tank may have been a storage vessel for oil that was used to fuel the boilers in the Steam Plant before it was converted to natural gas, or used to heat one of the school buildings. The exact location of this tank is unknown, but is likely to be near the Steam Plant along French Street.

- Sanborn Fire Insurance Maps show a "coal bin" in the 1950, 1952, and 1977 maps in what is now the alley between the Freshman Academy and the Steam Plant. The historical storage of coal in this vicinity may have resulted in the release of coal or coal ash to the environment. A release of coal and/or coal ash could result in high levels of semi-volatile organic compounds (SVOCs) and polycyclic aromatic hydrocarbons (PAHs) in soil.

- 50 Father Morissette Boulevard was historically part of the Merrimack Manufacturing Company property. Most of the property was used for tenement housing; however, the northwestern corner of the property contained two buildings used as an "Old Packing Building" and "Finishing Mill". It is possible that dyes, solvents, or other chemicals used in textile processing were used, stored, or released in this portion of the Site.

- A railroad spur leading into the Merrimack Manufacturing Company was present along the southern border of the current 75 Arcand Drive property from the early 1900s until at least 1952. The railroad is not shown on the 1977 Sanborn fire insurance maps. Additionally, the rail line from which this spur originated directly abuts the Lord Building to the east. This line is still used for trolley services. Former railroad activities likely transported and handled raw materials, chemicals, and hazardous materials associated with the operation of area industry. In addition, railroad operations and maintenance activities themselves may have impacted the Site, as creosote or arsenic-laced railroad ties, herbicides, lubricating oils, diesel fuel, and diesel exhaust commonly result in releases of heavy metals, pesticides/herbicides, and petroleum-related contamination along railroad corridors.

Nobis also encountered several de minimis conditions for the Site. De minimis conditions (environmental concerns, although not RECs) encountered during the assessment include the storage of cleaning products, paints, sealants, pool maintenance chemicals, and laboratory

supplies used for school operations. These chemicals were observed to be labeled, contained, and no evidence of release was noted.

Any subsurface exploration or soil excavation performed in the areas identified above should consider the possibility that environmental media may be contaminated. Prior to performing any pre-design or construction work, Phase II investigations are warranted to evaluate whether these RECs have resulted in a release of contamination the environment, and to provide information to assist with soil management and health and safety planning for Site workers. Phase II investigations might include the advancement of soil borings and collection of soil samples for laboratory analysis. A surface geophysical survey may also be beneficial to identify the location of the suspected storage tank in the vicinity of the Steam Plant.

1.0 INTRODUCTION

Nobis has completed a Phase I Environmental Site Assessment (ESA) of six parcels of land located in the downtown area of Lowell, Massachusetts (the Site). Five of these parcels, 50 Father Morissette Boulevard, 35 and 55 French Street, 68 John Street, and 38 Kirk Street, are owned by the City of Lowell and are used as facilities and infrastructure for Lowell High School. The sixth parcel, located at 75 Arcand Drive, is currently owned by TRS Lowell Doctors Park Trust and is occupied by a pediatric dentistry office. The 75 Arcand Drive parcel was included in this ESA because it is being considered for potential acquisition by the City for expansion of the current high school. A Site Locus Map is included as Figure 1. A Site Plan is included as Figure 2. A Massachusetts Office of Geographic Information Systems (MassGIS) Map of the Site and vicinity is included as Figure 3.

1.1 Purpose

This Phase I ESA was conducted to support a Feasibility Study being performed by Perkins Eastman on behalf of the City of Lowell under a grant provided by the Massachusetts School Building Authority (MSBA). This document is intended to fulfill, in part, the requirements of MSBA Module 3, Section 3.1.4 (Evaluation of Existing Conditions), specifically to document the existing environmental conditions within the footprint of the current Lowell High School and an adjacent parcel being considered for expansion.

To accomplish this objective, Nobis performed a Phase I ESA in conformance with the American Society for Testing and Materials (ASTM) E 1527-13, “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process”. Exceptions and limitations to this report are noted in Section 1.4 below. The objective of a Phase I ESA is to assess environmental conditions at the Site and in the general vicinity for *Recognized Environmental Conditions* (RECs) associated with the presence of petroleum products (PP) or hazardous material (HM). To meet this objective, Nobis performed the tasks described in Section 1.2.

1.2 Detailed Scope-of-Services

The Phase I ESA included the following activities:

- A review of Massachusetts Department of Environmental Protection (MassDEP) and United States Environmental Protection Agency (EPA) regulatory database listings concerning environmental conditions at, and in the vicinity of the Site, as provided in a database search report provided by Environmental Data Resources Inc. (EDR®).

- Contacted City of Lowell officials to obtain information pertaining to present and historical environmental conditions at the Site and adjacent environs.

- A review of available ownership history and land use records, and interview persons with knowledge of the Site to obtain information on past use.

- A review of available aerial photographs, topographic maps, Sanborn Fire Insurance Maps, and historical city directories to aid in assessing local hydrogeology and in assessing past and present land use at the Site and vicinity.

- Performed a site visit on August 30, 2016 to assess general environmental conditions at the Site and adjacent environs for evidence of RECs associated with past or present PP or HM waste handling or storage activities.

- The preparation of this report summarizing the results of the assessment.

1.3 Significant Assumptions

It is assumed that federal, state, and local records are generally complete and current. The preparer assumes that all individuals contacted and/or interviewed during the preparations of this Phase I ESA have responded in good faith. Nobis is entitled to rely on all information gathered during this scope of work.

1.4 Limitations and Exceptions

This Phase I ESA is intended to assess the Site for potential significant environmental issues. It is not intended as a guidance document for potential future remedial action.

Nobis did not have access to the potential acquisition property at 75 Arcand Street during the site reconnaissance on August 30, 2016. This property is not currently owned by the City of Lowell and subsequently Nobis did not have access to view property conditions.

Additional limitations are noted in Appendix A.

1.5 Special Terms and Conditions

No special terms or conditions apply to this Phase I ESA.

1.6 User Reliance

User reliance is subject to the requirements of 40 CFR Part 312, ASTM E1527-13, as noted herein.

1.7 User Obligations

As defined in ASTM E1527-13, the user responsibilities, as applicable, are as follows:

- Identify the scope of work.
- Decide whether to use prior assessments.
- Check title records for environmental liens and activity and use restrictions.
- Disclose specialized knowledge and experience.
- Explain why the purchase price is below market value, if it is discounted.
- Answer interview questions in good faith.
- Provide the information summarized in the user questionnaire provided by Nobis.

2.0 SITE DESCRIPTION

This section provides a description of the Site and adjoining properties.

2.1 Location and Legal Description

According to City Assessor records, five Site parcels are currently owned by the City of Lowell School Department. The property at 75 Arcand Street, being considered for acquisition by the City of Lowell School Department, is privately owned. A summary of tax parcel IDs, building IDs, parcel size and associated street addresses, and current ownership information for the parcels is presented in the table below.

Lowell Assessor's Office Parcel ID	Building ID	Street Address	Approximate Parcel Size (Acres)	Current Owner
158-2470-50	Lord Building and Field House	50 Father Morissette Boulevard	3.29	City of Lowell School Dept.
158-2465-35	Steam Plant	35 French Street	0.15	City of Lowell School Dept.
177-2465-55*	Freshman Academy	55 French Street	0.41	City of Lowell School Dept.
177-3270-68*		68 John Street	0.38	City of Lowell School Dept.
158-3410-38	1922 Building	38 Kirk Street	2.31	City of Lowell School Dept.
158-210-75	Lowell Dentistry for Children	75 Arcand Drive	1.43	TRS Lowell Doctors Park Trust c/o Drs. Montiminy Inc.

*These two parcels make up the Freshman Academy building.

During Site reconnaissance and associated correspondence with knowledgeable personnel, the 1922 Building was occasionally referred to as the "1922 building" by faculty and students. Additionally, the Lord Building was occasionally referred to as the "1980 building". This nomenclature refers to the date of construction of these buildings.

