Project Scope Summary
Coburn Hall
Lowell High School
Lowell, Massachusetts

Programing

1) Provide Teachers Center on Ground Level.
2) Provide 7 new classrooms and 1 computer lab.

Site

1) Alternate: Open alley, restore cobblestone Paving

Structural

1) Repair and/or replace existing wood timber beams and joist members as required to meet current structural code requirements including provisions for seismic loading. This work required by the SBAB to fund project.

Exterior Closure

1) Remove and rebuild chimneys.
2) Spot point the mortar joints in brick walls
3) Repoint all mortar joints at terra cotta trim
4) Install lightning protection.
5) Alternate: Replace windows in existing configuration with new insulated glass in thermally broken aluminum frames to match existing.
6) Alternate: Remove glass block and painted aluminum panels from the arched windows at the stairways and on the third floor, install new fixed insulated glass in aluminum frames to be compatible with original design.
7) Spot repair of existing slate roofing.

Interior Construction

1) Install new suspended acoustical panel ceilings throughout
2) Patch and paint all walls.
3) Install plywood over existing raised floors and install new floor vinyl composition coverings.
4) Rehabilitate wood wainscot.
5) Replace the stairs to the roof and attic wings.
6) Renovate public and faculty toilets to provide ADA compliant fixtures and spaces.
7) Provide all new toilet fixtures, heavy duty stainless steel partitions and accessories.
8) Provide area of rescue assistance on each floor to comply with ADA.

Mechanical

1) Entirely new make-up and exhaust air system to meet fresh air requirements of code.
2) Air conditioning provided at Teachers Center and Computer Classrooms.
3) Remove existing steam radiators & piping system and replace with hot water fin tube radiation heating system complete with new piping and steam to hot water converter station.

Electrical

1) All existing electrical work including lighting will be removed and a new electrical system will be installed.
2) Repair or replace, as required, clock units which are inoperative. Provide new clock units in new classrooms.
3) Provide new fire alarm system conforming with current code requirements.
4) Provide new security system.

Plumbing

1) Totally replace existing plumbing sewer and supply lines.
2) Provide new toilets to accommodate ADA requirements.
3) Provide new toilet fixtures and drinking fountains.
4) Refurbish dry sprinkler system in attic.

Project Scope Summary
1922 Building
Lowell High School
Lowell, Massachusetts

Programing

1) Minor reconfiguration of existing spaces in isolated areas to improve efficiency, netting 6 additional or "found" classrooms.

Site

Structural

1) Provide additional support as required to receive new mechanical equipment in attic and roof areas.

Exterior Closure

1) Spot point approximately 20% of the mortar joints in brick walls.
2) Repoint all mortar joints at terra cotta trim
3) Selectively point mortar joints on parapet and penthouses
4) Replace EPDM flashing on the roof side of the parapets and at the roof/wall juncture.
5) Rebuild 200 feet of deteriorating parapet.
6) Remove clock on west face and repair clock on Kirk Street side.
7) Alternate: Remove glass block and painted aluminum panels from the arched windows at the stairways and replace with insulated glass in aluminum frames to match the configuration of the original 1922 Building.

Interior Construction

1) Patch miscellaneous damage to the plaster and paint the corridor walls on all levels.
2) Patch and paint all classroom walls on all levels.
3) Renovate public and faculty toilets to provide ADA compliant fixtures and spaces. Toilets walls are to be painted, drywall ceilings installed & painted and new ceramic floor tile provided.
4) Provide all new toilet fixtures, heavy duty stainless steel partitions and accessories.
5) Provide area of rescue assistance on each floor to comply with ADA.
6) Alternate: Paint auditorium
7) Repair & paint or replace 1800 lockers. Level 1 lockers recently renovated will remain.

Mechanical

1) Supplement and reconfigure existing make-up and exhaust air system to meet fresh air requirements of code.
2) Air conditioning provided at all Computer Classrooms.
3) Remove existing steam radiators & piping system and replace with hot water fin tube radiation heating system complete with new piping and steam to hot water converter station.
4) Provide appropriate ventilation levels within auditorium.
4) Alternate: Air condition the auditorium.

Electrical

1) Replace or repair all existing classroom lighting to meet current illumination and energy standards.
2) Repair or replace, as required, clock units which are inoperative. Provide new clock units in "found" classrooms.
3) Provide new alarm system conforming with current code requirements.

Plumbing

1) Totally replace existing plumbing sewer and supply lines.
2) Renovate existing toilets and/or provide new toilets to accommodate ADA requirements.
3) Provide new toilet fixtures and drinking fountains.

Project Scope Summary
Classroom Addition
Lowell High School
Lowell, Massachusetts

Programing

1) Provide new classroom addition at the north end of the 1922 Building. The addition includes 9 new general classrooms and 8 new computer labs.
2) Provide toilets to accommodate the Classroom Addition as well as assist in providing for the toilet count deficiencies of the 1922 Building.
3) Create a sense of main public entrance for the 1922 Building auditorium.

Site

1) Eliminate "exterior" steps from the main entrance access pathway.

Structural

1) As required to meet current code structural standards and seismic requirements.

Exterior Closure

1) Exterior wall will be clad in brick to match the buff color brick currently on the 1922 Building.

Interior Construction

1) All new construction.
2) Classroom and corridor walls shall be painted block.

Mechanical

1) Make-up and exhaust air system to meet fresh air requirements of code.
2) Air conditioning provided at all levels of the central core (areas inside the loop corridor system), all Computer Classrooms, Guidance Offices and Administrative Offices.
3) Replace all fiberglass duct with metal duct.

Electrical

1) Lighting to meet current illumination and energy standards.
2) Power requirements for HVAC and High-Tech system.
3) Repair the master clock system.
3) Provide alarm system conforming with current code requirements.
4) Provide emergency lighting to conform with code requirements.
5) Provide new security system.

Plumbing

1) New toilet fixtures as required.

Project Scope Summary
1980 Building
Lowell High School
Lowell, Massachusetts

Programing

1) Conversion of existing classrooms in center core area of level 2 to a Teachers Center.
2) Convert 8 classrooms to computer labs.

Structural

1) Provide additional support as required to receive new mechanical equipment on roof areas.

Exterior Closure

1) Spot repairs of roof and parapet.

Interior Construction

1) Paint the corridor walls on all levels.
2) Remove carpet in corridors on all levels and replace with vinyl composition tile.
3) Paint all classroom walls on all levels.
4) Remaining Classroom ceilings (those not affected by the wall functions) shall be painted.
5) Remove carpet and replace with vinyl composition tile in classrooms on all levels.
6) Renovate public and faculty toilets to provide ADA compliant fixtures and spaces. Toilets walls are to be painted, drywall ceilings installed & painted and new ceramic floor tile provided.
7) Provide stainless steel partitions and accessories.
8) Remove carpet in Dining Area and replace with vinyl composition tile.
9) Distribute 1200 new lockers along one side of corridors.

Mechanical

1) Make-up and exhaust air system to meet fresh air requirements of code.
2) New air conditioning provided at levels 2 & 3 of the central core including all Computer Labs and the Little Theater.
3) Replace all fiberglass supply and return air duct with metal duct.

Electrical

1) Replace or replace all existing classroom lighting to meet current illumination and energy standards.
2) Repair or replace, as required, clock units which are inoperative. Provide new clock units in "found" classrooms.
3) Provide new alarm system conforming with current code requirements.
4) Provide emergency lighting to conform with code requirements.
5) Provide new security system.

Plumbing

1) Reuse existing toilets reconfigured as required to provide ADA compliant layouts.
2) Existing plumbing lines and stacks to be reused as much as possible. Repair existing drinking fountains

Project Scope Summary
Library/Technology Center
Lowell High School
Lowell, Massachusetts

Programing

1) Provide Library/Technology Center to be located at the south end of the 1980 Building. The Center consisting of both new and renovated space includes stack areas, a Library Instructional Center, an Interactive Learning Center, Multimedia Production Areas, a TV Studio and support areas.

Site

1) Existing dock area will remain, but will be a covered dock area when the new Technology Center is added to level 2 & 3 above the dock area.
2) Existing truck turning radiuses will be maintained.

Structural

1) As required to meet current code structural standards and seismic requirements.

Exterior Closure

1) Exterior wall will be clad in brick to match the brown color brick currently on the 1980 Building.

Interior Construction

1) Metal stud and drywall partitions in the library area.
2) Acoustic separation of TV studio and multi-media areas will be provided.

Mechanical

1) Make-up and exhaust air system to meet fresh air requirements of code.
2) Air conditioning will be provided throughout the Technology Center.

Electrical

1) Lighting to meet current illumination and energy standards.
2) Power requirements for HVAC and High-Tech system.
3) Extend the current master clock system.
4) Provide fire alarm system conforming with current code requirements.
5) Provide emergency lighting to conform with code requirements.
6) Provide new security system.

Plumbing

1) New staff toilets in Library area.

Project Scope Summary
Pedestrian Bridge
Lowell High School
Lowell, Massachusetts

Programing

1) Provide Level 2 pedestian bridge over the canal between the 1980 Building and the 1922 Building.
2) Exterior appearance will be compatable with the existing pedestrian bridge.
3) Provide tinted glass and mechanical ventilation
4) Potential Alternate: Grade level bridge to be reviewed. Interface with trolly car has not been finalized at this time. The trolly tracks would likely need to be raised to walkway level with the potential of significant cost impact. Cost impact and acceptance by historical review board to be studied and recommendation forthcoming.

Contact: Alan Sayer
asayer@lowell.k12.ma.us

This report is in two parts; the first being the 1922 Building and the second part being the 1980 Building.

Issues discovered during inspection by Building Inspector Nelson Miller on 10/7/15:

Part One

Critical Violations:

1. **780 CMR IBC Chapter 9:** Entire automatic fire suppression sprinkler system is not operating in Coburn Hall.

Building Code Violations:

Violations noted on all stories:

1. **780 CMR IBC §1503:** Roof has multiple leaks and sections of roofing un-adhered. Verify source of leak and repair especially (but not limited to) the following:
    a. Roof above restaurant is leaking in several locations
2. **780 CMR IBC §808:** Ceiling tiles throughout building.
3. **248 CMR Plumbing Code:** Leaks in steam heating system. Potential burn hazard and loss of minimum temperature as per **780 CMR IBC §1204** and **IMC §309.1**

Level "0":

1. **780 CMR IBC §709.4:** Wall continuity damaged and possible fire separation lost due to holes in walls. These holes shall be repaired with like material to restore separation and continuity. The deficiencies are in the following places but not limited to:
    a. Room 027
    b. Electric / Fire Control Room
2. **780 CMR IBC §102.8:** Where egress door crash hardware is missing it shall be replaced in all areas including but not limited to:
    a. Sprinkler room number 023.
    b. Sprinkler pump room.
    c. Electric / Fire Control Room
3. **780 CMR IBC §715:** Exit doors at stairwell "C" in disrepair.
4. **780 CMR IMC Chapter 5:** Exhaust fans in restaurant do not work.
5. **780 CMR IMC §102.3:** Heat unit in restaurant does not work and panel will not shut.
6. **780 CMR IBC §715.4.8:** Fire doors throughout this story broken, malfunctioning, impeded or otherwise non-functional.
7. **527 CMR §12.00, NFPA 70 §620.4:** Elevator room is missing a cover over the elevator control panel.

Level 100:

1. **527 CMR §12.00, NFPA §406.5 (G):** Light fixture (outlet) broken a canal side exit.
2. **780 CMR IBC §102.8:** Where existing auditorium chairs are broken, malfunctioning or unsafe for continued use, they shall be repaired or replaced.
3. **780 CMR IBC §709.4:** Boys' bathroom has holes in the wall near the urinals.

Level 200:

1. **780 CMR IECC §C402.3:** Gaskets failing on arched windows in stairwell and is appears to reduce or eliminate the required energy efficiency of the window.

Level 300:

1. **780 CMR IBC §808:** Ceiling tiles throughout building.
2. **527 CMR §12.00, NFPA §406.5 (G):** Light fixtures (outlets) missing or broken throughout this story.
3. **780 CMR IBC §1006.3 and §1011:** Coburn Hall attic is missing emergency lights and exit signs from occupied areas to exit access doors.
4. **780 CMR IBC §1012 and §1013:** Stairwell "G" has multiple locations where the metal frame rails and/or guards are deteriorated and failing.