According to the City of Lowell Assessor's Department, all of the subject properties are currently zoned "DMU", which is defined in Article 3 of the City of Lowell Zoning Book (adopted December

7, 2004) as a “downtown mixed-use district”. Copies of the applicable properties’ assessor cards are included in Appendix B.

2.2 Site and Vicinity General Characteristics

The Site is located within an urban area of the City of Lowell with mixed residential, commercial, and recreational uses. The topography of the Site and surrounding environs is relatively flat. According to the Site Locus Map (Figure 1), the topographic gradient decreases to north/northeast, towards the Merrimack River, which is located approximately 650 feet from the Site.

2.3 Current Use of the Property

The subject properties (excluding 75 Arcand Street) are the current location of Lowell High School. The Lord Building and associated Field House, Freshman Academy, and the 1922 Building are all currently used as academic facilities. Academic facilities associated with these buildings include classrooms, laboratories, cafeterias, auditoriums, and administrative offices. The Lord Building facility and the 1922 Building are separated geographically by the Merrimack Canal, which runs north/south between the two buildings. Students and faculty are able to move between the Lord and 1922 Buildings using covered bridges which span over the canal below. The Freshman Academy is a completely separate building for 9th grade students, located to the east of the 1922 Building.

The Field House attached to the Lord Building is used as a sports and recreational facility. This facility contains a pool, an indoor track and gymnasium, a wrestling room, weight rooms, and locker rooms.

The 1922 and Freshman Academy buildings are heated using a forced steam system, which is produced by the Steam Plant, located at 35 French Street. The steam plant building contains the associated equipment (boilers, piping, compressors, etc.) used to produce steam.

The 75 Arcand Street property is used as a pediatric dentist office called Lowell Dentistry for Children.

2.4 Descriptions of Structures, Roads, Other Improvements on the Site

The subject properties and associated buildings are described in greater detail in the sections below.

2.4.1 50 Father Morissette Boulevard – Lord Building and Field House

The 50 Father Morissette Boulevard parcel is comprised of two buildings including the approximately 143,250 square foot Lord Building and the approximately 73,310 square foot Field House (square footage as reported on property cards on file with the Lowell Assessor's Office). The two buildings on this parcel are connected via lobby space and are both concrete block/masonry frames. The buildings are heated with natural gas via a forced hot air system. Both buildings were constructed in 1980.

The Lord Building is a slab-on-grade, three-story rectangular shaped educational wing comprised of classrooms, laboratories, a cafeteria, a kitchen, conference space, the Creegan Media Center, bathrooms, nurse's offices, Jeanne D'Arc Credit Union and ATM, storage space, a school store, a theatre, and administrative offices. The roof is steel frame with rolled composite roofing. Air handling units for the HVAC system are present on the roof of the building.

The Field House is a two-story hexagonal building with a multi-sport gymnasium, a pool, wrestling room, weight rooms, locker rooms, and furnace rooms. The basement contains a pool pump area where chlorine and carbon dioxide for the pool are stored. The Field House is located west of the Lord Building. The roof is steel frame with enamel metal shingles.

A paved access road leads from Father Morissette Boulevard on the western portion of the property to a loading dock and small parking area on the southern side of the Lord Building. The loading dock is primarily used for offloading trucks carrying food and drinks for the cafeteria.

Portions of the property that are not paved for walkways or the access road are landscaped.

2.4.2 35 French Street – Steam Plant

The approximately 2,500 square foot one-story steam plant abuts the Freshman Academy to the west. The building contains two large boilers, compressors, expansion tanks, and piping which

are used to generate steam which heats the 1922 Building and Freshman Academy. A tunnel connecting the steam plant and the 1922 Building runs from the west side of the steam plant under Kirk Street and connects in the eastern side of the 1922 Building basement. Piping associated with the steam heating system runs throughout the tunnel. Piping from the Steam Plant enters the second story of the Freshman Academy.

The Steam Plant was constructed circa 1920 and renovated in 1996. The Steam Plant building is slab-on-grade with masonry frame, heated by steam, with rolled composite roofing. An approximately 50-foot chimney is present adjacent to the southern wall of the plant.

A paved alley is present to the east of the steam building, between the Freshman Academy and the steam plant.

2.4.3 55 French Street and 68 John Street – The Freshman Academy

The approximately 92,000 square foot Freshman Academy is two stories with a basement. It is constructed with a masonry frame and a rolled composite roof. The building is comprised of classrooms, administrative offices, a kitchen, a cafeteria, a theater, and laboratories. The building is used only for freshman students.

The current building was constructed in two sections in the early 1900s. The northern portion of the building, along French Street, was built in 1939-1940 and was formerly identified as the Lowell Trade School. The southern portion of the building, along Paige Street, was built in 1902 and was formerly identified as the High School Annex. This building was fully renovated and repurposed in 1986.

2.4.4 38 Kirk Street – The 1922 Building

The approximately 300,000 square foot, rectangular shaped 1922 Building at 38 Kirk Street is three stories with a basement. The building is comprised of classrooms, administrative offices, an auditorium, laboratories, art rooms, and a health center.

The building was constructed in three sections from the 1890s to the mid-1990s. The southern portion of the building was constructed in in the 1890s and was the original Lowell High School. In 1922, the central portion of the building was constructed. The northern section of the building

along Father Morissette Boulevard was constructed in 1997. Renovations to the interior of the 1894 and 1922 buildings were performed in the mid-1990s.

The building is steel framed with rolled composite roofing. The building is heated via steam generated by the Steam Plant. Multiple utility rooms containing electrical equipment and equipment for hot water heating and circulation are present in the basement.

An art room in the basement contains a dark room and kilns. However, the dark room has been taken out of use and all hazardous materials have been removed.

2.4.5 75 Arcand Street – Lowell Dentistry for Children (Potential Acquisition)

The building at 75 Arcand Street is not owned by the City and is currently operated as a commercial doctor and dentist's office. Based on City property record cards, the building is two stories, with electric heat, steel frame, and a tar and gravel roof. Much of the undeveloped portions of this parcel is occupied by a paved parking lot to the north, east, and south of the building. Unpaved areas of the parcel are landscaped with trees, shrubs, grass, and bark mulch.

2.5 Current Use of Adjoining Properties

The 50 Father Morissette Boulevard parcel is bordered to the north across Father Morissette Boulevard by a parking garage, to the east beyond Lucy Larcom Park and the Merrimack Canal by the 1922 Building, to the west beyond Arcand Drive by residential properties, and to the south by Lowell Dentistry for Children.

The Freshman Academy and Steam Plant parcels are bordered to the north beyond French Street by residential properties, self-storage units, and Boarding House Park; to the east by a parking garage; to the west by the Lowell National Historical Park Headquarters and the 1922 Building; and to the south by a parking lot, residential properties, and social services offices.

The 38 Kirk Street parcel (1922 Building) is bordered to the north and south by residential properties; to the east beyond Kirk Street by commercial properties, the Lowell National Historical Park Headquarters, and residential properties; and to the west beyond Lucy Larcom Park and the Merrimack Canal by the Lord Building.

The 75 Arcand Drive parcel is bordered to the north by the Lord Building and Field House at 50 Father Morissette Boulevard; to the east beyond Lucy Larcom Park and the Merrimack Canal by residential properties, a church, and a social services center; to the west by residential properties and the Lowell City Fire and Police Departments; and to the south by the Lowell Masonic Center.

The Lowell Parks Department owns the properties on the eastern and western sides of the canal. Lucy Larcom Park runs along the eastern border of the Merrimack Canal and both sides contain benches, sidewalks, small monuments, and greenspace for public use. A railroad right-of-way exists between 50 Father Morissette Boulevard and the park along the western side of the canal. The railroad itself is still intact; however, it is no longer in use.