Maintenance Issues:

1. Floor tiles missing throughout building on all stories.

Issues discovered during inspection by Building Inspectors Paul Winchester and Nelson Miller on 10/6/15:

Part Two

Critical Violations:

1. **105 CMR 410.000:** Beehive in exterior wall of room 629 shall be removed

Violations noted on all stories:

1. **780 CMR IBC §1503:** Roof has multiple leaks and sections of roofing un-adhered from underlayment. Verify source of leak(s) and repair especially (but not limited to) the following areas:
    a. Roof above restaurant is leaking in several locations
2. **780 CMR IBC §808:** Ceiling tiles throughout building missing or in disrepair.
3. **248 CMR Plumbing Code:** Leaks in steam heating system. Potential burn hazard and loss of minimum temperature as per **780 CMR IBC §1204** and **IMC §309.1** and suspected loss of required efficiency per **IECC §101.4.1**
4. **780 CMR IBC §715.4.8:** All interior corridor fire doors inoperative, malfunctioning, have damaged hardware or are otherwise in disrepair.

First Floor:

1. **780 CMR IBC §1011:** Exit sign broken at boys' locker room.
2. **780 CMR IBC §1006.3:** Emergency lights needed in room beneath pool to illuminate path from occupied spaces to exit access door(s).
3. **780 CMR IBC §709.4:** Wall removed for ductwork outside pool entrance needs to be fixed.
4. **527 CMR §12.00, NFPA 70 §110.32:** Blocked electric panels in dry storage room (kitchen).
5. **527 CMR §12.00, NFPA §230.27 & §300:** Exterior electrical conduit attached to bridge is broken.
6. **527 CMR §12.00, NFPA §406.5:** Electric termination box missing protective cover in Galley Kitchen.
7. **780 CMR IBC §102.8:** Where egress door crash hardware is missing it shall be replaced in all areas including but not limited to:
    a. Electric room(s).
    b. Exit door in main electric room.

Second Floor:

1. **780 CMR IBC §1008.1.9:** Exit doors malfunctioning, doesn't close correctly or otherwise in disrepair in the following locations but not limited to these locations:
    a. Outside Little Theater (canal side)
    b. All exit doors from Gymnasium are broken
2. **780 CMR IBC §1011.2:** Exit light outside Little Theater (canal side) non-functional or inoperative under emergency conditions.
3. **780 CMR IMC §102.3:** Thermostat covers missing throughout building. Where missing, subject to tampering or impact damage, protective covering shall be restored or installed.

Third Floor:

1. **780 CMR IBC §1008.1.10:** Electric room exit doors appear to be installed without the benefit of permits and as installed are swinging the incorrect direction. These doors are required to be installed to swing in the direction of travel if the equipment inside the room is ≥1200 amperes.
2. **780 CMR IBC §2604.2:** Sound proofing material TV Studio does not appear to meet or exceed the flame spread index per this section of code. Provide documentation proving compliance.
3. **780 CMR IBC §1503:** Roof has multiple leaks and sections of roofing un-adhered. Verify source of leak and repair.

Maintenance Issues:

- Current elevator certification needed
- Treads are missing from stairs in staircase #1

Consequently, it is the position of this office that this property must undergo the following in order to assure that general health and life safety has been restored.

- Permits shall be obtained to affect repairs from this office as required per 780 CMR IBC Chapter 1.
- A licensed building contractor shall obtain the required permits
- A licensed electrical contractor shall obtain a permit should repair be required to the service panels and means of disconnect

Please note that this report deals with plainly visible issues and makes no assertions that additional code violation(s) are not present. Compliance with Local Zoning and City Ordinances is not considered in this report.

ADDITIONAL DESCRIPTION

Lowell High School is three stories in height, over two blocks long, and one block wide. It is one of the largest complexes of connected buildings in the town other than the mills, and it stands out because it is faced in yellow brick, rather than the more familiar red brick of Lowell. (The north wall of the school, the least prominent side, is the exception, as it is faced in red brick.) The original building (at the southwest end of the present complex) rises like a pyramid to a central hip roof and is richly detailed in the Renaissance Revival style. Features include granite and terra cotta trim, symmetrical and identical east and west facades, and a lively complex of hipped and single-pitched roofs with four huge chimneys. The addition is approximately four times as long as the original building. A series of projecting and recessed blocks and stepped parapets relieve its seemingly endless span. The addition is compatible with the original in height, materials, scale, and style. Its simplicity repects the visual interest of the older building.

Main features of the Kirk Street and canal facades of the original building include the central entrance pavilion flanked by projecting end pavilions. The central entrance portico is one-story high with a round-headed arch and a bull's eye window to each side. Over the portico is another large round arch enframing the second and third floor windows. Each end pavilion has three bays of windows, square at the basement and first floor, and segmental-arched above.

The south facade is surprising in that it is at once the liveliest and the least visible. A one-story five-sided bay marks its center and is topped with an iron railing. On the second floor are segmental-arched windows. On the third floor of the central block are five very tall round-arched windows, beautifully framed in terra cotta tracery (which open to Colburn Hall). The end pavilions project south with three window bays each, and the central block rises above them.

The surface texture of the original building begins with a granite basement and rusticated banding on the first floor. First, second, and third floor windows have terra cotta keystones and voissoirs. All terra cotta trim is classical in design, bold and crisp, including the cornice and a stringcourse above the first floor.

The addition is joined to the original building by three-story passages along the Kirk and canal facades, each two bays long with round-arched doors and upper windows. The addition repeats the arch motif of each central pavilion of the original building, with two sets of arches on each long facade. The addition is 39 window and entrance bays long. Flat decoration is in brick and terra cotta. The north facade, on French, is red brick . It is symmetrical with a large central projecting one-story entrance block. Paved parking extends from the building to the sidewalk along French.

Other exterior features of the high school include two clocks, one a handsome three-faced projecting bronze and glass mechanism mounted on the Kirk wall. The other is a simple modern two-faced clock on the canal side. Lucy Larcom Park, which fronts Merrimack Canal from French to Merrimack streets, replaces an early street (Anne Street) and provides a welcome downtown greenbelt with benches and mature trees.

ADDITIONAL HISTORICAL INFORMATION

The first Lowell City High School opened in December 1831, acclaimed as the first permanent co-educational high school in Massachusetts. After various temporary locations, a permanent school was built at Kirk and Anne Streets in 1840, on the site of the old portion of the present high school. The first diplomas were given out in 1858. Before that, the institution was criticized for being little more than an extension of grammar school. The building was reconstructed in 1867.

The original part of the present high school bears an inscription on its granite base with the date 1892; F. W. Stickney and W. D. Austin, Architects; Richard Bray, Superintendent of Public Buildings; and the names of the mayor and Lands and Building Committee members. A 1900 history (Lowell, A City of Spindles) reports that the building had 20 rooms, 27 teachers, and approximately 800 students. A sketch printed in 1893 (Fig. 1) shows the artist's rendition of the building in the Victorian mode, perhaps from a preliminary design by the architects. The photo ca. 1911 (Fig.2) shows the high school as it was built. It appears much as now, although the classical balustrade over each main entrance has disappeared.

Frederick W. Stickney was a native of Lowell who studied at Massachusetts Institute of Technology and apprenticed with architects Hartwell and Swazey, H. H. Richardson, and Henry Van Brunt in Boston. He later maintained an office there as well as in Lowell. His other local work included the First National Bank, Swan Building, Cook and Taylor's Building, Hoyt and Shedd's on Church Street, and Lamson Cash Railway Company's "new mill." He also worked in the greater Boston area, in Syracuse, New York, Cincinnati, Topeka, and Chicago (1).

The addition took two-and-a-half years to build, according to the report in City Documents of 1922-1923, and was first occupied in September of that school year. The date 1920 appears on the first floor stringcourse. With the exception of some minor window modification in the arches, the large structure appears to have maintained its original design.

The old high school of 1840 appears to have been the first structure to occupy any of the present site all the way to French Street, but by 1850 the land was virtually all built up, reflecting Locks and Canals great land sale of the mid-1840s. Structures then included several row houses along Kirk, and houses on Anne Street owned by individuals such as G. H. Carleton, Dr. Pillsbury, J. M. Marston, and others. One structure on Anne Street near mid-block (presumably also a house) belonged to Lowell Machine Shop from 1850 through 1896. At the corner of Kirk and French Streets was the Kirk Street Congregational Church.

The Kirk Street Congregational Church was built in 1846 at a cost of almost $23,000 (Fig. 3). The prosperous church was organized in 1845, 14th among all churches and fourth among Congregational churches in Lowell. In 1872 a six-foot deep addition was built at the front. As enlarged, the building was in the modified classical temple form with an elegant front facade and refined detailing (Fig. 4 and 5). A fire in 1881 did some damage to the roof and interior, but repairs were made. The Kirk Street Church merged with the Eliot Church in 1919 to form the United Eliot Church which, by 1920, occupied a site at the corner of Summer and Favor streets facing South Common.

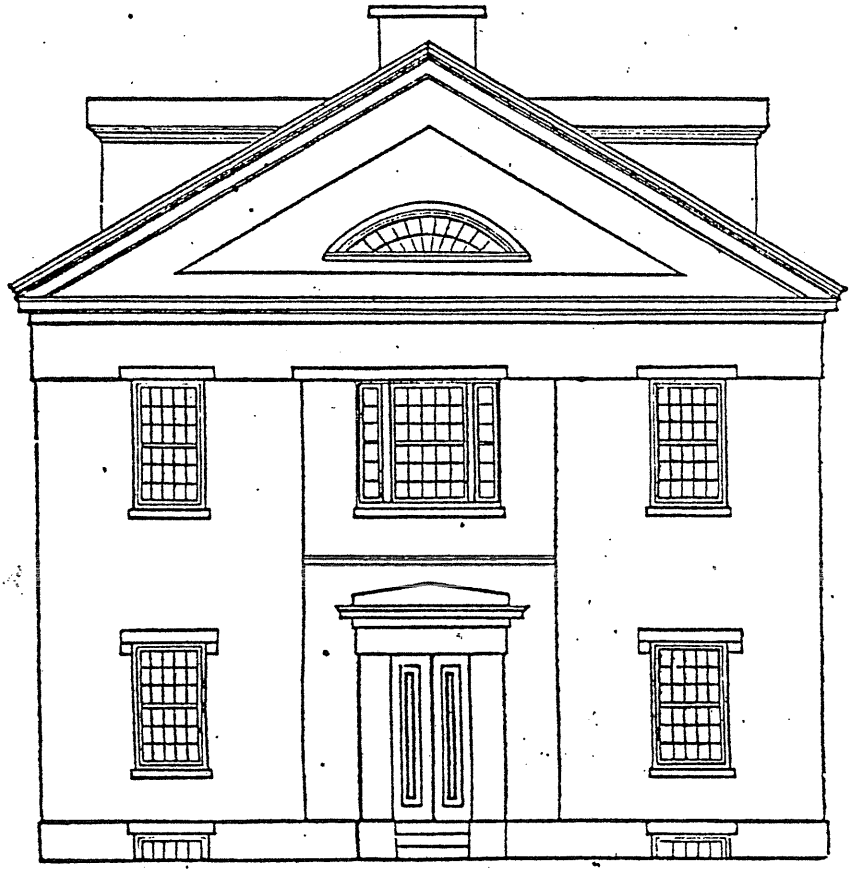
ARCHEOLOGICAL COMMENT

Lowell High School occupies most of its present site. Intact remains from previous buildings appear unlikely except, perhaps, along French Street where there is now a paved parking area.

Plans, &c. of High-School, Lowell.

Fig. 1.—End Elevation.



The house stands in the centre of a lot extending from Ann to Kirk street, furnishing separate entrances, yard, and play-ground for each sex.

The house is of brick, 84 feet by 48, with two stories, each 14½ feet in the clear, one for the male and the other for the female department, and an attic, which is arched and fitted up for a writing department.