2.6 Presumed Groundwater Flow Direction

Based on a review of the topography of the subject properties and vicinity, as well as its proximity to major surface water bodies, the presumed general direction of groundwater flow in the Site vicinity is toward the northeast, ultimately discharging to the Merrimack River, which flows northwest to southeast approximately 1,000 feet from the Site. However, the presence of several manmade canals in the vicinity of the subject properties may impact local groundwater conditions such that on a micro scale, the direction of groundwater flow could vary widely.

3.0 USER PROVIDED INFORMATION

Mr. Richard Underwood, Director of Operations for Lowell High School, provided responses to the user inquiries outlined in ASTM E1527-13. The completed User Questionnaire is included as Appendix C. The User was requested to respond to the best of his knowledge.

3.1 Specialized Knowledge

The User does not have specialized knowledge pertaining to the likely presence of contamination at the Site properties.

3.2 Commonly Known or Reasonably Ascertainable Information

The User did not know of any specific chemicals present on the Site properties currently or in the past, outside of those used in the school laboratory and chlorine used for the pool. The User is not aware of any spills or chemical releases on the Site properties. The User did not know of any environmental cleanups at the Site properties.

3.3 Valuation Reduction for Environmental Issues

At the time of this report, there are no plans to transfer ownership of the property and thus the question does not apply.

3.4 Owner, Property Manager, and Occupant Information

The Site is currently occupied by Lowell High School. Mr. Underwood provided responses to the Owner Questionnaire on behalf of the City of Lowell (Appendix C).

3.5 Reason for Performing Phase I

The User indicated that the Phase I ESA is being conducted to evaluate the presence of any potential environmental issues at the Site in anticipation of a large facility renovation. The City of Lowell is evaluating the feasibility of renovating or rebuilding the high school in its current location. This report will help the City evaluate current or foreseeable environmental conditions, issues, or constraints associated with the current facility properties and 75 Arcand Drive, to evaluate the extent to which environmental issues could impact renovation costs.

4.0 RECORDS REVIEW

The following sections document the information gathered during review of available environmental records, physical setting sources, and historical site use information.

4.1 Standard Environmental Record Sources

As part of this ESA, state and federal environmental records were reviewed in the form of an environmental database report provided by EDR® (Appendix D). When available, information was also obtained from federal, state, and local municipal records. Parcels associated with the Site and several surrounding properties were identified in databases accessed by EDR®. The following sections identify and summarize the databases evaluated in the EDR® Database Report, as well as identify Site properties and/or pertinent properties within the vicinity of the Site listed in the accessed databases. Several notable database findings are provided below:

Lowell High School, Kirk Street (the Site): The Site is listed in the facility index system (FINDS) database. This database contains air pollution data collected by the EPA, state, local, and tribal air pollution control agencies. It is unknown for certain why the Site is included in this database, however it is likely due to the presence of the Steam Plant. No violations or environmental releases were identified for this database listing.

Lowell High School, 50 French Morissette Boulevard (the Site): The Site is listed in the FINDS and US Aerometric Information Retrieval System (AIRS). AIRS is the national repository for information concerning airborne pollution in the United States. Both databases relate to tracking air emissions from the Steam Plant. An information violation was issued in March 2012. Compliance was soon achieved and this violation is unlikely to impact present day environmental conditions at the Site.

4.1.1 Federal and State Regulatory Agency Reviews

EPA National Priority List (NPL). The EPA's NPL is a list of confirmed or proposed Superfund facilities. The Site was not identified as an NPL facility or Delisted NPL facility. No NPL facilities or Delisted NPL facilities were identified within a 1-mile radius of the Site.

Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS). The CERCLIS database is the EPA's database of current and potential Superfund sites currently or previously under investigation. The Site was not identified as a CERCLIS facility. No CERCLIS facilities were identified within a 1/2-mile of radius of the Site.

Comprehensive Environmental Response, Compensation and Liability Information System Archived Sites (CERCLIS-NFRAP). The CERCLIS-NFRAP database is a database of archived CERCLIS facilities that, to the best of the EPA's knowledge, assessment has been completed and the EPA has determined no further steps will be taken to list this site on the NPL. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not deemed to be a potential NPL site.

The Site was not identified as a CERCLIS NFRAP facility. No CERCLIS NFRAP facilities were identified within a ¼-mile of radius of the Site.

Resource Conservation and Recovery Act (RCRA) Handlers. The RCRA database is the EPA's database of registered hazardous waste generators and Treatment, Storage, or Disposal (TSD) facilities. The Site was not identified as a TSD facility or a corrective action (CORRACTS) facility. No TSD or CORRACTS facilities were identified within ¼-mile of the Site.

Lowell High School was listed in the RCRA database as a RCRA Conditionally Exempt Small Quantity Generator (RCRA-CESQG). The RCRA-CESQG (EPA ID No. MAR000010918) is listed at 50 French Street, but does not identify the hazardous waste currently or formerly generated at the Site. The EDR® Database report lists a "Written Informal" Violation associated with a Generator Manifest initially identified on January 26, 2012 and later enforced on March 6, 2012. The EDR® Report indicates compliance was achieved February 1, 2013. According to Richard Underwood, Head of Facilities at Lowell High School, the high school no longer generates any sort of hazardous waste. Additionally, no documentation regarding any hazardous waste spills were identified in Site records review.

One (1) RCRA Large Quantity Generator (RCRA LQG) was identified less than 1/8-mile from the Site, identified as a CVS Pharmacy located at 35 Merrimack Street. This facility (EPA ID No. MAC300019775) is located 364 feet southeast of the Site, and reportedly has not had any violations. This generator is unlikely to pose an environmental threat to the Site.

Three (3) RCRA Small Quantity Generators (RCRA SQG) were identified within ¼-mile of the Site:

- **Konarka Technologies (116 John Street**) is listed as a SQG of ignitable waste, spent halogenated and non-halogenated solvents, and waste oil. According to the EDR® Report, there are no documented releases or spills associated with this property.

- The **Wannalancit Building (600 Suffolk Street**) is listed as a SQG for a variety of wastes, including but not limited to ignitable waste, heavy metals, spent halogenated and non-halogenated solvents, volatile organic compounds (VOCs), polychlorinated biphenyl (PCB) waste, and waste oil. This parcel is inferred to be located hydraulically upgradient to the Site. According to the EDR® Report, there are no documented releases or spills associated with this property.

- The **Ames Photonics Center (720 Suffolk Street**) is listed as a SQG for a variety of wastes, including but not limited to corrosive waste, ignitable waste, reactive waste, heavy metals, spent halogenated and non-halogenated solvents, VOCs, PCB waste, and waste oil. According to the EDR® Report, there are no documented releases or spills associated with this property.

These RCRA SQG facilities are unlikely to pose an environmental threat to the Site.

Three (3) RCRA CESQGs were identified within 1/8-mile of the Site:

- **Hess Gas Station (330 Merrimack Street)** is listed as a CESQG for ignitable waste and reportedly has not had any violations.

- The **Lowell Fire Department (99 Moody Street)** is listed as a CESQG for ignitable waste and reportedly has not had any violations.

- The **Lowell National Historic Park (400 Foot of John Street)** is listed as a CESQG for ignitable waste and waste oil. Although the database indicates several violations have been identified with this RCRA CESQG, the violations reportedly have been rectified by confirmed compliance evaluations.

These RCRA CESQG facilities are unlikely to pose an environmental threat to the Site.

Federal Emergency Response Notification System (ERNS) Releases. The ERNS database is the EPA's database of emergency response actions. The Site was not identified as an ERNS facility.

Federal Institutional Controls and/or Engineering Controls Registries. The Land Use Control Information System (LUCIS) contains records of land use control information pertaining to former Navy Base Realignment and Closure properties. The US Engineering Controls Sites List identifies sites at which engineering controls have been implemented, including various forms of caps, building foundations, liners, and treatment methods which create environmental pathway elimination for regulated substances to enter the environment. Institutional controls include administrative measures (groundwater use restrictions, construction restrictions, property use restrictions, etc) to prevent exposure to contaminants remaining at sites. No Federal engineering or institutional controls were identified for the Site or within 0.5 miles of the Site.