A, A, entrances at the ends. B, B, entries, provided with hooks, &c. for hats, bonnets, and outer garments. Cb, Cb, single desks and seats. E, E, Teacher's platform, 6½ feet wide, raised 6 inches above the floor. F, Teacher's desk. G, G, aisles, nearly 4 feet in width, all around the school-room. H, room for library, apparatus, &c., 18½ by 12½ feet. I, recitation-room, 18½ by 12½ feet. J, J, stairways to the second story. K, hot air pipe from furnace.

The rooms are heated by furnaces in the cellar, and ventilated by four openings in the ceiling, 8 inches by 16, which are carried out in flues built for this purpose in the chimneys. Each pupil has an area on the floor of more than 14 square feet.

ARCHEOLOGICAL COMMENT

The two high school buildings and the power plant cover large areas. Their masonry construction (with full basements in the school buildings) would make the possibility of finding in-place subsurface historical materials highly unlikely. Although there may be more likelihood of finds in the parking area, there is no surface indication of such materials.

ARCHEOLOGICAL COMMENT

The two high school buildings and the power plant cover large areas. Their masonry construction (with full basements in the school buildings) would make the possibility of finding in-place subsurface historical materials highly unlikely. Although there may be more likelihood of finds in the parking area, there is no surface indication of such materials.

ADDITIONAL HISTORICAL INFORMATION

The site of the new Lowell High School addition was occupied by boarding houses of the Merrimack Manufacturing Company from the early 1820s until the mid-1960s. Merrimack originally built both brick and wood frame houses, two-and-a-half stories tall. Most were double houses, though some contained four separate boarding-house units.

In the mid-1840s, several of these small houses were removed, and replaced along Dutton Street with the "New Block", a long, brick row house, three-and-a-half stories tall.

Much of the Merrimack's housing stood until the mid-1960s, when it was demolished in an urban renewal program. Only a portion of the housing site (in fact, only a portion of the new high school building) is included in the LHPD.

ADDRESS FRENCH STREET EXTENSION at ARCAND DRIVE

ARCHEOLOGICAL COMMENT

The large building under construction on this site must have eradicated any remains of previous structures or activities on the property. Robert Schuyler, an historical archeologist, now at the University of Pennsylvania, conducted excavations on part of this site a few years before the present construction began.

His findings, when published, will add to knowledge of the past use of this site, and enhance our understanding of Lowell boarding house life.

Research Report
64 John Street
Lowell Trade High School
1900
76 John St./43 French St
Lowell High School Annex
1939

The Trade High School and High School Annex are adjacent red brick rectangular boxes which, together, span the width of their block and two-thirds of its length.

The older building is three stories in height. It rests on a granite foundation. The basement windows have been blocked up. The first floor on Paige St. has a blind arcade, with small rectangular windows piercing the infill of most of the arches. The westmost (left) arch is open as an entryway. The arches have granite keystones, and a granite string-course extends along the whole arcade at the springline. The second and third story windows are segmentally arched and are grouped mainly in threes. Second story sills are granite, as are those on the third story. The latter are linked in a continuous sill course. Between the third floor windows the brick is laid in a raised latticework pattern.

The John Street facade repeats the round arch for its central entrance and the first floor stringcourse. There are scattered, but symmetrically placed, segmentally arched windows in the first and second stories. The third floor has the same sill course, latticework, and triplet windows that appear on Paige Street. The building has a dentilated brick cornice and a flat roof. A brownstone plaque in the John Street doorway reads:

AD MCM
Lowell High School
Commercial and Manual Training Department
Jeremiah Crowley, Mayor
Joseph S. Gillow
Superintendent of Public Buildings
Harry Prescott Groves, Architect

The Annex building on French Street is two stories in height, plus a set-back "penthouse" addition. Doors and windows are rectangular with granite sills set in regularly spaced bays. The long French Street facade has three entrance bays topped with stepped-up parapets. The end ones' entrances are emphasized with second story loft doors and projecting steel loft rigs. The structure has copper flashing and copper canopies on the roof, over skylights. Two bronze plaques on the French side explain that this building was constructed by the Federal Works Agency, in 1939, under President Franklin D. Roosevelt, for the City of Lowell. The architect for this second building also is listed as Harry Prescott Groves.

Pipes above the second floor of the Annex connect it to the power plant just west of the Annex. The plant, which supplies heat to the school, has four round-arched two-story bays on the north and south walls, three on the east and west walls. There is a separate free-standing chimney stack just south of the building. On the site east of the classroom buildings and south of the power plant is a paved parking lot surrounded by a chain link fence. There was a small building on the French Street side site by 1841, according to city maps. By 1850 the property belonged to the Boott and the Massachusetts Mills.

In the 1850's, Boott Mills erected a long boarding house row on the site now occupied by the High School Annex. Two 1929 photographs show the narrow John St. end (Fig.1) and the long French St. facade (Fig.2) of this brick structure.

The three story building faced the earlier Boott boarding houses across French St., and shared with them brick walls and granite trim, gable roofs set with dormers, and twin chimneys linked with parapets.

The Trade High School site apparently never contained any buildings more substantial than a large wooden shed, owned by Boott Mills. The shed is shown on the 1879 atlas. By 1896, the frame shed had been removed, and the site was designated for the school building.

According to the 1900 report of the Superintendent of Schools, construction began in 1899, originally for a one-story building. When it became clear that more space

was needed, the plans were altered, and the report of the Superintendent noted that the building suffered from the changes. The building was expected to be completed for full occupancy in 1901. The commercial program which it housed was introduced into the Lowell school system in 1900 (1).

Around the time the school building was completed, Boott Mills sold the adjacent boarding house to Saimen Sirk, a Boston realtor. That building stood until the High School Annex was constructed in the 1930s, as a Federal Works Agency project. The bronze plaque commemorating the 1930 Annex construction lists the same architect as the brownstone plaque on the 1900 Trade High School, Harry Prescott Groves.

The power house to the west of the Annex was built before 1939, for it is illustrated in a 1929 photograph of French Street (Fig. 2). Probably the power house was built along with the 1922 extension of the main High School building on Kirk Street.