State and Tribal Hazardous Waste Site Inventory (SHWS) Sites, State RELEASE Database, State and Tribal Leaking Underground Storage Tank (LUST) List, State and Tribal Leaking Aboveground Storage Tank (LAST), and Spills Database. The RELEASE and SHWS databases contain records of release reports submitted to MassDEP. The LUST database contains records of leaking underground storage tanks. Properties identified in these databases are usually found throughout the other federal and state databases researched by EDR®. The Spills database contains records of release reports submitted to the Commonwealth of Massachusetts.

Seventeen (17) SHWS sites were identified within 1/8-mile of the Site. Of the 17 identified SHWS Sites, six (6) have been closed with Class A-1 Response Action Outcome (RAO) Statements, indicating the released contamination has been reduced to background and/or the threat of release has been eliminated. Four (4) of the 17 SHWS sites have been closed with Class A-2 RAO Statements, indicating that some form of remediation was implemented and, although contamination was not reduced to background levels, a Permanent Solution has been achieved and there are no restrictions on the use of the property. The Class A-1 and Class A-2 RAO sites are highly unlikely to adversely impact environmental conditions at the Site. The seven remaining SHWS sites identified within 1/8-mile are described below:

- **Former Boott Cotton Mill, 130 John Street (located approximately 500 feet northeast of the Site):** This property has had multiple reported releases. The releases are described below.

  - Release Tracking Number (RTN) 3-26688: This RTN also covers the release associated with RTN 3-30667 and is a result of a release of PCBs, petroleum hydrocarbons, and lead to soil. Soil contamination was discovered in 2007 during development of the current residential buildings on the parcel. Multiple excavations have been performed to remove a majority of the contamination. The RTN status is currently Phase IV, indicating that remediation is ongoing. This RTN remains open (i.e. a Permanent Solution has not been achieved).

  - RTN 3-27777: This RTN was issued as a result of a hydraulic fluid release from a pipe in July 2008. The release was abated and closed via a Class A-1 RAO in August 2008. As discussed above, this release is unlikely to impact conditions at the Site.

  This property is inferred to be hydraulically downgradient from the Site, and therefore releases occurring at this property are not likely to adversely impact environmental conditions at the Site.

- **50 Arcand Drive (located approximately 200 feet west of the Site):** This property is identified in the SHWS, LUST, Release, and Institutional Controls Databases as a result of a release of petroleum hydrocarbons to soil and groundwater identified in February 1999 during the removal of underground storage tanks (USTs) at the Lowell Police and Fire Department (RTN 3-18004). Three 4,000-gallon USTs were removed in 1999, and replaced with three 6,000-gallon USTs. A Class A-3 RAO statement was filed in August 2009, indicating that remediation was conducted and a Permanent Solution was achieved, but that an Activity and Use Limitation (AUL) was implemented to prevent exposure to contamination left in place. The RAO document indicates that groundwater flows to the west, in the opposite direction of the Site. Given the property is located hydraulically downgradient from the Site, this release is unlikely to adversely impact environmental conditions at the Site.

- **River Place Towers, 115-145 Post Office Square, Lowell (located approx. 300-500 feet north of the Site):** This property is listed on the Release, SHWS, and State Institutional Controls databases as a result of a release of petroleum hydrocarbons to soil discovered in November 1996 during the removal of USTs (RTN 3-14505). The RTN was closed with a Class A-3 RAO, indicating that remediation was conducted and a Permanent Solution was achieved, but an AUL was implemented in order to prevent exposure to contamination remaining in place. This property is inferred to be located hydraulically downgradient from the Site, and therefore the release is not likely to adversely impact environmental conditions at the Site.

- **Former Gasoline Station, 70 French & Amory Street, Lowell (located approx. 300 feet east the Site):** This property is listed in the Release and SHWS databases as a result of contamination related to two USTs uncovered in 1989 (RTN 3-1975). A notice of responsibility (NOR) was submitted to the potentially responsible party in 2008, outlining measures that must be taken to bring the property into compliance with the MCP. However, available MassDEP documents do not provide any additional data regarding investigations or remedial actions at the property. The release location is inferred to be hydraulically downgradient from the Site, and therefore unlikely to adversely impact environmental conditions at the Site.

- **44 Post Office Square (located approx. 120 feet north and northeast of the Site):** This property is identified in the LUST, Release, SHWS, and State Institutional Controls databases for the release of approximately 6,000 gallons of No. 6 fuel oil into the adjacent Merrimack River in 1979 (RTN 3-354). Upon completion of follow up environmental investigations, three more USTs were identified and removed, and contaminated soil was excavated (RTN 3-14565). A Class A-3 RAO Statement was filed in March 1999 which included the implementation of an AUL to prevent exposure to contamination left in place. The property is believed to be located hydraulically down and cross-gradient to the Site, and is therefore unlikely to adversely impact environmental conditions at the Site.

Six (6) LUST sites were listed within a 1/8-mile radius of the Site. Of the six LUST Sites identified, three have been closed with either a Class A-1 RAO or a Permanent Solution with No Conditions (PSNC), indicating contamination has been reduced to background levels and there are no restrictions on the use of the property. Two of the remaining three LUST Sites have been closed

with Class A-2 RAOs (indicating remediation was conducted and a Permanent Solution was achieved, but contamination was not reduced to background). These two LUST Sites are located at a former Hess Station, one listed at **253 Merrimack Street (RTN 3-4509)** and **300 Merrimack Street (RTN 3-28784)**. Documentation on file with MassDEP indicates groundwater was interpreted to flow in a northwesterly direction along Merrimack Street, cross-gradient to downgradient from the Site. The final LUST site was located at 44 Post Office Square, and is described above. Based on the locations of the LUST sites and their inferred cross-gradient or downgradient location relative to the Site, they are unlikely to adversely impact environmental conditions at the Site.

State and Tribal Active Solid Waste Disposal Sites (SWL). The Site was not identified as a current or former SWL. No landfills were identified within ¼-mile of the Site.

State and Tribal Underground Storage Tank (UST) List. The UST database is a list of USTs registered with the Commonwealth of Massachusetts. Six UST facilities were identified within ¼-mile of the Site. Three of the UST facilities are located within 1/8-mile of the Site, and are listed below:

- **Lowell Police and Fire Department** (50 Arcand Drive) is located approximately 200 feet west of the Site. This property contains three 6,000-gallon USTs which provide diesel and gasoline for municipal vehicles. No reported issues or violations have occurred associated with these USTs, and no impacts to environmental conditions at the Site are expected.

- **Boott Mills Museum** (115 John Street) is located approximately 500 feet east of the Site. This property contains one 550-gallon diesel UST. RTN 3-31857 is associated with this tank, however a PSNC has been filed for the release and therefore no impacts to environmental conditions at the Site are expected.

- **Former Hess Gas Station** (300 Merrimack Street) is located approximately 400 feet south of the Site. This property contains three 10,000-gallon gasoline USTs and two 550-gallon waste oil USTs. All of the tanks were reportedly installed in 1988. The USTs associated with this property are believed to be associated with RTNs 3-4509 and 3-28784 (see LUST Database results). MassDEP documentation indicates groundwater flow has been interpreted at the parcel as flowing westerly along Merrimack Street, away from the Site, therefore no impacts to environmental conditions at the Site are expected.

Based on the inferred cross-gradient or downgradient locations of these UST sites relative to the Site, the UST facilities are unlikely to adversely impact environmental conditions at the Site.

State and Tribal Aboveground Storage Tank (AST) List. The AST database is a list of ASTs registered with the Commonwealth of Massachusetts. No AST facilities were identified within ¼-mile of the Site.

State and Tribal Institutional Control / Engineering Control Registries (INST CONTROL) List. The INST CONTROL list contains properties where AULs have been established on the future use of contaminated property. The Site was not identified on the INST CONTROL list. Four (4) Institutional Control properties are listed within ¼-mile of the Site. Three of the properties have been identified above (River Place Towers, 44 Post Office Square, and 50 Arcand Drive), and are not likely to adversely impact environmental conditions at the Site.

The fourth location, The Tremont Mills Site located at 257 Father Morissette Boulevard, is approximately 750 feet west of the Site. Four different RTNs have been associated with this former mill property, including RTN 3-19880 (petroleum and PCB contamination in property soils), RTN 3-27821 (petroleum sheen observed on Western Canal north of Hall Street), RTN 3-27828 (asbestos containing material [ACM] in demolished boiler material), and RTN 3-27830 (threat of release from a drum containing viscous tar in demolition debris). The January 2011 Class A-3 RAO Statement submitted to MassDEP indicates that on-site groundwater contains low levels of petroleum contamination, at concentrations that do not exceed applicable MassDEP risk-based standards. Given the property's location in relation to the Site, it is unlikely to adversely impact environmental conditions at the Site.

4.1.2 City of Lowell Municipal Record Review

On August 31, 2016, Nobis visited the City of Lowell municipal offices to review records from the Assessor's Office, Engineering Department, City Clerk, Historical Department, and Fire Department. This section provides a summary of the review of municipal records.

4.1.2.1 Assessor's Department

According to City Assessor records, five (5) of the six (6) Site parcels are currently owned by the City of Lowell's School Department. A summary of parcel IDs and associated street addresses is presented in the table below.

Lowell Assessors Office Parcel ID	Street Address	Approximate Year Building Constructed*	Approximate Parcel Size (Acres)	Current Owner
158-2470-50	50 Father Morissette Boulevard	1980	3.29	City of Lowell School Dept.
158-2465-35	35 French Street	1920	0.15	City of Lowell School Dept.
177-2465-55*	55 French Street	1920	0.41	City of Lowell School Dept.
177-3270-68*	68 John Street	1939	0.38	City of Lowell School Dept.
158-3410-38	38 Kirk Street	1920	2.31	City of Lowell School Dept.
158-210-75	75 Arcand Street	1970	1.43	TRS Lowell Doctors Park Trust c/o Drs. Montiminy Inc.

*=Approximate year building constructed refers to the current building on the parcel, and does not indicate that the current building was the first building to occupy the tax parcel.

All six Site tax parcels are currently zoned "DMU", which is defined in the City of Lowell's Zoning Book (amended October 22, 2013) as a "Downtown Mixed-Use District". A copy of the assessor cards for these properties is included in Appendix B.

4.1.2.2 City of Lowell Engineering Department

The City of Lowell Engineering Department contained floor layouts for the 1922 and Lord Buildings as well as the Field House. Additionally, a summary report listing all building violations was identified from an October 2015 Building Inspection of the facility. Listed violations appeared to address facility equipment or infrastructure that had become damaged or worn out over time that was not up to Massachusetts Building or Plumbing Code.

The Engineering Department also provided files pertaining to facility upgrades that have been performed at the school throughout the years. Examples include: replacement of the slate roof in

the 1892 portion of the 1922 building in 2012; replacement of lighting, windows, toilets, radiators, and other interior components in 1995; installation of air conditioning units in 1995; air handling units upgrades on the Lord Building in 2005. Original documentation retrieved from the Engineering Department files is provided in Appendix B.

4.1.2.3 City of Lowell Clerk's Office

The City of Lowell Clerk's Office contained minimal useful information regarding the Site or Site buildings. The Clerk's Office was able to provide historical city directories of the surrounding neighborhood.

4.1.2.4 Lowell Historical Society

Given the historic nature of the area and the buildings currently occupying the Site, Nobis inspected available records at the Lowell Historical Society. Mr. Steve Stowell of the Lowell Historical Department was able to provide Cultural Resources Inventories of the Site buildings. Original documentation is provided in Appendix B.

4.1.2.5 City of Lowell Fire Department

Nobis reviewed available records at the City of Lowell Fire Department. Original documentation is provided in Appendix B. The Fire Department records contained one index card file for Lowell High School, which indicated the facility had a 12,600-gallon "below grade" "Faber Burner" tank located on French Street. The tank's contents were not listed, nor was the installation date, removal date, or any sort of inspection date. The record does not provide any additional details regarding the tank.

4.2 Online Resources

Nobis reviewed a Statement of Interest (SOI) form submitted by Lowell High School to the MSBA dated April 2014, related to "replacement of or addition to obsolete buildings in order to provide for a full range of programs consistent with state and approved local requirements". Information related to the history, structure, and usage of the School buildings provided in this document are referenced throughout this report. The SOI was provided to Nobis by Perkins Eastman, the lead firm of the feasibility study design team, and is included in Appendix E.

4.3 Additional Environmental Sources

Nobis reviewed documents available on the MassDEP Reportable Release Lookup internet database. The documents and records available on this website pertain to sites or properties at which reportable releases or threats of release of contamination have occurred and MassDEP has assigned a Release Tracking Number. The findings of this review are included in the site summaries provided in Section 4.1. As detailed above, Nobis did not identify conditions at nearby release sites that would be expected to adversely impact environmental conditions at the Site.

4.4 Physical Setting Sources

According to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) dated July 7, 2014, the Site is not located in a 100- or 500-year flood zone. The nearest floodplain areas are the canal (which bisects the Site) and the Merrimack River, located approximately 750 feet to the northeast.

4.5 Historical Use Information on the Properties and Surrounding Area

According to Nobis' review of historical records, the historical use of Site properties is as follows:

According to the Lowell Cultural Resources Inventory for the Site, the Lowell High School was initially built on Kirk and Anne Streets in 1840, at the site of the "1894 Building". At the time of its construction, the high school building was reportedly the only development within the current school footprint (east of the canal) all the way to French Street. By the 1850s, the area had been built up with several row houses along Kirk Street and additional houses along Anne Street. The Kirk Street Congregational Church was built at the corner of Kirk and French Streets in 1846. In the 1850s, Boott Mills constructed a boarding house row along French Street on the property now occupied by the Freshman Academy.

To the west of the canal, tenement homes associated with the former Merrimack Manufacturing Company were initially developed circa 1820. As of 1892, the area within the footprint of the current high school was occupied by homes associated with the Merrimack Manufacturing Company or Boott Cotton Mills (including the row houses mentioned above), and community buildings constructed to support the population of mill workers and their families. Based on review of the oldest available maps of the Site, the current Lowell High School was being constructed in

1892 at the current location of the “1894 Building”. The Kirk Street Primary School was located across Kirk Street from the high school. The Lowell Congregational Church was located on the corner of Kirk and French Streets. A storage building was located at the corner of Paige and John Streets. The Site area maintained this configuration and use until at least 1907, with the only major change being the construction of the “High School Annex” in 1902 and the “Manual Training School” along Paige Street prior to 1907.

Major changes within the Site area between 1907 and 1950 included construction of the “Heating Plant” (present day Steam Plant) in 1920, demolition of tenement homes on the 38 Kirk Street parcel and expansion of the high school in 1922, and demolition of the row houses along French Street and construction of the Lowell Trade School in 1939-1940. In 1950, Lowell High School was located entirely to the east of the Merrimack Canal, with the 1894 and 1922 Buildings located on their current footprint, and the Freshman Academy buildings present as their predecessor schools (High School Annex No.1 and Lowell Trade School).

The next major reconfiguration of the Site area was during the late 1960s/early 1970s, when the tenement homes located to the west of the canal were demolished and the streets reconfigured. This change followed the demolition of the Merrimack Manufacturing Company mills in the mid-1960s. The gridded streets that provided the structure for this neighborhood were removed and Arcand Drive was created to form the western and northern boundaries of the present day 50 Father Morissette Boulevard parcel. In 1980, the Lord Building and Field House were constructed on this newly formed parcel.

The following sections provide specific details regarding the review of Sanborn Fire Insurance maps, aerial photographs, topographic maps, and city directories reviewed for the Site.