None of these three buildings display major exterior changes, though some alterations to the oldest, the Trade High School, are apparent. Basement windows have been bricked up, first floor windows filled in to make smaller openings with glass blocks or ventilator screens. The recessed entrances also have been modified. On the west wall, a small one-story block has been added where the two school buildings meet. A 1973 article in the Lowell Sun announced that the physical education annex, in the basement of the girls' section of the Lowell Trade High School, would close as it was unable to comply with "minimum safety standards" (2).

The Trade High School, High School Annex, and High School power plant are handsome examples of functional institutional buildings. They form a link between the industrial buildings of Boott Mills, and the more richly decorated commercial structures of downtown Lowell. The schools also are representative of the city's efforts to teach skills useful to the students, and needed in the local economy.

ADDITIONAL HISTORICAL INFORMATION

The current Professional Park building and its parking lot cover an area that once emcompassed two no longer existant streets: the northern extension of Worthen Street and an unnamed street between Worthen and Dutton Streets. The number of structures occupying this site has varied from six to ten.

Ten buildings owned by the Merrimack Manufacturing Company appear on this site on the 1832 map. Pairs of rectangular structures faced Dutton Street and the eastern and western sides of Worthen Street. Behind the rectangular structure in the center of the block bounded by Worthen, Dutton and Moody Streets were four small square structures. In 1841 the number of structures on this site had been reduced to six. The four small square structures have disappeared and an unnamed street is shown between Worthen and Dutton Streets. By 1850 six T-shaped structures occupy this site. The Merrimack Manufacturing Company is listed as the owner of these structures in both 1841 and 1850. The same configuration of streets and six T-shaped (frame) structures appears on the 1879, 1896, 1906, and 1924 atlases. Apparently these frame structures were used as boarding houses for the employees of the Merrimack Manufacturing Company, who is listed as owner of the property in the 1879, 1896 and 1924 atlases. The 1906 atlas lists Hiram Whitney and Saimen Sirk as owners. In the early twentieth century, Sirk had developed the largest apartment complex in Lowell, at the corner of Bridge and French Streets (Sirk had converted an 1830's brick boarding house into apartments with new additions).

Urban renewal of the early 1970s completely changed the scale of this area. The frame houses disappeared, as well as part of Worthen Street and an unnamed thoroughfare, and were replaced by the present, single structure on a wide parking lot.

ARCHEOLOGICAL COMMENT

Domestic structures related to Lowell's first major industrial complex occupied this site continuously from the 1830s through the 1960s. The degree of subsurface disturbance occasioned by the removal of these structures and construction of the present building and parking lot is not known, but at least the parking lot portion of this property may cover archeological remains of potential significance.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/09/2015 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA)

of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/09/2015 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
CVS PHARMACY 1000	35 MERRIMACK ST	SE 0 - 1/8 (0.069 mi.)	H36	102

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/09/2015 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/09/2015 has revealed that there are 3 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Protection's Summary Listing of all the Tanks Registered in the State of Massachusetts.

A review of the UST list, as provided by EDR, and dated 05/18/2016 has revealed that there are 6 UST

sites within approximately 0.25 miles of the target property.

State and tribal Brownfields sites

BROWNFIELDS: Under Massachusetts law, M.G.L. c. 21E is the statute that governs the cleanup of releases of oil and/or hazardous material to the environment. The Brownfields Act of 1998 amended M.G.L. c. 21E by establishing significant liability relief and financial incentives to spur the redevelopment of brownfields, while ensuring that the Commonwealth's environmental standards are met. Most brownfields are redeveloped with the benefit of liability protections that operate automatically under M.G.L. c. 21E.

A review of the BROWNFIELDS list, as provided by EDR, has revealed that there are 3 BROWNFIELDS sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 03/21/2016 has revealed that there

are 25 US BROWNFIELDS sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/09/2015 has revealed that there are 17 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 3 EDR MGP sites within approximately 1 mile of the target property.

LOWELL GAS LIGHT CO	PERRIN STREET	WSW 1/2 - 1 (0.788 mi.)	221	807

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

KONARKA TECHNOLOGIES (Continued) **1014916973**

AIR EMISSIONS CLASSIFICATION UNKNOWN

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Owner/Op end date: 06/30/1991

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: F001
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans

HESS GAS STATION (Continued) **1000263689**

to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR EMISSIONS CLASSIFICATION UNKNOWN

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Response Action Outcome: A permanent solution has been achieved. Contamination has been reduced to background or a threat of release has been eliminated.

Action Type: Release Disposition
Action Status: Reportable Release under MGL 21E
Action Date: 3/14/2005
Response Action Outcome: A permanent solution has been achieved. Contamination has been reduced to background or a threat of release has been eliminated.

Action Type: Immediate Response Action
Action Status: Oral Approval of Plan or Action
Action Date: 3/14/2005
Response Action Outcome: A permanent solution has been achieved. Contamination has been reduced to background or a threat of release has been eliminated.

Action Type: RLFA
Action Status: FLDRUN
Action Date: 3/15/2005
Response Action Outcome: A permanent solution has been achieved. Contamination has been reduced to background or a threat of release has been eliminated.

Action Type: A Notice sent to a Potentially Responsible Party (PRP)
Action Status: A MassDEP piece of correspondence was issued (approvals, NORs, etc.
Action Date: 3/23/2005
Response Action Outcome: A permanent solution has been achieved. Contamination has been reduced to background or a threat of release has been eliminated.

Action Type: RLFA
Action Status: FOLOFF
Action Date: 3/25/2005
Response Action Outcome: A permanent solution has been achieved. Contamination has been reduced to background or a threat of release has been eliminated.

Action Type: Immediate Response Action
Action Status: Completion Statement Received
Action Date: 5/16/2005
Response Action Outcome: A permanent solution has been achieved. Contamination has been reduced to background or a threat of release has been eliminated.

Action Type: RNF
Action Status: Reportable Release under MGL 21E
Action Date: 5/25/2005
Response Action Outcome: A permanent solution has been achieved. Contamination has been reduced to background or a threat of release has been eliminated.

Action Type: Release Disposition
Action Status: Reportable Release under MGL 21E
Action Date: 5/27/2005
Response Action Outcome: A permanent solution has been achieved. Contamination has been reduced to background or a threat of release has been eliminated.