4.5.1 Sanborn Fire Insurance Maps

Sanborn Fire Insurance Maps were provided by EDR® for the years 1892, 1907, 1950, 1952, 1977. The EDR® Certified Sanborn Map Report is included as Appendix F. The following is a summary of information obtained from each Sanborn map:

Lord Building and Field House (50 Father Morissette Drive)

- **1892:** The parcel on which the Lord Building and Field House would later be constructed is occupied entirely by tenement row houses. Dutton Street extends northward along the southeastern property boundary, running parallel (to the west) to the Merrimack Canal which bisects the Site. Two buildings associated with the Merrimack Manufacturing Company facility, an old textile mill, extend south onto the parcel in the northwest corner.

- **1907:** The parcel and associated buildings appear similar to that of the 1892 map. The parcel continues to be improved with multiple tenement row houses. The two buildings associated with the Merrimack Manufacturing Company still occupy the northwestern corner of the parcel. The buildings appear to be used as an “Old Packing Building” and “Finishing Mill”.

- **1950:** The parcel and associated buildings appear similar to that of the 1907 map. The parcel continues to be improved with multiple tenement row houses. One of the two Merrimack Manufacturing Company buildings has been razed. One set of tenement row houses in the northwestern corner have also been razed to accommodate the extension of the Finishing Mill building further southeast onto the parcel.

- **1952:** No changes have been made to the parcel since the drafting of the 1950 Sanborn map.

- **1977:** All of the former tenement housing facilities have been razed. All of the Merrimack Manufacturing Company buildings have also been razed. The streets within the current limits of the parcel have been significantly realigned, forming the current boundaries of the parcel. Dutton Street no longer runs parallel along the Merrimack Canal, and instead terminates at the southern corner of the existing Site. Worthen Street, Bradford Street, and an unnamed alley that were formerly part of the tenement development, are no longer present and Arcand Drive now runs to the west and north of the parcel, forming the western and northern property boundaries. The parcel is improved with one small building; the use or occupancy of this building is unknown.

Steam Plant (35 French Street)

- **1892:** The parcel is improved with a two-story dwelling attached to a dwelling to the south.

- **1907:** The parcel appears similar to the 1892 Sanborn map.

- **1950:** The 1950 Sanborn map depicts the dwelling having been razed. The parcel is now improved with a “Heating Plant”, constructed in 1920. Three horizontal steam boilers appear in the building. Adjacent east of the plant is a “coal bin”. A brick chimney has also been constructed just to the south of the Heating Plant.

- **1952:** No changes have been made to the parcel since the drafting of the 1950 Sanborn map.

- **1977:** No changes have been made to the parcel since the drafting of the 1952 Sanborn map.

Freshman Academy (55 French Street, 68 John Street)

- **1892:** The parcel is improved with tenement row houses associated with the Boott Cotton Mill. A storehouse is located south of the tenement houses.

- **1907:** The parcel still is improved with the tenement row houses along French Street. The storehouse on the southern region of the parcel has been razed and improved with a Manual Training School and the three-story “High School Annex”.

- **1950:** The tenement houses have been razed, and the area has been improved with a two-story Lowell Trade School. The Sanborn map indicates the building was constructed between 1939 and 1940. The High School Annex is still in place south of the new trade school. Almost the entire parcel land area is covered by the footprints of the two buildings.

- **1952:** No changes have been made to the parcel since the drafting of the 1950 Sanborn image.

- **1977:** No changes have been made to the parcel since the drafting of the 1952 Sanborn image.

1922 Building (50 Father Morissette Drive)

- **1892:** The parcel is improved with two-story dwellings, tenement row houses along Kirk Street, and the "Kirk Street Congregational Church" on the corner of Kirk Street and French Street. The southern end of the parcel is improved with the foundation of the High School, which is presumably under construction. Anne Street appears to run between the parcel and the Merrimack Canal, adjacent to the west.

- **1907:** The parcel appears the same as the 1892 Sanborn image; however, it appears the three-story Lowell High School building has been completed, occupying the southern third of the parcel.

- **1950:** The row houses and Congregational Church have been razed. The land area formerly occupied by the row houses and church is improved with an extension of the Lowell High School. The construction date of the northern wing of the high school is specified as 1921. The new high school wing appears to be three stories tall, and includes an assembly hall. The original high school building is present with the same footprint on the southern region of the parcel, with a construction date of 1892 specified.

- **1952:** No changes have been made to the parcel since the drafting of the 1950 Sanborn map.

- **1977:** No changes have been made to the parcel since the drafting of the 1952 Sanborn map.

75 Arcand Street (Lowell Dentistry for Children – potential acquisition)

- **1892:** The parcel is occupied entirely by tenement row houses. Dutton Street extends northward along the southeastern property boundary, running parallel (west) to the Merrimack Canal which bisects the Site.

- **1907:** The parcel and associated buildings appear similar to that of the 1892 map. Since 1892, a railroad spur has been added to the rail line running along Dutton Street. The spur runs perpendicular to Dutton Street along the southern border of the Site on what is now 75 Arcand Drive (the remnants of this spur are still visible in recent aerial photographs of the area).

- **1950:** The parcel and associated buildings appear similar to that of the 1907 map.

- **1952:** The parcel and associated buildings appear similar to that of the 1950 map.

- **1977:** All of the former tenement housing facilities have been razed. The parcel is improved with one small building located centrally on the parcel; the use or occupancy of this building is unknown. Dutton Street no longer runs parallel along the Merrimack Canal, and terminates at the southern corner of the parcel. The size and orientation of the building indicates that this is presumed to be the building that currently occupies the parcel. The railroad spur along the southern boundary of the property is no longer identified.

4.5.2 Historical Aerial Photographs

Historical aerial photographs were provided by EDR® for the years 1938, 1952, 1963, 1965, 1977, 1980, 1985, 1998, 2006, 2008, 2010, and 2012. The EDR® Aerial Photo Decade Package is included in Appendix F. The following information was obtained from each aerial photograph:

- **1938:** Tenement homes occupy the portion of the Site located to the west of the canal (the Lord Building and Field House have yet to be constructed). The area to the east of the canal is occupied by the high school buildings constructed in 1892 and 1921. The Steam Plant and High School Annex are present at the east end of the Site.

- **1952:** The Site appears similar to the 1938 photo with the exception of the High School Annex (current Freshman Academy), which appears to have been improved with the Lowell Trade School.

- **1963 and 1965:** The Site appears similar to the 1952 photo. Substantial demolition of mill buildings on the Merrimack Manufacturing Company property is noted to the north of the

Site, and a large swath of vacant land is present at the current location of the Tsongas Center and associated parking facilities.

- **1977:** The Site areas to the east of the canal appear similar to the 1963 and 1965 photos. To the west of the canal, the tenement homes have been demolished and streets reconfigured to resemble the present-day alignment (Arcand Drive has been created along the current western and northern boundaries of the Site). The area enclosed by the newly constructed Arcand Drive appears to be occupied by a single building at the south end of the property, which appears to be the current building on the 75 Arcand Street parcel. The 50 Father Morissette Boulevard parcel appears to be developed as a parking lot or storage lot for vehicles. To the north of the Site, some redevelopment has occurred on the former Merrimack Manufacturing Company property.

- **1980, 1985, and 1998:** The Site areas to the east of the canal appear similar to the 1963 and 1965 photos. To the west of the canal, the Lord Building and Field House have been constructed. To the south of these buildings, the building on the 75 Arcand Street parcel remains in the same configuration as the 1977 photo. Additional development is noted to the north of the Site, including two high-rise towers that appear to be the existing River Place Towers Apartments. In the 1998 photo, the Tsongas Center has been built.

- **1998, 2006, 2008, 2010, 2012:** There are no significant changes in the configuration of the Site in this series of photos.

4.5.3 Historical Topographic Maps

Historical topographic maps were provided by EDR® for the years 1893, 1918, 1921, 1931, 1935, 1941, 1942, 1943, 1946, 1950, 1965, 1966, 1979, 1986, and 2012. The EDR® Historical Topographic Map Report is included in Appendix F.

Topographic maps 1893 – 1935: The Site area is located within the industrialized portion of the City. The Merrimack Canal and nearby mills are depicted, and the street configuration is shown, but specific Site buildings are not displayed on these maps.

Topographic maps 1941 – 1979: The topographic maps illustrate the Lowell High School occupying the 1922 Building parcel at 38 Kirk Street. 50 Father Morissette Boulevard, where the Lord Building and Field House are located, are unimproved with any notable structures. The Freshman Academy parcel appears to be improved with the “Trade High School”. No buildings are depicted on the 75 Arcand Drive property.

1987: The topographic map illustrates the Lowell High School occupying the 1922 Building, the Lord Building, and the Field House. The Freshman Acadamy parcels and the 75 Arcand Drive parcel all appear similarly to the previous historic topographic maps.

2012: The building footprints are no longer shown on this map. The Site area is referred to as the “Hamilton Mill”.

4.5.4 City Directories

City Directory archives list the name of an occupant at a particular address. The EDR® City Directory Abstract is included in Appendix F. Nobis reviewed directories dated 1942, 1948, 1954, 1960, 1966, 1971, 1976, 1981, 1986, 1992, 1995, 1999, 2003, 2008, and 2013. Results of properties are summarized below.

- **50 Father Morissette Boulevard (Lord Building and Field House):** Father Morissette Boulevard first appears in the city directory in 1995. Lowell High School is listed at 50 Father Morissette Boulevard in the 2008 directory, but not in any of the other directories.

- **35 and 55 French Street:** These properties are not listed in any of the city directories reviewed. On French Street between Anne Street (Merrimack Canal) and John Street, the listings in the 1942, 1948, and 1954 directories include the Lowell Crayon Company at 2 French Street, “storage” at 40 French Street, and the Lowell Trade School at the corner of French and John Streets. In the 1960, 1966, and 1971 directories, two additional entries are published: “Bon Marche Warehouse No. 3” at 20 French Street and “White J C Store”/H&H Paper Company at 42 French Street. Also, 43 French Street is now listed as the Lowell Trade High School. By 1976, two new businesses had moved into 38 and 40 French Street, an electronics and sound equipment store and “Dara International Inc”. In 1981, the Sara Lee Sweet Company is added to the listing at 42 French Street. By 1986,

all of the properties on French Street between the canal and Bridge Street were listed as vacant. From 1992 to 2013, the listings in this portion of French Street were primarily City of Lowell School District related entities.

- **38 Kirk Street:** This property is not listed in any of the city directories reviewed. In the directories published between 1942 and 1981, 30 Kirk Street is listed as Lowell High School and other school-related uses. Properties across the street from the school during this time period were used for storage, residential apartments, City health department offices, a Boy Scouts of America office, and for a short time in the early 1970s Associated Electronics, Inc.

- **75 Arcand Street:** This property first appears in the 1971 city directory, as this street did not exist prior to this time. Since 1971, this property has been listed as a professional park and office building, with tenants including dentists, orthodontists, oral surgeons, an optometrist, and a chiropractor.

4.6 Vapor Encroachment Screening

As specified in the ASTM 1527-13 standard, Nobis completed a vapor encroachment screening (VES) for the Site. The screening was conducted in general accordance with ASTM E 2600-10, *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*.

A vapor encroachment condition (VEC) is "*the presence or likely presence of chemical(s) of concern (COC) vapors in the soil or groundwater of the Site caused by the release of vapors from contaminated soil or groundwater either on or near the Site. A VEC is a potential exposure pathway, specifically to building occupants, whereby volatile organic contamination present in soil and groundwater may partition into the vapor phase and migrate into soil gas and indoor air.*"

Based on the review of records conducted for the Phase I ESA, Nobis has concluded that a VEC is not likely present at the Site. Environmental data collection (i.e. soil and groundwater sampling) would be required in order to definitively rule out a VEC at the Site.

5.0 SITE RECONNAISSANCE

Nobis performed a site reconnaissance on August 29, 2016. Details are provided in the following sections.

5.1 Methodology and Limiting Conditions

Mr. Evan Rudomen of Nobis Engineering visited the Site to observe property conditions. Photographs taken during the site reconnaissance are included as Appendix G.

5.2 General Site Setting

The Site is located within an area of mixed residential, commercial, and recreational use, including multiple parking garages, historical sites, a park, apartment buildings, and commercial space. The Site is made up of six buildings, all within a two city-block radius. The Lord Building, Field House, 1922 Building, the Freshman Academy, and the steam plant building are currently owned by the City of Lowell and are part of the Lowell High School complex. The 75 Arcand Street property is not owned by the City and is currently operated as a pediatric dentist's office.

The Lord Building and Field House (50 Father Morissette Boulevard) are located on the western portion of the Site, with the 75 Arcand Street property abutting them to the south. A narrow park, the Lucy Larcom Park, and the Merrimack Canal are located to the east of the Lord Building and Field House, separating them from the 1922 Building. The 1922 Building connects to the Lord Building via two enclosed, glazed bridges which span across the canal and park below. The Freshman Academy and the steam plant are approximately one city block to the east of the 1922 building, with the steam plant building abutting the Freshman Academy to the west.

5.3 Exterior Observations

The on-site buildings are constructed of masonry and concrete. Portions of the ground surface immediately outside the building are covered in asphalt pavement. Remaining portions of the Site ground surface are landscaped. Specific observations of the use, storage, and potential release of oil and hazardous materials in the exterior portions of the Site are described below.

- A generator and pad-mounted transformer are present adjacent to the southwestern corner of the Lord Building.

- A Conex box is present along the southwestern property boundary with de minimis motor oil, lubricant, gasoline, and vehicle maintenance fluids.

- Three additional pad-mounted transformers are present at the Site. Two are located at the northwestern property boundary, at the intersection of Arcand Drive and Father Morissette Boulevard. The other is adjacent to the southwestern corner of the Freshman Academy, along Paige Street.

5.4 Interior Observations

Nobis' observations of the use, storage, and potential release of oil and hazardous materials in the building interior are described below.

- De minimis storage of cleaning products, sealants, paints, glosses, degreasers, printer ink, and various other products used by custodians for maintenance of the buildings. These products are all contained and showed no evidence of a release.

- The basement below the field house contains chlorine, calcium hypochlorite tablets, and sodium hyprochlorite for the pool. Liquid and gaseous carbon dioxide tanks are also stored in this area which are used to maintain proper pH for the pool. All chemicals are containerized, labeled, and show no signs of release.

- Classroom laboratories contained a variety of acids, bases, dyes, stains, buffers, oxidants, alcohols, and other chemicals used for classroom experiments. These chemicals are present at de minimis levels and there is no evidence of a release.

- Floor drains were observed in various locations throughout the High School properties. According to Alan Sayer, all floor drains discharge to the municipal sewer system.

- Used furniture was located within the basement of the Lord Building, in the steam plant, and in unused rooms throughout school buildings.

- A small room within the switchboard room in the basement of the Lord Building contained a rectangular concrete pit approximately 2 feet deep with a floor drain at its base. Several disconnected pipes were also present in this room. It did not appear that this room had been used in several years, and its original use is unknown.

- Several 5-gallon buckets of floor stripper are stored in the basement of the Lord Building.

6.0 INTERVIEWS

Interviews performed for preparation of this Phase I ESA are described below.

6.1 Interview with Owner and Owner's Representative

The Site is currently owned by the City of Lowell, Massachusetts. Nobis interviewed Mr. Rick Underwood, Head of Facilities for Lowell High School. Mr. Underwood has been working at the school for approximately 25 years. He indicated that the Site has been used by the school throughout its history. He stated that he has no knowledge of any PP storage or usage during his time at the Site. The only hazardous materials stored on the property are related to basic high school laboratory experiments and chlorine used for the pool. These are discussed in greater detail in Section 5.4 of this report.