Action Type: RLFA
Action Status: FOLOFF
Action Date: 5/27/2005
Response Action Outcome: A permanent solution has been achieved. Contamination has been reduced to background or a threat of release has been eliminated.

HAFFNER'S SERVICE STATIONS, INC (Continued) **S106863365**

Action Type:	Response Action Outcome - RAO
Action Status:	RAO Statement Received
Action Date:	9/21/2005
Response Action Outcome:	A permanent solution has been achieved. Contamination has been reduced to background or a threat of release has been eliminated.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

BROWNFIELDS:
SR Num: 9
Year: 2009
Applicants: Developers Trinity Appleton Limited Partnership and Trinity Appleton Four Limited Partnership
Project: Trinity Appleton Limited Partnership is redeveloping the former Appleton Mills complex at 307 Jackson Street in the historic Hamilton Canal District of Lowell into 130 units of affordable rental housing to be marketed as artist live/work space. The project will feature many environmentally-friendly components, including a green roof, efficient systems and Energy Star appliances. It will also include a historic rehabilitation of existing mill buildings, and improvements to area infrastructure, including sidewalks and new and rehabilitated bridges over canals that will connect the building to the downtown neighborhood.

Recipient name:	Lowell, City of
Grant type:	Cleanup
Property name:	351 JACKSON STREET
Property #:	1
Parcel size:	2.02
Property Description:	Property was site of former railroad round house. Now, unimporved dirt/partially paved lot to be redeveloped into Lowell Trial Court complex
Latitude:	42.64147
Longitude:	-71.31387
HCM label:	Address Matching-House Number
Map scale:	1:24000
Point of reference:	Entrance Point of a Facility or Station
Datum:	World Geodetic System of 1984
ACRES property ID:	79941
Start date:	10/01/2007 00:00:00
Completed date:	01/23/2012 00:00:00
Acres cleaned up:	2.02
Cleanup funding:	200000
Cleanup funding source:	US EPA - Brownfields Cleanup Cooperative Agreement

been implemented.

Action Type: Activity and Use Limitation
Action Status: Transmittal, Notice, or Notification Received
Action Date: 7/21/2009
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background and an Activity and use Limitation (AUL) has been implemented.

Action Type: Release Abatement Measure
Action Status: Completion Statement Received
Action Date: 7/26/2005
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background and an Activity and use Limitation (AUL) has been implemented.

Action Type: RNF
Action Status: Reportable Release under MGL 21E
Action Date: 9/10/2004
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background and an Activity and use Limitation (AUL) has been implemented.

Action Type: Release Disposition
Action Status: Reportable Release under MGL 21E
Action Date: 9/10/2004
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background and an Activity and use Limitation (AUL) has been implemented.

Action Type: Release Abatement Measure
Action Status: Written Plan Received
Action Date: 9/10/2004
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background and an Activity and use Limitation (AUL) has been implemented.

Action Type: Phase 4
Action Status: Notice of Delay in Meeting RA Deadline Received
Action Date: 9/19/2008
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background and an Activity and use Limitation (AUL) has been implemented.

Action Type: Tier Classification
Action Status: Tier 2 Classification
Action Date: 9/20/2005
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background and an Activity and use Limitation (AUL) has been implemented.

Action Type: Phase 1
Action Status: Completion Statement Received
Action Date: 9/20/2005
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background and an Activity and use Limitation (AUL) has been implemented.

LOWELL REGIONAL TRANSIT AUTHORITY (Continued) **S106617566**

BROWNFIELDS:
SR Num: 39
Year: 2000
Applicants: Not reported
Project: A Brownfields Covenant helped the Lowell Regional Transit Authority (LRTA) redevelop an abandoned industrial site on Hale Street in Lowell into a bus maintenance and operations center. This project was part of the LRTA's larger plan to upgrade the Gallagher Intermodal Transportation Center, which is the third largest transportation hub after Boston's North and South Stations, an effort expected to bring approximately 120 new jobs to Lowell that would generate more than $3.8 million a year in new payroll dollars. Moreover, by using the site to maintain and service its bus fleet, LRTA has been able to move its fixed route bus service out of the Paige Street area of downtown Lowell to the Gallagher Terminal area. This relocation provides the added benefits of fuel savings, reduced traffic congestion, improved air quality, and increased on-time performance for the transportation system.

BROWNFIELDS 2:

Chemicals:
Chemical: NON PCB MINERAL OIL DIELECTRIC FLUID
Quantity: 60 gallons
Chemical: MODF
Quantity: 40 gallons

Actions:
Action Type: Immediate Response Action
Action Status: Oral Approval of Plan or Action
Action Date: 3/18/2008
Response Action Outcome: A permanent solution has been achieved. Contamination has been reduced to background or a threat of release has been eliminated.

POLE MOUNTED TRANSFORMER (Continued) **S109146536**

Action Type: Release Disposition
Action Status: Reportable Release under MGL 21E
Action Date: 3/18/2008
Response Action Outcome: A permanent solution has been achieved. Contamination has been reduced to background or a threat of release has been eliminated.

Action Type: A Notice sent to a Potentially Responsible Party (PRP)
Action Status: A MassDEP piece of correspondence was issued (approvals, NORs, etc.
Action Date: 5/15/2008
Response Action Outcome: A permanent solution has been achieved. Contamination has been reduced to background or a threat of release has been eliminated.

Action Type: RNFE
Action Status: Transmittal, Notice, or Notification Received
Action Date: 5/19/2008
Response Action Outcome: A permanent solution has been achieved. Contamination has been reduced to background or a threat of release has been eliminated.

Action Type: RNF
Action Status: Reportable Release under MGL 21E
Action Date: 5/19/2008
Response Action Outcome: A permanent solution has been achieved. Contamination has been reduced to background or a threat of release has been eliminated.

Action Type: Response Action Outcome - RAO
Action Status: RAO Statement Received
Action Date: 5/19/2008
Response Action Outcome: A permanent solution has been achieved. Contamination has been reduced to background or a threat of release has been eliminated.

. Waste name: BAG HOUSE DUSTS AND FILTER/SEPARATION SOLIDS FROM THE PRODUCTION OF CARBAMATES AND CARBAMOYL OXIMES.