6.2 Interviews with Others

Nobis spoke to Mr. Alan Sayer, Senior Custodian for the Lowell High School. Mr. Sayer informed Nobis that all floor drains throughout the building are connected to the municipal sewer system. He stated that he has no knowledge of any HM or PP storage or usage during his time at the Site. He also informed Nobis that any waste oil produced by the kitchen, or in regular maintenance processes for the school, is stored in a five-gallon bucket which is picked up by the Department of Public Works as needed.

7.0 CONCLUSIONS

In accordance with ASTM Practice E 1527-13 requirements, the Environmental Professionals that prepared this Phase I ESA provide the following Statement of Conclusion:

> *We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527 of the site located at 50 Father Morissette Boulevard, 35 French Street, 55 French Street, 68 John Street, 38 Kirk Street, and 75 Arcand Drive in Lowell, Massachusetts. Any exceptions to, or deletions from, this practice are described in Section 1.4 and Section 10.0 of this report. This assessment has revealed evidence of current recognized environmental conditions at the Site in connection with historical use of the property, as well as current conditions at the property.*

8.0 OPINION

Based on review of the documentation available for the preparation of this Phase I ESA, and the observations made on the property, it is the opinion of the Nobis Environmental Professionals who prepared this assessment that RECs, as defined in ASTM E1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, are present at the Site. The following is a description of the RECs identified at the Site as a result of the assessment:

- City of Lowell Fire Department records contained one index card file for Lowell High School, which indicated the facility had a 12,600-gallon “below grade” “Faber Burner” tank located on French Street. The tank’s contents were not listed, nor was the installation date, removal date, or any sort of inspection date. The record does not provide any additional details regarding the tank. This tank may have been a storage vessel for oil that was used to fuel the boilers in the Steam Plant before it was converted to natural gas, or used to heat one of the school buildings. The exact location of this tank is unknown, but is likely to be near the Steam Plant along French Street.

- Sanborn Fire Insurance Maps show a “coal bin” in the 1950, 1952, and 1977 maps in what is now the alley between the Freshman Academy and the Steam Plant. The historical storage of coal in this vicinity may have resulted in the release of coal or coal ash to the environment. A release of coal and/or coal ash could result in high levels of semi-volatile organic compounds (SVOCs) and polycyclic aromatic hydrocarbons (PAHs) in soil.

- 50 Father Morissette Boulevard was historically part of the Merrimack Manufacturing Company property. Most of the property was used for tenement housing; however, the northwestern corner of the property contained two buildings used as an “Old Packing Building” and “Finishing Mill”. It is possible that dyes, solvents, or other chemicals used in textile processing were used, stored, or released in this portion of the Site.

- A railroad spur leading into the Merrimack Manufacturing Company was present along the southern border of the current 75 Arcand Drive property from the early 1900s until at least 1952. The railroad is not shown on the 1977 Sanborn Fire Insurance Maps. Additionally, the rail line from which this spur originated directly abuts the Lord Building to the east. This

line is still used for trolley services. Former railroad activities likely transported and handled raw materials, chemicals, and hazardous materials associated with the operation of area industry. In addition, railroad operations and maintenance activities themselves may have impacted the Site, as creosote or arsenic-laced railroad ties, herbicides, lubricating oils, diesel fuel, and diesel exhaust commonly result in releases of heavy metals, pesticides/herbicides, and petroleum-related contamination along railroad corridors.

Nobis also encountered several de minimis conditions for the Site. De minimis conditions (environmental concerns, although not RECs) encountered during the assessment include the following:

- De minimis storage of cleaning products, sealants, paints, glosses, degreasers, printer ink, and various other products used by custodians for maintenance of the buildings. These products are all contained and showed no evidence of a release.

- The basement below the field house contains chlorine, calcium hypochlorite tablets, and sodium hyprochlorite for the pool. Liquid and gaseous carbon dioxide tanks are also stored in this area which are used to maintain proper pH for the pool. All chemicals are containerized, labeled, and show no signs of release.

- Classroom laboratories contained a variety of acids, bases, dyes, stains, buffers, oxidants, alcohols, and other chemicals used for classroom experiments. All chemicals are containerized, labeled, and show no signs of release.

9.0 ADDITIONAL SERVICES

No additional services were performed for this Phase I ESA.

10.0 DEVIATIONS

Substantive deviations from ASTM E 1527-13 “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process” are detailed in Section 2.4.

12.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

This section presents the qualifications of the Environmental Professionals that performed the assessment of the Site. The following attestations are presented to satisfy the requirements of the All Appropriate Inquiries (AAI) Rule (40 CFR Part 312):

> *We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of this part. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.*

Evan Rudomen
Staff Scientist

- Over 3 years of experience as an environmental professional performing ASTM Phase I and Phase II property investigations and hazardous material surveys.
- Conducting hazardous materials surveys (asbestos, regulated materials).
- Conducting site investigations and remediation activities at sites contaminated with petroleum or hazardous materials throughout the Northeast United States.
- Performing field investigations, providing contractor management, coordinating environmental projects, preparing reports and interfacing with Federal, State and local regulatory agencies.

Stephen Vetere, PE, LSP, LEP
Senior Environmental Engineer

- Over 17 years of experience in providing a variety of environmental engineering services throughout the Northeast United States including site assessment, remediation, long-term monitoring, and five-year reviews.
- Manages and performs site assessments, remedial investigations, risk assessments, and develops remedial action plans for sites regulated under CERCLA and state programs as well as Brownfield properties.

- Designs and manages a variety of site remediation programs including contaminated soil excavation, groundwater recovery and treatment systems, in situ bioremediation systems, and enhanced natural attenuation remedial systems.
- Manages long-term monitoring programs at landfills and other closed facilities.

Lowell High School
Environmental Appendix
Note: File to be included in electronic file only

APPENDIX A

APPENDIX A
LIMITATIONS

1) This Environmental Site Assessment was performed in accordance with generally accepted practices of other consultants undertaking similar assessments at the same time and in the same geographical area. The results of this assessment are based on our professional judgment and are not scientific certainties. Specifically, Nobis Engineering, Inc. does not and cannot represent that the site contains no hazardous wastes or other latent conditions beyond those observed during this preliminary assessment. No other warranty, express or implied, is made.

2) The observations and conclusions presented in this report were made solely on the basis of conditions described thereon and not on scientific tasks or procedures beyond the scope of described services or the budgetary and time constraints imposed by the client.

3) Observations were made of the site as indicated in this report. Where access to portions of the site was unavailable or limited, Nobis Engineering, Inc. renders no opinion as to the presence of hazardous wastes or the presence of indirect evidence of hazardous wastes in those portions of the site.

4) No property boundary, site feature, or topographic surveys of the site were performed by Nobis Engineering, Inc.

5) Our services did not include assessments for the presence of pesticides, herbicides, urea-formaldehyde foam insulation (UFFI), or lead in drinking water at the site. In addition, no air quality monitoring or chemical analyses of soil, surface water, or groundwater were performed as part of this assessment. The site was not assessed for compliance with the Clean Air Act. Our services did not include an assessment for typical non-friable asbestos-containing materials such as floor tiles, exterior siding, and roofing materials.

6) The purpose of this screen was to preliminarily screen the physical characteristics of the subject site with respect to the presence of hazardous wastes in the environment within the context of ASTM E 1527-13, “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process”. No attempt was made to check the compliance of present or past owners of the site with federal, state, or local laws.

7) This assessment has been prepared for the exclusive use of the City of Lowell, Massachusetts solely for use in an environmental evaluation of the site. Reliance by others on the information and opinions contained herein is strictly prohibited without prior written consent of Nobis Engineering, Inc.

8) Nobis did not have access to the proposed acquisition property at 75 Arcand Street during the site reconnaissance on August 30, 2016. This property is not currently owned by the City of Lowell and subsequently Nobis did not have access to view property conditions.