. Waste code: K159
. Waste name: ORGANICS FROM THE TREATMENT OF THIOCARBAMATE WASTES.

. Waste code: K161
. Waste name: PURIFICATION SOLIDS (INCLUDING FILTRATION, EVAPORATION, AND CENTRIFUGATION SOLIDS), BAG HOUSE DUST AND FLOOR SWEEPINGS FROM THE PRODUCTION OF DITHIOCARBAMATE ACIDS AND THEIR SALTS. (THIS LISTING DOES NOT INCLUDE K125 OR K126).

. Waste code: K169
. Waste name: CRUDE OIL STORAGE TANK SEDIMENT FROM PETROLEUM REFINING OPERATIONS

. Waste code: K170
. Waste name: CLARIFIED SLURRY OIL TANK SEDIMENT AND/OR IN-LINE FILTER/SEPARATION SOLIDS FROM PETROLEUM REFINING OPERATIONS

. Waste code: K171
. Waste name: SPENT HYDROTREATING CATALYST FROM PETROLEUM REFINING OPERATIONS,INCLUDING GUARD BEDS USED TO DESULFURIZE FEEDS TO OTHER CATALYTIC REACTORS (THIS LISTING DOES NOT INCLUDE INERT SUPPORT MEDIA)

. Waste code: K172
. Waste name: SPENT HYDROREFINING CATALYST FROM PETROLEUM REFINING OPERATIONS, INCLUDING GUARD BEDS USED TO DESULFURIZE FEEDS TO OTHER CATALYTIC REACTORS (THIS LISTING DOES NOT INCLUDE INERT SUPPORT MEDIA)

. Waste code: K174
. Waste name: WASTEWATER TREATMENT SLUDGES FROM THE PRODUCTION OF ETHLYENE DICHLORIDE OR VINYL CHLORIDE

. Waste code: K175
. Waste name: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF VINYL CHLORIDE MONOMER..

. Waste code: K176
. Waste name: BAGHOUSE FILTERS FROM THE PRODUCTION OF ANTIMONY OXIDE, INCLUDING FILTERS FROM THE PRODUCTION OF INTERMEDIATES (E.G.,ANTIMONY METAL OR CRUDE ANTIMONY OXIDE)

. Waste code: K177
. Waste name: SLAG FROM THE PRODUCTION OF ANTIMONY OXIDE THAT IS SPECULATIVELY ACCUMULATED OR DISPOSED,INCLUDING SLAG FROM THE PRODUCTION OF INTERMEDIATES (E.G.,ANTIMONY METAL OR CRUDE ANTIMONY OXIDE)

. Waste code: K178
. Waste name: RESIDUES FROM MANUFACTURING AND MANUFACTURING-SITE STORAGE OF FERRIC CHLORIDE FROM ACIDS FORMED DURING THE PRODUCTION OF TITANIUM DIOXIDE USING THE CHLORIDE-ILMENITE PROCESS.

. Waste code: K181
. Waste name: Nonwastewaters from the production of dyes and/or pigments.

. Waste code: LABP
. Waste name: LAB PACK

. Waste code: K147
. Waste name: TAR STORAGE RESIDUES FROM COAL TAR REFINING.

. Waste code: K148
. Waste name: RESIDUES FROM COAL TAR DISTILLATION, INCLUDING, BUT NOT LIMITED TO, STILL BOTTOMS.

. Waste code: K149
. Waste name: DISTILLATION BOTTOMS FROM THE PRODUCTION OF ALPHA (OR METHYL-) CHLORINATED TOLUNES, RING-CHLORINATED TOLUNES, BENZOYL CHLORIDES, AND COMPOUNDS WITH MIXTURES OF THESE FUNCTIONAL GROUPS. [THIS WASTE DOES NOT INCLUDE STILL BOTTOMS FROM THE DISTILLATION OF BENZOYL CHLORIDE]

. Waste code: K150
. Waste name: ORGANIC RESIDULES EXCLUDING SPENT CARBON ADSORBENT, FROM THE SPENT CHLORINE GAS AND HYDROCHLORIC ACID RECOVERY PROCESSES ASSOCIATED WITH THE PRODUCTION OF ALPHA (OR METHYL-) CHLORINATED TOLUNES, BENZOYL CHLORIDES, AND COMPOUNDS WITH MIXTURES OF THESE FUNCTIONAL GROUPS.

. Waste code: K151
. Waste name: WASTEWATER TREATMENT SLUDGES, EXCLUDING NEUTRALIZATION AND BIOLOGICAL SLUDGES, GENERATED DURING THE TREATMENT OF WASTEWATERS FROM THE PRODUCTION OF ALPHA (OR METHYL-) CHLORINATED TOLUNES, BENZOYL CHLORIDES, AND COMPOUNDS WITH MIXTURES OF THESE FUNCTIONAL GROUPS.

. Waste code: K156
. Waste name: ORGANIC WASTE (INCLUDING HEAVY ENDS, STILL BOTTOMS, LIGHT ENDS, SPENT SOLVENTS, FILTRATES, AND DECANTATES) FROM THE PRODUCTION OF CARBAMATES AND CARBAMOYL OXIMES.

. Waste code: K157
. Waste name: WASTEWATERS (INCLUDING SCRUBBER WATERS, CONDENSER WATERS, WASHWATERS, AND SEPARATION WATERS) FROM THE PRODUCTION OF CARBAMATES AND CARBAMOYL OXIMES.

. Waste code: K158
. Waste name: BAG HOUSE DUSTS AND FILTER/SEPARATION SOLIDS FROM THE PRODUCTION OF CARBAMATES AND CARBAMOYL OXIMES.

. Waste code: K159
. Waste name: ORGANICS FROM THE TREATMENT OF THIOCARBAMATE WASTES.

. Waste code: K161
. Waste name: PURIFICATION SOLIDS (INCLUDING FILTRATION, EVAPORATION, AND CENTRIFUGATION SOLIDS), BAG HOUSE DUST AND FLOOR SWEEPINGS FROM THE PRODUCTION OF DITHIOCARBAMATE ACIDS AND THEIR SALTS. (THIS LISTING DOES NOT INCLUDE K125 OR K126).
